AMERICAN CARNATION SOCIETY.

Seventeenth Annual Meeting, Washington, D. C., January 28-29, 1908.

The seventh annual meeting and exhibition of the American Carnation Society opened at the National Rifles hall, Washington, D. C., January 28. There was an excellent attendance and the exhibits of carnations from all over the country were never better. In the opening address, Peter Bissett, vice-president

President-Elect M. A. Patten.

of the society, said: "I take this opportunity to welcome you to our city. A year ago when in Toronto we asked that you hold your next meeting in the city of Washington. We promised at that time we would do all in our power to make the visit both pleasant and profitable to you. We are very glad that you have accepted our invitation. We rejoice at your coming, and also congratulate you upon the work of the city. The exhibition downstairs is a credit to this organization and shows what it is doing. I am no speaker, but we have here a gentleman who can talk, a gentleman who stands for and has had much to do with the advancement of the city of Washington—a gentleman always ready to do whatever he can for the advancement of our city and the interest of mankind in general. He will address you in words befitting the occasion. It therefore gives me much pleasure to introduce to you Mr. McFarland, commissioner of the District of Columbia.

Commissioner McFarland said: "We of the government of the District of Columbia are most happy to offer the American Carnation Society a happy welcome. We are very glad to welcome to Washington, the national capital of the United States, a society whose membership includes Canadians as well as natives of the United States, under the name of Americans, for we believe that all Canadians and men of the United States are brothers, and we hope and trust that the friends from over the border will feel just as much at home as the representatives from our country. Personally, I am especially glad to welcome the men of Canada.

"We here are welcoming you on the eve of the birthday of President William H. McKinley, whose memory is to be kept alive in the years to come by the carnation, as well as by the written words. It is most interesting and most fortunate that you represent the only flower which is associated with any American statesman. The primrose of England keeps fresh the memory of that most eminent statesman, Lord Beaconsfield, who loved that flower, and to-morrow all over Washington you will see the carnation, representing the affection and the admiration of his people for that good, great and gentle president, who was held in such honor all over the country and all over the world. We who knew him personally remember that he always had a carnation. We remember that in Buffalo, when we saw him just before the end, he had the carnation then. It is a great mystery that a man of his nature should have been sacrificed as a martyr to liberty and to righteous law; but his fame is secure and his place as secure, and

every one of us, when we look at the carnation, must be grateful for the great service which he rendered to this republic and to the world; and I think it is most fortunate that your society is linked with his name, and that you meet here on the eve of his birthday. I welcome you all to the American capital and trust that your visit may be often repeated and that you may thoroughly enjoy every hour you are here."

F. R. Pierson of Tarrytown, N. Y., responded in an eloquent speech.

President Lemon then read his annual address, which was pointed, condensed and well covered the status and outlook for the Society.

The judges appointed were Peter Fisher, Ellis, Mass., M. A. Patten, Tewkesbury, Mass., and S. J. Reuter, Westerly, R. I.

NEXT YEAR'S CONVENTION.

The venue of the society's meeting and convention for 1909 was freely discussed and Indianapolis, Ind., was decided upon.

Albert M. Herr, Secretary.

ELECTION OF OFFICERS.

The following are the officers elected for the ensuing year:

Marcellus A. Patten, Tewksbury, Mass., president; A. F. J. Baur, Indianapolis, Ind., vice-president; Albert M. Herr, Lancaster, Pa., secretary; Fred Dorner, Jr., Lafayette, Ind., treasurer.

President Lemon's Address.

It has been the custom for a number of years for the president to share in extending a welcome to the members of the American Carnation Society. Today the seventeenth president has the privilege and honor of sharing in the expression of thanks and appreciation for the hospitable reception and cordial welcome extended by the convention city.

It must be remembered at this time that the real work of preparation for this convention has been done by our most worthy vice-president, Peter Bissett, and his able assistants in Washington. Allow me to express at this time my personal appreciation of the unfailing courtesy, and the untiring zeal and activity of the vice-president which, together with the efficient services of the secretary made possible this most successful exhibition and convention.

Reference has frequently been made during the last few years to the subject of the society's certificate; it is a pleasure to refer to the eminently sensible and correct settlement of the controversy at the convention in Toronto last year. The remarks on the subject by our honored member, W. N. Rudd, contain the best exposition of the aims and province of the American Carnation Society to be found in all the society's literature. It is indeed true, as stated in those remarks, that "the certificate is nothing except an opinion of the quality of the flower shown at the exhibition. The commercial value of carnations must be shown in other ways; and it is beyond the ability of this society, beyond its province, to attempt to say whether or not a certain carnation shall prove a profitable investment to the buyer." I wish at this time to most emphatically endorse this position in relation to new varieties and to urge the society to encourage in every way possible the production of new kinds and especially the exhibiting of new things at our annual shows.

There has been a decided inclination, during the past few years, to belittle the value of the showing made by a carnation at the American Carnation Society's exhibition. Opinions of this kind have been expressed by many prominent members and have even crept into a number of addresses by our past presidents. I desire to especially emphasize my opinion that any variety which can win the American Carnation Society medal, or obtain first place in one of our open to all classes, must possess many points of exceptional merit. The fact of its winning is prima facie evidence, and is incontrovertible, for the judgment is the expressed belief of at least two and more often three of the leading experts of the country, that such variety has produced blooms superior to any others of its class. The trade at large, and particularly members of this society, should accept this at its full value, that is to say, should recognize such action as coming from the highest tribunal and as being the best opinion obtainable in the United States on the subject. The idea that the American Carnation Society does thereby guarantee such variety to be a profitable one to grow commercially is a false position and should be avoided in the future. The society as a body can possess only the prescience of its integral parts, its individual members, and what man among us can unfailingly predict a carnation's future even after studying the variety from all vantage points? The production of fine blooms is a prime requisite and with this alone should the society concern itself, leaving prophecies as to the probable future of a variety to individual judgment.

Any practical grower of carnations, should consider the grant of a certificate or medal by the American Carnation Society as the very highest recommendation possible and amply sufficient proof of merit to justify a thorough test and earnest effort to grow the variety as well as it has been grown by the raiser. However, there is one point in this connection which does come within the province of this society, and that is, the proper recognition of merit which has been abundantly proven. Seven years ago, at Indianapolis, when the fatal illness of the president, Wm. J. Bertermann, placed me in the position of acting chairman, I suggested that the society ought to take some action commending the raiser of any carnation which has proved itself the premier variety of its class for a number of successive years. No attention was given the suggestion at that time, but my opinion has not changed on the subject. I believe that when any variety wins first prize in any class A open to all sections, for three successive years, the raiser of such variety should be granted the society's gold medal fittingly engraved as an award of sterling merit. It is at least a subject worthy of discussion. There ought also to be a sweepstakes prize covering Class A, open to all sections.

To refer again to the certificate classes, I believe that the entrance fee, in both preliminary and final certificate classes, should be omitted except when such certificate is granted, and that the only restriction placed on exhibiting in these classes should be membership in the society. This should be done for the purpose of increasing the number of exhibits in these classes. The judges may be depended on to properly sift such candidates.

Fred. Dorner, Jr., Treasurer.

Reference has been made annually, since the inception of this society, to the proposed exhibition of carnations in pots. Ex-president Rackham spoke of the matter in his address at Detroit. John Birnie made a strong plea for such varieties in his able paper at Toronto last year. Now to accomplish anything in this line will require a radical step by the society and it may as well be taken at once. Offer a good substantial prize for the best collection of plants in bloom in pots. To do this, reduce the breadth and scope of Class B, which, as it now stands, tends toward monotony in the exhibition.

Also, if it were possible to so divide the money devoted to premiums to admit of it, a certain amount ought to be devoted each year to exhibits show-

CARNATION AFTERGLOW AT R. WITTERSTAETTER'S, CINCINNATI, O.
Winner of First Prize, 100 Blooms, in Lawson Pink Class, at Washington.

ing the adaptability of the carnation to reception and wedding decorations. Competitive contests among local retail men are not practicable, but some prominent retail man might be selected to prepare some such exhibit each year, as this would interest the public greatly and add to the beauty of the exhibition.

The very valuable papers from foreign carnation growers last year, together with the reports appearing in our trade papers from time to time, indicate the rapid strides being taken by our co-workers in England in the development of the everblooming carnation. Such reports should stimulate the activity in America for we should retain our supremacy in this line.

Taking into consideration the formidable opposition in the securing of new varieties of carnations which the English breeders have now presented, would it not be a good thing to make some arrangement whereby new English sorts could be sent here for test as to their adaptability to American conditions and markets? Probably some exchange of novelties could be made between growers in the United States and those in England for this purpose. A great deal of interest is now being taken in American varieties over in England, and the same thing is likely to happen with English varieties in the United States; hence it would be well for the American Carnation Society to take the first steps aiming towards co-operation.

In the matter of the registration of new varieties, the opinion has been expressed by interested members that the society ought to omit all superfluous verbiage as to whether the new variety is better than others of its kind, and give simply the name, the parentage, the date when the cross was made, and the color. A uniform registration blank should be adopted and this should avoid any appearance of indorsing the good qualities of a new kind.

At the Chicago convention in 1907, an action was passed authorizing the offering of American Carnation Society certificates at the fall exhibitions in our leading cities, and the appointment of judges for such exhibits. There was a committee appointed with power to act, but the plan never was carried out. This should be taken up and some definite action taken. The Society of American Florists invited the co-operation of our society in the National Flower Show to be held in Chicago in November of this year, and we should offer our certificate and medals at that great exhibition. It is with great pleasure that I look forward to the joint meetings with the American Breeder's Association. I hope and believe that much of benefit to the practical grower may result from the joint discussion on carnation breeding. If there is anything tangible as regards Mendel's law in relation to the breeding of carnations it should be brought out at this time.

The business sessions of the convention in Toronto were the best attended of any convention in a number of years. I am counting on the members to surpass that record in Washington. In closing I desire again to join with the visiting members of this society in appreciation of the efforts of the Washington florists which have made possible a successful convention. It is a high honor to be chosen president of the best, most business like, and most effective florist's organization in the United States, and I thank you most heartily for that honor.

Secretary Herr's Report.

Your secretary reports having issued the regular printed matter of the society during the past year. Our annual report was more complete than usual, thanks to our stenographer and the fact that, being from my own city, it could be worked out to better advantage than could possibly be done by correspondence. The premium list and dates for the meeting were discussed and adopted at the meeting of the board of directors held in Philadelphia last August, quite a few changes being made in the premium list and a three-day session agreed upon as an experiment, all of which was duly announced through the trade papers.

It has since developed that a portion of intending exhibitors are not able to get their flowers through in

time for staging by 1 P. M. Tuesday. I would suggest that a portion of our meeting be set aside for the purpose of adopting a premium list, a set of rules governing the exhibition and the best date for the opening of the show in 1909. With exhibitors, judges, and the board of directors all present, mistakes and friction could be avoided. The exhibitor being the first consideration in our shows should have first consideration in our premium list.

Carnation Wanoka.

In the opinion of your secretary the matter of advertising in our premium list should be dispensed with; the members do not patronize it to any extent, even after personal solicitation and it is hard to get outsiders to look upon it as a good business proposition. For the one issued this year a circular letter was sent all members of this society, followed by a personal letter to the possible advertisers (in some cases two and three); in addition to this, personal letters were sent to about 400 other advertisers with the results shown before you. The getting up of the premium list, aside from the solicitations, is almost as much work as getting out the annual report, and after deducting the extra cost of printing there is such a small margin of profit, that it is hardly just to your secretary to pile all of this work upon him.

A pet scheme of my own was tried this year and an invitation sent to every florist within a radius of 100 miles from the meeting place to join the society. The responses were two new members and several inquiries, a result that teaches its own lesson. In addition to all of the foregoing, there has been about 700 pieces of mail, mostly personal letters in response to inquiries, and the regular correspondence between this office, your president and the board of directors.

Your secretary requests that, unless you have selected a successor for the coming year, that he be continued in office for one year longer, in order to use up stationery and other matter that would have to be changed and lost if a new one were elected, and that he then be released. The work of this society is increasing in a ratio of about three to one as compared to membership; it is a work that ought to be done and for which the society is not in a position to pay a competent salary, so that, in making your selection, it will be the part of wisdom to select a secretary who has leisure time to devote to this work and one who employs clerical help, to whom can be given the routine part of the work. Your present incumbent having served this society for 13 years feels that with another year's service to break the hoodoo, he has borne his share of the work and that some one more competent and better able to give the time and labor required should take it up and carry it on to completion.

Notes on Varieties Shown.

BY W. N. RUDD.

Afterglow—Well to the lead in many classes. A fine thing.

Alma Ward—Peerless on the exhibition table.

Andrew Carnegie—Not shown at its best.

Apple Blossom—A fine flower, but not quite distinct enough.

Aristocrat — Fine under artificial light.

Bay State—Not shown at its best.

Beacon—Very much in it in the red classes; lacks in color.

Cardinal—Shown in fine shape.

Climax—Not shown at its best.

Creole Beauty—Perhaps the brightest crimson shown.

Defiance—Not shown at its best.

Enchantress—Still best of its class.

Harvard—A little dark.

Imperial—Not a pleasing color.

John E. Haines—No place for it.

Lady Bountiful—A few still shown.

Lawson—Alas, poor Yorick!

Lawson—Enchantress—Very pretty.

Lieutenant Peary—Scores high.

Melody—Will not trot with Enchantress.

Mrs. C. W. Ward—Lights up well under electric light.

Mrs. Charles Knopf—Large flower, a little weak in color and stem.

Mrs. M. A. Patten—Nothing better shown in its class.

Mrs. Robt. Hartshorne—Not shown at its best.

Mrs. Tom Harvey—Fine dark pink.

Pink Imperial—Looks well under artificial light.

President Seelye—Will score well up to head of standard whites.

Red Chief—Not quite large enough for the show table.

Carnation Climax.

Robert Craig—A few still shown.

Rose Pink Enchantress—Fine, but too many varieties too near alike.

Ruby—Crimson, promising.

Sarah Hill—Fine white bloom.

Snowflake—Very good white.

Splendor—Fine flower in the Winsor class.

Toreador—Very decorative, unusually long stem and fine color, under-sized.

Variegated Lawson—Shown in good shape.

Victory—Disputes with Beacon first place in commercial reds.

Viola Sinclair—A pretty rose pink, medium in size.

Wanoka—Fine crimson, a little dark in color.

Welcome—Not quite in it with Winsor.

White Enchantress—A leading white.

White Lawson—Still shown.

White Perfection—This and White Enchantress are leaders in the commercial class.

Winsome—On the Wm. Scott order.

Winsor—Not excelled in color.

No. 32—John Reimels; promising scarlet.

No. 100—A fine flower much like Rose Pink Enchantress, Jos. Heacock.

46205—A fine white M. A. Patten.

Carnation Apple Blossom.

Treasurer Dorner's Report.

The following is Treasurer Dorner's report:

RECEIPTS.

Balance January 21, 1907		$ 390.11
Cash from Sec'y	$897.05	
Cash from interest	$2.97	980.02
		$1,370.13

EXPENDITURES.

Paid orders on treasurer	$1,032.08
January 24, 1908, cash on hand	338.05
	$1,370.13

PERMANENT FUND.

Amount reported January 21, 1907	$2,025.31
Life memberships	350.00
	$2,375.31

Carnation Afterglow.

The illustration shows a house of Afterglow that was planted August 8, and photographed seven weeks later. These plants were propagated the first week in April, potted in 2¼-inch pots May 10, and planted in the field June 2. The blooms could be cut with stems 10 to 14 inches long at the time the photograph was taken.

HOUSE OF DEFIANCE CARNATIONS AT JENSEN & DEKEMA'S, CHICAGO.

Report of the Judges.

CLASS A—ONE HUNDRED BLOOMS.

White.—Cottage Gardens Co., Queens, N. Y., first, with Alma Ward; F. R. Pierson Co., Tarrytown on Hudson, N. Y., second, with white Enchantress.

Enchantress Pink.—Chicago Carnation Co., Joliet, Ill., first, with Enchantress.

Lawson Pink.—E. G. Hill Co., Richmond, Ind., first, with Afterglow; Cottage Gardens Co., second, with Mrs. Tom Harvey.

THE SOCIETY'S MEDALS.

Gold medal for the best vase of 100 blooms, any variety, any color.—Cottage Gardens Co., with Alma Ward.

Silver medal for the second best vase of 100 blooms, any variety, any color.—R. Witterstaetter, with Afterglow.

Special Points on Hybridizing.

BY R. WITTERSTAETTER.

Some sixteen years ago, when I first undertook the work of hybridizing the carnation, I had very little knowledge of nature's law, regarding the results to be expected from crossing the standard commercial varieties of that date, and concluded that experiments with a complete record of the parentage, and the results, was necessary. As regards color, size, stem, form, habit, freedom, etc., I found, while we had some very good seedlings that pointed up well in everything except color,—and color being a very important factor in a commercial carnation—that we got quite a few variegated purples and off colors, and very few identical with the parent color. I, therefore, concluded that it must be nature's law in plant life, the same as in the human race, that blood would tell, and future breeding has been carried on with that point in view; namely, scarlets in a race by themselves, whites in theirs, and so on, always selecting for future work that which came nearest to an ideal as to color and commercial value.

Some have held that by following this method you lose constitution. We have proven this, to our own satisfaction, to be untrue, if a selection of vigorous parents is made for the work. This opinion may have arisen from the fact that a very brilliant scarlet has no vigor to back it up; our most vigorous scarlets are only a fair or dull red, and if a good constitution and a brilliant color are combined, the result is apt to be a slow and shy bloomer, not up to the commercial requirements. As most of my endeavors have been devoted to the scarlet race, amounting to about one-third of the number of the seedlings raised, I have taken the pessimistic view, that it would be an impossibility to produce a brilliant scarlet of free blooming quality, backed up by a vigorous constitution. Of late years, however, I have observed that this will not be an impossibility.

In breeding for form we always selected those that have reproduced themselves in that point for two or three generations, from one or the other of its parents, preferably the seed parent, and using the same as a seed parent. In pink we do not hold so closely to the color line; but are very particular that, whatever color is used, it be of good, clear, strong and lively tone and not subject to fading into dull colors, or easily affected by the sun.

In breeding for size I do not hesitate to use a small flowered variety as a seed parent, provided its progenitors of the first and second generations past were large flowered varieties; as a pollen parent, likewise, if it has all the other attributes of a good commercial variety.

In breeding for stem and calyx, I like to select a variety that has inherited these good points from one or two generations past, with the bloom bordering on the semi-double, or not too many petals to insure a good setting of seeds; also guarding against parents with flowers containing too many petals, as the result will be too many extremely double flowers, with no calyx to speak of.

Constitution, next to color, is the most important factor of a commercial carnation, from a grower's point of view, and should be given the utmost consideration. The parents should be selected and bred to such varieties as are noted for their healthy and vigorous constitution. I believe, in order to gain the best results, this crossing should be done during the months of March and April, when plants are making their most vigorous and rapid growth, insuring well-developed and ripened seed.

I sometimes question whether the condition and class of food, with which we supply the mother plant when crossing, and up to the time of ripening the seeds, is not responsible to some extent, for our failures or successes, as the case may be. Regarding other points on hybridization, I might suggest a strong, well rooted love for the work; untiring patience, and perseverance, with a studious observation of the results and a fair sized bank account at your disposal, until your aim has been attained.

THE CARNATION.

Notes in Season.

At this season particular care should be taken to keep the temperature at the required degree and to admit as much fresh air as the weather conditions will allow. If the houses are kept close and a high temperature prevails for very long, red spider will appear in such force that drastic measures will have to be resorted to to eradicate it. On the other hand, a low temperature will cause a check in the root action, bringing with it poor plants and burst calyces. The present rapid growth and development of the plants renders disbudding a matter of urgent necessity, requiring constant attention. It is useless to expect fine results if the side buds are allowed to get large before removal. About every week or so go over the plants and place the growths inside the rings or supports to give them a chance to straighten up and allow for a free circulation of air. Keep all decayed or diseased leaves picked off and remove every weed that makes its appearance in the beds.

Occasionally the soil will get washed from the edges of the beds to the center, and should be drawn back to the sides again, leveling the surface to allow of proper watering. Should any parts of the beds have become bare, so that the roots are exposed on the surface, a light surface dressing of fresh soil and well rotted cow manure in proportions of one-half manure to one-half soil should be put on thinly,—just enough to cover up the bare places, but guarding against a heavy mulch. One night a week should be set apart for fumigating, which will be ample to keep the plants free from insects unless these have got the upper hand. In this case it will be necessary to repeat the fumigating for two or three nights in succession. Very little neglect along this line quickly cripples the new growths and ruins the buds; the mischief is easily seen by the growths coming twisted and failing to properly open and the tips turning yellow. This is the season of burst calyces, but we can guard against this trouble to a very great extent by keeping the plants a little dry at the roots and not being carried away with the idea that the carnation needs manure and feed without discretion as to ability to assimilate it. To injudiciously strip the plants for cuttings is another cause of the calyces splitting.

The propagating house or bench needs careful watching and its requirements attended to. After the cuttings have had their first watering a light misting or spraying twice a day will be all that is necessary for the first week or 10 days, if the conditions of the propagating beds are as they ought to be, and the right kind of clean, sharp sand is used. They will root much more readily when the sand is kept just moist than when it is allowed to become saturated and there is not nearly as much danger of the cuttings becoming diseased. The walks around the propagating beds should be damped down two or three times a day to maintain a moist atmosphere, and if the sand in parts of the beds upon examination is found to be of a lower temperature than necessary a few bags or strips of cloth tacked on to the sides of the benches will help keep the heat underneath the beds and go a long way towards remedying this defect. Watch the temperature of the house so that ventilation is given on every favorable occasion, but at all times avoid cold and excessive draughts, an even temperature being a great aid to successful rooting. While the cuttings are in the sand making roots, the soil, if not already on hand, should be got into condition preparatory for potting them. If it is stored where frost reaches, it should be brought inside and spread out where it can get thoroughly warmed through. Young carnations require a good, live, fresh soil, but while in their small stage should be given little if any manure, it having a tendency to cause them to make a soft, rapid growth rather than a sturdy one. For home use the cuttings should be potted as soon as they have made sufficient roots, but for shipping they need to be held in the sand a little longer, as some of the roots are bound to get broken in transit. If for any reason the cuttings are not taken out when ready and are being held in the sand this should be kept on the dry side and the temperature of the house kept around 45° at night and as near that mark as possible during the day.

C. W. JOHNSON.

Carnation Lloyd.

Carnation Lloyd.

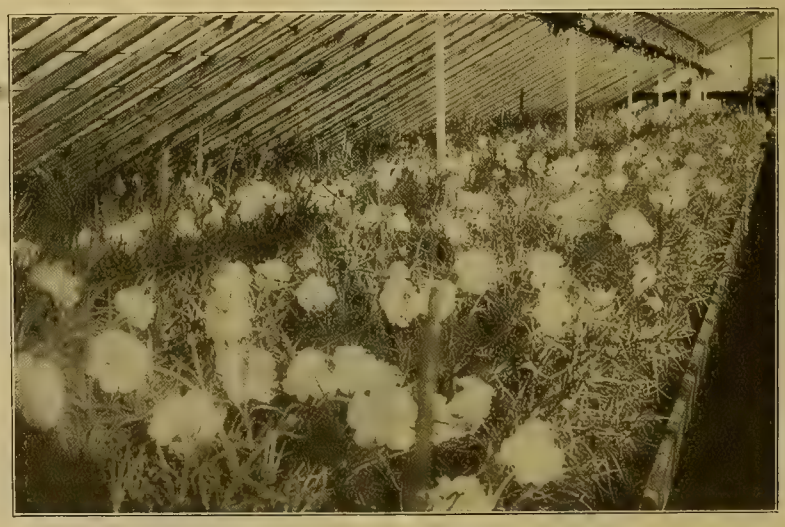
The accompanying illustrations show a house of the new carnation, Lloyd, grown by the originator, H. A. Jahn, New Bedford, Mass. The photographs were taken December 22, showing its freedom in winter, and the originator says of it. "It is a pedigree seedling with Enchantress as the last cross. The first cross is Silver Spray x Daybreak; the second year a selected seedling crossed with McGowen; the third year seedling recrossed with Queen; the fourth year seedling crossed with Lawson; the fifth year seedling crossed with Enchantress and the sixth year seedling selected Lloyd. In Lloyd I have succeeded in producing a carnation that is considered by competent growers all over the country to be the most valuable florist's variety ever produced.

"It is absolutely an ever blooming carnation, in fact the only one in existence at the present time which in truth can be called an ever bloomer. A temperature of 50°-52° with plenty of ventilation and a light house will give as fancy a flower in size and make up as any strictly fancy carnation to date. Its fragrance is wonderful, and the keeping qualities are of the very best. Flowers shipped and tested by several prominent dealers and growers have been pronounced unexcelled.

"In freedom of bloom Lloyd ranks as a strictly commercial variety, as it produces as many flowers as one of its parents, the old McGowen, used to. In quality it stands in the front rank with the fancies. The size and shape of the flower is the exact counterpart of Enchantress. The color is a good, clear peerless white in a good light house; in dark old houses it will show a slight trace of pink in midwinter. In order to succeed best with Lloyd it should have the same treatment as Enchantress."

Carnation Beacon.

W. W. Coles of Kokomo, Ind., says: We have a bench of 750 plants in one of our new King construction houses and it has been a mass of flowers for several months. We consider Beacon the best and most profitable red carnation to date.



CARNATION LLOYD AT H. A. JAHN'S NEW BEDFORD, MASS.

Grown under 10x12 glass; photographed December 22, 1907.

New Carnation Georgia.

This fine new variety, introduced by J. D. Cockcroft, Northport, N. Y., and well shown in the accompanying illustration, is a pure white, fringed variety, the result of a cross between Prosperity and Morning Glory. The variety comes in early in September and continues until well into the next summer, the flowers being from 3½ to 4 inches in diameter when at their best. It has a perfect calyx and the flowers are well built, produced on stout stems from 24 to 30 inches in length. The plant is a good, clean grower and the flowers keep well. It should have a successful career.

Growers' Expectations from Introducer.

BY S. S. SKIDELSKY.

It would be hard to find, in the history of floriculture, another instance of the rapid strides and development of a flower to equal that of the carnation. The "divine flower" has indeed sprung into favor as if by magic. Unlike the short lived chrysanthemum or the queen herself, the rose, the carnation is preeminently the flower of the masses. It is grown everywhere, it is sold everywhere, the curb merchant, no less than the society florist, handling it in immense quantities. More glass is going up, more carnations are being grown, and the demand is continually for still more. Nor is its popularity confined to our own borders. England, Germany and France depend upon our varieties; Norway and Sweden grow them with success—and even in darkest Russia, we are told, they can do Lawson, Enchantress and White Perfection well. Let us hope—and you will pardon my slight digression from the subject—that with the advent of Beacon there may come a light to brighten the hovels of the semi-civilized, wretched peasantry in the czar's domain.

When John Thorpe, but a comparatively short time ago, predicted that our puny carnation of yesterday would attain the respectable size, by actual measurement, of four inches in diameter, there were many among us today who were inclined at the time to treat such prophecy with a grain of salt. That prediction of Mr. Thorpe has come true nevertheless. We have practically reached the goal of our ambition. The 4-inch carnation is here and has evidently come to stay. Nor are we content to rest upon our laurels. We are aiming higher and still higher. What was good enough a season or two ago, does not satisfy us today. We must have something better. It will not do to stay the march of progress or to check the course of evolution. Aside from the size of the bloom itself we must also have stem, a long and a stiff one at that; we must have a carnation with a non-bursting calyx, of good color, good keeping qualities and we insist on varieties that will produce the flowers and yield us dollars and cents—"bread and butter" carnations, if I may borrow the stereotyped description now and then applied to seedlings, which do not pay for the bread, let alone the butter.

It is not my intention, however, to point out any particular varieties, nor do I wish to call to the bar of the growers' opinion any of the introducers of these so called bread and butter sorts. I am rather inclined to the belief that the average introducer of a new seedling is honest and honorable, that he means well, that his sole aim and object in introducing a carnation is to give satisfaction, that under all circumstances he aims to give the grower his money's worth. There have been some exceptions, of course, but this is another story having no bearing upon the subject under consideration. Granted, then, that no fraud or deception on the part of the introducer is ever intended, the question arises: Why are worthless varieties thrown upon the market? I shall attempt to answer this question, as I have studied it at close range, depending largely upon my personal impressions and observations, which, of course, are in no wise infallible. My observations upon numerous occasions lead me to the conclusion that there are some hibridizers, who are inclined to be too optimistic, often being carried away, so to speak, by the momentum of their own enthusiasm. The man thus inclined makes his cross, selecting for the purpose sturdy and meritorious parents. The result, he takes it for granted, must be highly satisfactory. I say he takes it for granted advisedly, because taking things for granted is a characteristic trait of the enthusiast. He watches the seed pod with all the care, hope and love which a young mother bestows upon her firstborn. To be sure, he reasons, something good must result. A chip of the old block is an asset not to be despised. In course of time the seedling or seedlings appear. Out of a dozen or more "uncertainties" the one looking the most promising is selected and duly labeled. No sooner does the bloom break through the calyx, than the plant is chopped down, literally hacked to pieces, in order to get all the cuttings, good, bad and indifferent, that it may yield through and beyond the season. The vitality of the "promising one" is thus impaired at the very outset of its ephemeral career. The season following it still looks promising, although the calyx is somewhat inclined to go asunder, nor is the stem strong enough to sustain the weight of the bloom or the bunch of petals. The season, of course, which happened to be either too dry or too wet, is accountable for that. Perhaps a little overfeeding did the mischief; maybe a degree or two below or above the temperature required to suit its delicate constitution. To be sure there are numerous reasons for its misbehavior, but no matter, where there is life there is hope. A second massacre is in order and the plants are propagated to the limit. Cuttings are taken regardless of their condition. It won't do to "put off" when the growers are so much in need of a good white, a good red or a good pink and, incidentally, when there is a fortune in sight. I will stop right here, however, to reiterate my assertion that the introducers of new carnations are absolutely honest, that no fraud is intended when a carnation is finally launched with all the pomp and all the songs in its praise which we are accustomed to see and to hear.

The question what the grower should expect from the introducer of a new carnation is rather a perplexing one and is not so easily answered as one might expect. Our ideas as to the fitness of things are so much at variance with local conditions and local requirements that it would be practically impossible to set up a standard with a view of insuring general satisfaction. In his notes on the Chicago flower show, John Thorpe has this to say about the carnations which were on exhibition there: "Of new carnations, in quantity very short, in quality never better. Raisers of seedlings are getting wise. It's not how many, but how few. Let this prevail, be-

NEW CARNATION GEORGIA.

Introduced by James D. Cockcroft, Northport, N. Y.

cause the few have the best chance." Tersely expressed, and true. That the few of superior quality have the best chance is not to be denied. Yet, on the other hand, we must also not ignore the fact that while there are comparatively few growers ever in quest of fancies or carnations of quality, whose products are sure to command the highest prices at all times, there are thousands of others who are ever on the look out for the "bread and butter" sorts, whose local markets, either wholesale or retail, do not warrant heavy investments in fancies, who, in brief, must have carnations, which, taking local conditions into consideration, will pay for the coal, the help, the interest on the greenhouse plant and leave a dollar to boot. It is the rank and file that is to be considered; the man who can no longer grow Lawson or Queen and is in want of something to take their places.

A standard, therefore, to suit alike the successful growers in the vicinity of New York or Chicago and the man in the Dakotas, is not to be thought of. But what, after all, is the grower to expect from the introducer of new seedling carnations? Coming to the point by the shortest possible route there ought to be a sort of happy middle ground, upon which both the grower and the hybridizer could meet for the purpose of advancing their mutual interests, for the purpose of adjusting differences, of overcoming prejudices and of facing conditions, if the one realizes the need of the other; in other words, if the introducer of seedling carnations will exercise the most scrupulous care on behalf of the goose that lays the golden egg and the grower in his turn will bear in mind that his very success or the golden egg, has been made possible by the men who have made hybridization their life-study; who are sacrificing their time and their means in order to improve upon past achievements and thereby advance the interests of the carnation growers—if both, I say, could meet upon such ground, there surely would be no cause for disappointment or dissatisfaction. But how is this to be accomplished? Leaving the hybridizer's cause in the hands of Mr. Rudd, who, I am sure, will do ample justice to it, I will take up the grower's end of the question and will briefly outline his expectations from the introducers of new seedlings:

First—The grower expects his money's worth. By this I mean that when he orders a batch of high priced cuttings, he expects and is fully entitled to high grade stock; cuttings that have been carefully selected and well rooted; rooted not by dint of the steam pipe at so many thousands per week, but by the natural process of keeping the feet comfortably warm and the heads cool, to insure vigor and health.

Second—He expects from the variety just what it is represented to be. In other words, when a variety is a cropper, it should not be represented as a continuous bloomer, that when its calyx splits at certain seasons or under certain conditions, that fact should be brought to the surface regardless of losses or gains.

Third—He expects the benefit of the introducer's experience without paying an additional price, often a heavy one, for the experience himself. By this I mean that when a seedling has been thoroughly tested and its requirements and peculiarities studied and recorded, the introducer is morally obliged to give the grower the benefit of his own knowledge and experience. The grower is entitled to such information and it should not be withheld from him. A printed slip, bearing all the cultural notes about the variety introduced, should accompany each and every shipment.

Fourth—The grower expects a square deal. By this I mean that no carnation, no matter what its previous record, how many points it scored or how many medals were awarded it, unless it maintains its record in all its essentials up to the time of and including the season of its dissemination, unless its vigor is in no wise impaired, should see the light of day. The introducer must be absolutely certain on this point; he must take nothing for granted, else the grower is sure to be a very much disappointed man.

The grower's expectations, it seems to me, are within the bounds of reason and need hardly be dwelt upon at greater length here. Let a condition of a thorough understanding and a most scrupulous honesty on both sides prevail and we will no longer hear about gold bricks and suckers. After all there is a deal of truth in the old saw of honesty being the best policy. The most successful business men of today are they who pursue such a policy, whether it be in the dissemination of seedlings or breadstuffs. The child that burns its fingers fears the fire, so does the grower steer clear of the man who sells him a winner and gives him a gold brick instead. It is to our own interests, whether we be hybridizers, dealers or mere agents, to discourage worthless varieties, stamp them out, roots, branch and all, if we wish to see the most important branch of our business thrive and develop without hitch or hindrance.

The Introduction of New Varieties.

BY C. L. WASHBURN, CHICAGO.

S. S. Skidelsky has sent me by mail a copy of his paper on the introduction of new varieties. I think he covers the matter very fully when he states what the growers or buyers of these new varieties reasonably expect. The trouble is to get these expectations fulfilled. As Mr. Skidelsky very ably states, the business of growing carnations has reached to large dimensions and importance.

It would seem that the American Carnation Society should, for the benefit of its members, take up this matter of introducing new varieties and give them the history in detail of each new variety from the time it is first started until it is offered for sale to the trade. There are certain large centers of the carnation industry, such as Boston, New York, Philadelphia, Buffalo, Detroit, Chicago, Indianapolis, St. Louis, etc. Now committees could be appointed in each of these districts to visit the various places where new varieties are being grown and investigate their condition, etc., keeping a record of, say, monthly visits, these records to be printed and issued to each member once a year. This would put a curb on the introduction of new varieties in the manner described by Mr. Skidelsky, where the most promising of a dozen or more uncertainties is selected and this plant is then put through a hurry-up process to increase the stock as rapidly as possible.

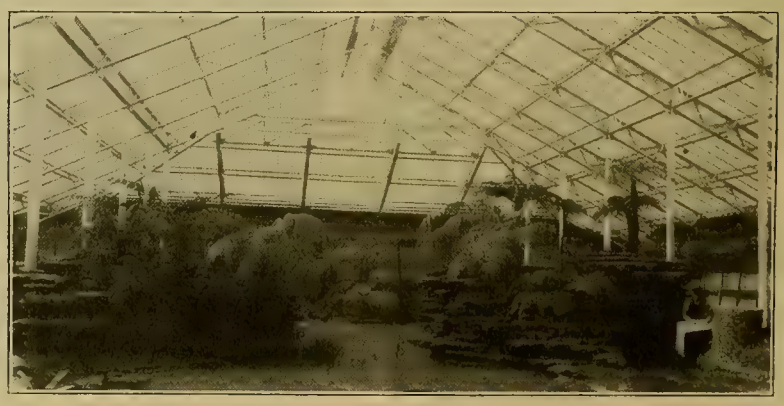
The introducer of seedlings would be benefited as much by this method of inspection as the buyers, for if he has a good thing the reports would show it. As it is now, we have all been bit so many times that, as a "burnt child dreads the fire," we all buy very sparingly of any new thing, being afraid of the gold brick. When the reports show a promising seedling a grower should be induced to allow others at different sections of the country a few plants for trial.

Now, in order to pay the expenses of these committees (and the committees should be paid for their time and all their traveling expenses) the money could be raised by taxing each member for these reports a sum in porportion to the amount of carnation plants he grows. Let the tax be, say to start with, $1 per 1,000 plants. Then a member growing 50,000 plants would pay $50 for his reports for the year. This would raise a good sized sum of money and put the matter of inspection on a business basis. There is not a single member of this society who would not be benefited ten times the amount he pays in, by the reports he would receive.

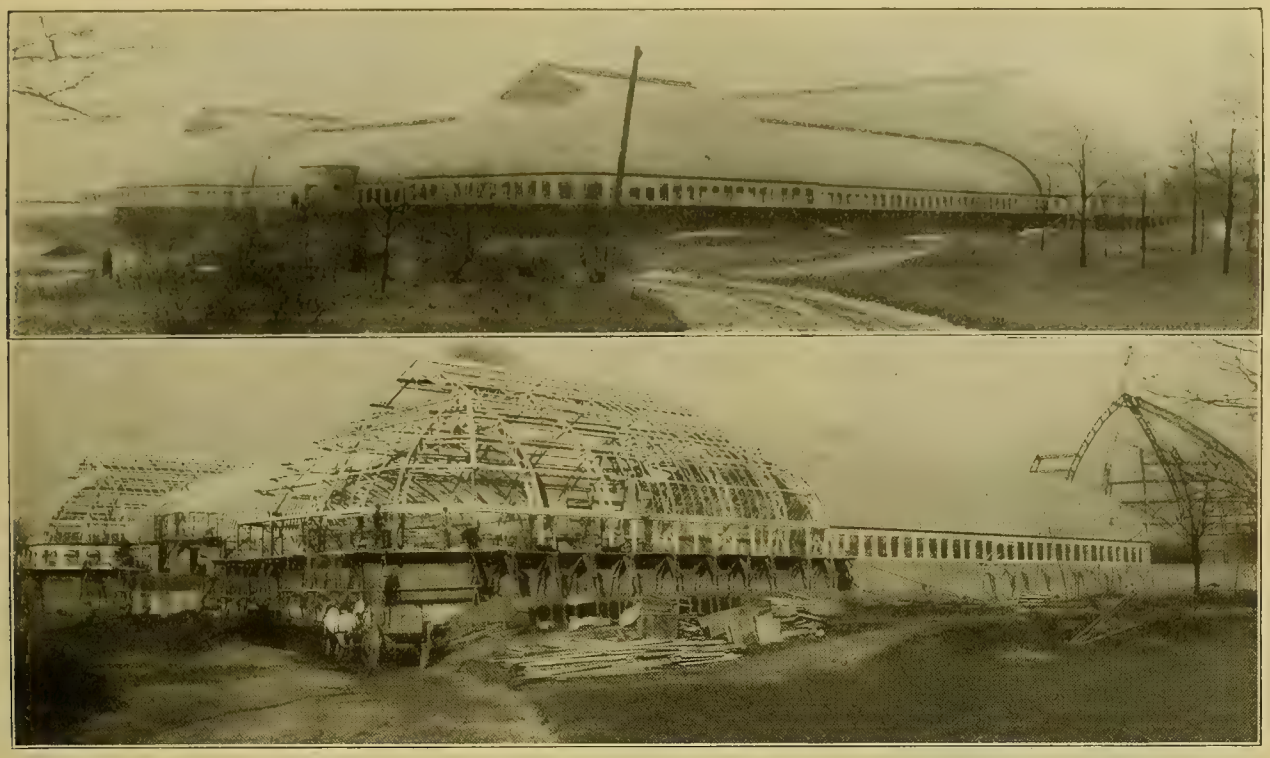
Mr. Skidelsky has given us a very complete paper on the subject and it remains for us to put some practical plan in use to prevent the abuses which the trade has suffered in buying goods which are grossly misrepresented and are causing us heavy losses each year.

Fritz Bahr, Highland Park, Ill., (on right) and E. Hippard, Youngstown, O., in Cuba.

TOM J. CORBREY, well known as a commission man in the early days of the trade in Chicago, writing from Long Beach near Los Angeles, Cal., says: "The Japs are giving the local growers a run and it looks as if the 'little brown men' may soon be it. The latter are paying as high as $40 per acre annual rental for land on which they grow flowers and vegetables."



INTERIOR OF NEW CONSERVATORY AT GARFIELD PARK, CHICAGO.



NEW CONSERVATORIES AT GARFIELD PARK, CHICAGO.

Garfield Park Conservatories, Chicago.

A most notable range of conservatories is now approaching completion in Garfield park, the central one of the three great parks of the West Chicago park system. This splendid range has been designed by Hitchings & Co., of New York, and those who have critically examined the new houses believe them the finest and best adapted for the purpose in the United States. Its final cost, together with the range of propogating houses adjacent will, when fully completed and equipped, cost approximately $225,000. Superintendent Jens Jensen must be credited with the conception and carrying forward of this much-needed work in a most permanent and satisfactory manner; in this he has been ably supported by the west park commissioners under President Eckhart, who was appointed by Governor Deneen with a free hand for these betterments. The range will be heated from a central plant. C. E. Carson & Co. are the steel work contractors, while H. Wilson had charge of the glazing.

WITH THE GROWERS

James D. Cockcroft, Northport, N. Y.

Growers of carnations would find much to interest them at the establishment of James D. Cockcroft at Northport, Long Island, one of the largest plants devoted exclusively to the cultivation of carnations east of New York. Besides the best of the standard varieties, the principal attractions are the three new varieties, Harvard (crimson), Faust (scarlet), and Georgia (fringed white), originated by Mr. Cockcroft. The following letter shows the opinion of one of the leading florists of New York as to the popularity and ready sale of these novelties:

"Mr. James D. Cockcroft,
Northport, N. Y.
Dear Sir:—
We desire to congratulate you on the two varieties of carnations, Georgia and Harvard; which you have been sending us. Georgia we consider to be the best white carnation that comes to New York and can easily sell from 50 per cent to 100 per cent more than regular white. Harvard we think to be the best dark red coming here, easier to sell at double the price of any other dark red.
With kind regards, we remain,
Yours truly,
(Signed) TRAENDLY & SCHENCK."

Faust.—This variety is a brilliant scarlet, a shade brighter than Victory with long and wiry stems averaging 20 to 24 inches. The flowers are of medium size, well built up with a perfect calyx. It is a strong healthy and clean grower, coming into bloom very early and its extreme productiveness makes it very desirable for commercial use, especially for the Christmas trade when it is in full crop.

Georgia.—Among all the various whites on the market, Georgia stands in a class by itself as it is a commercial variety in productiveness and a fancy one in size, fragrance and form. This variety, Mr. Cockcroft intends to introduce next year.

Harvard.—This new crimson variety originated four years ago. It is of a rich crimson color, the result of a cross between Prosperity and Gen. Maceo, combining the magnificent size and stem of the former with the freedom and rapid growth of the latter. The flowers measure from three and one-half to four inches in diameter, are symmetrical and well built with deeply fringed petals and are splendid keepers and shippers. A critical examination by a disinterested party just before Christmas of the 5,000 plants now being grown disclosed not a single case of split calyx and the originator says "that this quality has been a noticeable one at all times." The stems are long, stiff and wiry at all seasons, averaging about 24 inches in length. The plant is a rapid and vigorous grower with no superfluous grass, coming in bloom early and continuing throughout the season, every shoot producing a well formed flower.

ALL kinds of new methods in orchid growing crop up and are recommended from time to time; but when cultivators realize the simple fact that a proper atmosphere in the houses where they are grown is the most important detail of all, and far more so than hair-splitting differences in compost and temperature, they will be well on the way to success with these beautiful plants.

THE WA-NO-KA GREENHOUSES, BARNEVELD, N. Y.
Partial Exterior View of Plant.

Thos. Rochford & Son, Broxbourne, Eng.

As a striking instance of a colossal business being worked up from small beginnings in a comparatively short space of time the wonderful greenhouse plant of the Rochfords is worthy of notice. In England all such places are termed nurseries and the full title of the firm is Thos. Rochford & Sons, Ltd., Turnford Hall Nurseries. They are situate at Broxbourne, 17 miles from London. The well-known and genial Thos. Rochford, who died some six years ago at a comparatively early age, was the real founder of the business as it at present stands, though it had its small beginning at Tottenham when he and his father, Michael Rochford, grew especially good pines and

Thos. Rochford.

Present head of the firm of Thos. Rochford, Broxbourne, England

grapes. A ton of grapes in those days was thought a big lot, but now this firm alone grows nearly 100 tons under glass annually. Prices in those days ranged anywhere from $3.75 to $5 per pound, while today 25 cents is a fair average price, though, of course, higher prices are paid for best quality fruit. It is worthy of note, too, that in the old days the grapes grown at Tottenham were carried on the men's heads, thence to the London market, a distance of about six miles. Today large four-horse vans, as large as furniture vans, carry the produce.

The Turnford Hall Nurseries and the ground around them secured for extension cover an area of 100 acres. There are in all 285 greenhouses, one of the largest of these, a palm house, being 300 feet long, 50 feet wide and 26 feet to the roof apex. In this particular house are many palms, ranging in value from $5 to $250 each. The actual area of glass in this immense establishment has been variously estimated in America and all kinds of guesses have been made. It will interest our readers to know that the actual size is just under a million and a quarter square feet, 1,224,119 to be exact. This is the first time these figures have been published and they are correct. They represent the actual area covered and not the amount of glass used, which would, of course, be much more. The business carried on is wholesale and extends practically all over the world. There are railway sidings or switches connecting with the nursery and the firm uses its own railroad cars for shipping fuel, coke being principally used.

PALMS.

To return to the palm growing, there are in addition to the large house mentioned 14 span-roofed houses 160 feet long, filled with Kentia Forsteriana from two to six feet high and valued at from $6 to $45 per dozen. Larger specimens are grown in four other spans, each 300 feet long, and, in order to make the most of the head room, fine plants of Cocos flexuosa are interspersed with the kentias. Being tall, these take up little ground space and do not interfere with, but rather conduce to the health of the latter. Then there are two other spans, 25x300 feet, for the six-foot kentias, a grand stock of these on which the firm prides itself being always kept up. These houses are probably the finest in the world devoted to the culture of palms for market. There are 54 other span-roofed houses for small stock, each 14x160 feet. Owing to the scarcity of kentia seed, a scarcity likely to continue, Latania Borbonica is selling much better than formerly and there are large healthy stocks of this favorite palm on hand. Spent hops from the breweries are used for plunging the pots in in all the houses and the scent of these is very pleasing.

Crotons are also a leading specialty here, over 80 varieties in all sizes being grown. Single stemmed plants seven feet high, feathered with foliage down to the pots, are very fine, the variety Alice being a popular one. Souvenir de Thomas Rochford is also a decided acquisition. Souvenir de Baron Alphonse Rothschild is being largely shipped to America, while Reedi, a splendid variety, is being sent in large quantities to Paris. Victoria Improved, Warreni, Prince of Wales, Princess of Wales, Emperor Alexander the Third, Chelsoni and Disraeli are all largely grown, as is Turnfordiensis, which recently received a first-class certificate from the Royal Horticultural Society. Filicifolium aureum is one of the best of the narrow-leaved forms, bright yellow with a drooping habit, and when finished is like a shower of gold. It is an excellent variety for table decoration. Whole houses full of Asparagus plumosus and the true variety nanus are grown and many were being packed for the United States recently. Then there are houses of Malmaison carnations, Princess of Wales, grown for cutting, other houses of Rasfail geraniums, the plants four feet high and a blaze of scarlet, large span-roofed houses of roses, 35x500 feet, and many other crops. The new rose, William Sheen, is expected to outclass Bridesmaid. It is a very lovely variety. Richmond is also largely grown, as is also Queen of Spain. Poinsettias in 4-inch and 5-inch pots, pandanus and the new golden smilax are all well grown, the latter a very beautiful and distinct feature here.

Orchids are largely grown for cutting and also for sale on the plants. There are house after house of cattleyas, and at the time of our visit C. labiata was at its best. Odontoglossums, chiefly O. crispum, fill 12 houses and the plants were bristling with flower spikes. Then, there are immense lines of Spirea Japonica, Azalea mollis and the pretty pink spireas Queen Alexandra and Peach Blossom. Dormant crowns of these are being sent out and plants in bloom were on show. Everyone speaks well of them. There is an immense stock of the new Nephrolepis todeaoides. In one house there were 20,000 in 2½-inch pots, all grown cool, and there are others in all sizes up to large specimens. Begonia Gloire de Lorraine is a leader. There are many fine specimens, in pans nine inches deep, that are three feet high and as much through, while the basket plants for Christmas trade are very fine. Rochford's Masterpiece is in great form and sells well. Amabilis is a new cross, not yet disseminated, between Masterpiece and Socotrana. It is a stout

RETARDED LILY OF THE VALLEY AT THOS. ROCHFORD'S, BROXBOURNE, ENG.

The pips, when removed from the refrigerators, at any time of the year, bloom in about three weeks.

AT THOS. ROCHFORD'S. BROXBOURNE, ENG.

Retarded Lily of the Valley. Azalea Mollis. Cattleya House.

grower, very free, the flowers hanging loose; miles ahead of anything else, according to American visitors. There are 18 span-roofed houses, 160 feet long, devoted to Easter lilies and a similar number 200 feet long filled with varieties of L. lancifolium. L. eximeum is spoken of as the best variety for retarding. There are other large houses devoted to Eucharis Amazonica Lilium auratum and other good market kinds, the eucharis being perfectly free of disease and mites which are so troublesome in some places.

LILY OF THE VALLEY.

Twelve span-roofed houses, each 14x300 feet, are occupied during the entire year with lily of the valley, all retarded crowns being used. Much has been written on the forcing of this plant, but no forcing is done here. The crowns are grown quite cool from the start, frost only being excluded, and this accounts for the fine quality produced from the firm's own retarded stock. Before going into the refrigerating chamber each bundle of crowns is thoroughly examined and again after it comes out before the crowns are planted or delivered to customers. The firm handles between 10,000,000 and 11,000,000 crowns every year and report their stock as never better than the present season. The export trade in this line is considerable and we saw a consignment of 23,000 being packed for Holland. The refrigerator chamber is very interesting and beautiful inside, the frost hanging thick on every part of the woodwork, walls, etc. Ivy is grown on the outside walls to keep it still cooler. The packing sheds are built and fitted with every necessary convenience for expeditious handling and bunching of the stock.

Fuchsias.

Fuchsias are used very plentifully in Girard college, especially on Founder's day (Stephen Girard's birthday), May 20, when all those who have graduated from this beneficent institution who are living within easy distance are invited to spend the day. Varieties that bloom later than the date indicated above are not much used here, excepting for conservatory decoration through the early summer months. Some old plants are carried over from year to year as these lend themselves better to training as standards than do plants of the present season, but the old plants are not so easy to carry through the heated term in many parts of America as they are in Great Britain and some other European countries, where they grow and bloom and are a constant delight all summer long.

For spring sales, in a commercial florist's establishment, plants raised from the present season's propagation are to be preferred and this should commence now. Select fresh young cuttings and insert same in the propagating bed where the temperature is not higher than 60° at night. Do not crowd them if a shapely plant is desired. Shading from the sun and frequent sprinklings are necessary. We have had the best results in growing fuchsias of a uniform pyramidal habit by potting the cuttings before they were rooted. The reason is that the plants had sufficient room for the full development of the lower shoots, thus aiding the natural habit so much admired in well grown plants.

As soon as the young plant is well established in its first pot it should be shifted to a 4, 5, or 6-inch pot according to the variety. Varieties with large leaves and a strong growing habit like Speciosa will take the larger size, while Wave of Life and others with smaller leaves will do well enough in the 4 or 5-inch sizes. The large shifts recommended also encourage the lower shoots to their fullest development. Do not delay longer than possible the placing of a neat and straight stake to each plant, or all other efforts to train the plants into a good shape will be in vain. A temperature of 55° at night is warm enough. If large plants for exhibition or large decorations are wanted, cuttings should be secured, if possible, in October, or as soon thereafter as possible, but very presentable plants may be grown this season if the hints thrown out herewith are intelligently carried out. Never allow the plants to become potbound until the time for blooming is approaching, when a weekly application of liquid cow manure may be given. The plants growing in 4-inch pots should be repotted into 6-inch and those in 5-inch into 7-inch, as the ball of earth is well filled with roots.

AT THOS. ROCHFORD'S, BROXBOURNE, ENG.

Retarded Lilium Lancifolium Cut for the Paris Market in the Bud Stage.

I do not believe in stopping fuchsias for the purpose of causing them to develop into bush plants, because the pyramidal form is preferable and more natural; besides this, the time of flowering is delayed until too late in the season for either spring sales or early summer decorating when the shoots are pinched. Where climatic conditions are such that the fuchsia makes an acceptable bedding plant in summer time, the pinching of the shoots might be permissible, but not otherwise. When the buds appear, which they will do on the leading shoot first, carefully remove them as soon as large enough to handle and keep on doing so until they appear uniformly all over the plant, when they may be allowed to open, and a very graceful plant should result.

Personally I prefer the single varieties because there is an easy grace about them which the double varieties lack. Raisers of new fuchsias are apparently striving to develop the flowers as double and as large as possible, but this destroys their natural grace and beauty. Varieties that are grown here and are satisfactory are the old Rose of Castille, Arabella (Mrs. Marshall), Wave of Life, Black Prince, Specosia and several double white varieties. I would like a single flowering white variety if I knew where it may be had.

EDWIN LONSDALE.

PLANT NOTES.

Propagating.

During the time firing is necessary, bottom heat for the propagating bench can always be had without extra cost and for this reason the bench should always be kept filled during winter and early spring. Although a very fine sand may be preferred for the smallest cuttings, a fairly coarse material is better for ordinary propagating. Nowhere is cleanliness more essential than in the propagating house. Given the requisite heat and moisture and absolute cleanliness, there is no reason why one cutting in 1,000 should fail under ordinary circumstances, but when fungus and damping sets in there is a very different tale to tell. In most propagating operations the heat below should be a few degrees higher than that in the atmosphere of the case or house, the idea being to keep the tops practically dormant while roots are forming. In the case of grafting roses or other plants, the roots of the stock will have been already excited before the grafts are put on, and here it is necessary to excite top growth in order to set up what may be termed a sap-circulation through stock and scion. For this reason the top heat should be maintained as high as the bottom, and ample moisture kept in the atmosphere to prevent any shrivelling of the scion growth. These may seem small matters but they render successful propagation much simpler and surer than can be the case when they are neglected.

Asters.

In some cases last year early flowering asters under glass proved profitable. The seed may be sown at once in a temperature of 55° in soil as described recently. When the seedlings have attained the first rough leaf prick them off into moderately deep flats about two inches apart and grow them on quite cool in a light airy house. Asters are not particular as to soil but a sandy loam is best. Plant out eight inches apart as soon as ready and grow them cool right along. Green fly and thrips must be kept in check; if once these insects get a good hold on the plants the chance for a good crop of flowers is a remote one. Sow the seed thinly and cover with one quarter of an inch of sandy soil. Queen of the Earlies is a good variety for growing under glass and the old Victoria is also excellent, large flowering and slightly later. Good telling colors and white are the best to grow and the quantity of each must depend upon the demand. The white is very useful for design work, when not disbudded, but for fine specimen blooms disbudding is essential.

Treasurer National Flower Show Committee.

National Flower Show Fund.

Secretary J. H. Burdette, of the National Flower Show committee, has notified all subscribers to remit the first assessment of twenty per cent of their subscriptions now to Treasurer Irwin C. Bertermann, treasurer of the committee, at Indianapolis.

THE ROSE.

Notes in Season.

In looking over the list of rose novelties for 1908, it has been many years since we have had a better selection to choose from, and it is interesting to note that several of the most promising varieties are of American origin, showing that a deeper interest is being taken towards producing something new and better by hybridizing and not depending altogether on importations and sports. Some of our rosarians have given years of careful study and work, their object being to produce vigorous, productive plants, with well developed flowers of pleasing color and fragrance, Richmond being a fair sample of what can be done in this line here at home. The hybrid teas seem to predominate; from these we can expect fragrance as well as color and stem. A few of the recent novelties we predict a brilliant future for are My Maryland, a seedling raised by John Cook, of Baltimore, Md., a rose of the Killarney type, soft salmon pink in color which brightens up wonderfully as the flowers expand. A large vase of this variety at a recent exhibition was a sight well worth going a long way to see. Queen Beatrice made good at the same exhibition; this rose is a deep pink, shading out lighter to the outer petals, has fine stems and foliage and is beautiful under artificial lighting as well as by day. Mr. Kramer should feel proud of this introduction. Mrs. Jardine is another of great merit; it is also a hybrid tea, very fragrant, fine habit, the color a rosy pink, shading to salmon pink on the outer petals; the rose is said to be more productive than Bridesmaid, and holds its color throughout the trying month of January, when Bridesmaid is inclined to fall off a shade in color. Mrs. Potter Palmer, the new pink sport of Mme. Chatenay, is meeting with great success, I am told, by the originators, Poehlmann Bros. Co.; it bids fair to eclipse Mme. Chatenay. This being a splendid variety, an improvement must be fine indeed.

Rhea Reid has made a distinct hit wherever shown, very much resembling American Beauty in color, very vigorous, giving long stems and abundance of blooms. This fairly well describes the real novelties and these have all had a trying out with excellent results. Of course, there will be growers who will give these novelties only an ordinary test and others who, I feel assured, will be successful with them, as with Killarney and Richmond, two of the finest roses to my knowledge in cultivation, and if the novelties mentioned above do not become standard indoor forcing varieties within the next two or three years, I will be greatly mistaken. But growers should give them a fair trial, purchase enough to make a fair comparison with other varieties known to be profitable and give them the very best location. They should try them grafted and on own roots before discarding them. They have all been grown successfully by the originators or introducers.

To come back to our old stand-bys, Bridesmaid, Bride, Golden Gate, American Beauty, etc. These must not be neglected. The sun is now gaining strength and the plants should now show some effects of the increased light and air. The fires should be banked as early as possible on bright days, not to the extent of chilling the plants, but to do away with as much artificial heat as possible, not only for the sake of economy, but for the welfare of the plants. Ventilate carefully and as freely as possible. If the plants are vigorous and in good foliage, they will now stand an increase in feeding. This can best be accomplished by applying liquid manure at normal strength, if they have been given liquid manure along through the winter; if not, commence with a weak solution, applying once a week, increasing the strength as the plants show improvement. Cow manure may be used fresh for mixing the liquid or good sheep manure. The latter contains more ammonia and should require nearly twice the amount of water. Water on clear days and at the time the plants are making new growth. When in full crop, full

strength liquids may injure some of the flowers; at this time a weaker solution can be used. Very often after cutting a heavy crop at Christmas the plants will be at a standstill for some time afterwards. Although perfectly healthy, they do not seem to want to break into growth. A little nitrate of soda applied in liquid form will often have the desired result in this case, using about three-quarters of a pound to 50 gallons of water. After the plants begin to break freely the liquid manure will be the thing for them. Give the young potted roses plenty of air and never let them become dry; syringe them freely, and fumigate frequently. There is no excuse for the appearance of green fly on the young plants. E.

Caroline Testout and Its Descendants.

Now, since quite a number of rose enthusiasts on this side of the Atlantic are interested in raising seedling roses, it will be interesting to know the source of some of the good new roses that have been produced from seeds and sports, with the variety heading these notes as one of their parents, as described in Gardening Illustrated:

"It is doubtful whether a more useful rose was ever raised than Caroline Testout, for it has enabled us to embellish our gardens with a glorious variety of surpassing loveliness and, what is equally valuable, of lusty vigor. It was a happy idea of M. Pernet Ducher to hybridise that old rose Mme. de Tartas with Lady Mary Fitzwilliam, the former, no doubt, bequeathing to the seedling that marvellous vigor which has now become so well known. I have sometimes wondered whether the tendency of Caroline Testout to give light colored sports, and to produce white, or nearly white, seedlings, such as Irene, could be traced to the old and one time popular Devoniensis. It is well known that Lady Mary Fitzwilliam was raised by the late Henry Bennett from a cross between Victor Verdier and Devoniensis, and if this were established it would go far to explain the production of so many light colored hybrid teas which owe their origin on the one part, or indirectly to Lady Mary Fitzwilliam. It is an interesting subject which, with our limited knowledge of Mendel's theories, debars us from making any definite statement, but, even in the case of that peerlees white, Frau Karl Druschki, Caroline Testout is reputed one of the parents.

"Irene, before referred to, is a splendid variety, large and showy. It is one of the best of the white sports or seedlings from Caroline Testout, but it has one great defect, and that is a weak flower stalk. If it carried its flowers erect the same as Admiral Dewey, it would surpass that variety in beauty and size. But where this semi-drooping of the blossoms is not objected to, Irene will, undoubtedly, be found to be a good rose. I think the Caroline Testout group is pruned quite hard enough, as a rule. It is better to prune moderately; at the same time, supplies of new wood should be encouraged from the base by cutting right down each year one or more of the very oldest growths. Next to Irene and Admiral Dewey, the best seedling or sport of Caroline Testout is Margaret Guillot. In the early autumn this rose is very fine, and much the purest white of the three, but it is not such a commanding flower as Irene.

"A very charming soft pink seedling of Caroline Testout is Lucien de Lemos. This, I believe, will prove a very useful rose. It was raised from Princess A. de Monoco, crossed with Caroline Testout. Milly Crean is another lovely peachblossom pink variety of the old favorite. Its flowers are very large and distinct. Some mild sensation was

George Collins.
Peter Reinberg's greenhouse superintendent.

caused in the autumn by the exhibition of a number of striped and flaked flowers of Caroline Testout, the sport being named Mrs. Longworth, after President Roosevelt's daughter. If the particolor is maintained, it will be an interesting addition.

"A delightful rose, and one that should be in every garden, is Mme. Leon Pain. I do not know whether the lovely flowers of pink, with orange base, or the beautiful ruby-red foliage pleases me most, but this latter certainly lends a distinctness to the variety not to be lost sight of. It, without a doubt, inherits this deep-colored foliage from its pollen parent, Souvenir de Catherine Guillot, Konigin Carola, there is no doubt, will rank high as a garden rose. Recently its bold, massive flowers presented a lovely appearance, although the growth is scarcely vigorous enough. A few other really first-rate descendants of Caroline Testout are Marie Croibier, very rich in coloring; Frau Ernest Borsig, a novelty with a lovely white edging to its petals; George Laing Paul, one of the best of our colored hybrid teas; Aimee Cochet, and Frau Lillie Rautenstrauch. It should also be noted that to this old rose we are indebted for such varieties as Lohengrin, William Shean, Lady Ashtown and, possibly, the new Mme. Segond Weber."

Mme. Caroline Testout is well known in America as it at one time was used for forcing under glass, and it proved especially valuable for summer blooming, but it is now superseded by Mme. Chatenay, which has the appearance of also being a seedling from Testout. Perhaps some of the readers of the AMERICAN FLORIST will tell us whether it has been used on this side of the water for seedling raising purposes and if so, with what results. No other variety that I know of has so good a record as has Caroline Testout as a parent of good and useful roses, as the foregoing account will testify.

E. L.

THE Chilean government is doing much to encourage the cultivation of flax, ramie and heniquen in this country. Several liberal concessions have been granted and the effort is meeting with good success in the provinces south of Santiago. The soil and climate is well adapted to their culture.

HOUSE OF AMERICAN BEAUTY ROSES AT PETER REINBERG'S, CHICAGO.

THE RETAIL TRADE

The New York Retailers.

While the New York retailers may occasionally talk in a pessimistic vein, optimism always prevails in their show window decorations. The great variety of good stock that has this season been placed on the market at nominal figures has given the decorative branch of the business ample material with which to exercise its skill. It has been said that an appreciative audience is an incentive to oratory and the floral decorators of New York should be, and doubtless are moved to put forth their best efforts, for their audience is a vast multitude, always sympathetic and appreciative. When orchids are as cheap as they have been this season, it is a great temptation to the decorators to use them with a free hand, and however arranged they look beautiful, but their beauty is greatly enhanced by an appropriate setting

In the window of Chas. Thorley's Broadway store I recently noticed a beautiful decoration of cattleyas and oncidiums. For a background, large cibotiums were placed at an angle that showed the fronds at their best. Clusters of oncidium were arranged among the drooping fronds, where their foreground faced the glass; in front of these were the shorter stemmed but equally beautiful cattleyas, Asparagus plumosus nanus being twined about the bottom of the window. The glasses and holders are now a great aid to artistic window decoration. By their skilful use, a pleasing variety has already been produced in many stores, not only with orchids, but carnations, narcissi, violets and other flowers, and I doubt not that we shall yet see advancement.

Recently at the store of the Rosary Flower Co., near the Waldorf-Astoria, there was a handsome cattleya decoration, made effective by the use of glasses. A large wire hoop was suspended in the center of the window space and to this the orchid glasses were fastened, the effect being striking and original. The same scheme may be carried out with other flowers. In show windows where there are pillars, a grand effect is obtained by fastening the glass holders to these, and the decoration can be taken to the top of the window. For such form of decoration, carnations, or Golden Spur and Trumpet Major narcissi are admirable. Asparagus plumosus nanus is an excellent as well as a convenient green to use on the pillars.

While orchids are beautiful and elegant it does not follow that they are absolutely essential to the maintenance of a handsome window. Fine taste and the ability to put it in practice can make the most commonplace flowers work wonderful transformations. Many of us can recall some garden of a humble home, where the tiger lilies, sweet williams and hollyhocks were more pleasing to the eye than the carpet bedding of more extensive grounds. There is now a varied stock of foliage and flowering plants to draw from, and the decorators of the metropolis are quick to take advantage of the best. In writing of window decorations, I frequently mention Cibotium Schiedei; for an elegant background in a large window it has no equal, but other ferns and foliage plants have also their place. Nephrolepis Whitmani and N. Amerpohli make a handsome setting in a window decoration of medium sized flowering plants, or vases of cut flowers can be interspersed with the ferns with good effect. Both these ferns, cut, may be used in funeral work. Not long ago, I saw a pillow made up altogether of cattleyas and N. Whitmani and I doubt if better results could have been reached with Adiantum Farleyense.

The heliconias are now finding favor with leading decorators and we would like to see more of them in use. They are highly ornamental and require little accompaniment to make a splendid show. In Fleischman's Fifth avenue store, where there are spacious show windows, these plants have been skilfully used. The gardenia, both cut and as a pot plant, is now frequently seen in window decorations. At the Fifth avenue store of Thomas Young, Jr., they are being constantly used with fine effect. A sash

E. J. Fancourt.
Secretary S. S. Pennock-Meehan Co.

of gauze ribbon tied around near the base of the plant is now often seen and the effect is good; the same may be done with small ericas. The advancement in forcing has brought both the purple and white lilacs to the front as midwinter decorative plants.

Vanderbilt-Szechenyi Wedding, New York.

The most elaborate wedding decoration of the season, and one of the finest decorative effects ever produced in New York was for the wedding of Miss Gladys Moore Vanderbilt to Count Laszio Szechenyi, January 27. The decorations were executed by the Rosary Flower Co. of which J. H. Troy is manager. The ceremony took place in the ballroom of the bride's home. This room is 60x80 feet, the height being 42 feet.

The bride and groom took the solemn vows of matrimony, standing in an arbor, for the decoration of which 7,000 cattleyas were used. Other decorations of the room were on the same lavish scale. For the wedding breakfast, the bride's table, at which 36 persons were seated, was decorated with white orchids and orange blossoms. There were, in addition, elaborate decorations for 36 smaller tables, each seating 10 guests. The whole house was decorated, the floral work conforming to the color of the original decorations of each room.

FLORISTS' FERNS.

TEMPERATURE FOR ADIANTUMS.—Where adiantums are grown for cutting, on benches, a high temperature and moist atmosphere are not to be desired. When replanted, a rather higher temperature and closer atmosphere is needed for a time, but when again established bring the temperature down gradually to about 55° at night and the plants will produce harder and better fronds. Quicker growth can, of course, be secured by employing more heat, but the fronds will not be as lasting as when grown cool.

Notes in Season.

Those who planted good stock of adiantums in autumn have the satisfaction now of seeing fine early fronds and these will be well matured and ready for sale long before the spring planted stock is. Where it is evident that the plants have obtained a good hold on the compost there is little risk now, as the plants practically take care of themselves. This may be seen by the rapid growth of the fronds and the spreading of the color over their surface; in short, by the general thriving appearance of the plants. Those that have not a good hold, on the other hand, will often have the fronds wilting at the top before they commence to take on their proper color. The two classes of plant must be treated differently.

The healthy benches will need watering fairly often, twice a week at least if properly drained. If the soil is full of roots a little feeding may be indulged in, but it is easy to overdo this. The ordinary liquid manure is not so suitable for ferns as a concentrated fertilizer. Guano and soot are excellent manures for the purpose. The guano may be mixed with several times its bulk of dry soil or peat dust and sprinkled over the benches thinly and evenly a teaspoonful to each plant being a fair application. Soot should be given in liquid form by soaking a bag in a tub or tank as frequently described in these pages. Only the well clarified upper portion should be used, the bag being well stirred after use, not before. Soot water should be given almost clear to ferns of this kind, and only when the soil is damp beforehand.

The weak plants must not be fed at all, and water must be very sparingly applied. Endeavor by cultivating the surface to get the air down to the roots and see that the soil is well on the dry side before giving a fresh supply. When once a bench of ferns gets into really bad order it is often quite a long

THE SOCIETY OF AMERICAN FLORISTS

—What we have long needed.—

THE Florists of the United States have for a long time felt the necessity of an organization, national in character, honest and progressive in purpose. Such an organization is now an accomplished fact.

Who are Interested ?—The 15,000 people directly and indirectly engaged in the business, are certainly interested in a Society that will study and further their general good; the amateur, lady or gentleman; the lover of flowers in town or country; the gentleman's gardener, will all be interested in our Society, as the whole range of horticulture will be reviewed from year to year, and gardening in all its phases will be discussed in a manner that can not fail to profit all.

Who will be Benefited.—Alike, the Florist, with his acres of glass, and his humbler brother, with a few hundred feet; the decorative florist and dealer in flowers, the manufacturer and dealer in supplies of all sorts; the greenhouse builder and heating apparatus manufacturer, and all those interested in floriculture, whether for pleasure or profit.

The Aim of the Society—Is to lift up and carry forward all that tends to advance the growth of such a delightful occupation, to collect and diffuse from the best sources information that shall be beneficial to all its members, to care for and instruct all in the best modes of carrying on a successful business, to help those overtaken by misfortune and form a brotherhood worthy of the goddess Flora.

The Plan of Action—Is to have a yearly meeting at one of the larger cities; in connection with these there will be an exhibition—at such meetings the business of the Society will be conducted, the transactions of the year previous will be presented, and the programme for the ensuing year laid down. The exhibitions will be entirely novel, and of such interest as will be worthy of the Society of American Florists. The desirability of forming either a Hail Fund or a Hail Insurance Company is generally conceded, and it will receive careful thought and prompt action on the part of the Society at its first annual meeting in Cincinnati.

(2)

Practical Papers, short, concise and full of instruction will be read at the meetings, and printed with the reports of the Society each year. No new plant or flower, no device or invention of merit will go unrewarded. Medals and certificates will be given for deserving exhibits. The Society will take especial care to have everything reported in the best manner. The Constitution and By-Laws are in preparation, and will be presented at our first general meeting.

Action Taken.—At a meeting of representatives from eight different States, held in Chicago on June 19th, 1884, this Society was organized by the election of the following

OFFICERS.

JOHN THORPE, President, - - - Queens, N. Y.
J. M. JORDAN, First Vice-President, - St. Louis, Mo.
M. A. HUNT, Treasurer, - - - Wright's Grove, Chicago.
E. G. HILL, Secretary, - - - Richmond, Ind.

EXECUTIVE COMMITTEE.

ROBT. S. BROWN, - - Kansas City, Mo.
ROBT. CRAIG, - - Philadelphia, Pa.
J. C. VAUGHAN, - - Chicago, Ill.
ALFRED NEUNER, - Louisville, Ky.
ROBT. J. HALLIDAY, - Baltimore, Md.
ROBT. GEORGE, - Painesville, O.
B. P. CRITCHELL, - - Cincinnati, O.
W. G. NEWETT, - - Chicago, Ill.
HARRY SUNDERBRUCH, - - Cincinnati, O.

VICE-PRESIDENTS.

ROBT. H. HEATH, - Canada West.
EDWIN LONSDALE, - Pennsylvania.
C. E. ALLEN, - - - Vermont.
ALEX. MURDOCH, - - Pennsylvania.
LUTHER ARMSTRONG, - Missouri.
F. R. PIERSON, - - New York.
A. BRACKENRIDGE, - - Maryland.
R. MAITRE, - - - - Louisiana.
WALTER COLES, - - Delaware.
A. H. BUNDE, - - Minnesota.
J. D. CARMODY, - - Indiana.
GEO. P. LAMB, - - North Carolina.
A. DONAGHUE, - Nebraska.
CARL JURGENS, - Rhode Island.
PETER HENDERSON, - New Jersey.
W. R. SMITH, - Dist. Columbia.
FRANCIS MORAT, - Kentucky.
C. B. WHITNALL, - - Wisconsin.
C. A. REESER, - - - Ohio.
O. F. DUE, - - Salt Lake City, Utah.
MARCUS ELLIS, - - New Hampshire.
J. C. VAUGHAN, - Illinois.

Our First Meeting.—The first meeting will be held at Cincinnati, O., between the 12th and 25th of August, 1885. We can promise even at this early date a more numerous attendance than has ever been accorded to any similar organization.

Our plans are maturing for an exhibition, noble in its conception and differing in character from any before attempted. The interest already manifested by many of the members warrants this positive statement. A schedule of premiums with rules and regulations and a complete list of members to date will be ready early in January.

THE FIRST CIRCULAR OF THE SOCIETY OF AMERICAN FLORISTS, 1885.

time before it recovers and it is a vexatious crop to handle when in this condition. In really bad cases it is best to pull the plants right out, turn the soil in the bench up roughly, lay the plants in a warm, moist house for a time and replant when young roots are again starting freely. But such a drastic method as this should not be used until the cultivator has tried others to bring the plants into a satisfactory state of health. Once the roots are healthy and active it will not be long before the fronds take on a good color and grow freely.

There are often a lot of Boston ferns coming in at this time of year that have been used for holiday and store decoration and are in poor condition. They should not be left to lie about thickly on the benches, but should have all decayed and useless fronds taken off and be staged up carefully. When they again begin to grow, which they will do quickly unless in really bad health, they may be repotted if necessary and grown on in a house kept at a night temperature of about 55°. This will ensure their making good plants again by Easter. Propagating benches, where plants were bedded out last fall for runners should be kept just nicely moist, and if the centers of the plants seem to be taking an undue lead at the expense of the runners pinch these out. Do not allow the soil to become crusted on the surface. Where the soil is heavy some runners may be kept under for good this way. On the other hand, too frequent stirring of the surface may lead to some of the forwardest runners being snapped off and lost. Should it be necessary to plant out any more for stock it will be safest to pinch the center of each out at planting time, this leading to a free production of runners.

Division of old plants of pteris and others may be carried out now and the divisions will have the best of the season before them. Some of the ribbon ferns grow so freely from spores that it is hardly worth while dividing up old plants. But any choice or favorite variety of which it is desired to increase the stock must be so treated. If potted at once let the divisions go into the smallest sized pots they can and avoid overwatering at first. The size of the divisions will depend upon the class of plant needed. That pretty fern, Adiantum Farleyense, should not be divided into very small portions, or the increased heat needed to start them leads to weak attenuated growth that has to die off and be followed by other fronds before a good stocky little plant is produced. Loam of good quality leads to better results than a very light compost for this favorite fern.

COMMERCIAL.

Grand Special Prizes.

Society of American Florists.

NATIONAL FLOWER SHOW PREMIUMS.

The following list of premiums offered for competition at the National Flower Show at Chicago, November 6-15, 1908, covers all special offers definitely in hand January 22, 1908. It totals over $1,800 in addition to the S. A. F. medals.

The thanks of the committee are tendered to these public spirited and generous firms and individuals who have responded so nobly.

The many others who intend making similar offers are urgently requested to "HURRY UP" so that all may be included in the preliminary list now in press, as otherwise proper publicity and a good competition cannot be secured.

W. N. RUDD,
Chairman Premium Committee,
Morgan Park, Ill.

American Florist Co., 324 Dearborn street, Chicago.—Cup, value $25; class not yet specified.

B. K. & B. Floral Co.—Richmond, Ind.—For 50 blooms Sarah Hill carnation; $8 first; $5 second; 50 blooms Lawson-Enchantress carnation, $8 first; $5 second.

Chicago Carnation Co., Joliet, Ill.—50 blooms Andrew Carnegie carnation; $12 first; $8 second; $5 third.

W. H. Elliott, Oak square, Brighton,

Losses by Hail.—One of the first intentions of the Society of American Florists is to provide in the best manner an insurance against loss of glass by hail. To advise the best plans for this insurance it will be necessary that all information regarding losses by hail during the years '82, '83 and '84 be furnished the Secretary as soon as possible. We wish to investigate this thoroughly and ask our friends to report any losses and to state the NAME of the sufferer, DATE of occurence, quantity and PER CENT. of glass broken. This is a matter of vital importance to the Society and a compliance with the above is urgently requested that the Society may have facts and data as a basis for action.

Who are Eligible.—"All Florists, Gardeners, Seedsmen, Nurserymen, Superintendents of Parks, Manufacturers of Heating Apparatus, Greenhouse Builders and dealers in Florists' Supplies in the United States and Canada shall be eligible to membership in this Society."

The fact that the large membership here given of representative men of the trade is voluntary and received almost without effort, proves that with the extended circulation kindly given our announcement through the various trade journals and catalogues we shall procure for our next membership list, the name of nearly every man connected with our business. Your name should be sent to the Secretary, or to the Vice-President of your State, or other officer of the Society and the regular numbered receipt of the Treasurer will be sent. ***LET US HEAR FROM YOU.***

Annual Subscription.—The annual subscription is $2.00, entitling members to all the privileges of the Society. Most of our members so far, wishing to give the Society a good impetus in the shape of an incidental fund, have paid $3.00 extra, making a subscription of $5.00. We shall be glad of many other $5.00 subscribers.

For all particulars address:

E. G. HILL, Secy,
Richmond, Ind.

THR FIRST CIRCULAR OF THE SOCIETY OF AMERICAN FLORISTS, 1885.

Mass.—Cup, value $50; class not yet specified.

Alexander J. Guttman, 43 W. Twenty-eighth street, New York.—For 50 blooms Victory carnation; $12 first; $8 second; $5 third.

E. V. Hallock, Queens, N. Y.—For 12 blooms each of 12 varieties best hardy garden roses, or two plants in pots of each of the 12 varieties. Plants to stand zero to 10 degrees below. Exhibitor to select his own varieties; quality of blooms or plants, 80 points; desirability for growth under conditions named, 20 points; $50 first; $35 second; $15 third.

The E. G. Hill Co., Richmond, Ind.—Trophy; class not yet specified.

Horticultural Society of Chicago.—Medals, value $500; classes not yet specified.

Wm. F. Kasting Co., 383-387 Ellicott street, Buffalo, N. Y.—Cash $50; class not yet specified.

The King Construction Co., North Tonawanda, N. Y., and Toronto, Ont.—Cash $25; for 100 blooms carnations, any variety in commerce. Competition limited to those owning or operating not over 25,000 feet of glass.

Lord & Burnham Co., Irvington on Hudson, N. Y.—Gold medal for best general collection of orchids grown and exhibited by a private gardener.

Henry F. Michell Co., Philadelphia, Pa.—Cash $10; class not yet specified.

John C. Moninger Co., Hawthorne, Blackhawk and Smith avenues, Chicago.—Three cups; classes not yet specified.

F. R. Pierson Co., Tarrytown on Hudson, N. Y.—For 50 blooms Winsor carnation; $12 first; $8 second; $5 third. 50 blooms White Enchantress carnation; $12 first; $8 second; $5 third. Cup, value $25, for best specimen Nephrolepis Piersoni elegantissima grown in not over 12-inch pot or pan.

Poehlmann Bros. Co., Morton Grove, Ill.—Cash or cup, value $25, for 100 blooms Mrs. Potter Palmer rose.

Quaker City Machine Co., Richmond, Ind.—Cash $25; class not yet specified.

Chicago Florists Club, Chicago.—Trophy value $50; class not yet specified.

Chrysanthemum Society of America.—Cup for 10 blooms, one variety chrysanthemum, any color.

W. W. Coles, Kokomo, Ind.—Cash, $10; class not yet specified.

Wm. P. Craig, 1305 Filbert street, Philadelphia, Pa.—Cup, value $30, for 50 blooms Mrs. Jardine rose; grown by grower with not more than 50,000 feet of glass.

The Albert Dickinson Co., West Taylor street and the river, Chicago.—Cash $25; class not yet specified.

Peter Reinberg, 51 Wabash avenue, Chicago.—Cup, value $25; class not yet specified.

W. N. Rudd, Morgan Park, Ill., and Jensen & Dekema, 674 W. Foster avenue, Chicago.—For 50 blooms Carnation Defiance; $12 first; $8 second; $5 third. Donors barred from competition.

Robert Scott and Sons, Sharon Hill, Pa.—Cup, value $30, for 100 blooms Mrs. Jardine rose.

S. S. Skidelsky, 1741 North Eighteenth street, Philadelphia, Pa.—Cash, $25; class not yet specified.

Elmer D. Smith & Co., Adrian, Mich.—Cash, $50, for best 25 blooms chrysanthemums of American origin, five or more varieties shown in one vase, not less than 36-inch stem. To be judged from commercial standpoint. Undisseminated varieties admissible.

Society of American Florists.—Ten silver gilt medals; 25 silver medals; 25 bronze medals; classes not yet specified.

The Storrs & Harrison Co., Painesville, O.—Trophy, $25; class not yet specified.

Charles H. Totty, Madison, N. J.—Cup, value $50, for 6 vases of chrysanthemums, single varieties, one color to a vase; 20 sprays in each vase.

Ellwanger & Barry, Rochester, N. Y.—Silver cup for best collection of hybrid perpetual roses.

Frank H. Traendly, 44 W. Twenty-eighth street, New York.—Gold, $50; for

36 chrysanthemums, six varieties in one vase.

Wm. Duckham, Onunda, Madison, N. J.—Cash $25; class not yet specified.

W. A. Manda, South Orange, N. J.—Ornament set with precious stones, value $250; class not yet specified.

Kroeschell Bros. Co., Chicago.—Gold, $25; for best vase carnations, not less than 25 blooms any variety in commerce. Must be grown in houses heated by hot water; gold, $25, to the exhibitor using hot water exclusively for heating, who wins the greatest number of prizes at the show.

Foley Manufacturing Co., Chicago.—Two silver cups, each $25; class not yet specified.

Wietor Bros., Chicago.—Cash, $25; class not yet specified.

A. Dietsch Co., 615-621 Sheffield avenue, Chicago.—Cash $10; class not yet specified.

Henry A. Dreer, 714 Chestnut street, Philadelphia, Pa.—Cash $200; classes not yet specified.

Vaughan's Seed Store, Chicago and New York.—Two cash prizes in gold, $20 each, and two silver cups, $25 each; classes not yet specified.

The Cottage Gardens Co., Queens, N. Y.—Cup, value $100, for best vase 100 carnations, variety either not yet in commerce or not introduced to commerce prior to 1906.

Welch Bros., 226 Devonshire street, Boston, Mass.—Cash, $25; class not yet specified.

J. F. Wilcox, 521 Broadway, Council Bluffs, Ia.—Cup, value $35; class not yet specified.

R. Witterstaetter, Cincinnati, O.—For 50 blooms Afterglow carnation; $12 first; $8 second; $5 third.

SALT LAKE CITY, UTAH.—Local nurserymen report a profitable season, about the same as last year, and with as good an assortment of stock on hand as was ever grown in this part of the state. The demand continues to be for fruit and shade trees which find ready sale in Utah, Colorado and Idaho. Secretary Sowles of the Utah Nursery says he can remember, without any effort, when Fremont county, Idaho, was a dreary, sagebrush waste. But now it has been planted up with thousands of trees, so that the aspect of the country has been entirely changed. Salt Lake valley has improved wonderfully, also, in reforestation in the last 20 years.

OBITUARY.

The Late Gustave Wittbold.

Gustave Wittbold.

Gustave Wittbold, the third son of Geo. Wittbold, passed away at his home in Chicago, January 24. He had been ill only a few days, a case of grip quickly going into pneumonia. Mr. Wittbold was born July 11, 1871, and was one of the five sons, all of whom have had their share in building up and maintaining the large interests of the Geo. Wittbold Co. Since the incorporation of this firm, some eight years ago, Gustave has been in charge of the retail department, maintaining two stores, one at 512 N. Clark street and the other at 1657 Buckingham place. He was well liked by all of his customers and acquired a reputation as an artist in his own line. He leaves a wife and two children, and is survived as well by his father, mother and four brothers—Henry, Fred, Louis and Otto. Funeral services were held in Graceland chapel January 27, at 3 p. m., and were largely attended by the local trade.

W. B. K. Johnson.

W. B. K. Johnson, of Allentown, Pa., one of the leading nurserymen of Pennsylvania, died January 22, aged 70 years. He made his fortune in the early 70s, when he made trips to Cuba and South America importing shiploads of parrots to the United States and selling them at great profit. He was an authority on fruit growing, and was long on the staff of both the Pennsylvania and National Agricultural Departments. In his large nurseries near Allentown, he had more than a million trees.

Michel Crozy.

Michel Crozy of Lyons, France, died recently at the early age of 58. He had not long succeeded to the business of his father, the late Pierre Crozy who was famed for his canna garden at Hyeres. Michel Crozy was much esteemed by all who knew him and leaves a widow and three children.

Andrew De Voe.

Andrew De Voe, seed merchant, died at his home, 1919 Bryant avenue, the Bronx, New York, January 26. He was a son of the late Stuart De Voe, who founded the business by starting a seed farm in West Farms in 1838.

John F. Noll.

John F. Noll, a member of the Newark, N. J., Board of Trade, and a seed merchant of that city, died at his home there January 22 of pleuro-pneumonia. He was 38 years old and was a native of Myerstown, Pa.

LYGODIUM SCANDENS is one of the best ferns for trailing, or hanging baskets.

AZALEA HEXE, with its bright red blooms, has made a pronounced bid for favor.

SOOT and lime in equal proportions will do away with those slimy spots on the benches.

REMEMBER that the best stock was never yet produced from weak or diseased cuttings.

GOOD growers of lily of the valley do not care to change the sand, in which the pips are grown, too often.

THE value of lime rubbish and burnt refuse as an additon to soils for cucumbers and tomatoes is not sufficiently appreciated.

FUNKIA VARIEGATA from retarded roots is becoming a popular market plant in England. It should be worthy of consideration on this side, for it is undoubtedly a beautiful plant.

FIELD OF LETTUCE AND SWEET PEAS OF THE HAVEN SEED CO., LODI, CAL.

THE AMERICAN FLORIST

TWENTY-THIRD YEAR.

Subscription, United States and Mexico, $1.00 a year; Canada, $2.00; Europe and Countries in Postal Union, $2.50. Subscriptions accepted only from those in the trade.

Advertisements, on all except cover pages, 10 Cents a Line Agate; $1.00 per inch. Cash with Order.

No Special Position Guaranteed.

Discounts are allowed only on consecutive insertions, as follows—6 times, 5 per cent; 13 times, 10 per cent; 26 times, 20 per cent; 52 times, 30 per cent.

Space on front pages and back cover page sold only on yearly contract at $1.00 per inch net.

The AMERICAN FLORIST Advertising Department is for florists, seedsmen and nurserymen and dealers in wares pertaining to those lines only.

Orders for less than one-half inch space not accepted.

Advertisements must reach us by Monday to secure insertion in the issue of the same week.

When sending us change of address always send the old address at the same time.

We do not assume any responsibility for the opinions of correspondents.

Photographs.

We are always pleased to receive good pictures of trade subjects. Send them prepaid by mail or express carefully packed to prevent injury in transit. Pack them flat, not rolled, with name and address of sender on the back of each picture.

Marcellus A. Patten.

Marcellus A. Patten, who has been chosen president of the American Carnation Society for 1908, is well entitled to the honor bestowed. Mr. Patten has been a member of the S. A. F. almost since its organization, being recorded on the membership list of 1886-87. He has been a member of the Carnation Society since 1898 and has, through his firm, held a front place among the New England carnation growers, the product of its establishment at Tewksbury, Mass., ranking high in Boston both for market and for exhibition. He will do credit to the office.

A COMPLETE report of the meeting last week of the National Council of Horticulture will be found on page 21.

EXPERIENCED American Beauty rose growers, who have a light soil only at command, prefer grafted to own root plants.

W. N. RUDD'S comments elsewhere in this issue on the varieties shown at Washington are commended to all carnationists.

"THE Rose Bush; It Blooms Monthly," is the title of a Philistine-like publication published in the Lennox Building, Cleveland, O.

THE beautiful and sweetly scented Daphne Mezereum should be planted in sunny warm nooks where its flowers are delightful in early spring.

SUBURBAN LIFE is now owned by the S. S. McClure Co., and is expected to come forward as a rival of Country Life and the Garden Magazine.

THE pupils of the public schools of Illinois have, it is said, voted to choose the purple violet as state flower and the white oak as the native state tree.

PANSIES are not usually too plentiful around Easter and a simple way of having an abundance is to sow seed of a good strain now and devote a bench to them.

SOME of the new chinaware shown this season is very beautiful and artistic, but there appears to be a danger of turning florists' stores into china shops. And, after all, flowers look far nicer in plain vases than in figured ones.

IT is reported that there are 206,000 empty freight cars idle on the railroad tracks of this country at the present time. The bank failures in 1907 are more than 13 times greater in money involved than during 1906.

The Cottage Gardens Co. won four firsts out of the eight classes of 100 blooms; other winners of firsts in these classes were E. G. Hill & Co., Chicago Carnation Co., H. Weber & Son, and John Reimels, each winning one.

THE introduction of new varieties is such a live question to both introducers as well as buyers that the paper of Mr. Skidelsky and the letter regarding it by C. L. Washburn will be read with interest everywhere. We shall be glad to have further comments.

ON the attendance at and interest taken in the Washington convention the Carnation Society may well felicitate itself of all the children of the S. A. F. None can claim conventions better attended or flower exhibitions in which greater interest is regularly taken.

LAWSON-ENCHANTRESS as a name for a commercial carnation, considering that we have already an Enchantress and a Lawson, is about the weakest thing in nomenclature that has come to our notice. A fine, large package of woe awaits the wholesale cut flower grower who attempts to handle it under that name.

WM. TRICKER, of Arlington, N. J., calls our attention to an error in a reprint article on "Waterside Plants," wherein Aponogeton distachyon is described as having flowers of a bright yellow. This is so obviously wrong that it would not deceive anyone acquainted with these plants, as the flowers are well known to be white, with purple stamens. It is a true aquatic rather than a waterside plant.

GLASS is very cheap at the present time notwithstanding the fact that there is less in the hands of both the manufacturers and jobbers than there has been in years on account of the long delay in the factories getting started, very few having operated since April 20, 1907. The demand for greenhouse glass is very good now and it is expected by the best informed people that prices must be higher within a few days.

CUSTOMERS have to be studied when preparing cut flower or plant decorations and many insist on a greater quantity of both flowers and plants being used than is necessary to create a good effect. But florists in some instances foster this by using these in too large numbers, even without orders, and the beauty of individual specimens is often lost. Much of the beauty of kentias and other palms lies in the fine, graceful stems and these are too often hidden by masses of other plants right up to the foliage. Many of the baskets sent out are solid masses of foliage and flowers, the outline, where stray fronds or leaves escape, being the only pretty part about them.

Rose Name Changed.

W. N. Rudd, secretary of the Society of American Florists, informs us that Paul Niehoff of Lehighton, Pa., desires to change the name of his pink rose, registered as Aurora, to Lovely, as he learns there is a European variety in existence bearing the former name.

The American Rose Society.

ADDITIONAL PRIZES.

There is offered a silver cup, valued at $25, by H. F. Michell Co., Philadelphia, Pa., for 50 blooms of Kate Moulton rose.

F. R. Pierson Co., Tarrytown, N. Y., offers a silver cup, valued at $25, for the best new rose not in commerce nor yet exhibited before the American Rose Society.

There has been mailed to every florist or grower located in Chicago a copy of the schedule for the annual exhibition. August Poehlmann, Morton Grove, Ill., is duly appointed chief of the executive committee to represent on the spot the American Rose Society. Any entries, prizes or other matters should be forwarded to the secretary of the society. BENJAMIN HAMMOND.

Fishkill-on-Hudson, N. Y.

The Rust Disease of the Hollyhock.

The New York College of Agriculture, department of plant pathology, Ithaca, N. Y., is now undertaking a careful and exhaustive study of this hollyhock disease. It is well known as one of the most serious and widespread of the plant. Under the most serious attacks of the disease the plants are almost entirely defoliated and the blossoms greatly reduced both in size and number. Some preliminary experiments previously carried on indicate that this disease can be readily controlled by the use of certain spray mixtures. It is now proposed to test this out the coming summer and publish a full account of the disease and how it may be controlled. The solution of this will undoubtedly be of great benefit to the seedsmen, many commercial florists and all who cultivate the hollyhock for pleasure or profit. H. H. Whetzel, assistant professor in charge of this, asks for contributions of seeds or cuttings of any hollyhocks, hibiscuses or mallows for use in these trials. He hopes not only to determine what spray mixtures are most efficient, but to ascertain if any varieties are immune to the disease.

Department Store Flowers.

ED. AMERICAN FLORIST:—

Can some one tell us why the department stores can sell violets 25 in a bunch at 10 cents per bunch, while the cheapest violets selling at wholesale are 12½ cents per bunch. We cannot see why the wholesaler or grower does not give the retailer opportunities like this. The department stores make money on nearly everything they sell, particularly in Kansas City, and this has occurred time and time again and we would like to be advised by some one of the American Florist's readers.

Kansas City, Mo. A. E.

Meetings Next Week.

Dayton, O., February 6.—Dayton Florists' Club, 37 E. Fifth street.

Des Moines, February 4, 8 p. m.—Des Moines Florists' Club, Iowa Seed Co.'s store.

Detroit, Mich., February 5, 8 p. m.—Detroit Florists' Club, 38 Broadway.

Grand Rapids, Mich., February 3.—Grand Rapids Florists and Gardeners' Club, Board of Trade rooms, Pearl street.

Hamilton, Ont., February 4, 8 p. m.—Hamilton Gardeners' and Florists' Club, office of member.

Indianapolis, Ind., February 4, 7:30 p. m.—State Florists' Association of Indiana, State house.

Louisville, Ky., February 4, 8 p. m.—The Kentucky Society of Florists.

Old Nick in Flowers.

At the national convention of the Veiled Prophets of the Enchanted Realm held at Syracuse, N. Y., October 1, a rather unusual floral piece was executed, among other devices, by Bard & Davis, of his satanic majesty and the illustration herewith is reproduced from a photograph taken there.

Now Ready in Quantity. E. A. BEAVEN, Evergreen, Ala.

National Council of Horticulture.

A meeting of the National Council of Horticulture was held at the Auditorium Annex, Chicago, January 22. In accordance with the original stated composition of the council, the term of service of the delegates at large was arranged so that one-third or three of the number should expire at the end of each calendar year. The delegates were accordingly divided into groups as follows:

Terms expiring December 31, 1907—J. H. Hale, H. C. Irish, Professor E. J. Wickson.

Terms expiring December 31, 1908.—J. Horace McFarland, Professor L. R. Taft, Professor W. W. Tracy.

Terms expiring December 31, 1909.—Professor W. B. Alwood, Professor S. Beach, Professor S. B. Green.

By unanimous vote, the following were elected to succeed those whose terms expired December 31, 1907: Professor R. S. Macintosh, Auburn, Ala., to succeed H. C. Irish; Professor W. T. Macoun, Ottawa, Ont., to succeed J. H. Hale; Professor E. J. Wickson, Berkeley, Cal., to succeed himself.

It was voted to request the national organizations represented in the council, if agreeable to them, to take necessary action authorizing the secretary of such organizations to be one of the delegates to the council.

After full and free discussion the following plan was arranged for the press bureau service for the coming year:

(1) That at least 68 articles be used or four for each week for a period of 17 weeks.

(2) That these articles be sent on each of the 15 weeks from February 15, to May 31, and the last week in September and first week in October.

(3) That the secretary be authorized to expend not more than $75 for the preparation of 50 articles, which, with 20 already in hand, will give the desired number.

(4) That these articles be prepared at the earliest practicable time, and copies made and submitted to the delegates from the contributing organizations for their approval.

(5) That the matter be sent to about 500 newspapers and newspaper syndicates (through whom it goes to several thousand publications), which will cost $30 per week for four articles.

(6) That a schedule be prepared giving the title of each article to be used, and the date when it is to be sent out; this schedule to also include a list of the newspapers and newspaper syndicates to which the articles are to be sent.

The secretary reported funds on hand of $114.28 and he has been advised that the Society of American Florists have set aside $150; the American Association of Nurserymen, $200; the American Seed Trade Association, $200, or a total of $550 for the purpose of the council, which together with the funds actually in the hands of the secretary make a total of $664.28 for press bureau service during the year. The schedule of expenses as outlined amounts to $585 which, if expended, will leave a balance at the end of the year of $79.28.

A letter was read from J. Horace McFarland, suggesting that an effort be made to encourage the improvement of the planting conditions about country schools, by including in the press bureau service articles which would show the desirability of such planting, and enlarging upon the bleakness and unattractiveness of so many of the country schools, and to emphasize the desirability of using for the most part, hardy native plants, and at the same time, where school grounds are sufficiently capacious, to encourage the development of the children's garden idea. The writer referred to several examples, namely: Washington, D. C., Yonkers, N. Y., and Rockford, Ill., where much has been done along this line. It was proposed to get a few such articles prepared.

Mention the American Florist when writing

A letter was read from J. F. Wilson, secretary of the American Nut Growers' Association, giving suggestions in reference to the exploitation of horticulture, and explaining the work that is being done by that organization.

A letter was read from J. W. Fitch, secretary of the Wisconsin Cranberry Growers' Association, inquiring about the press bureau service and the practicability of using a few articles on the importance of cranberries as an article of diet. The secretary was instructed to correspond with Mr. Fitch offering to use four articles at the approximate cost for such service of $25.

Letters were read from officers of several state and district societies in response to a circular letter sent out by the secretary of the council to such bodies some weeks ago.

H. C. IRISH, Sec'y.

Cheer Up.

A little old man came riidng by,
Said I—"Old man your horse will die."
"Suppose he does" I'll tan his skin
And, if he lives, I'll ride him agin."

Roses and Carnations A Specialty.....

WHOLESALE GROWER of CUT FLOWERS

Chicago.

TRADE FAIRLY ACTIVE.

Trade has been fairly active the past week, with prices generally a little stiffer. McKinley day helped out considerably with the sale of carnations, especially red, but funeral work has been the main dependence and large quantities of white stock of all sorts have been moved. Bride roses early in the week continued rather on the short side of the market, in spite of the fact that these are now coming in good crops. Bridesmaid and Killarney are also coming in large quantities. Richmond remains about the same as heretofore with the demand taking about all that comes in. Carnations have been very slow sale, but the demand has improved very considerably, although prices were still down early in the week. The cold spell shortened the supply somewhat and at the same time helped sales. Violets are down in price and slow sale. Lilies are a trifle scarce, but they are in small demand. Roman hyacinths and Paper White narcissus also move slowly. Daffodils are meeting with a better demand. Green stock generally is not very active, but common ferns are in good demand for made-up work.

NOTES.

Christian Clemensen, of Cheltenham Beach, has acquired a plot of ground at the corner of Seventy-eighth street and Railroad avenue and will erect thereon two large show houses, 26x150 feet and 32x100 feet, respectively. These will be built fronting the two stores and into the angle form he will gradually place the range now located at 8128 Sherman avenue and where he carries a fine line of bedding and decorative stock.

Edwin A. Kanst, secretary of the Horticultural Society of Chicago, read a paper on "Trees and Shrubs" at Boulevard hall, Garfield boulevard and Halsted street, January 22, at the meeting of the Illinois Federated Women's Clubs, third district. About 150 were present. The address covered questions of varieties, planting, and insect enemies.

Geo. Fisher, local buyer for the H. A. Fisher Co., of Kalamazoo, Mich., report that firm opened a branch store at 41 N. Jefferson avenue, Battle Creek, on January 29. A big reception was held and every visitor was given a carnation as a McKinley day souvenir. Music was a feature of the day.

Some account of the life of Gustave Wittbold, who died last Friday, will be found elsewhere in this issue. It was a rather melancholy coincidence that made the day of the funeral (January 27) the same as the thirty-fifth birthday of his brother Louis.

Some very fine Winona carnations are to be seen at the Kennicott Bros. Co's. place. At E. E. Pieser's home on Tuesday evening 300 of them, sent there by the originators, F. Dorner & Sons Co., were used, and Mr. Pieser says they appear to better advantage under artificial light than blooms of any other variety he has seen.

A big fire Tuesday night destroyed a million dollars worth of buildings and stock on Wabash and Michigan avenues. The Keith firm, burned out about 9 o'clock at night, had an advertisement of their new location in the next morning's paper!

The Chicago delegation to the Washington convention of the American Carnation Society includes the following: August Poehlmann, W. N. Rudd, J. E. Jensen, Geo. Asmus, J. S. Wilson, A. T. Pyfer, Peter Olsen, A. F. Longren and Fred Lautenslager.

Wietor Bros.' place is in especially fine shape at the present time, carnations never having appeared to better advantage than now. Houses devoted to the cultivation of Lawson are in especially heavy crop.

Miss Mary Hicks, of Racine, Wis., has taken over the business of her sister, the late Mrs. C. W. Pike. Miss Hicks has this week been the guest of Mrs. W. E. Horton at her Evanston home.

J. D. Carmody, of Evansville, Ind., who has been spending a few days in town, plans soon to start for a Pacific coast trip via Florida, Cuba, and Panama.

Bassett & Washburn report the beginning of big crops of Bride, Bridesmaid and Killarney roses from which they are cutting very heavily.

Peter Reinberg, Anton Then, Adam Zender and John Fichter are hunting and fishing in the neighborhood of Elberta, Ala.

Weiland & Risch report the possession of a new seedling rose of which they report wonderful things.

Abe I. Simmons is still in the hospital and though scarcely holding his own last week seems to be mending, as we go to press.

L. H. Vaughan and wife are to be congratulated on the arrival of a baby girl at their home.

Greenhouse builders here report more inquiries than in any previous January.

J. E. Hauswirth's baby boy, aged 4 months and 21 days, died last Saturday.

J. B. Deamud on Friday last left to spend a few days in Michigan.

Visitors: H. E. Philpott, Winnipeg, Manitoba; Fred Rentsehler, Madison, Wis.; Frank Stuppy, St. Joseph, Mo.; C. B. Knickman, representing McHutchison & Co., New York.

ORDERS BOOKED ONE DAY IN ADVANCE.

All other seasonable cut flowers in good supply.

St. Louis.

PRICES HOLDING UP.

The market the past week has held up well and the scarcity of white flowers has been apparent. Graduating exercises and funeral work, together with other social events, has caused the week to be a very busy one. The weather up till midnight of Wednesday was warm and spring like. By Thursday morning it was below freezing and at time of writing it is cold and clear. Quite a few yellow and white tulips with long stems are in and sweet peas are also coming in with longer stems. Violets have been very abundant; prices for January have proved much lower on these than last year. Asparagus Sprengeri and A. plumosus are selling well. Roses have brought good prices and carnations are holding up well.

HORTICULTURAL SOCIETY MEETING.

The Horticultural Society met in annual session January 21 in the Odeon building under the most favorable auspices, with about 40 of the most interested members present, for the purpose of receiving the annual reports and the election of officers for the ensuing year. The meeting was called to order and presided over by Vice-President J. H. Gundlach. After the usual ceremonies incumbent on such occasions the secretary read the first annual report, the principal points of interest being, that the society first sought existence in October, 1906, and had succeeded in presenting to the city of St. Louis during the last year one beautiful spring show and one still greater fall show, upon which the officers reflect with much pleasure. One hundred and fifty members are enrolled to date and the greatest enthusiasm prevails. The treasurer read his report which was short but wholesome and showed a very heavy balance on hand to commence the new year with, in addition to having withstood one free show and one that lacked the proper attendance.

Edward Mallinckrodt was unanimously elected president. Leonard Matthews first, Alexander Waldbart second, J. B. Gazzam third, and J. H. Gundlach fourth vice-president; Fred C. Weber treasurer and Otto G. Koenig secretary. The following 10 were elected as an executive committee: F. W. Brockman, C. B. Nicholson, C. C. Sanders, Theo. Miller, Fred C. Weber, Hy. Young, A. Meyer, Jr., Fred H. Meinhardt, Emil Schray, and A. Jablonsky. Twenty directors and several standing committees will be appointed by the president in due course. Anxiety was expressed for the holding of a spring show, and the matter referred to the executive committee, who, it is expected, will reproduce one similar in beauty to the one held last spring, if in fact they cannot improve on same; this show will be held some time in March.

NOTES.

Mrs. Charlie Schoenle was brought home last week from the sanitarium after undergoing a painful operation. She is anxious to get back in the store but Charlie says no, not within a month.

Young & Sons' mail orders are pouring in. They had the decorations for dinner at the Planters' hotel given to the directors of Butler Bros.' notion establishment.

J. W. Dunford is again in the retail business in the down-town district; he has also a store in the west end managed by Mrs. Osterlag.

E. G. Kelley and W. F. Petschonek have a very pretty store; they had the bouquets at Central high school for the graduating exercises, red carnations being used.

Grand Leader is selling large quantities of bulbs and seeds. Frank Bucksart is in charge of this department.

Werner Bros. have three houses of carnations and California violets; their stock is looking very fine.

C. A. Kuehn reports trade as good, plenty of stock, a slight shortage in roses.

Visitor: Martin Reukauf, Philadelphia, Pa.

W. F.

Cleveland.

LILIES SCARCE.

Business the past week has been very brisk in all lines, especially the funeral trade. All flowers have been cleaned up each day, especially roses and light colored carnations. Lilies are sold ahead of arrival and Harrisii has not been delivered for the past week on account of all the storage stock being cut and the new stock not having matured as yet, although reports show a good supply in the next few weeks. Bulb stock of all kinds is coming in in large quantities and selling better than the past few weeks. Stevia is about all done; the last seen was Saturday from J. W. Wilson's. Lily of the valley has been a short item here for some time and prices in this line have held up well. Sweet peas are coming in with a rush, and the quality extra fine; prices rule about the same as a year ago, with everything sold. Asparagus plumosus and A. Sprengeri are both in good demand with a good supply in sight. Smilax still remains in oversupply and practically a drug on the market. Common ferns have advanced to $2 per 1,000 under a sharp market. Single violets at this writing are in good demand with good supply.

NOTES.

The writer, in company with the following, paid a visit of inspection to the Lamborn Floral Co. of Alliance. My genial escorts were Isaac Kennedy, of West Park; John Merkel, of Mentor; T. J. Kirshner and George W. Smith of the Cleveland Florists' Exchange, who handles the stock from this firm. This plant consists of a modern range of glass comprising houses all 300 feet long and 30 feet wide all built in the most improved manner in the last few years. The firm makes a specialty of roses and carnations, although a large variety of stock suitable for a large market is also grown. American Beauty rose is grown here in large quantities and the success has been so that it will add to the already large planting by further additions the coming season. Bride, Bridesmaid, Mme. Chatenay and Richmond are also grown. All the two and three year old stock are on their own roots and this year's planting is all grafted stock. Mr. Bodtick, the superintendent, thinks the latter method will in time replace the own root stock. In carnations we saw all the standard and new varieties grown to perfection with a steady cut in sight. Smilax and asparagus are also grown in large quantities, also lilies including callas, Harrisii and longiflorum. Bulb stock is handled only in a lesser way, the chrysanthemum houses being utilized for this purpose. The heating plant consists of two 100 h. p. boilers with traps for returning the condensation. One great feature of this place is a large manure tank that can be heated to any temperature for feeding the entire system of houses. This place is one of the largest and most productive plants in this section and by the appearance, the proprietor, L. L. Lamborn, and the superintendent deserve great credit. After inspection we were taken to dinner at the Kappler house, as guests of the firm, after which, Mr. Lamborn escorted us for a drive of sight seeing through the city and surroundings. The trip was a most enjoyable affair and our most hearty thanks were extended the firm and its heads for the generosity and good fellowship shown us.

Miss Lucile Schmitt, formerly bookkeeper for Smith & Fetters, will be married to Jas. G. Moore on February 5. The best wishes of the craft will go with them as Miss Schmitt has been very popular among the trade.

Don't forget carnation night at the club February 10, as some of the growers have something good under the hat to show you. Some real roses and other stock will also be shown, also a good time.

Mr. Jones, head decorator for The Gasser Co., will leave shortly for California for his health; the employes are planning a swell reception for the send off.

Knoble Bros. of West Twenty-fifth street have had one of the prettiest windows in this city for some time. FORESTER.

Buffalo.

TRADE ONLY FAIR.

Weather conditions have varied the past week, from extreme cold to a heavy snowstorm followed on Sunday by rain. Trade has not been rushing. The opening of a new hotel gave the florists one busy day. Funeral work has been the only other work. Roses are plentiful, as also are carnations. Bulb stock is now coming in in good quantities. The thermometer at the present time registers 10° above zero, with a bad wind, making it about the coldest day we have had this winter.

It seems now that the talk of removing the Botanical Garden may be a reality. Several propositions have been suggested for locating the greenhouses on park property. The latest is building on the Pan American grounds with a proposed greater university, all being a continuation of the beautiful Albright art gallery, the Historical Society building, the new Natural Science building, all being on the Pan American grounds and adjoining the park. If carried out as projected it would be an ideal thing for this city. It seems too bad to have to remove the Botanical Garden and greenhouses after the years spent in erecting them. If rebuilt it would be at least five years before they would again be open for the public good as at present, but such is the outlook.

The first consignment of bulb salesmen arrived last Tuesday, followed up by the Hon. Harry Bunyard as usual bound somewhere and in a hurry. W. J. Smith, representing Wm. Boas & Co., Philadelphia, Pa., also called.

They say the charter of the Florists' Club is

locked up in Wm. F. Kasting's safe. Should President Neubeck get in the same room as that safe is in, there might be a meeting.

J. B. Wiese, czar of the Chippewa market, departed for Chicago on Thursday on a pleasure trip.

The Buffalo Cut Flower Co. is handling some extra fine Bride and Bridesmaid roses at present.

The Wm. Scott Co. is getting some fine roses and carnations from its Corfu greenhouses.

BISON.

Minneapolis.

BUSINESS SLOW.

There has been a very marked scarcity of roses for the past two weeks; carnations are tolerably plentiful, but do not come near meeting the demand. Bulb stock is very plentiful, and extra good. Growers are busy putting in their carnation cuttings, and otherwise preparing for spring and summer trade. A number of the customers who patronize the higher class stores have gone south, and their absence is felt in the diminished orders.

NOTES.

The Twin City Florists' meeting, January 21, at Holm and Olson's store in St. Paul was attended by about 75 florists from the two cities. A lot of business was transacted. E. Nagel read a paper on "Spring Plants" which was generally discussed. A smoker followed the meeting, and there are prospects of better coalition among the florists than there has been for a long time.

Theodore Wirth has been ill the greater part of the past week, but is now out again.

Visitors: B. Eschner from M. Rice & Co., Philadelphia, Pa.; W. J. Phare, of Willmar, Minn.

M.

PASADENA, CAL.—Committees have been appointed to arrange for the annual flower show of the Gardeners' Association, which will be held on April 2-4, inclusive.

CANON CITY, COL.—The Colorado Horticultural Association will hold its next annual convention in this city in February, according to an announcement made by President W. S. Coburn. It is the purpose of the board to make the gathering the largest ever held by the organization.

BUSINESS FAIR.

A baby blizzard swept over the city last Thursday, leaving in its trail the heaviest snow of the season. No damage resulted, however, the only trouble being delayed street car and railway travel. There is not much snap to business, but there appears to be enough doing to keep any surplus from accumulating. Although considerable extra glass was added the past summer and is all in working order the various avenues of trade seem to take up the increased stock and it has made appreciable difference in prices. White roses are the color that just now makes the best returns, as anything worth while brings $8, while the higher grades readily command $12 and $15. American Beauty is a trifle more plentiful; $5 to $6 per dozen is now asked for the specials. Fancy Killarney and Richmond are much in demand at $15 and a few higher. They are worth it, as one storekeeper expressed it, just to look at. Fancy carnations are seen in all the leading varieties, some few selling as high as eight cents. Spring flowers, tulips, daffodils and other like blossoms are now plentiful and there is a drop in the prices. The best Golden Spur are down to $3, as are also tulips. The new crop lily of the valley is making its appearance, the first cutting of this season's importation being sent in from the Floracroft Gardens, Moorestown, last Monday. Sweet peas are much more plentiful this season than we believe they have ever been in this market. Very good stock is seen in all colors, prices ranging from 50 cents to $1.50 per 100; $6 per 100 sprays is about high for freesias, very good stock being offered at $2.50 to $3. Orchids are plentiful with the price holding very well. Cattleyas have not sold below $5 per dozen for good fresh stock.

NOTES.

The carnation meeting at Washington is the center of attraction this week and many of the craft will take a run down to look over the new things to be seen there for the first time. Wm. P. Craig will have a vase of the new rose, Mrs. Jardine, at the convention. He is booking a lot of orders for this novelty. There are many visitors to the Scott nurseries at Sharon Hill to see it growing and interested parties seldom come away without leaving an order for some of the stock. Dennis Connor, representing the Lord & Burnham Co., will also attend. E. J. Fancourt will be there in the interest of the S. S. Pennock-Meehan Co., which is selling rooted cuttings of many of the best varieties. E. A. Stroud, of Strafford, is taking a few of his best cut blooms, his Beacon particularly being about as good as seen anywhere. Jos. Heacock has a very fine pink which should also get a place, as it will certainly be in the race.

The Wm. Graham Co. had the decorations for a large private ball at Horticultural Hall last week. The color scheme was pink, large quantities of Enchantress carnations being used, as well as pink roses. The ceiling was canopied with greenhouse smilax which extended over the entire dancing floor. Quantities of palms and ferns were also used. These with the addition of thousands of small electric lights made a very beautiful display.

The Leo Niessen Co. is having the best orchid season this firm has ever experienced. Mr. Niessen says the demand for orchids is rapidly growing. They offer at this time a splendid lot of cattleyas and Lælia anceps alba.

Hustling John McIntyre keeps his immense stock of single violets moving, finding a ready sale for them. Daffodils are also a feature of his stock.

E. Reid has just returned from a trip south as far as North Carolina. He reports trade quite up to the mark through this region.

Wm. McKissick's storeroom presents a brilliant showing of carnations these days. It is like a miniature carnation exhibition.

K.

Boston.

TRADE TEMPORARILY DULL.

A decided falling off in trade during the week has worried the minds of the pessimists but with little real foundation. The first real winter weather came in with a rush the latter end of the week. High wind, several days of the expected low temperature and a heavy blizzard, have strongly reminded us that the winter is not yet gone. Carnations and bulb stock have been burdensome and a heavy surplus is accumulating. Roses of most varieties are plentiful, but still are at top prices. With the beginning of the week an improvement in this stock is expected. American Beauty is at a premium, the local market being entirely off crop and the foreign markets meeting the trade with excellent stock. Very few of these roses can be purchased at less than $9 per dozen. As fine a selection of Killarney as has ever been displayed in the city are now coming in. They are more in demand than all other roses combined. Richmond and Mme. Chataney have been disappointing: they having weakened under the sudden changes of the weather. A limited amount of excellent Bride and Bridesmaid is being received and meet with popular approval. The large sales of bulb stock and novelties have seriously hampered the moving of carnations, and in consequence the market is over-supplied. Some rare specimens of fancy and ordinary orchids are displayed and with violets and gardenias are the choicest products of the market. Flowering plants of new varieties are slow in coming to view. Genistas have re-appeared during the week and are excellent.

NOTES.

It was a merry party that left for the carnation show on the 9 o'clock train, January 27. Composing the delegation were a representative party of the carnationists of New England, and men famed for their interest in other products, including Wm. Nicholson, Peter Fisher, M. A. Patten, Allen Pierce, Geo. Buxton, Samuel Goddard, Wm. Sim. A. Roper, E. Sutermeister, and Messrs. Strout, of Biddeford, Me.; Mitchell, of Waterville, Me.; Midgeley, of the Worcester Rose Co., and McManmon, of Lowell.

It will be good news for the numerous acquaintances of Walter Holden, who for several years has represented L. E. Small in the Music Hall Market, to learn that his recovery from a siege of typhoid fever is now assured. He is now sitting up daily and is expected out in a week or two. Mr. Holden has been ill since Thanksgiving and has undergone a severe strain and his case has appeared hopeless several times.

The many friends of Bernard McGinty, the genial salesman of the Music Hall Market, extend their deepest sympathy to him, he having buried during the week his daughter Marion, age 18 months, she being a twin to his daughter, who is alive and well. The case is particularly sad and her loss is severely felt by both father and mother.

W. H. Elliott is showing as fine a crop of Killarney roses as has ever been seen by the local growers. With a large, well colored bloom, admirably supported by a long and strong stem, well furnished with foliage of unusual vigor, this rose has few if any superiors and is the choice of the present rose market.

J. Fuller, of Leominster, is disposing of an excellent crop of Easter lilies at the Park Street Market, through his salesman, Wm. Aylward. Mr. Fuller is a new shipper to Boston and his goods have rapidly found their way to the higher class products.

Patten, first; S. J. Goddard, second; M. A. Patten, third. Daybreak pink—S. J. Goddard, first; M. A. Patten, second. Dark pink—S. J. Goddard, first; M. A. Patten, second and third. Crimson—S. J. Goddard, first; M. A. Patten, second and third. Striped—M. A. Patten, first; Backer & Co., second.

Gratuities—Wm. Riggs, Leptosyne maritima; Dr. C. G. Weld, Primula Kewensis; F. Davis, Begonia Gloire de Lorraine; Mrs. Fred'k Ayer, Erica melanthera; E. A. Wood, mignonette; Gen. S. M. Weld, Primula Kewensis; Mrs. J. M. Sears, Celsia arcturus.

Honorable Mention—Walter Hunnewell, Corydalis Wilsoni; R. & J. Farquhar & Co., Begonia Gloire de Lorraine superba; Mrs. H. F. Durant, Schizocentra elegans (Heeria Mexicanum).

Vote of Thanks—Walter Hunnewell, camellias.

Cultural Certificate—Wm. Ritchie, gardener to Mrs. J. M. Sears, Celsia arcturus.

Lenox, Mass.

The regular meeting of the Horticultural Society was held January 18, President Jack in the chair. Percy Ellingo was unanimously elected a member of the society. The schedules for the August and fall exhibitions were approved as read. S. Carlquist was awarded a diploma for a fine vase of Celsia arcturus. The annual banquet of the society will be held at the Curtis hotel, February 15, and promises to excel anything ever held by the society. The fourteenth annual concert and ball was held in the town hall January 22. This event is always looked upon by the people of this city as one of the chief attractions of the winter season, and this proved to be no exception to the rule, as there were fully 200 couples participating in a very enjoyable evening. The committee of arrangements, of which H. P. Wookey was chairman, is to be congratulated upon the social and financial success attending their efforts.

G. H. I.

New Canaan, Conn.

A new conservatory has been built, for large palms, and a new Lord & Burnham boiler has been put in for the heating on the Misses Childs' estate north of here.

Patrick Haverty, gardener to J. T. Burns, has had great success with Enchantress and Aristocrat carnations, shipping a large number daily to New York.

J. T. Burns, manager of the Lindenfield estate, is having fairly good luck with his grafted roses.

Drummers, in plenty, are the gardeners' visitors just about this time of the year in this vicinity.

L.

Pittsburg.

STOCK PLENTIFUL.

The few days' sunshine brought out an abundance of carnations and the wholesalers have colored stock to peddle, funeral work taking up the white stock. There is an abundance of Rose Pink Enchantress coming in. Some complain about this carnation being too soft, but it finds good sales when in good condition. The local growers are preparing for the carnation show Tuesday night and there is certain to be a fine collection, probably the best ever staged in this city. The plants in the benches are a magnificent sight at present. McKinley day orders are not to be seen so far. Undoubtedly the florists are letting a golden opportunity slip by in not booming this event. Roses are more plentiful, Bride being very fine. Violets, while selling better, are still slow; bulb stock is very plentiful, especially Roman hyacinths.

NOTES.

The Pittsburg Cut Flower Co. is handling a very nice line of American Beauty roses.

J. B. Murdoch & Co. are receiving very fine Enchantress and white carnations.

The Pittsburg Florists' Exchange is disposing of a belated crop of poinsettias.

A. M. Murdoch and wife are on a visit east.

J.

MANSFIELD, MASS.—Wm. Brown is at work again, after a severe attack of pneumonia.

BAR HARBOR, ME.—Lord & Burnham, New York, are building a $7,000 greenhouse for James I. Kane.

MALDEN, MASS.—E. D. Kaulback & Son had the decorations for the wedding of W. H. Keen and Miss Annie Maria Sargeant at the home of the bride, January 16. The reception room was decorated in yellow roses, palms and ferns, the living room in pink and the dining room in red.

New York.

HEAVY SNOWSTORM.

The great snowstorm of January 23-24, while it did not exactly plunge the wholesale district into gloom, gave a number of the boys an opportunity to test the quality of cheerfulness derived from intimate association with snow shovels. It was an old-fashioned blizzard, and the fellows who have all along been telling us that the weather was too fine for good business, should have been immensely pleased. On the morning of January 25, shipments of stock were very late in arriving; it was afternoon before some of them got in, 11 A. M. being considered a good record. When New York has a storm there is sure to be something doing over in New Jersey and this occasion was no exception to the rule. The Summit express, which runs on a pretty regular schedule, and carries flowers to this city, had a rough trip, arriving late with fagged horses. As a consequence but little business was transacted in the forenoon and buying was light throughout the remainder of the day. While during the first few days of the week business was fairly good, the market has at no time been very active, the storm had a bad effect on retail trade and though there was more activity on Saturday prices continued low. Business is, in short, very unsatisfactory. The better grades of roses and carnations clean up fairly well but the bulbous stock continues to drag, this condition being due largely to over-supply, excepting possibly the Golden Spur narcissus, which is now selling very well.

NOTES.

Byron Abbott, employed by Wm. W. Matthews, Great Neck, could probably get a job as a detective if he wanted it. On the night of January 21, Mr. Matthews' office was broken into and a clock stolen. Shortly after discovering the theft, the next morning, Abbott boarded a Long Island train to this city. He had just got seated when he heard a familiar ticking from the seat in front of him, which was occupied by two men. Closer investigation showed that their baggage consisted of four well-filled sacks. At Flushing, Abbott called Policeman McCarthy, who arrested the pair. The clock and other plunder in their possession was identified by Abbott as having been stolen from Mr. Matthews.

The Scottish Society gave its twentieth annual Burns celebration January 23, at Mendelssohn hall. Alexander McConnell, the Fifth avenue florist, is a member and active promoter of this society. A stanza from one of Whittier's poems is appropriate in this connection:

"In smiles and tears, in sun and showers,
The minstrel and the heather,
The deathless singer and the flowers
He sang of—live forever."

The Johnston Heating Co., which is now located at 138 East Thirty-first street, is making active preparations for next season's business. During the past season this firm put in boilers at a number of the finest private and commercial ranges in this vicinity. One noteworthy contract which they filled was at Greystone, the country home of Samuel Untermeyer, formerly the Tilden estate.

Anton Schultheis, College Point, has just got his big stock of Crimson Rambler roses well started for spring flowering. He sends in daily a big cut of lily of the valley, tulips, etc. There are also many pans of tulips, attractively put up, to be seen at the place. From the quantity of fine pot plants to be seen it is safe to say that Mr. Schultheis will make a very fine Easter display.

The friends of Tim Sullivan will give him a dinner January 29, at the Knickerbocker hotel, at which there will be a decoration of a tiger, done in flowers. That will be a backset for the people who think the Tammany tiger should be done with a club.

Dutcher & Son, of the Coogan building, who have greenhouses at Nyack, are just now handling fine carnations and freesias.

Joseph S. Fenrich, who has been quite ill with grip and threatened with pneumonia, is recovering.

Cincinnati.

TRADE VARIABLE.

Business took a decided slump toward the latter part of the week but on Saturday the florists were quite busy, and a great deal of stock that had accumulated was cleaned up. Carnations are more plentiful and the price has dropped accordingly; $3 per 100 buys fair carnations; the same may be said about roses, which sell from $8 per 100 down. Lily of the valley is good property but there is a glut of Roman hyacinths and Paper White narcissi. Violets are also a glut, selling as low as 25 cents per 100. Lilies, both callas and Harrisii, clean up every day at good prices. Green goods of all kinds in good demand with a fair supply.

NOTES.

There has been an epidemic of sickness among the florists of this city: C. J. Jones, Wm. Murphy, Henry Schwarz, Gus. Meier, R. A. Kelly and Miss Cora Pherson, bookkeeper for Wm. Murphy, are all able to be about again after having had a tussle with the grip. B. P. Critchell is confined to his home with inflammatory rheumatism, but from last reports he is getting along nicely. Mrs. Henry Schwarz has about recovered from an operation performed at the Bethesda hospital and is again at her home in Norwood.

Hardesty & Co. had a nice window display of lælias the past week. This firm believes in displaying flowers in their windows. Mr. Hardesty handles nothing but high grade stock and says it pays him to give the public a chance to look at fine window displays of choice flowers.

Wm. Murphy has a new seedling rose which no doubt will prove a winner. It is on the order of Mme. Chatenay, only has a richer color and a whole lot more substance. Will is working up a nice stock of it and thinks it will be ready for dissemination in another year.

Weiland & Olinger are cutting some exceptionally fine stock, especially their American Beauty roses, which are coming along in quantity and getting better every day.

E. G. Gillett is now established in his new location, 115 E. Third street, and has a nice place to carry on his business, having everything neatly and handily arranged.

Geo. Corbett is picking the best Prince of Wales violets coming in, and his carnations and callas are the usual high grade stock for which his place is noted.

Geo. Meyer, of the Avondale Floral Co., has the sympathy of the craft in the loss of his brother, whose death occurred January 25.

Ira Clark, Greensburg, Ind., is sending some exceptionally fine carnations to this market which sell at topnotch prices.

B. P. Critchell was the first in the market with sweet peas in quantity which prove to be good stock.

S.

Evansville, Ind.

The trade reports business good with plenty of stock to go around.

A visit to the range of the Wm. Blackman Floral Co. shows things in fine shape, a house of American Beauty roses being especially fine. Frank Fischer, formerly the foreman of The Chicago Carnation Co., Joliet, Ill., has charge of the carnation range, which is at its best.

Julius Niednagel's place is keeping up its standard on Killarney and Ivory roses. Rose Pink Enchantress carnation, their own sport, shows up great. A climbing Killarney was noticed. Mr. Niednagel contemplates a trip to the Fatherland some time this summer.

J. D. Carmody, the sage of "bilers' hand ventilatin kontrapshun" fame, is devoting himself to managing his stag lodging house.

George Blackman has the sympathy of the trade in his oldest daughter's serious illness.

John Elsperman has had an attack of grip but is now able to be out.

Visitors: Chas. Meyer, Ralph Ward, New York; L. Bauman, J. B. O'Neil of Vaughan's Seed Store, Chicago, and the usual winter delegation of Hollanders.

Lafayette, Ind.

The establishment of Fred Dorner Sons Co. shows that careful earnest culture brings big returns. The stock of all the leading varieties shows up well. Winona, their 1908 pink, has a wealth of bud and bloom and promises to make a place for itself. White Perfection at home surely shows that it is the premier white of recent introductions. The propagating house contains a fine lot of cuttings ready to be sent out. Fred Dorner, Jr., reports trade in carnation cuttings opening up fine.

Louisiana State Horticultural Society.

The fifth annual meeting of the Louisiana State Horticultural Society will be held in Minden, February 20-22. The programme will include discussions of subjects presented by the leading scientific and practical horticultural and agricultural men in the state. A representative of the Department of Agriculture will also be present. The following subjects are among those on the programme: "Peach Culture;" "The Cannery;" "Apple Culture;" "Pecan Culture;" "Good Roads;" "Cut Flowers;" "Rose Culture;" "Bird Life;" "New Vegetables and Fruits;" "The Nursery;" "Tomato Growing;" "Plant Diseases;" "Fig Culture;" "Grape Culture;" "Small Fruit;" "Hedge Plants;" "Care of the Orchard;" "Trucking;" "Insect Pests;" "School Gardens;" "Fertilizers;" "Home Improvement;" "School Grounds;" "Horticulture and the Railroads." The secretary is F. H. Burnette, Baton Rouge.

TRAVERSE CITY, MICH.—Business in this section is remarkably good, says Frank M. Paine, the demand being heavy for all kinds of flowers suitable for funerals. We have been especially favored by an abundance of bright sunshine all through January. Carnation stock is looking fine.

TRADE GOOD.

Since New Years, trade conditions have varied considerably. One day will see everything cleaned out and in the next couple of days piles of stock are available with no buyers at hand. The general run of stock at present is far above the average, both in quantity and quality. Roses are in excellent condition, owing to the splendid growing weather prevalent for the last few weeks. There seems to be no end to the improvement in Killarney, which in our community is a very close rival of American Beauty. Richmond is no less worthy of note, some being displayed with 5-foot stems and with flowers as large as American Beauty. Carnations are in the same healthy condition and the demand is unusually good, especially in the lighter colored varieties. The prices as a rule are not so good as they might be. Bulb stock is fairly plentiful but meets with poor sale. Easter lilies are in good demand.

While somewhat belated, it is well to say that, judging from a consensus of opinion gathered at random, the Christmas and New Years trade this year was far ahead of that of last year. The results indeed were surprising to most of the trade, who were expecting about the same amount of business as was done last season. In many respects conditions differed from those of last season, more particularly the volume of business handled at the very last. The outlook for future business seems good and indications point to a swift recovery from the panicky conditions which have been noticeable. Weddings are numerous and other social affairs are being booked which should keep the craft busy until Lent.

NOTES.

The decision of the wholesale implement dealers against floral decorations in their houses for the convention held a week or so ago was perhaps a good move for some of the smaller dealers who could not afford the expense of decorating but proved a loss to the florists who usually secure a good lot of orders.

H. L. Hunt, late of Stiles and Co., Oklahoma City, Okla., was a caller last week. Mr. Hunt recently resigned his position with that firm to take a position with a firm in Nebraska.

Raymond Blessing of the Wm. L. Rock Flower Co., has been on the sick list for several days nursing a poisoned hand caused from rose thorns.

The employes of the Alpha Floral Co. were pleasantly entertained at dinner last week at the home of Alpha Elberfield.

E. Bunyar has been cutting a nice stock of single violets and stevia this season.

We are glad to see Chas. Heite again able to be about his duties.

TRADE IMPROVING.

Business has picked up slightly in the past week, possibly on account of several small weddings and funerals. The prospects for improvement are small and we can only look forward to what each day will bring forth in the way of work. Tulips and daffodils are coming nicely now, but the daffodils are still somewhat small. Some nice lily of the valley is on hand. Violets are going rather slowly just at present.

Rob't Schenck has bought out the Columbus Floral Co., formerly belonging to Mrs. Jones, and will continue at the old stand. Mr. Schenck promises some innovations in the decorative art promises some innovations in the decorative art.

CARL.

Pasadena, Cal.

Accepting a hearty invitation to a social entertainment, a large number of members of the Gardeners' Association, with their wives, their families, and their lady friends, met at the residence of their president, John Blake, on the evening of January 18, and were duly entertained in lavish style. Dancing was freely indulged in, and song and sentiment intermingled. During the course of the evening, G. Nilsson, in the name of the Pasadena Gardeners' Association, with a few eulogistic and appropriate remarks, presented Mr. Blake with a handsome timepiece and a handsome pair of candelabra as a token of regard and esteem, and in recognition of the valuable service Mr. Blake has at all times so cheerfully given the association.

Mr. Clinch, replying on behalf of Mr. Blake, proved himself a ready and eloquent speaker; outlining Mr. Blake's career, he spoke in the highest possible terms of the many good qualities he has always exhibited, during a residence of 20 years in this city, and also made it an occasion to extol the many excellent qualities of the hostess, Mrs. Blake. A brief outline of the affair and of the growth of the association terminated this part of the proceedings. After partaking of excellent and splendidly served refreshments, the party dispersed, one and all expressing themselves as having spent a thoroughly enjoyable evening. The following are the officers of the association:

J. Blake, 975 Cypress avenue, Pasadena, president; O. Heutchsy, 262 S. Pasadena avenue, Pasadena, vice-president; G. F. Nilsson, 91 S. Grand avenue, Pasadena, treasurer; R. MacKenzie, 1071 Orange Grove avenue, Pasadena, secretary. Trustees: Messrs. Howard, Coolidge and J. W. Ross. The association meets at the Board of Trade rooms the first and third Friday of the month.

R. McK.

BROOKFIELD, MO.—Miss Gertrude Jones is planning to erect a large and more modern greenhouse as an addition to her business.

RIVERSIDE, CAL.—Among other shrubbery to be used in beautifying the streets of this city and Arlington are 10,000 Ragged Robin roses.

SALISBURY, MD.—The Peninsula Horticultural Society has elected James T. Shallcross, of near Middletown, president. The society will meet at Wilmington next year.

TACOMA, WASH.—In connection with the meeting of the Metropolitan park board, January 13, the contract was signed for the construction of the conservatory in Wright park from the fund of $10,000 given by W. W. Seymour.

CHEROKEE, IA.—O. B. Palmer has leased the room in the Lewis building soon to be vacated by W. H. Korns and will open up a flower store and office for his greenhouse business. This will be much more convenient for his patrons.

BOULDER, COL.—Chas. F. Fawcett reports good business around Christmas and New Year's which would have been far better but for a severe wind and dust storm on December 24. There was not enough cut flowers to meet the holiday demand and prices were better than those of last year. Plants sold well.

PASADENA, CAL.—Park Superintendent J. G. Morley of Los Angeles has given to this city more than 50 varieties of cactus to be used as a nucleus for a bed of these plants. They will be planted in Central park and the superintendent hopes soon to rival the collection now blooming in White park, Riverside.

PASADENA, CAL.—Plans for the annual flower show of the Gardeners' Association, to be held April 2, 3 and 4, are already being laid, and judging from the success of last year's exhibition the event will bring together an imposing array of floral and plant specimens illustrative of the possibilities of Pasadena's glorious year-round climate. At a recent meeting of the gardeners the executive committee was named to have charge of the coming show. Robt. Pegg is chairman, Richard Thomas secretary and Geo. Nelson treasurer.

The Seed Trade.

American Seed Trade Association.
Geo. S. Green, Chicago, Pres.; M. H. Duryea, New York, First Vice-Pres.; C. E. Kendel, Cleveland, O., Sec'y and Treas. Twenty-sixth annual convention, June 23 to 25, at Hotel Ponchartrain, Detroit.

VISITED CHICAGO.—W. J. Fosgate, Santa Clara, Cal.: L. W. Wheeler, representing the Braslan Seed Growers Co., San Jose, Cal.

AMPELOPSIS VEITCHI, Four-o'clock, Convolvulus major, mixed, and Adlumia cirrhosa are among the very short items in seed this year.

THE fourth annual convention of the Canadian Seed Growers Association will be held, February 3-4, at the Canadian building, Ottawa.

PORTSMOUTH, VA.—J. W. S. Butt & Co., druggists and seedsmen of Middle street, made an assignment, January 20, for the benefit of their creditors.

EVERY day is pay day with the L. A. Budlong Co., near Chicago, who employs 400 or more men and women in its onion set and market garden business, as fully described in a former issue of THE AMERICAN FLORIST.

THE Hollander, says a correspondent, is again in the land hunting for business. Judging by the number in the country, the wooden-shoe brigade will need Madison Square Garden for its annual reunion before sailing for home.

IT is reported that W. Atlee Burpee, trading under the name of W. Atlee Burpee & Co., and Henry A. Dreer, a New Jersey corporation, are involved in litigation regarding the Fordhook Bush Lima bean, the former firm taking exception to the naming and description of this variety as given in the 1908 catalogue of the latter firm. A stiff legal battle seems to be a certain feature of the controversy.

IT is reported that the Southern Texas Truck Growers' Association has, through its manager, made a five years' contract in the Canary islands for its supply of Teneriffe grown onion seed, in order to enable it to compete against American seed dealers. The contract is said to have been made with two Teneriffe firms. Another Teneriffe firm, outside the contracting parties, solicits the contract business of the seed trade.

A CHICAGO market gardener in search of onion seed bargains secured a job lot of something over 5,000 pounds from a second hand dealer and was somewhat surprised to find in the sacks the labels of the Northrup, Braslan, Goodwin Co., a firm which went out of existence in 1895. It is hardly necessary to state that the germination of this onion seed was hardly up to the critical requirements of the onion set grower.

ESTABLISHMENT OF L. A. BUDLONG CO., CHICAGO.—PAYING OFFICE.

Seedsman's Golden Wedding.

Francis and Mrs. Brill celebrated their golden wedding anniversary at their home, 56 Washington street, Hempstead, N. Y., January 1. Owing to the failing health of Mrs. Brill, a formal reception was dispensed with, and the event was quietly celebrated.

On January 1, 1857, Francis Brill and Ann Elizabeth Mac Donald, daughter of the late David Mac Donald, of Newark, N. J., were married. Mrs. Brill's grandfather, Robert Mac Donald, was one of the early settlers of that part of Newark, N. J., known as "The Neck," and was identified with the growth and development of that thriving city. Mr. Brill is the youngest son of the late John Brill, one of the leading horticulturists of his day, who for many years conducted an extensive and thriving market garden and florist establishment in Jersey City, and later, in Newark, N. J., up to the time of his death in 1870. Here Francis Brill received that training, which, combined with his executive ability, keen observation and personal experiments in after years led to his being recognized as one of the leading seed experts in the country.

In the year 1870 Mr. Brill moved with his family to Mattituck, in Suffolk county, where he established a seed farm, and largely through his efforts in developing and perfecting the cauliflower, blazed the way for the extensive cauliflower industry that has made that section of the island famous all over the country. From Mattituck Mr. Brill went to Riverhead, and after a few years, removed to Hempstead, where he has since resided, and carried on his seed business. Wherever they have resided, Mr. and Mrs. Brill have taken part in every good work for the advancement of the interests of the community, while Mr. Brill has been prominent politically, and is still interested, as a good citizen, in public affairs.

Seed Trade in Santa Clara, Cal.

The seed industry of Santa Clara county is a most important one and the product is shipped to all parts of the world. The year 1907 has been an exceptionally prosperous one in all lines of the business, says Thos. Landrum of the C. C. Morse Co., in the San Jose Mercury. The crops in general were very good, especially the onion, which was one of the best in many years. There is always a ready market for the seed, and the sales this year reached enormous proportions, the money stringency having no apparent effect whatever.

The prospects for 1908 are very bright indeed, and from present appearances the yield and sales will be the greatest in the history of the trade.

Imports.

During the week ending January 25, imports were received at New York as follows:

H. Frank Darrow, 25 cases plants.
Aug. Rolker & Son, 3 cases plants.
P. Henderson & Co., 120 bbls. grass seed; 1 bag, 101 pkgs. seed.
The Albert Dickinson Co., 189 bbls. clover seed.
Vaughan's Seed Store, 44 bags, two pkgs. seed.
Wm. Elliott & Sons, 34 bags seed.
Stumpp & Walter, 13 bags seed.
J. M. Thorburn & Co., 10 bags alfalfa seed; 1 case, 3 bags seed.
To others: 107 pkgs. plants, 1,124 bags seed, 56 bbls. seed, 3 cases seed, 244 pkgs. seed, 4,628 bags clover seed, 203 bags grass seed, 176 bags sunflower seed.

MARKET GARDENS.

Mistakes With Mushrooms.

The culture of mushrooms is not difficult when everything can be obtained at the proper time, in sufficient quantity and of the right character, but it cannot be denied that more failures are recorded with this crop than almost any other. We cannot hope in a short article to give full directions but will touch on a few points often lost sight of even by growers of considerable experience:

Regarding the manure, this may come from stables where the horses have been given medicine which contains drugs of a deleterious character, and many failures may be traced to this. In spring, horse keepers use much green food, and the manure from such stables is not good. Horses fed regularly on dry hard food produce the kind needed and this must be thrown into a heap and turned frequently until all the rank smell has gone and there is a smell not unlike that of mushrooms in the mass. It is ready then for use.

Spawning is sometimes left until too late for a quick crop. It is often advised that the heat is allowed to decline considerably before spawning. But this is a waste of heat and if the manure has been properly prepared it will not heat violently or quickly, but will maintain a regular rise for a few days and may usually be spawned in about four days from the time the beds are made up. Again, some growers break up their spawn into too small pieces (we refer to the brick spawn). A brick should not be broken into more than eight pieces and these should be laid under the surface and the manure pressed back firmly over them. Never use a dibber. Large pieces of spawn do not suffer, should the bed become slightly overheated, or at least only the outside of it suffers. Small pieces would be ruined entirely.

The nature of the fine, thread-like mycelium must not be lost sight of. When making new beds on shelves over those already in bearing growers pound away with a hammer, a brick or some such thing, quite oblivious of the shaking they are giving the growing beds. The jar often leads to the snapping of the mycelium threads and is the cause of frequent failures of beds or parts of beds. The remedy for this is to make all beds on the same line of shelves at the same time if possible and not to have them connected over great lengths. Mistakes in watering are common with beginners. Experienced growers do not need to be told that watering at all is risky and heavy watering fatal. They usually arrange, by keeping up a very moist, cool atmosphere, to do away with the necessity of any but light spraying.

The Retail Plant Business.

Continuing my remarks in regard to the plant business, as some growers are so situated that operations must soon commence, it is time to order the required seed. Do not buy seeds of novelties for the plant business. If a grower plants a new thing on his own place, and it proves worthless, he has the fun of growing it and only himself to blame. But if he buys an ounce of seed of some new kind, and sells some 3,000 to 5,000 plants to various small buyers, he has hurt his standing very much, should the novelty prove inferior or unsuited to the locality. Sow only a few varieties. If a dozen kinds of cabbage or tomato are sown they produce a big stock of plants in the aggregate, yet the grower is unable to fill half the orders properly.

In tomatoes, of first importance is color. If customers prefer a pink tomato, Beauty, Globe and Ponderosa fill the bill in the order named. If scarlet is the color, then Chalk's Jewel, Early Michigan and Stone. Earliana is not adapted to home culture, as it plays out after making a few clusters of fruit. In cabbage, Jersey Wakefield is the best early and Succession the second early. In cauliflowers, Snowball is a good all around variety. Among peppers, Ruby King is most popular; but grow also a few Cayenne for a hot pepper. For early celery, Golden Self Blanching and White Plume are best. Celery and sweet potatoes should not be grown in boxes; they lift well out of frames or flats. Egg plants and peppers are much slower than tomatoes and they need more time to develop. Do not bother with yellow tomatoes, red cabbage or Savoy cabbage. The demand is so small it would not pay.

MARKETMAN.

Prices of Indoor Vegetables.

The prices of indoor vegetables at leading points, January 25, were as follows: New York, cucumbers, No. 1, 75 cents to $1 per dozen; No. 2, $2 to $3.50 per box; lettuce, 20 cents to 40 cents per dozen; mushrooms, 10 cents to 40 cents per pound; mint, 50 cents to 75 cents per dozen bunches; radishes, $2 to $2.50 per 100 bunches; rhubarb, 40 cents to 60 cents per dozen bunches; tomatoes, 10 cents to 25 cents per pound. Cincinnati: cucumbers, $1.25 to $1.50 per dozen. Chicago, mushrooms, 10 cents to 50 cents per pound. Boston: tomatoes, 15 cents to 20 cents per pound.

JACKSONVILLE, FLA.—Sawyer & Payne are making a fine show in their new store.

STERLING, ILL.—The Sterling Floral Co. has a new carnation which is admired by the many visitors at the greenhouses east of the city. The flower has been named The Sport by Manager Lundstorm and will be placed on the market next year.

NEWBURGH, N. Y.—The store now occupied by E. M. Peattie, at 86 Broadway, has been leased and will be occupied by the Yuess Gardens Co. beginning February 15. It will be used as a seed and flower store. The Yuess Co. has also asked for bids from contractors for erecting another greenhouse on its property on Third street opposite Fullerton avenue. This house will be 50x250 feet and it is said when completed it will be the largest greenhouse in this section of the state.

Forcing Asparagus and Rhubarb.

Fine 8-year-old roots of **Asparagus**; enormous: larger than the top of a bucket: will force readily; only $5.00 per 100.

Fine **Rhubarb Clumps**, immense; will produce magnificent stalk; only $6.00 per 100; smaller, $3.00 per 100.

WARREN SHINN, Nurseryman. **Woodstown, N.J.**

Vegetable Plants...

Lettuce Plants: Grand Rapids, Boston Market and Big Boston, 25 cents per 100; $1.00 per 1,000.

Tomato: Mayflower and Lorillard, 50 cents per 100.

Are NOW making their regular winter trips and will call on most of the trade in the near future in our interest. Kindly await their arrival before placing your seasonable orders.

"The Best Flower Seeds in America."

Vaughan's Seed Store,
CHICAGO. NEW YORK,

An Insect Query.

ED. AMERICAN FLORIST:—

Please find enclosed insects and let me know what they are, also how to get rid of them. They increase very fast and will fly when disturbed. I had a Black Prince fuchsia in my cucumber house on which they seemed to start and breed. E. P.

The package when received contained nothing but a couple of dried up leaves broken up into small pieces in the mail. You should send insects properly packed and we will then endeavor to help you.

WASHINGTON, D. C.—Joseph Kaschaka, a well known Bohemian and botanist, died here suddenly January 19. He was one of a party of botanists sent to China in the early 80's and has lately been in charge of the Columbia golf course.

RICHMOND, IND.—E. G. Hill made another of his "gum shoe trips" through Indiana, visiting W. W. Coles, Kokomo, and Fred Dorner at Lafayette, winding up at the state meeting at Indianapolis, where his talk on "Harmony" made a great impression.

NEW ORLEANS, LA.—The new greenhouse at City park has been completed. The structure, one of the finest of the kind in the south, has been in course of erection for three months, and cost something over $12,000. The greenhouse is 34x150 feet, while the dimensions of the propagating plant are 12x62 feet. The potting shed and gardeners' quarters extend over an area of 20x83 feet. The heating apparatus has been installed, tested and found in good order. The walks in the interior have all been laid; the work of transferring delicate plants from the old to the new greenhouse is in progress.

BOSTON, MASS.—Mayor Hibbard, January 20, put his official ban upon the use of potted plants and floral decorations from the municipal conservatories for private social affairs throughout the city. The mayor was called upon by a committee of young people who wanted to borrow potted plants from the city's conservatories, and he was amazed at such a request. When informed that it had been customary to secure such displays for the asking, he immediately notified those in charge of the municipal conservatories not to loan any more flowers or potted plants for private use. In years gone by and until the present administration it was a very common occurrence for the city to distribute scores of potted plants at halls where social affairs were being held, and the city paid for all the carting.

DAVID HERBERT & SON,
Successors to L. K. Peacock, Inc., ATCO, N. J.

The Nursery Trade

American Association of Nurserymen.
J. W. Hill, Des Moines, Ia., President; C. M Hobbs, Bridgeport. Ind., Vice-President; George C Seager, Rochester, N. Y., Sec'y.
Thirty-third annual convention to be held at Milwaukee, Wis., June, 1908.

W. F. LEDMAN has been appointed agent, in the Wabasha, Minn., territory, of the Clinton Falls Nursery Co.

VINCENNES, IND.—W. A. Reiman has a very promising field of peonies. He now has 30,000 plants and reports business good.

ADRIAN, MICH.—A paper from the pen of J. Spielman was given at the meeting of the Lenawee County Horticultural Society January 8.

PASADENA, CAL.—Rice & Skillen of El Monte have leased 10 acres of land from the North Pasadena Land Co., on which they intend to establish a nursery.

SIOUX FALLS, S. D.—The nursery stock act of last winter is to be tested by Henry Hawley by a habeas corpus application filed by him in the supreme court.

MUCH waste of valuable fertilizing property is caused by spreading hot manure thinly on quarters to be prepared and leaving it there steaming and losing the ammonia into the air.

THE American Nursery Co., New York has been incorporated with capital stock $100,000. The incorporators are: Frederick W. Kelsey, New York; Theodore Foulk, Flushing, and Wm. Flemer, Springfield, N. J.

DAVID F. ROY has resigned his position as park commissioner of Malden, Mass., and superintendent of Pine Banks park and now goes to Marion as superintendent of The Moorings, the fine place being developed by Col. H. E. Converse.

SPRINGFIELD, MASS.—Professor F. A. Waugh has just received word from the United States patent office that a patent has been allowed on his pocket plane-table. This is an instrument which the classes in landscape gardening have used for two or three years, and which will probably prove useful for a variety of landscape gardening and engineering work.

THE Texas State Nut Grower's Association at its meeting at Abilene, January 15-16, framed resolutions in favor of the express companies buying and selling fruit and other produce of the truck growers and thus opposing the action of the Western Fruit Jobbers Association. Also to petition the government for aid in fighting the diseases and insect pests of the pecan timber.

AMES IA.—At a recent meeting of the board of trustees of the Iowa State College, C. A. Scott of the United States Forest Service was elected to the chair of forestry to fill the vacancy caused by the resignation of Professor H. P. Baker. Mr. Scott is a graduate of the Kansas State Agricultural College and a student of the Yale College of Forestry. His work has been largely confined to the middle west and the Rocky Mountain states; hence he has the advantage of being familiar with the forestry conditons of the upper Mississippi valley. Since its origin he has had charge of the extensive forest nurseries and plantings of the Dismal River national forest. In 1906 he was elected to membership in the Society of American Foresters, a professional organization which is limited in its membership. His training, experience, strength of character and personality make him one of the best men available for the position to which he has been elected.

How to Have Roses.

Because of seeming difficulties in cultivation, supposed to be due to tenderness, lack of vigor and liability to diseases and insect attacks, many are deterred from entering upon the culture of roses, says W. C. Barry, of Ellwanger & Barry, Rochester, N. Y., in a contemporary. Others think that the rose only blooms once in the year and that the plants afterwards are not only unattractive but objectionable. It will be the aim of the writer in this brief article to mention a few beautiful hardy and half-hardy continuous-flowering varieties, possessing good foliage, and suitable for planting in ornamental beds on the lawn or in plats in the garden proper, and to furnish a supply of cut flowers for house decoration.

Hybridists have greatly added to the list of so-called ever-bloomers which will largely replace the older Bourbons, Bengals and Chinas, none of which can be said to be really satisfactory. The plants are not sufficiently vigorous nor are the flowers attractive enough. The teas, though exceedingly beautiful, are, in the main, too delicate to succeed. But there are some in this list, especially among the hybrid teas, of surpassing beauty, great vigor and remarkable freedom of bloom, and, withal, capable of withstanding severe cold if well protected. The origination of these teas, hybrid teas, and polyanthas, prompts the writer more than anything else to suggest and recommend to all flower lovers to make the attempt at least towards securing a bountiful supply of roses during the summer months.

The basis of successful rose growing is rich soil, ordinary good garden soil, well-drained and thoroughly and deeply spaded, enriched with manure or fertilizer. The soil can hardly be too rich, but the manure must be decayed and thoroughly incorporated with it, and the plants must be set in the soil, not in the manure as it is sometimes done. Well-decayed sod, prepared in advance and forming a compost, is a valuable addition to garden soil. Careful preparation of the soil months in advance of planting, will amply repay the care taken. Very satisfactory beds or masses may be planted of one kind of rose; for example—of Gruss an Teplitz, a vigorous, free-blooming, crimson hybrid tea. This is an ideal bedding rose, being a continuous bloomer, of vigorous habit, good foliage and producing abundantly showy, medium-sized, fragrant flowers of a rich and permanent color.

La France, once regarded as the most beautiful of all roses, is still valuable for bedding as it flowers constantly and freely, is of a beautiful silvery pink color and has a delicious perfume. Caroline Testout is very like the latter, but deeper in color and is one of the best bedders. Killarney is a distinct and vigorous variety free in producing its long tapering buds of a delicate flesh color, suffused with pink. Kaiserin Augusta Victoria, a light yellow hybrid tea, is a fine companion to the above named. Clothilde Soupert is a dwarf polyantha having flowers of a delicate flesh color, with rosy center. It is hardy and flowers abundantly. Baby Rambler, also a polyantha, is particularly well adapted for bedding, being dwarf, hardy, vigorous and continuous in flower. The blooms, being produced in clusters, are not as desirable for cutting as those borne on single stems; nevertheless, the trusses can be utilized in vases with good effect. It improves with age, and moderate protection is recommended.

Cecile Brunner, one of the dwarf fairy-polyanthas, bears perfect little buds, followed by small but perfectly developed blooms of a salmon tint, afterwards becoming white. It is also suitable for bedding. Pink and White Maman Cochet (tea) justly deserve all commendation for cut flower purposes. The flowers are remarkably beautiful in form, charming in color and remain perfect long after being cut. For vases they are unexcelled. The pink variety, while excellent, is surpassed in beauty by the white, which, though a yellowish white, is tinged with blush, rendering it exceedingly attractive. The buds of both are unusually well formed, surpassing in this regard those of almost any other kind, and the plants being very vigorous and floriferous, a large number of blooms may be obtained from a few specimens. The buds of these varieties should not be cut until they are about three-quarters open, being then at their best.

The hybrid perpetuals are not so constant in flowering as those named above. They flower, usually in June, very profusely, and after this refuse to bloom except at intervals. Those mentioned are they that flower over the longest period, have great adaptability to various conditions of climate and are universal favorites as garden roses. Mrs. John Laing is quite hardy, blooms early and late, and has lovely flowers of silvery rose. Ulrich Brunner has cherry red flowers, large and fragrant, good foliage and is very free. Frau Karl Druschki, or Snow Queen, is a newer, pure white variety, exceptionally beautiful in the bud. It will doubtless be much grown when better known, on account of its excellent qualities. Paul Neyron is a very large flowering rose and, in the bud stage, is a very beautiful one. In the fully developed stage it is slightly coarse. The Wilder is a very large, globular, bright red and fragrant variety, hardy, vigorous and free. It is, in short, one of the finest in cultivation.

In order that roses may be employed most effectively they should be planted in beds and masses, from 20 to 100 or more plants together and all of one kind, not a variety or mixture, and the varieties suggested in this article are well adapted to this purpose. When planted in beds, roses should be set about 18 inches apart, or 13 plants for a bed six feet in diameter and 37 plants for one 10 feet in diameter. The hybrid perpetuals may be planted two feet apart, or about seven plants for a bed six feet in diameter, or 19 plants for a bed 10 feet in diameter. I will close with Dean Hole's advice to rose growers:

"He who would have beautiful roses in his garden, must have beautiful

roses in his heart. He must love them well and always. To win he must woo, as Jacob wooed Laban's daughter, though drouth and frost consume. He must have not only the glowing admiration, the enthusiasm and the passion, but the tenderness, the thoughtfulness, the reverence, the watchfulness of love."

Raising Golden Seal.

ED. AMERICAN FLORIST:—

Please give me details as to raising and cultivating Golden-seal. E. G. P.

Golden-seal (Hydrastis Canadensis) is a native of the eastern states and delights in ample root moisture and a soil containing peat or leaf mould. It may be propagated by division of the roots while dormant or from seed sown in spring. G.

Retail Nurserymen's Association.

The fifth annual dinner of the Retail Nurserymen's Association was held January 21, at the Powers Hotel, Rochester, N. Y., and proved to be one of the best of the series, in spite of the fact that owing to illness some of the men announced to speak were unable to be present.

After the dinner President Wm. Pitkin welcomed the guests and introduced the toastmaster, Edward B. Lynn, in a witty toast to which the toastmaster responded in kind. Owing to the inability of Eugene J. Dwyer to be present and respond to the toast "the Flower City," the subject was assigned to Wm. C. Barry, who explained that he had made no preparation except by living in the city for many years. He said in part:

"We are proud of Rochester and its development, for its beauty and its growth, but these did not come of themselves. Rochester, it is true, has very many natural beauties, but if you will look over the history of Rochester 40 years ago you will find that there were many people deeply interested in beautifying the city. They were men of high ideals who worked gradually and successfully, and today you have the results of their labors, which are by common consent admitted to be admirable. In this city the industry was inaugurated which spreads to all parts of the globe beautiful flowers, trees and fruits. The flowers and trees and fruits have the effect of elevating mankind, to beautify the world itself and to make life pleasant. You are the men who are continuing this work and you may well be proud of your industry.

"Language is not strong enough to describe the beauties of the flowers and shrubs which you are putting into the hands of the people all over the world. When a tree is planted for its fruit or for ornamental purposes think of the number of people who are to get the benefit. Then multiply that number by the thousands on thousands of trees sent out of Rochester each year and you will find that your business is one which is doing great good and harms no one." —

Wind Sows the Scale.

The San Jose scale will kill a tree outright in three years. I have seen a whole peach orchard wiped out by the insect, says a writer in American Cultivator. The scale insect can be carried by a man when picking the fruit, pruning or working in the orchard; birds may convey it or insects; it may be blown by the wind. To show that they will blow I cite the case of a man at work in the orchard whose back was covered with them as he walked along in the wind.

DEPEND

On receiving only strong and healthy cuttings when you order from us. We have only the nicest and best varieties. Write for further information to

Guttman & Weber

The Wholesale Florist of New York.
42 West 28th Street.

Grower,
Lynbrook, L. I.

Victory, Imperial, Pink Imperial, Aristocrat, Winsor, Welcome, White Perfection, Lieut. Peary, Rose Pink Enchantress, etc.

London.

Geo. Monro, Jr., has received the first consignment of galax leaves, bronze and green, in prime order. They sell at 50 cents per dozen bunches, 25 in a bunch.

Callas are scarce and bring $1.75 to $2 per dozen flowers; Lilium longiflorum is worth $1 per dozen; Golden Spur narcissus, 30 to 35 cents per dozen. Tulips, in pots and cut, are very cheap and sell for little more than the cost of the bulb. Many pot plants are frozen in spite of careful wrapping.

January 11. Azaleas and Asplenium Nidus Avis stand the cold weather better than most other plants. Cut flowers are short except carnations which are in over supply. Brittania is worth $1.25 per dozen. Chrysanthemums are still plentiful especially Framfield Pink and Pancoucke (white) which are worth 50 cents per dozen. French supplies to this market are very irregular.

National Sweet Pea Society, Eng.

The following circular was sent to members of the National Sweet Pea Society who are raisers of new varieties: "My committee propose holding a further trial of sweet peas at the University College Gardens, Reading, during 1908, and I shall therefore be very glad if you will assist us in making these trials as complete as possible by sending seeds of new sweet peas you may be distributing in 1908, or are getting forward for distribution in 1909. I need hardly add that the trial will be an absolutely independent one, and under the able management of Charles Foster. Not fewer than 15 seeds of each variety should be sent, and they should be sent to Mr. Foster, Assistant Director in Horticulture, University College, Reading. You will greatly oblige by indicating the color section to which each variety belongs, whether it has waved or plain flowers, and whether you would care to have it tested by the side of any standard variety. This information should be on a separate sheet of paper, and a duplicate copy sent to me will further facilitate matters. My committee does not propose to make a charge for these trials, but suggests that a donation be sent to the honorary secretary to help defray their cost. The trials conducted in 1907 necessitated considerable expenditure and this was defrayed chiefly by private donations. No awards to new varieties will be made at the society's exhibitions in 1908; awards of merit or first-class certificates will be granted only to meritorious varieties tested in the society's trials at Reading. The value of these trials to all raisers and growers is so great that I trust you will kindly render whatever assistance you can."

W. N. RUDD,
MORGAN PARK, ILL.

Watertown, S. D.

The South Dakota Horticultural Society held its annual convention here January 21-23. The mayor made an address of welcome, which was responded to by Vice-President Gurney of Yankton. The treasurer's and secretary's reports were received, and the following papers read:

"Home Gardening on a Town Lot," J. P. Cheever, Brookings; "Garden Notes for 1907," A. J. Glidden, Hitchcock; "Market Gardening," H. H. Stoner, Highmore; "Tomato Culture for Market and Home Use," Thomas A. Hobart, Sioux Falls; "Shelter Belts," M. P. Beebe, Ipswich; "Street Trees," George H. Whiting, Yankton; "Shelter Belt Experience," George L. Carson, Bradley; "The Russian Olive for Ornamental Hedges," C. B. Chambers, Faulkton; "Prairie Tree Planting," A. W. Krugar, Groton; "Windbrakes and Shelter Belts for Farm Homes," Iver Eitreim, Colton; "Shade Trees for the North," Fred J. Hutchins, Huron; "Forest Tree Planting in the Black Hills," C. V. Gardner, Piedmont.

President G. A. Tracy of this city delivered his annual address in the evening of January 22. Miss Minnie Avery of Council Bluffs, Iowa, delegate from the Iowa State Horticultural Society, spoke on "Woman's Work in the World," and the remainder of the evening was devoted to papers on "The Culture of Flowers," speakers from Pierre, Sioux Falls, Watertown, Aberdeen, Brookings, Huron, Mitchell, Forestburg and York, Neb., taking part.

SALINA, KANS.—Thos. Anderson, president of the Saline County Horticultural and Mechanical Association, reports a good meeting of the state board at Topeka recently.

JACKSONVILLE, ILL.—Secretary of State James A. Rose granted a license to incorporate, January 14, to the Gulf Coast Agricultural and Horticultural Development Co., headquarters here. The capital stock is $50,000, and the purpose is the cultivation of the land and the marketing of crops. The organizers and first board of directors are: C. A. Burton, O. E. Tandy and R. Y. Duncan.

The Wonders of 1907

Imperial and Pink Imperial Carnations

The color of "Imperial" is a variegation of delicate Pink similar to the shade in "Enchantress", with darker shades of pink.

The **Color** of "Pink Imperial" is a most pleasing shade of Pink, one that has long been wanted in the cut flower market.

The **Stems** of both these varieties run from three to four feet in length, are extra strong and have no equal in the Carnation of to-day.

The **Calyces** are good and strong and are practically non-bursters.

The **Flowers** are well formed, run from three to four inches in diameter and are very fragrant. They are early, free and continuous bloomers, from October until late in July. Strong growers, every shoot a a flower. Have shown them both at the November Shows with thirty inches of stem. Vases of blooms shown at this fall's Show at Philadelphia, were pronounced the finest ever shown there. Both took first prizes at Washington.

"John E. Haines," **the leading scarlet,** has proved to be all that was claimed for it,

Color, most brilliant scarlet.

Stem, from two to three feet in length, strong.

Calyx, good and strong non-bursters.

Flower, three to three and one-half inches in diameter.

Productiveness, unsurpassed, bloons 12 months of the year. No extra grass. Every shoot a flower.

Prices, for selected cuttings of each variety, delivery commencing December, 1907. $6.00 per 100; $50.00 per 1000.

Place your orders early. **Visitors always welcome.**

JOHN E. HAINES, Carnation Specialist,

Headquarters at BETHLEHEM, PA.

ORIGINATOR of three varieties. **JOHN E. HAINES,** Scarlet; **IMPERIAL,** Variegated; **PINK IMPERIAL,** Pink.

Making a Floral Design.

ED. AMERICAN FLORIST:—

Please give me ideas as to the most artistic way of making a floral design of a key-stone, mostly of carnations. Would it be better to use a key-stone on an easel or without?

E. W.

The keystone, as other flat designs, is without doubt more effective, and makes a far better showing if mounted in some manner, whether it be an easel or stand. As to the construction of the design in itself care should be exercised in bringing out the desired form. This result may be gained best by making the body solid of white carnations with a good heavy border of green which will aid materially in bringing out the shape and at the same time afford a relief for the white in the body. A trifle to the right and above the center, arrange a light half crescent spray of, say lily of the valley and maidenhair ferns, being careful to make the spray of light, airy character and not too large. These suggestions of course best apply to the medium priced design and may be elaborated upon considerably, but this plan carefully carried out will assure you of a neat, tasty design, simple but effective.

K. C.

This emblem is somewhat limited in its proper use and is not a familiar design in many sections of the country. As a tribute to a deceased friend it is usually connected with the fraternal orders, and in the state of Pennsylvania it is perhaps more often seen than elsewhere. As a suggestion for an effective but not costly design, displaying in the simplest and most comprehensive manner, a keystone as a funeral tribute should be displayed reclining on an easel. The body of the design is most effective when of solid white and for this the most available and suitable flower to use is the white carnation, and when placed compactly and evenly an outline of pink carnations would bring prominently to the eye the figure of the design. In selecting the pink carnations care should be taken to select a good shade, a medium pink being best adapted. In the center of the design is usually displayed the insignia of the particular order or society. Purple chenille and letters are the most plainly displayed. Violets, although consuming considerable time in forming, are most tasty, each flower having to be wired separately.

The finishing touches are the next step. A light spray of some choice flower would decidedly improve the design and greatly relieve the solid appearance. Cattleyas, lily of the valley, pink sweet peas, myosotis or cypripediums all allow of good taste. Adiantum lightly sprayed through these flowers further improves the general appearance. The design itself should be sufficiently elevated to permit of a suitable basic formation. Asparagus Sprengeri can always be used to excellent advantage and is a most valuable accessory. It should be carefully sprayed on the whole outline but not used in such quantities as to become too conspicuous. The idea, when designing this class of work, is to bring first to view most prominently the figure desired. All additions should be simply to relieve the coarseness of a solid figure. B.

THE NEW .. CARNATION **AFTERGLOW**

WAS AWARDED A

Gold Medal by the Rhode Island Horticultural Society, at Providence, Nov., 1907. (Exhibited by Wm. Nicholson)

Craig Silver Cup by the Penn. Horticultural Society at Philadelphia. Nov., 1907. (Exhibited by Dailledouze Bros.)

First Prize by the St. Louis Horticultural Society at St Louis, Mo., Nov., 1907. (Exhibited by The E. G. Hill Co.)

First Prize by the State Florists' Association of Indiana at Indianapolis, Nov., 1907. (Exhibited by the Originator.)

Scored the highest number of points of any seedling exhibited at the Toronto Exhibition of the A. C. S. Jan., 1907, after arriving 24 hours late from Framingham, Mass.

Aside from these honors, the fact that it has been grown successfully wherever it has been tried is the best proof of its commercial value. Orders now booked by the undersigned, to be filled in rotation for well grown, well rooted cuttings at

$2.00 per doz.; $12.00 per 100; $100.00 per 1000.

JAMES D. COCKCROFT, Northport, Long Island, N. Y.

Retailers' Windows.

Cleanliness and neatness are the principal points to study in window decoration. No matter what class of stock is used it is improved in appearance if everything around it is clean and neat, while the best stock looks but poor if viewed through a smeary window or accompanied by other signs of careless management. Regarding the display of cut flowers, the attempt to crowd too much and too many different colors into one window is always unattractive and unsatisfactory. Unless one has a good eye for color contrasts it is always safe to depend upon one color, with white, or simply one color alone. There is no risk then of an incongruous mixture. A window decorated entirely with one flower with suitable green is always effective and many successful retailers seize the opportunity of a glut of any variety to make a grand display of it temporarily. This is good business policy, for it never pays to allow the window to get into disorder because trade is quiet. An attractive window is at all times a good drummer.

Floral Ideas.

In the process of selection to which the selective cultivator subjects the flowers which it is his aim to improve, and to which we owe a very large percentage of our most attractive horticultural gems, there is formed in many instances a sort of ideal type of perfection towards the attainment of which the selector directs all his efforts, by eliminating those which stray from the direct line, and choosing those which most closely adhere to it. All, however, that he can do in this connection is to trust that Dame Nature will help him by inspiring, as it were, the right spirit into the offspring of the plants he propagates. These vary, it may be, in all sorts of seemingly wayward ways which he cannot influence one jot. All he can do is to watch for indications (they may be faint or they may be distinct) which approach his ideal, and encourage these by selection and special care. Very often, however, that ideal is not nature's; it contravenes some hidden law ungrasped by man, hence he is constantly frustrated; or maybe, when a triumph is achieved, she handicaps it with sterility.

Undoubtedly the best ideals of floral beauty are those which adhere most closely to natural types. Somehow or other in the process of evolution, the interaction of the insect world and the floral world has led to the production of many flowers of the greatest charm from the human point of view, so that apart from the humbler loveliness of many of our native flowers, our expert plant hunters in tropical, sub-tropical, and even temperate regions have discovered and introduced many floral types which cannot be excelled by the florists' highest ideals.. On the other hand, however, a considerable number of our finest docorative flowers have been derived from very inferior forms, so far as size and brilliancy and variety of color are concerned.

The pursuit, however, of a fixed ideal in a definite direction, and the resulting elimination and destruction of all variants in other directions, is fraught with a danger of no small consequence. Nature has a knack of creating quite unexpected sports, displaying characters altogether different from the parental ones, and consequently quite outside the line leading direct to the florist's ideal. In the young stage, assuming the sport to originate in a seedling, the difference would quite possibly constitute a direct invitation to the selector to weed it out as one of the unfit, as it certainly would be as a contributor to the attainment of the ideal in question. On the other hand, however, it is possible that it represents a starting point for a different ideal altogether, for there are many types in cultivation which are entirely due to nature's inventive powers in the sport line, and would never have otherwise been conceived by man. Sometimes new types start as mere indications; hints, as it were, for the selective cultivator to follow. Smooth-edged leaves show slightly serrated edges, and these, by selection, may result in a few generations in deeply divided leaves, as we see in the fern-leaved sections of normally plain leaved primulas. So with flowers—smooth petals may break into serrate and even fringed ones, or a few petaloid stamens, at the outset mere deformities, may lead to the finest double flowers.

Obviously, therefore, a slavish adherence to selection in one particular direction, i. e., towards a floral ideal, is a mistake. We have in mind the first indications of cresting, as it is called, in tuberous begonias. Normally, the surface of the begonia petal is perfectly smooth, and under selective culture and skilful hybridizing so large a number of types, single, double, and of all colors were raised that, as in the case of the dahlia, the possibilities of variation seemed exhausted. Then, suddenly, seedlings appeared, in which the central surface of the petals was broken up by excrescences, and we distinctly remember how judges condemned this as "spoiling the flower," because it was outside the ideal. Begonia growers, however, persisted in encouraging this new feature by selection, and as a consequence we have now a number of beautiful flowers with richly fringed and encrusted petals of generally recognized beauty—a section in itself. The moral of which is, that it is well for the selective cultivator to keep an open mind and watch for other indications as well as the main one he has in view.—Journal of Horticulture.

NEW YORK.—E. A. Turner has leased the parlor floor at 118 Lexington avenue, southwest corner of Twenty-eighth street, to the Greek-American Retail Florist and Growers' Association, to be used as an office and meeting rooms of the association.

PITTSBURG, PA.—Simon Held, Sr., aged 79, died January 19 of the grip at Fair Oaks, where he had been living for several years. He had been ill for about a year. He was born in Westphalia, Germany, and came to this country 25 years ago, engaging in gardening. Owing to his failing health he was compelled finally to go to a home at Fair Oaks. He was a member of the Smithfield Street German Evangelical church.

ALWAYS IN DEMAND.

Araucaria Robusta Compacta and Excelsa Glauca.

The lion of the Araucaria family, as big as a Christmas tree, perfect jewels in shape and color, about the same in width as in height. Specimen plants, 6 to 7-in. pots, 6 years old, 4-5 tiers, 28, 30, 35, 40 in. high, worth a ten dollar bill, only $3.00; 6-in. pots, 6 years old, 4, 5, 6 tiers, about 25 to 28 in. high. $2.50; 6-in. pots, 5 years old, 3, 4, 5 tiers, 20 to 25 in high, $2.00; 6-in. pots, 5 years old, 3-4 tiers, 18 to 20 in. high, $1.50 to $1 75; 6-in. pots, a trifle smaller, 3-4 tiers, Glauca only (no Compacta), $1.25.

Araucaria Excelsa, 6 years old, 6 to 7 in. pots, 5-6 tiers, 25-30 in. high, $1.50; 6-in. pots, 5 years old, 5 tiers, 22-25 in. high, $1.00 and $1.25; 6-in. pots, 4 to 5 years old, 4-5 tiers, 20-22 in. high, 75c; 5¼-in. pots, 2 years old, 2-3 tiers, stocky little plants, 6-7-8 in. high, 40c. Sold out of 50-60c sizes.

Kentia Belmoreana and **Forsteriana,** Belgium and home-grown stock, 4-in. pots, 18 to 20 in. high, 35c; 5¼, 5½ and 6 in. pots, bushy plants, 50c, 60c and 75c each.

Areca Lutescens, 4-in., made up of three plants, 18 to 20 in high, 20c.

Asparagus Plumosus Nanus Compacta, 3-in. pots, very strong plants, $7.00 per 100; 4-in. pots, $10.00 per 100.

Dracena Bruanti, from Belgium, full of green foliage from bottom to top, 6-in. pots, 22 to 25 in. high, 40c each

Begonia Improved Erfordii, 4-in pots, very large, $2.00 per doz.; 5¼-in., in bloom and bud, 25c each, or $3.00 per doz.

Cocos Weddelliana (Palm), 3-in. pots, 12-15-18 in. high, 15c to 18c each.

Ficus Elastica or **Rubber Plant,** home grown and Belgium stock, 5, 5½, 6 and 7 in. pots, 30c, 35c, 50c, 60c and 75c each.

☞ Now is the time to force **Hydrangea Otaksa** for Easter blooming. Remember only pot-grown will force successfully for Easter. We raise ours in pots outside in cold frames during summer. Can spare of these about 500 plants from 6 to 7-in. pots. Price, 25c 35c, 50c and 75c each.

Azalea Indica for Easter blooming. Have an immense stock grown for us in Ghent, Belgium, by an expert in azaleas. Have only leading varieties, such as Mme. Van der Cruyssen (2,500 alone, all shapely plants, full of buds), Simon Mardner, Vervæneana, Bernard Andreas Alba, Apollo, Niobe, Deutsche Perle, Prof. Wolters, Empress of India, and others; all planted in 6-7 in. pots. Price 60c, 75c, $1.00, $1.25, $1.50, $2.00 to $2 50 each.

Latania Borbonica, 4-in. pots, about 18 to 20 in. high, 25c each.

Choice Nephrolepis, all pot-grown.

A middle bench full of choice **Whitmani Ferns** in splendid shape, 7-in. pots, bigger than 8 in., made up in July (three plants in pot), now big as a bushel basket, worth $3.00, and are beauties, cut down to $1.50 and $1.25 per pot; 6-in. pots, very handsome, 75c to $1.00 each.

Boston Ferns, 8-in. pots, made up, very bushy, as big as a wash-tub, worth $3.00, only $1.25 to $1.50; 7-in pots, as big as a bushel basket, worth $2.00, price 75c to $1.00; 6-in. pots, very large, only 50c; 5-5½-in. pots, 30c, 35c and 40c.

Scottii Ferns, 7-in. pots, very large, $1 00 to $1.25; 6-in. pots, 50c, 60c and 75c.

Piersoni Ferns, 6-in., good, 50c; 5-5½-in., 30c, 35c and 40c; 4-in. pots, 25c.

Pteris Wilsoni, very handsome, 5¼-in. pots, 20c.

Nephrolepis Amerpohli, small 4-in. pots, 50c.

Please mention if in or out of pots. All goods must travel at purchaser's risk. Cash with order, please.

Toronto.

FUNERAL WORK PLENTIFUL.

Funeral work is the leading feature of the retail trade at present and, aside from this, the sales are only ordinary; the cut of roses is not very large so that the market is pretty well cleaned up of these each day. The few days of sunshine have been very favorable and the color is good. Richmond and Killarney are much the best, though there are some very good Bride and Bridesmaid to be seen. Carnations are more plentiful; the crop is not over large but the many varieties of bulbous stock have lessened the demand and they can be bought very reasonable.

January 22, Violet day, in memory of the late Queen Victoria, saw the market over supplied, and good blooms could be had in some of the stores as low as 75 cents per 100 retail; some of the growers are putting them in very low when taken in quantities.

NOTES.

At a meeting of the Gardeners and Florists Association the prize list for the industrial fair was arranged but with the exception of the large groups and decorative plants there has been little change. The officers for 1908 are: Sir H. M. Pellatt, honorary president; A. Houle, president; E. Graham, first vice-president; J. Mathew, second vice-president; executive committee: T. Manton (chairman), Geo. Douglas, W. H. Foord, W. Jay, W. Wilshire, W. H. Wright, F. Adams; representatives to Canadian National Exhibition: T. Manton, W. H. Foord; representatives to Ontario Horticultural Exhibition: E. F. Collins, W. Wilshire, W. Jay, E. Dale; Geo. Mills, treasurer; E. F. Collins, secretary; Colon Nesbitt, assistant secretary. To make the club nights more interesting all members are requested to bring to each regular meeting some horticultural productions of their own growing, plants, cut flowers, fruit, vegetables, or any novelty they may have. A record of all will be kept and points awarded. The member winning the highest number will be awarded a gold medal at the end of the year. The association's certificate of merit will be awarded to any deserving entry.

Grobba and Wandrey are cutting good longiflorum lilies and bulbous stock in quantities; this firm is never at a standstill and will put up another range of houses as soon as the weather permits.

Albert Houle has had such splendid success with Richmond rose that he will discard American Beauty in its favor. Killarney also does exceptionally well with him.

Miss Mabel Riggal, who has been ill for some months past, has again returned to business; she and her sisters have a very fine store and are doing well.

Park Commissioner John Chambers has resigned his position, having been the eldest from point of service in the city's employ.

H. G. D.

ERIE, PA.—It is announced that on January 1 the old firm of the Schluraff Floral Co., having done business for the past 23 years, has passed out of existence, all its assets being taken over by Vern L. Schluraff, junior partner in the old firm, who will continue the business at the new greenhouse recently erected at Floral Park.

NEW ROSE

MY MARYLAND

Best Up-to-Date Commercial Rose.

Read what others have to say about it:

Among the many new roses of the year; there is none which has impressed us more as being worthy of a thorough trial. It has been exhibited only as No. 294; being a seedling raised by John Cook, of Baltimore. A beautiful rose with an exqusite fragrance. In color, it may be described as a soft salmon pink, which brightens up beautifully as the bud opens. We are intending to plant this rose in quantity. A. N. PIERSON, Cromwell, Conn.

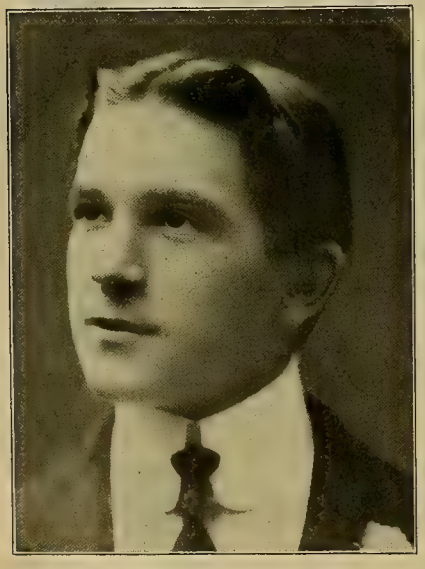
In reply to your inquiry what we think of your new Rose My Maryland. We would say that after seeing others, we still believe that you have the Best New Rose of modern times. GUDE BROS., Washington, D. C.

PRICES: 2 and 2 1-2-inch pots, $25.00 per 100; $200.00 per 1000; 3-inch pots, $5.00 per dozen.

JOHN COOK, 318 N. Charles Street, BALTIMORE, - MD.

E. F. Blachowski.

This enterprising young Philadelphian, an employe of Henry A. Dreer, recently returned from a stay of one year and six months in Europe, working



E. F. Blachowski.

while there as a man behind the hoe and can and at the potting bench. He visited and worked in Germany, Holland, Belgium, and England, being employed at different times by the firms of Sander & Son, of England and Belgium; J. Blauw, of Boskoop, Holland; Wm. Pfitzer, of Stuttgart, Germany, and Hugh Low & Co., of London. He tells some interesting and amusing anecdotes of his stay abroad and while he acknowledges that he did not make a fortune he thinks that on account of the experience and opportunities for observing "how they do it" over there, that his time was well spent.

TAUSENDSCHON.

or in English, **THOUSAND BEAUTIES,** is the sensational new Climbing Rose of the year. Every florist should have it. Is not excelled for forcing purposes and for general planting by any Climbing Rose now known, **not even barring Crimson Rambler.** This is the coming forcing Rose. Get your stock early. It is beautifully illustrated in ten colors and gold in **Our New Guide to Rose Culture,** for 1908 the Leading Rose Catalogue of America. Copy **free** for the asking.

Strong plants of Tausendschon from 3-in. pots, 10 for $2.00; $15.00 per 100; $125.00 per 1000.

Single Hyacinths, all the leading named varieties King of the Blues, Czar Peter, Norma, etc., $3.00 per 100

Single Hyacinths, all colors mixed, $2.00 per 100.

Double Named Hyancinths, Goethe, Lord Raglan, Pure d'Or, Blolksbergeb, etc., $3.00 per 100.

Crocus, Named Varieties, $3.00 per 1000; Mixed Yellow, Mixed Purple and Blue, $2.50 per 1000.

Narcissus, Paper White Grandiflora, $1.00 per 100; $8.00 per 1000.

Dahlias, all the leading varieties $45.00 to $50.00 per 1000. Send for list.

Cannas, all the leading varieties $10.00 per 1000 and upwards. Ask for list.

Rex Begonias, the largest and cleanest stock in the country, $5.00 per 100; $45.00 per 1000.

NEW ROSE

MRS. JARDINE

Has All the Good Qualities, and

IS A MONEY MAKER

Easy to grow. Large flower; free bloomer; fragrant. It has already been awarded many honors — a silver medal from the Massachusetts Horticultural Society, a silver medal from the Pennsylvania Horticultural Society, and numerous certificates. It has also stood the best test that any novelty could possibly have, in receiving the highest honors of the Awards Committee of the New York Florists' Club, after their exhaustive examination of the growing plants in December; they having unanimously awarded **Mrs. Jardine** the club certificate, with a score of 92 points.

Our young stock is in superb condition, and all orders will be filled in strict rotation on and after March 15th, from 2 1-2 inch pots, $6.00 per dozen; $30.00 per 100; $250.00 per 1000; $1,125.00 per 5,000. Grafted plants on Dickson's Manetti Stocks, $5.00 per 100 additional. Send orders to

ROBERT SCOTT & SON, Sharon Hill, Pa. OR **WILLIAM P. CRAIG,** 1305 Filbert St., Philadelphia, Pa.

Sole Selling Agents in the United States and Canada.

6-inch pans, elegant stock ..... $1.00 each

For a complete list of seasonable stock see our **Quarterly Wholesale List** just issued.

HENRY A. DREER
714 Chestnut St, PHILADELPHIA, PA

Indianapolis.

Business is very good and the demand for cut flowers is strong. Greens, especially smilax, have a better call than for the preceding two weeks. Flowering plants, such as primulas, cyclamens and azaleas sell well.

NOTES.

The annual meeting of the State Florists' Association of Indiana was held at the Commercial club rooms January 15. The attendance was unusually large, and the invitation to be tendered to the American Carnation Society was the main topic. The carnation men may rest assured of a royal welcome, should they accept the invitation of our delegates. Officers for 1908 were elected as follows: J. S. Stuart, president; H. Junge, first vice-president; Chas. Knopf, second vice-president; A. F. J. Baur, secretary; Homer Wiegand, treasurer. A vote of thanks was tendered to John Heidenreich, the outgoing treasurer, for his many years of faithful service.

John Bertemann made a flying trip to Richmond last week, and Carl Sonnenschmidt and H. Junge visited New Castle. William Dittman's American Beauty roses are in excellent shape; Mr. Dittman considers this the best paying rose. Heller Bros. were head over heels in preparations for the spring rush in their mail order department; their new catalogue is a very attractive piece of literature for the rose-loving public.

Bentley & Co., who grow roses exclusively, are especially strong on Killarney; their establishment still leads regarding system and neat and highly practical arrangement. They also have a bottle opener that is marvelously simple and effective.

We shall send a large delegation from Indiana to Washington, including John Bertermann and A. Baur of this city.

Weiland and Olinger's roses and carnations are uniformly fine this year, every foot of bench yielding good crops.

Meyer Heller while able to be about is still under the care of a physician.

Visitors: E. G. Hill, C. Knopf and John Evans, Richmond; Stuart & Haugh, Anderson; W. W. Coles and W. A. Bitler, Kokomo; Geo. Moore, Rushville; A. Barick, Seymour; C. S. Barnaby, Columbus; Fred and Theo. Dorner, Lafayette.

Milwaukee.

STOCK IMPROVED.

Roses have shortened up very much during the past few days and it is now difficult to fill late orders. Carnations are just about equal to the demand. Stock of all kinds is very good and shows the effect of the nice bright weather that we have been having this month. There are now plenty of sweet peas for all demands.

NOTES.

According to present indications there will be quite a lot of building or rebuilding this coming season. Gustave Pohl will erect one house 25 by 100 feet. Chas. Burmeister will rebuild several of his houses and will, on completing this job, have his entire place of modern construction. C. C. Pollworth Co. will also erect several houses of the usual size. The firm reports being somewhat off crop on roses at present with prospects for a crop early in February.

Holton & Hunkel Co. is handling a lot of wild smilax this season that is of extra quality. The firm is also receiving heavy shipments of roses and violets.

Nic. Zweifel will attend the carnation meeting in Washington and it seems now as if he will be the only one from this city.

John Howard has a fine crop of long stemmed sweet peas. H.

COLUMBIA CITY, IND.—A. H. Diffendorfer has sold his half share in Wagoner's Columbia City Greenhouses to Mrs. A. J. Wagoner. A. J. and Mrs. Wagoner were the former owners of this concern, but last year Mr. Diffendorfer purchased a half interest in it. Mrs. Wagoner now returns to active participation in the business.

To Be Done Now.

IN THE GREENHOUSES.

Allow American Beauty at least a week longer than the tea roses in the sand.

Damp the raffia before tying on the scions when grafting roses and tie only moderately tight.

Keep the stock plants of chrysanthemums perfectly cool and allow a free circulation of air at all times.

Stir the soil regularly on the stock benches of Boston ferns to allow of the runners breaking through easily. Take care these are not injured in the operation.

If the benches are not ready for the asparagus and the plants are give a small shift. If they get very hard in the pots they will not start freely.

Sow Cobœa scandens, Maurandia Barclayana and other vines for veranda planting.

Never use bad cuttings. It is cheaper to throw them away at first than to be bothered with them all the season.

Sow Grevillea robusta. It pays to take time to sow the seeds point downward in a soil containing some sandy peat.

Commence working a stock of dahlias by placing the roots in moderate heat and keeping them moist to produce shoots for cuttings.

IN THE STORE.

Good fresh boxwood is a very attractive green for use with red flowers.

Cycas leaves and callas with a few mauve cattleyas were used with excellent effect in a large funeral wreath recently noted.

Keep everything about the windows neat and clean and have no dirty pots showing.

Where there is a greenhouse in connection with the store change the Boston ferns regularly and often.

Valentine's day should prove a money maker. Have suitable boxes and cards ready. There is scope for much originality here.

Araucarias are among the most satisfactory plants to push the sale of as they give satisfaction to customers.

OUTDOORS.

Cement concrete, among many other uses, is advised for filling rot holes in large trees. All decayed wood should be thoroughly cleaned out before running in the cement.

Ridge up badly drained soil and cut cross furrows where necessary to allow the water to escape.

Cut down hedges that are not wanted and pile the brush on the roots to be burned later and kill them.

Give plenty of air to cabbage or cauliflower plants in frames on all possible occasions.

Push on with cleaning the bark of old lichen-infested trees whenever the weather admits and when through give a good coat of whitewash.

A good hotbed made now is of assistance in raising vegetable seeds for planting later.

Leave pruning alone during severe frost.

While the ground is frozen get all the manure led onto the ground, as this plan is more satisfactory and less laborious than at any other time.

30,000 Dahlias

VAUGHAN'S SEED STORE, 84-86 Randolph Street, CHICAGO. 14 Barclay Street, NEW YORK.

Greenhouses and Nurseries: Western Springs, Ill.

Madison, N. J.

The twelfth annual smoker will live long in the memory of those present, consisting of 150 members and their guests. The entertainment committee secured high-class talent, and there was not a minute lost. Cigars, sandwiches, coffee and punch a la Totty were served abundantly and timely. The card tricks, comic songs and speeches kept us busy all the time. There was a short business meeting. Two new members were elected and two more names proposed. The Tarrytown Florists' Club, Monmouth Co. Horticultural Society, Wm. J. Stewart, F. R. Pierson and many from a distance sent letters of regret.

Among our visitors was a delegation from Orange, representing the New Jersey Floricultural Society, including Secretary Miller and Vice President Halbig, Secretary Miller spoke for the society and invited us in a body to their smoker, February 7. Invitation was thankfully accepted and we intend to go there in force. Harry Turner, of Castle Gould, was here, also A. and Billy Rickards, and they helped to make us merry. Wm. Sperling, of Stumpp & Walter Co., and W. E. Marshall, who spoke for the New York Florists' Club and sang several songs, were our guests. After singing "Auld Lang Syne" in concert, the affair broke up at 1 A. M. with a rousing three cheers for the Madison Florists. E. R.

MELROSE, MASS.—C. Casey had the decorations at the home of Geo. W. Perry on the occasion of the golden wedding celebration of Mr. and Mrs. Perry.

PHILADELPHIA, PA.—At a meeting January 21 it was decided to hold the spring flower show of the Horticultural Society on March 31, April 1 and 2. The show, which will be held in Horticultural Hall, will comprise an exhibition of all varieties of hyacinths, tulips and other bulbous plants.

Cinerarias

3, 4, 5 and 6-inch pots, 80c, $1.75, $3.00 and $4.75 per doz:

The Advance Ventilating Apparatus

"It works like a charm," "it is a pleasure to operate your machines" "it is so easy to set up" "would not want anything better," are a few of the expressions that come to us oftenest in our letters from cusomers.

Why not try our line.

THE ADVANCE CO.
RICHMOND, IND.

It is good business policy to mention the *American Florist* .....when writing to an advertiser

The Standard Steam Trap

Has established a record far above that of any other trap for Florists; being very simple, durable and easily taken care of.

Catalogues of the **Trap, Duplex Gutter,** and **Standard Ventilating Machinery,** mailed free upon application.

E. HIPPARD. Youngstown, O.

A STORY OF WATER SUPPLY TROUBLES.

15 MICHIGAN STREET.

*** He saw our ad. in the AMERICAN FLORIST—sent for our catalogue and got it promptly. The

STANDARD PUMPING ENGINE

using gas or gasoline for fuel, looked right to him. "That

AUTOMATIC SAFETY VALVE IS CERTAINLY FINE.

"But you are too high priced. I can buy a——engine and belt driven pump and get a common safety valve and then I have just the same thing for less money." He did so—had it six weeks—it never worked just right, so he threw it out and refused to pay for it. Then he tried another—the belt slipped, the safety valve leaked and got stuffed up, it was not made for that kind of work. He threw this one out too, and said to us: "Tell me more about your

AUTOMATIC BY-PASS

and how soon you can ship me a **STANDARD PUMPING ENGINE?"** We got his order on Saturday, we shipped the same day by express, * * * running in his place the next Tuesday and saved his dried up stock.

His letter with payment said: "Working fine. Wish you the success you so richly deserve," Don't experiment, We have done that for you. Buy the guaranteed results given by

Standard Pumping Engines. High Pressure, Plenty of Water and Reliability.

Do it now and begin to increase your profits at once. Send for Catalogue.

Ready Reference Advertising.

BOOKS FOR FLORISTS

The time is coming along when these are needed and opportunity at hand for reading them. Every one of the following should be in your library.

Send prices quoted and we send the books.

THE AMERICAN CARNATION (C. W. Ward).—A complete treatment of all the most modern methods of cultivating this most important flower. Illustrated. $3.50.

FUMIGATION METHODS (Johnson).—A practical treatise on cheap and effective means of destroying insect pests. Handsomely bound and profusely illustrated. 250 pages. $1.00.

THE HORTICULTURISTS' RULE-BOOK (L. H. Bailey).—Contains information valuable to all those engaged in any branch of horticulture. Illustrated. 312 pages. 75 cents.

HOW TO MAKE MONEY GROWING VIOLETS (Saltford).—This is by a practical grower who has made a success of the business. No grower of violets can afford to be without it. 25 cents.

DAFFODILS, NARCISSUS AND HOW TO GROW THEM (A. M. Kirby).—Contains all that is really worth knowing about these most popular of spring bulbs, written from the standpoint of American conditions. Illustrated, 233 pages; postpaid, $1.21.

THE VEGETABLE GARDEN (Vilmorin-Andrieux).—The best and most complete book on vegetables ever published. There are 782 pages and hundreds of illustrations in this English edition, edited by Wm. Robinson, the noted English horticultural writer. $6.00.

CELERY CULTURE (Vaughan).—The important subject of celery culture is thoroughly covered in this illustrated pamphlet of 59 pages. The florist raising young plants of celery and those who grow the plants to maturity will alike find it valuable. 50 cents.

SUCCESS IN MARKET GARDENING (Rawson).—Written by one of the most prominent and successful market gardeners in the country, and who has the large t glasshouses for forcing vegetables for market in America. Outdoor and indoor crops are treated. Illustrated, $1.00.

ASPARAGUS (Hexamer).—A practical treatise on the planting, cultivation, harvesting and preserving of asparagus, with notes on its history and botany. This book is mainly devoted to the culinary kind of asparagus, but there is also some reference to the ornamental species. 50 cents.

THE GOLDFISH (Mulertt).—A number of florists find goldfish an attractive and paying addition to their business. The best advice is given in every department of the subject, including construction and care of the parlor aquarium, in this volume of 160 pages, handsomely illustrated. $2.00.

THE ORCHARD AND FRUIT GARDEN (Powell).—One of the most complete works we have seen on this subject for a considerable period. It is divided into three parts, the orchard, the fruit garden and cultural directions. The volume is well illustrated and the author is a practical man who knows his subject. The book contains 321 pages. $1.50.

MUSHROOMS: HOW TO GROW THEM (Falconer).—The only American book on the subject, 29 illustrations. Written by a practical mushroom grower, who tells the whole story so tersely and plainly that a child can understand it. This book has increased mushroom growing in this country three fold in three years. $1.50.

EVERYBODY'S PAINT BOOK (Gardner).—The author has given in this book easily understood instructions for painting anything from a board fence to a fine room and so well is it illustrated that almost every tool a painter needs is shown and described. The perusal of this book will save much money to those who have a bent for this kind of work. It contains 180 pages. $1.

LANDSCAPE GARDENING (Waugh).—This is a very useful little book on the art of landscape gardening. It will be found exceptionally valuable to amateurs, as it covers in detail the numerous problems that come to the owners of small gardens. It is freely illustrated and the pictures have been chosen with a view to informing the reader rather than decorating the book. 50 cents.

Manufactured by THE KENTUCKY TOBACCO PRODUCT CO., Louisville, Ky.

St. Paul.

Trade has been the largest for this month that we have ever experienced. The weather has been favorable and stock has been very good for January. Dutch bulb stock came in much earlier than usual this year, and has sold very well. There has been some scarcity of light colored roses and carnations, but other stock has helped out very materially.

CLUB MEETING.

The first regular meeting of the Twin City Florists' and Gardeners' Club was held at Holm & Olson's store January 21, and was attended by about 70 of the craft. On account of the illness of President Wirth, Vice-President Olson was in the chair. After the minutes of the meeting when the club was organized had been read and disposed of, the constitution and by-laws were re-read and those present were invited by Secretary Dysinger to become charter members by paying their dues, for which a recess was taken.

After everyone had been enrolled E. Nagel read a paper, "Spring Bedding Plants," which started considerable discussion on prices at which these have been sold, and which ended with a committee being appointed to look into the matter and report at the February meeting. The ball was started rolling also for a fall show, with a committee being appointed to look into the matter and report at the next regular meeting. The club has now over 70 members, who all are very enthusiastic, and great hopes are entertained for a large and flourishing society.

Several out of town florists came to join the club, among them being G. A. Clausen of Albert Lea; A. N. Kinsman, Austin; J. Larson, Red Wing; and Niel Nielsen, Mankato. The officers of the new club are: Theo. Wirth, Minneapolis, president; O. J. Olson, St. Paul, vice-president; S. D. Dysinger, 20 W. 5th street, St. Paul, secretary; R. A. Latham, Minneapolis, treasurer; E. R. Holm, Aug. S. Swanson, E. Nagel and Thos. Hall, executive committee.

Visitors: A. Currie, Milwaukee, Wis.; A. Ringier, representing W. W. Barnard & Co., Chicago; C. B. Knickman, representing McHutchinson & Co., New York; Wm. Hagemann, New York; W. G. Schucht; C. W. Scott, representing Vaughan's Seed Store, Chicago.

O.

In a Luther Burbank Garden.

White are the coreless apple buds,
As your hand in mine I clasp;
And we wander through the eyeless spuds
And the raspberries, sans rasp.

You plucked a blackberry, dazzling white,
As we chanted a tuneless tune,
And I took a lucious, soulful bite
Of a pitless, skinless prune.

The cactus plant ne'er cackles now,
As its teeth have all been drawn,
And calm there falls upon your brow
The light of a sunless dawn.

In this dear place I would live for aye,
Discussing the whyless how,
And speeding the minuteless hours by,
From the path of the pastless now.

ROSE GRAFTING AT PETER REINBERG'S, CHICAGO.

Peter Reinberg, Chicago.

When calling at Peter Reinberg's fine plant recently we found Foreman Collins and his staff busy in the throes of rose grafting. We noticed that both the wood used for grafting and the stocks were in excellent condition and the cases in which 50,000 of the most popular varieties are to be placed were filling up rapidly. No American Beauty is grafted here, but most of the other kinds that do better this way, such as Bride, Bridesmaid, Richmond, Mrs. Marshall Field and others. Besides the large amount of grafted stock about 500,000 cuttings are rooted annually and much of the stock is already potted and growing away.

In a hasty look around the houses the fine appearance of the American Beauty roses in the large sections devoted to this variety strikes one at once. The plants are clean and healthy and a heavy cut is being taken. The number of plants grown here is prodigious, but they have been given quite recently and we need not refer to this further now, but the condition of all the stock leaves nothing to be desired. The Bride is in full cut and the flowers are fine, while Bridesmaid is also in excellent condition, the flowers of perfect color and substance. Notwithstanding the heavy cut which has been taken for months, the plants are full of fine new growth and are making good from below in a remarkable manner. Mrs. Marshall Field is a lovely variety and is in crop, but so closely cut that few blooms could be seen. The demand for this fine rose is constantly increasing and a larger number than ever before is being grafted this season for home planting. Mr. Reinberg has not yet decided to give this rose to the

trade and will probably keep hold of it at least one more season.

In the carnation section the plants are in great shape and a large cut is on. Mrs. T. W. Lawson is still grown here in quantity and White Lawson is also very well done, large pure white flowers being taken. Enchantress, Rose Pink Enchantress and Winsor are grown in immense numbers. Beacon here, as in many other places, is largely taking the place of Robt. Craig, being much freer in growth and producing many more flowers to the plant. The propagating house is filled with healthy, well-rooted cuttings. Last year 1,300,000 were rooted and already this season 800,000 have been put in the sand. Everything around the portion of the plant we visited was in perfect order, the plants clean and healthy and all promising extremely well for the coming season.

Pistachio Trees at Indio, Cal.

Seventy-five pistachio trees have been sent to the government experimental station at Indio, Cal., and are in a promising condition. The trees are six months old, and received considerable backset from being disturbed in shipping, but they are now starting a new growth.

The pistachio nut is a native of Greece, but it is believed it is especially adapted to the Coachella valley and that it can be raised with profit there. There are three varieties, one of which bears the delicate green nut used for ices, creams, etc., and the other varieties are for flavoring and confections. The nuts do not appear until about the fifth year, and the tree does not come into full bearing until it reaches an age of six or seven years. The nuts sell at from $1 to $1.25 per pound, and an average tree will bear 25 pounds .

Orders From Everywhere.

AMERICAN FLORIST CO.—Please omit from my advertisement of chrysanthemum cuttings Glory of Pacific, Kalb, Willowbrook and Chadwick, as I am sold out of these varieties. Your advertisement does the business, as I have orders from everywhere, excepting the North Pole and Cape Horn, and suppose they are on the way.

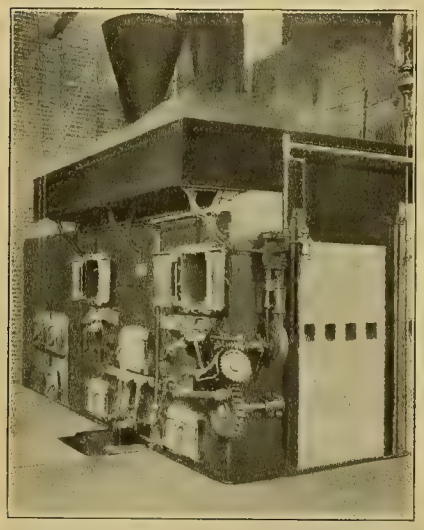
The Allied Trades

Descriptive particulars—with drawings or photographs, if possible—of any new apparatus or device which may prove helpful to the trade are solicited for this department.

Murphy Automatic Smokeless Furnace.

This is a device for automatic stoking and firing. Not only does it mechanically feed and distribute the coal, but it also removes ashes and refuse. It is adaptable to any size or type of boiler and is useful for steam-making as well as for all kinds of kilns and drying, burning, evaporating and calcining operations where very high temperatures are needed. There are coal magazines on either side of the furnace extending from front to rear into which the coal may be either machine or hand fed. Below is the coking plate against which the upper ends of the inclined grates rest. These are moved by a rocker bar at the lower end.

The motion is apparently applied to as many boilers as necessary by coupling



Murphy Automatic Smokeless Furnace.
At the F. R. Williams Co , Cleveland, O.

up the stokers on each, the steam pistons being at the end of the battery, though, presumably, this is capable of adaptation. Owing to the perfect coking of the fuel it is claimed that all volatile gases are mixed with air and consumed in the furnace before the coal is burned, thus ensuring the highest temperature and most perfect combustion with a low grade of coal. Another strong point in its favor is economy of labor, for even in a one-man power plant the fireman will be free a great part of the time for other duties. With this device it is also unnecessary to open the furnace doors, thus preventing a rush of cold air to the fires. The device is in use in large power producing and other plants in all parts of the world, repeat orders to the number of 32 having been sent in from a large steel works, where the first of the Murphy automatic furnaces was put in in 1890. It is manufactured at the Murphy iron works, Detroit, Mich., and the company have branch offices all over the United States, in Canada and in London, Eng.

KROESCHELL BROS. CO., 45 Erie St., Chicago.

Hybribizing a la Chicago Record-Herald.

An eminent horticulturist they say has crossed the potato bug with the hen, to make the egg market brisker; has mixed the buckwheat stem with the sugar maple to produce self-siruped cakes; has grafted the sorghum cane upon the cornstalk to bring about corn bread and molasses with little labor; has budded the apple upon the jack oak to make apple-jack from the cider or tree drip without waiting for fermentation; has crossed the pepper and the box elder to bring an annual crop of ready-made pepper boxes, and added a little touch of the quaking asp to this already marvelous hybrid and thus provided a self-shaking pepper box right off the tree; has learned from the bloom of the hawthorn tree how to tell the he-haws from the she-haws; has combined the slippery elm and the ice-plant until he has produced an ideal wood for making toboggans and bob-sleds; has crossed the ironwood with the water birch and never caused a bit of rust; has crossed the dogwood and the pussy willow without any disturbance beyond a mere bark; has hybridized the tumbleweed with forest trees, so that the first strong autumn wind brings the lazy forester's water wood home to him without the stroke of an ax or even hitching up the team; has mingled the ragweed with thyme until the wind sings ragthyme through the branches of the mixture; has mingled the pollen of the honey locust, common locust and the wire grass until he will soon be able to supply the market with barbed-wire fence fresh from his fields—has even crossed a mountain-range with a burro and has great expectations of the results.

The Maidenhair Spleenwort.

One of the most charming of our native ferns may be gathered in midwinter, if one knows where to look for it, says the Philadelphia Record, and it is almost as common as it is charming. This is the maidenhair spleenwort, or, as it is more often called, the English maidenhair, though it is rather misleading to call it English, since it is found not only in Great Britain, but almost throughout North America. It is a small, delicately-made fern that loves the nooks and crannies of moist, shady cliffs, often growing in flat rosettes against the perpendicular sides of creviced rocks. Near Philadelphia it is unfortunately rather scarce nowadays, owing doubtless to the depredations of ruthless collectors. It may still be found in the Schuylkill hills, however, while in the more mountainous districts of the state, almost every rocky stream sings to its fronded colonies. People who keep a corner in their gardens for wild plants, will find the maidenhair spleenwort a contented denizen of a rockery.

European Horticulture.

FROM THE BRITISH TRADE PAPERS.

CYPRIPEDIUM SAN-AC-DERAE SUPERBUM.—The well known and now fairly common Cypripedium insigne Sanderæ has been outclassed. The improved form, or so-called improved form, was exhibited at the last meeting of the Royal Horticultural Society by Norman C. Cookson, Esq. (gardener, H. J. Chapman), Oakwood, Wylam-on-Tyne, when an award of merit was bestowed. Apart from slight differences of form, the yellow color is deeper than in C. insigne Sanderæ, which was one of the parents, the other being C. San-Actæus. As to the name, we are getting on in our nomenclature nowadays, are we not?

CYCLAMEN PRICES TOO LOW.—Overproduction, together with reckless competition, are held responsible for the fall in prices for cyclamens to a point below cost of production. Although one of the fastest selling items at the German plant markets they have ceased to bring figures adequately repaying for the expense and care entailed in their culture, so it is said.

Greenhouse Building.

Vincennes, Ind.—H. Zepf and Joseph Labo, 6,000 feet of glass in spring.

Portland, Me.—J. W. Minot, one greenhouse 45 x 150 feet.

Woburn, Mass.—Adam Foster, two greenhouses, 50x100 feet.

Attica, N. Y.—A. J. Pauley, two steel greenhouses, one 26x200 feet and one 16x100 feet.

Lynn, Mass.—Thos. Roland, Nahant, one greenhouse, 45x140 feet.

Atchison, Kans.—U. S. Bisel, one greenhouse.

Milwaukee, Wis—Gustave Pohl, one greenhouse, 25x100 feet; Chas. Burmeister, rebuilding several houses; C. C. Pollworth Co., several houses.

The Wholesale and Retail Florists both depend upon their refrigerators to determine whether their stock shall sell or stay in the store. McCray Refrigerators keep stock in such perfect, fresh and fragrant condition that it cannot help selling, and the McCray uses less ice than any other. It virtually pays for itself. The patented system of air circulation which cools all parts evenly, thoroughly, and with fresh, cold, dry air, is one of the features of

McCray Refrigerators

They are made in the most beautiful finish and substantial construction. They are lined with white enamel, or if you wish, you may have tile, opal glass, mirrors or marble.

There is a wide range of regular sizes of McCray Refrigerators for immediate shipment, although we build them to order for any requirement.

You should have our Catalog No. 71, which describes the detail of these successful and economical refrigerators for the florist.

McCray Refrigerator Company
760 Mill Street Kendallville, Indiana.

FROM THE BRITISH TRADE PAPERS.

BONEMEAL.—This is undoubtedly a fertilizer in which both the nitrogen and the phosphoric acid are sold at a very low price per unit. It has always been admitted that the nitrogen in bonemeal is in an available form. But as to the value of the phosphoric acid contained in this fertilizer there is some difference of opinion. Experiments conducted by some of the leading German agricultural chemists place the value at a little above that of mineral phosphates, which are, when in the undissolved condition, practically valueless as fertilizers, while the experiments conducted in Japan give it a very much higher value. Observations made in India also differ materially. A sample of coarse bonemeal applied on the surface under a covering of leaves disappeared in less than a year, while another sample of coarse bonemeal buried deeply was dug up after 28 years. Evidently neither the phosphoric acid nor the nitrogen is readily available when the bone is buried deep in the soil, and the whole question needs further investigation. This investigation is all the more desirable, as the ingredients of plant food contained in bone can be bought comparatively cheaply in that form, and as owing to the high percentage of iron and the very low percentage of lime in certain soils, superphosphates may not give relatively as good results as have been obtained elsewhere.

CANKERED (?) ROSE SHOOTS.—At the meeting of the Royal Horticultural Society's scientific committee on December 31, a report was received from Mr. Gussow concerning the rose roots shown at the previous meeting by Mr. Jenkins, as follows: "I find the trouble with the rose roots is not canker, and cannot be transferred from one plant to another. It is generally accepted that canker is caused (a) by frost, (b) by fungus, (c) by any other mechanical injury which fungi have infested. In the present case there is no fungus present, and if the root in the attacked plant (when repotting) is cut away no injury will be done to the plant. The growth is nothing but a continuous formation of adventitious roots, especially where the root is bent or injured. New callus is formed, and from that callus rootlets are everywhere sent out, but as the plant depends on the root system of the manetti no use is made of these roots, and they develop but little.

CYPRIPEDIUM FAIRIEANUM.—When Cypripedium Fairieanum caused such a commotion in the orchid world a few years ago not many would have cared to suggest that it would soon become comparatively common, yet such is the case at present, owing to large importations from its native haunts. The first variety of it, named Black Prince, was shown before the orchid committee of the Royal Horticultural Society December 10, 1907, by Sander and Sons, the well-known orchid specialists of St. Albans, when it received an award of merit. It is a handsome and distinct variety. The dorsal sepal is broader than in the type and is very heavily streaked with almost black crimson. The petals curve downwards, with the ends charmingly reflexed, the color being greenish streaks on a white ground. The lip is projected well forward and is of a brownish red color. Doubtless we shall soon be welcoming other varieties of this famous orchid.

DELPHINIUM CANDIDUM.—An interesting species belonging to a small group of delphiniums confined to the mountains of tropical east Africa. It is closely allied to D. Leroyi and D. macrocentron, and has large, pure white flowers with purple anthers and sweetly-scented, the perfume resembling that of the primrose; the leaves are palmately five-lobed, and measure four or five inches across the widest part. The plant figured in the Botanical Magazine was raised in the gardens of Hindlip Hall, from seed gathered by Lady Hindlip in 1904 between Mount Elgon and Kisumu, Uganda. D. Candidum is a perennial species, and dwarf in growth.

SULPHURIC ACID AS A FUNGICIDE.—We learn that a safe and useful fungicide, which is used with satisfactory results at the Royal Gardens, Kew, is a solution of sulphuric acid in the proportion of 1 to 1,000, or one pound to 100 gallons. This does not injure the plant, and completely destroys mildew and similar fungi. No harm will be done to pumps, etc., if a small amount of clear water is pumped through the apparatus at the conclusion of spraying. This should be done whatever solution is used, as the apparatus is then left in a clean condition.

AMERICAN CARNATION SOCIETY.

Conclusion of the Seventeenth Annual Meeting.

Wednesday Afternoon.

At the joint meeting of this society and the Breeder's Association, held in the afternoon of January 29, a paper was read by Prof. Alex. Graham Bell, which covered the wide field of improvement in races and species and was not confined to any special plant work. At the evening session it was voted to offer gold, silver and bronze medals for the coming National Flower Show at Chicago. S. S. Skidelsky read his paper on: "What the Buyer of a New Carnation Should Expect From the Originator," and a general discussion of the subject followed.

At 2 p. m., January 30, the delegates, with a number of their lady friends, assembled at the hall on G street and proceeded under the escort of W. F. Gude, to the White House. They were received by President Roosevelt with a short address of hearty and kindly greeting. A vase each of the carnations Alma Ward and Mrs. C. W. Ward were presented to the president. The delegates then proceeded to the steps of the U. S. treasury and were photographed in a body. The features of the afternoon and closing session were papers by Prof. J. B. Norton and Charles Willis Ward.

In addition to the election of the executive officers of the society, Peter Fisher was elected to fill the vacancy made by the resignation of Wm. Scott as judge. Wm. Nicholson was elected to succeed himself. J. S. Wilson was elected to succeed himself as a director.

The Banquet.

The banquet given in honor of the members of the American Carnation Society by the Washington Florists' Club was held at Ranscher's. The spacious hall was most beautifully decorated with the flower emblematic of this famous organization. On every side, on the tables, in bouquets and boutonnieres was the carnation. The decoration was by Gude Bros. Co.

Peter Bisset, president of the Washington Florists' Club, who welcomed his guests in a brief speech, said: "On behalf of the Washington Florists' Club, I welcome you. It is indeed a pleasure for me to state on behalf of that organization that we are very glad to have you with us. I will not take much of your time, however. The first toast of the evening is 'Our Country and President.' I am sure that after the pleasure we had this afternoon shaking hands with our beloved president, this toast has a new meaning to us, and I would ask that we all rise and drink to Our Country and President."

President Lemon said: "You here present are members of the American Carnation Society; you love the society, and therefore the few remarks that I will make will have a true and real meaning to you, even though they may be made in a halting manner. The society was organized 17 years ago, for the purpose of advancing the interests of the carnation. The chief aim was the improvement of the flower. The founders of this organization saw a grand future for the flower. The society includes members from all over the United States, and, I am happy to say, that the American Carnation Society is of such international interest that it includes members from Canada. There is no border, as relating to the American Carnation Society.

"I see a grand future for this organization. You have elected the coming year, as successor to my office, a man whose interests are primarily in the carnation. He is a man whom we all admire, and I feel certain that under his guidance, the American Carnation Society will advance to an even greater degree than in the past. I hope you will all come to the convention next year. We will welcome you to Indiana.

"I wish particularly to thank the members of the society for their help to me. And, I also wish to particularly thank our vice-president, Mr. Bisset, who has carried so great a part of the duties connected with this convention and with this society, and I am sure you will join me in thanking him for his great work in relation to this body. Let us remember, first, foremost and all

the time, to keep in mind the advancement of our society and the carnation, to bring exhibits to our next convention and do all in our power to increase the membership of the organization."

President-Elect M. A. Patten said: "I want to thank the people of Washington for this elegant time we have had here, and I hope next year in Indianapolis to have a large meeting and to see all of you there. We are going to have the greatest carnation meeting ever held."

Ex-President Dunlop then said: "A small delegation has come from across the border to enjoy the delightful entertainment afforded us here in Washington. We have thoroughly enjoyed this meeting. We have been helped and encouraged, and we want to extend to you that most cordial feeling we have for you. I hope that the convention of 1909 will be a successful one. I can say that from our end we will have a good delegation."

Robert Craig, of Philadelphia, said: "Horticulture includes all that grows out of Mother Earth for the use of men. Suppose it were possible for us all to be placed in a beautiful garden where there was no trouble, no disturbance. Would not that be a heaven on earth? Horticulture has always proved the source of the highest enjoyment. The most perfect rest can be found in the garden. Our first speaker spoke of the phenomenal progress of this great nation. We can also say that the art of horticulture is keeping pace with all other lines. We have at the head of the Department of Agriculture a great man. We can satisfy ourselves that the work of this department is going on well. We have here in Washington a man whom we all call the "Father of Horticulture." He presides over the National Botanical Garden. Everywhere in out of the way spots, we can find the results of this man's work, through the work of distributing seeds which he has done. It occurs to me that horticulture has advanced to a far greater degree than any other line of endeavor.

W. J. Stewart made several remarks about the work done by the press, about the endeavor made to present to the readers everything of value. He called attention to the fact that while the trade publications of other lines were of interest only to a few, the horticultural trade journals were of interest to every person imbued with a love for the beautiful."

W. F. Gude, Washington, said: "To me has been assigned the most beautiful toast of the evening. (Our Guests.) Your stay with us has been indeed most pleasing. I trust that you all have enjoyed yourselves to the fullest extent, and we wish for the American Carnation Society a happy and prosperous success and each and everyone of you good will and Godspeed for all time to come."

J. R. Freeman was absent on account of sickness, and C. W. Ward, of Queens, N. Y., responded to the toast of "The Ladies." He said in part that he was positive of the fact that any member of the American Carnation Society who did not love to look upon a beautiful woman, whether in face, figure or character, never did better than a third prize in the exhibition.

The presentation of the various prizes by President Lemon then followed.

GOLD MEDAL WINNING VASE OF ALMA WARD.
Exhibited at Carnation Conference by Cottage Gardens Co., Queens, N. Y.

M. A. Patten, as chairman of the final resolutions committee, then read the resolution reported by that committee, thanking in detail the members of the Washington Florists' Club, its officers, and the various speakers whose remarks had been so highly appreciated during the convention; as well as others. The seventeenth annual convention of the American Carnation Society was thereupon declared by President Lemon to be at a close.

The American Breeders' Association.

The work of the American Breeders' convention, co-incidental with that of the American Carnation Society, was important and took a wide range. At the morning session, January 30, the report on breeding forest and nut trees, written by Gifford Pinchot, was read by G. B. Sudworth. A paper on breeding cantaloupes was read by P. K. Blinn, of Rocky Ford, Col. David Coker, of Hartsville, S. C., read a paper on, "The Field for Economic Plant Breeding in the South." A resolution was adopted urging congress to investigate the question of quarantine of imported plants; the association being opposed to any hasty or radical action by congress in establishing such a quarantine.

The following board of officers was elected: James Wilson, secretary of agriculture, president; Charles Willis Ward, Queens, N. Y., vice-president; W. M. Hays, assistant secretary, Department of Agriculture, secretary; M. H. Gentry, Missouri, treasurer; H. H. Mowry, assistant secretary; H. J. Webber, Cornell University, chairman plant section; Prof. N. E. Hansen, Brookings, S. D., secretary plant section. Although the time and place is not yet fixed, it seems almost certain that the next meeting of the association will be held in Chicago.

MANY good varieties of carnations get the name of bursters that keep a perfect calyx under normal conditions of culture, but burst owing to too high feeding, too little air and other causes.

Notes on Varieties.

Creole Beauty.—Harlowarden type, brighter shade. Looks good to me for color.

Afterglow.—Shows up very fine in the different entries. Good, large flowers; fine stems and good color. Looks better to me than it did last year.

Alma Ward.—The finest and largest white shown; flowers four inches; good stems. Mr. Ward tells me he will not put cuttings on the market, but will keep and grow exclusively for his cut flower sales.

Mrs. C. W. Ward.—A grand pink, shade lighter than Afterglow. Flowers three and one-half inches; strong stems. Will keep same as Alma Ward.

Climax.—Enchantress type of flower; shade lighter than Rose Pink Enchantress. Appears to be a little soft.

Splendor.—This showed up in very fine shape, fine long, stiff stems; 3 to 3¼-inch flowers of a clear pink, shade of Mrs. C. W. Ward; rather heavily fringed. One of the best.

White Perfection.—As good as the best and still the leading white on exhibition table.

Aristocrat.—Showed up in usual good style. Kept well.

Winsor.—Showed up in fine shape in every entry. Fine color, good size and fine stems. Looks to be a good one for some years to come.

Andrew Carnegie.—Robt. Craig color; 3-inch flowers, on good, long stems. Beacon shape of flower, but more fringed. Looks fair.

Victory.—Holds its own as the best red with Beacon. Was shown up in good shape and flowers kept best of any in the hall. Will be a standard red for some time to come.

No. 32.—30-inch stems, 2½-inch, fine flowers, of good form. Color of Robt. Craig. Looks good. Exhibited by John Reimels.

White Enchantress.—As shown looks fine. Clear white, 3-inch flowers, on stiff stems, holding flowers up stiff. Undoubtedly a good commercial white.

AMERICAN CARNATION SOCIETY DELEGATES AT U. S. TREASURY, WASHINGTON, D. C. JANUARY, 1908.

PARTIAL KEY TO PORTRAITS.—(1) Pres. M. A. Patten; (2) Peter Bisset; (3) Robt. Kift; (4) F. R. Pierson; (5) F. Burki; (6) S. S Pennock; (7) Alex. Wallace; (8) Richard Vincent, Jr.; (9) J. E. Haines; (10) W. P. Craig; (11) J. R. Fotheringham; (12) Peter Fisher; (13) A. H. Langjahr; (14) John Walker; (15) Wm. Nicholson; (16) W. F. Gude.

Mrs. Tom Harvey.—Lawson type of flowers. Good size and fine stems. Color of Pink Imperial. Looks good.

Pres. Seelye.—Pure white, 3-in. flowers. Good stems; resembles Bountiful. Looks good.

Lieutenant Peary.—As shown looks well and showed up in good style.

Lady Bountiful.—Holds its own as one of the best whites. As shown flowers were hard to beat.

Apple Blossom.—Fine shaped; 3-inch flowers. White with delicate tints of pink on order of Mary Wood. The color is pleasing. Stems good.

Heacock's Seedling No. 100.—Seedling of Enchantress, which it resembles in form, and color of Rose Pink Enchantress. Can see very little difference between this and Rose Pink.

Beacon.—As shown is the best scarlet of the day. Flowers much larger than shown last year and better form. No doubt this is the leading scarlet.

Defiance.—Suffered in transit, went to sleep early. Is fine color and good form.

Harvard.—Very fine dark maroon or crimson.

Imperial.—Showed up in fine shape, but variegation is poor.

Sarah Hill.—The few shown looked fine and of good size. Pure white. Kept good. Looks good.

Rudd's White.—Arrived 24 hours late and was in excellent condition. Fine, well shaped, 3½-inch flowers, on good stems. Has the looks of a good one. Color clear white.

Rudd's Pink Seedling.—Large, close petaled, light pink. Looks good. Arrived late, but was in good condition.

W.

President Seelye may never prove a wonder as a prize winner, but for commercial purposes I will expect it to be heard from, early and often.

Viola Sinclair, another of H. W. Field's introductions, of the Lawson shade of pink seems to have good points and may yet make a record.

Bay State, as I saw it growing a year ago at the range of its originator, Albert Roper, was much superior to what we saw of it at Washington, though it is agreed that a growing carnation and one that has made a long trip are different propositions.

F.

Convention Notes.

W. N. Rudd's white seedling carnation caused many exclamations of admiration.

The American Carnation Society has brains behind it; see what good officers it always elects.

The Washington florists are hospitable and kindly men. May they have abundant prosperity!

Robert Craig, Robert Kift, S. S. Pennock and other Philadelphians arrived in time for the banquet.

W. N. Rudd's New White Seedling 1605 A.

Secretary McCauley, of the Florists' Club of Washington, is entitled to his share of credit. He worked hard.

The carnation flowers took on a fine summer doze the next morning and were mostly, as Willie would say, "on the bum."

When a man gives a special prize and drops in to see the flowers that won it, he should be able to find them without a guide.

The attendance at the regular sessions of the society was scattering, hardly enough around to keep the chilliness out of the air.

Those who went south for a warmer climate must have been disappointed. January 30 and 31 came near showing zero weather.

Ex-president Dunlop and the Canadian delegation made a fine body of men, and it is pleasing to note that they were popular.

President Lemon, Vice-President Bisset, Secretary Herr and Treasurer Dorner all worked hard, and their labors seemed to give general satisfaction.

Doubtless the parties having the matter in charge did the best they could, but it does seem strange that in a city like Washington, no more acceptable place can be found in which to hold a show than the National Rifles armory.

The attendance of visiting florists was good but I noticed comparatively few local florists in the hall. The Washington boys did not seem to warm up as they did at the last S. A. F. summer convention; perhaps it was the weather.

Many of the delegates visited the various government horticultural departments, notably the greenhouses of the propagating gardens and Department of Agriculture, and were well repaid. The crops of carnations and roses at both departments were very fine.

Mr. Rudd has the happy faculty of disposing of a carnation in a line and a half, but in some instances he seems severe.

Buyers were very shy, especially on the new sorts. The 1908 introductions will have to get busy if they run up big sales this spring.

A peculiar incident was the tie vote—Indianapolis vs. Pittsburg. Of 166 votes cast, 83 were for each city, Chas. S. Crall cut the knot by a motion that Indianapolis be chosen.

It will be both unjust and ungenerous to criticise the prize winners—their honors were fairly won. But, it does not follow that all those that did not win prizes are indifferent or worthless.

Special Exhibits.

W. P. Craig, Philadelphia, Pa., made a fine exhibit of the new rose Mrs. Jardine, which, after standing the wear of a three days' exhibit, were used in the decoration at the banquet at Rancher's with fine effect.

At the entrance to the hall, F. H. Kramer, of Washington, arranged an elaborate exhibit of his new rose Queen Beatrice with a border of Adiantum Brienii fern. The exhibit was greatly admired by all.

The E. G. Hill Co. exhibited the new red rose Rhea Reid which showed splendid qualities of stem and bloom.

William Sim of Cliftondale, Mass., exhibited his new single violet Boston, which attracted much attention.

F. R. Pierson Co. of Tarrytown, N. Y., in addition to the many prize winning carnations exhibited Nephrolepis superbissima.

J. A. Evans, representing the Quaker City Machine Co., of Richmond, Ind., exhibited specimens of his firm's greenhouse appliances.

The Lord & Burnham Co., of New York, greenhouse builders, was well represented.

The Morehead Manufacturing Co., Detroit, Mich., exhibited their steam traps and other appliances.

Kroeschell Bros. Co., of Chicago, specialists in greenhouse boilers, were well represented.

Special Prizes.

Besides the special prizes noted in our last issue, the following were awarded:

Bronze medal of the American Carnation Society for 100 blooms, any variety, any color.—The Cottage Gardens Co., Queens, N. Y., with Mrs. C. W. Ward.

Silver medal of the Society of American Florists for the best vase of 50 flowers of a variety not yet disseminated.—Cottage Gardens Co., for Alma Ward.

Bronze medal of the Society of American Florists for the second best vase of 50 flowers of a variety not yet disseminated.—R. Witterstaetter, Cincinnati, O., for Afterglow.

CARNATION AFTERGLOW.

Five dollars cash, given by John Robertson, Washington, for 25 blooms Winsor.—Cottage Gardens Co.

Silver cup, given by James J. Harty to the exhibitor making the largest display—all vases counted.—Chicago Carnation Co., Joliet, Ill.

Ten dollars in gold, given by Z. D. Blackistone, Washington, for best 50 blooms of white carnations, distinct from other entries.—Chicago Carnation Co.

Cup or stein, given by C. A. Goldsmith, jeweler, Washington, for 50 blooms of red, distinct from other entries.—Cottage Gardens Co.

Vonderheide cup.—R. Witterstaetter.

Barry & Whitmore cup.—S. C. Briggs, Washington.

CERTIFICATES.

Preliminary certificate to M. A. Patten for No. 46-205.

Certificates of merit to Joseph Heacock, Wyncote, Pa., for No. 100-86, and to H. W. Field, Northampton, Mass., for President Seelye.

Points on Carnation Breeding in America.

BY C. W. WARD.

Though I have devoted a considerable time to the breeding of carnations and to the study of them during the past 14 years, in view of the complexity of the subject and my lack of scientific knowledge, I feel diffident in placing my views before a conference composed of the most advanced scientific talent of the world. I shall not attempt to enter into a scientific discussion of the subject, but will endeavor to state in plain language what seems to me to have been thus far accomplished.

As most florists know, the original carnation, which has been known in history for several centuries before the Christian era, was a five-petaled single bloom about one inch in diameter and of a pinkish-mauve color. It was distributed in its wild state over the whole southern half of the temperate zone in Europe, but was known more particularly to historians as inhabiting France and northern Italy. It was found in abundance in Normandy, from whence it is generally believed to have been introduced into Great Britain about the time of the Norman conquest. Even so recently as 1874 it was found in a wild state covering the Castle of Fallaise, in which William the Conqueror was born. It was described by Theophrastus as early as 300 B. C., and has been frequently mentioned in history since that date.

The carnation of today, the subject upon which I am working, is the product of several centuries of hybridization and culture. It is an open pollinated species, and mother plants can be chosen from amongst hybrids, as well as by inbreeding upon the same plant or upon plants of the same variety. A variety once produced from seed is easily perpetuated for a certain period by propagation from cuttings which are easily rooted and usually secured in abundance. Improvements in varieties may be made by bud-selection, and new varieties are sometimes secured by bud variation (sports), as well as from seed variation and by hybridization.

In raising varieties from hybridized seed very few improvements are produced, the proportion being about one good variety for every 1,000 hybrids grown, and probably as little as one decided advance in each 5,000 or 10,000 hybrids grown; and unless some law is discovered, whereby we can forecast more surely than we now can what certain specified hybrid seed will produce, it would seem as if even this low proportion of valuable new varieties would decrease rather than increase in view of the higher standard which is being demanded from year to year.

COLOR STUDY.

Up to the present time I have been pursuing my studies in breeding upon the single subject of color alone, basing my work upon the theory that any laws developed in color would hold good when applied to the development of other qualities; and this hypothesis I still believe to be correct. The tools used are very simple, consisting only of a pair of delicate tweezers and a microscopic magnifying glass. I used to employ a fine camel's-hair brush for transferring the pollen, but eventually abandoned it, as I found the use of the tweezers less difficult, and speedier work could be done than with the brush.

In hybridizing the carnation the first step is to remove all the anthers from the mother flower before they develop, and to watch the pistil until it is in a proper receptive condition. The anthers of the selected male parent are watched until just bursting, and the pollen is in the condition of a dry powder. The anther is then removed by means of the tweezers, and the pistil of the mother flower is fertilized by lightly touching it along its entire length with the pollen-bearing anther. Conception generally takes place within 24 hours after this operation provided the conditions are favorable. In order to pursue my color studies with reasonable method I have divided the work into the following sections:

(1) Fancy section, comprising all varieties peculiarly marked, of various colors.

(2) Purple and blue section, comprising all purple flowers and any which may show a tendency towards blue in color.

ROSE QUEEN BEATRICE.
Exhibited at Carnation Conference by F. H. Kramer, Washington, D. C.

BRONZE MEDAL WINNER, MRS. C. W. WARD.
Exhibited by the Cottage Gardens Co., Queens, N. Y.

(3) Crimson and maroon section, comprising all shades of crimson, maroon or scarlet-maroon.

(4) Scarlet section, comprising all shades of red and scarlet.

(5) Light pink section, including all shades of salmon, flesh or Daybreak tints.

(6) Dark pink section, including all rose, cherry and deep pink tones.

(7) White section.

(8) Yellow-variegated section, including all varieties having a yellow ground with scarlet, crimson or pink markings. I have not as yet been able to establish a pure yellow section, for even though the seedling plant may give pure yellow flowers for a time, as soon as propagation is carried on to any extent, more or less variegation appears.

(9) White-variegated section, comprising all varieties with white grounds marked with various colors.

(10) Pink-variegated section, comprising all varieties having a pink ground of any shade with markings in deeper colors.

In the purple and blue section I have not as yet succeeded in producing anything that might be termed a blue; for, although we have had several varieties showing a distinct blue shade there has invariably been enough pink in it to convert the tone into a purple or a mauve. The crimson, dark and light pink, scarlet, and white sections have been fairly well fixed; but the yellow, white and pink variegated, and blue sections will be very difficult to fix, as they are essentially mosaics, and there is a constant tendency towards variation in all their progeny.

In order to render the study of pedigrees easier, I have devised a system of bench cards which are used as labels tied to each variety under experiment, and which at the end of the season are filed away in a card index, thus preserving all of the original records made in my work. I find this system exceptionally useful, as it enables one to determine at a glance the pedigree of any variety when working upon it. My object has been to study out some system whereby the color tones might be purified, and rendered more brilliant or delicate and more pleasing to the eye; and while I have paid some considerable attention to size of flower, freedom of bloom, integrity of calyx, length and strength of stem, and fragrance, the purity of the color has been my first consideration. In order to develop more brilliant shades, I have, as a rule, confined my crosses to plants both bearing flowers of the color which I desire to improve: That is to say, crimsons were crossed with crimsons, light pinks with light pinks, dark pinks with dark pinks, whites with whites, and so on; and the result seems to indicate the following hypothesis, viz., that the percentage of color contained in the parentage for several generations back controls to a very large extent the color of the progeny. I do not, of course, mean that by using parents on both sides that have practically a scarlet pedigree for several generations back all scarlets will be invariably produced, but that where such parents are used, the chances of securing the improved scarlet color desired are greatly increased. True, the progeny of such parentage frequently show many shades varying from the red or scarlet, such as pinks, maroons, purples, and even white and yellow grounds with more or less variegation of all the colors mentioned.

Again, a cross between a white variety, having practically a white pedigree for several generations, frequently produces scarlet flowers; but, as a rule, such scarlets are not as brilliant or persistent as those produced from plants having only scarlet pedigrees. One of the best ways of proving this hypothesis is to take two scarlet parents, the pedigrees of which are mainly white. By crossing these, very few scarlets will be produced—sometimes none at all—but a large percentage of the progeny will frequently be pure white, or white grounds marked with scarlet or various shades of pink. I have sometimes thought that by taking a scarlet variety of comparatively pure scarlet pedigree and crossing it with a white variety the pedigree of which is largely scarlet, more clear and persistent scarlet tones are produced than where the pure scarlet pedigrees are used. For I have often found that with pure scarlet pedigrees there is a tendency for the color, even though it be very brilliant, to blacken, or turn a slaty shade when exposed to bright sunshine. While I have not been able to prove to my satisfaction that this hypothesis is right, there still seems to be evidence enough to warrant the assertion that if you desire free-blooming habits, use parents having early free-blooming habits. The same should hold good if you desire to produce varieties with extra large blooms, or perfect calyx, or any other peculiarity in habit or form of flower; it also seems to hold good in regard to fragrance. Again, the early-blooming varieties usually have small to medium-sized blooms, and the very large flowering varieties are generally late and inclined to be shy bloomers. This can to some extent be overcome by crossing large-flowering late-blooming varieties with the early free-blooming ones which have the largest blossoms. This, if followed up, will in the end produce large-flowered early-blooming varieties. Working on these lines, I have already succeeded in producing Alma Ward, which, under our intensive culture, gives flowers ranging from two and one-half to a little over four inches in diameter on stems from two to three feet in length, according to the season; and these flowers are produced in sufficient abundance to make the variety very profitable commercially. It is also a fairly early bloomer, coming into flower by October 1. This variety was obtained by crossing Prosperity, a large-flowered, not very free variety, with a white seedling having a very large flower and long stems, and quite a free bloomer.

PARENTAL INFLUENCE.

Peter Fisher, the raiser of Lawson and Enchantress, two of the most satisfactory of our American commercial varieties, secured his strain from crosses between Daybreak and a sport of Tidal Wave, two quite large-flowered very free-blooming as well as early varieties. In Lawson a curious blending of the qualities of both parents may be observed. Daybreak is a long-stemmed variety; Tidal Wave usually has quite short stems in the early part of the season, but as the season advances they become as long as those of the parent Daybreak. Double flowers may be produced by crossing single blooms with pollen from very double ones, and the more double the pollen parent is, the greater seems to be the proportion of double flowering seedings produced. Studies of color characteristics during the past 12 years seem to have determined—that the male parent does not exercise any paramount or dominant influence—but that either male or female or both may determine the dominant characteristics of the progeny.

In the case of seedlings used from other hybridizers, I am not able to give the color parentage, but expect if we had such color parentage it would not tend to change the results. My conclusions from these studies have led me to believe that it is not either parent that exercises dominant influence upon the hybrid, but there may be several elements which tend to control the characteristics in the hybrid. As for instance, the total percentage of the characteristics of a number of ancestors which may be illustrated as follows: Supposing that crossing a dark pink upon a white, 60 per cent of the ancestry on both sides was dark pink, the chances to secure a dark pink in the hybrid would be largely in proportion to the percentage of dark pink existing in the ancestry on both sides. On the other hand, supposing that we crossed a white with a white which had a large percentage of dark pink in the ancestry, and, as the result of said cross, we produced a large percentage of whites. This might tend to show that the condition of the chromasomes in the cells exercised the paramount influence in

NEW ROSE MRS. JARDINE.

determining the characteristics produced in the hybrid. Now, it might be possible to take different individuals, the result of the same cross, all of the individuals being white, the crossing two individuals might produce a large percentage of whites, while crossing two other individuals, all being white, might produce a large percentage of pink. This would again tend to prove the theory that the condition of the chromasomes in the cells of the individuals might exercise the paramount influence.

There is another peculiar thing that seems to be the case in regard to crosses between the same individuals, and that is that crosses between such individuals made at different periods of the year when the plants were growing under somewhat changed conditions produce different results. This might lead us to the theory that the condition of the individuals at the time that impregnation takes place may exercise paramount influence over the characteristics of the progeny. This theory might seem to be proven by the results obtained in the production of mankind where a dozen children, the result of the union of two individuals and born at somewhat widely different periods present widely different characteristics, both mental and physical as well as in appearance.

My impression is that it will take several years' study in order to determine the question. Possibly it may be necessary in continuing my experiments to segregate the female blooms in apartments by themselves so as to prevent the chance of a foreign grain of pollen alighting on the pistil, as this might explain some of the apparnt idiosyncrasies in the results obtained in my work.

CROSSING DIFFERENT COLORS.

The summary of the results of crossing different colors may prove very interesting. For instance—where crimson was crossed with crimson the results produced 12 crimson and five scarlets; where dark pink was crossed with dark pink, 37 dark pinks were produced; where scarlet was crossed with scarlet, 10 scarlets were produced; where white was crossed with crimson, five whites were produced and only two scarlets; where white was crossed with white, 34 whites were produced, and only one white variegated with pink, there being no solid colors. Where white was crossed with crimson, five whites were produced and two scarlets, the balance being divided between dark pink, flesh pink and crimson, but where white was crossed with dark pink, the result was three pure whites.

There is another element in making up these studies which may interfere with their value in deciding the question of paramount influence and that is that only varieties that possessed a number of representative characteristics were preserved and records kept of them. There is a great mass of material that was thrown away, and in making these crosses we were constantly selecting plants possessing all the characteristics desired. I am inclined to think that the fact that we threw away a lot of useless material will not change the result. For instance, taking the result of crossing white with white, there were saved for observation from these crosses 34 whites and one white variegated with pink, as all the white parents of both sides were selected not only for their good color, but also for size and form of flower, integrity of calyx, healthy constitution, stiffness of stem, vigor of growth, and also for freedom of bloom. The fact that 34 whites were selected for trial as against only one white variegated with pink and that the results of these white crosses did not produce anything in solid colors that were worthy of selection for trial would seem to indicate that whatever laws exist in regard to the influence of the parents upon the progeny would finally prove to be applicable not only to color but to all other characteristics.

Now, when we come to the consideration of pure crosses which we might specify as crosses between males and females of the same color, we find the following remarkable results: A cross of white upon white produced 34 whites against one other color; a cross of light pink upon dark pink produced six light pinks as against four of other colors; a large number of crosses of dark pink upon dark pink produced 37 dark pinks against 24 of other colors; a cross of scarlet upon scarlet produced 10 scarlets. All of which would tend to indicate that by using two individuals possessing the same characteristics, the chances to reproduce a large proportion of these same characteristics are very much enhanced. This might be shown very nicely in the cross of crimson upon scarlet, which produced 12 crimsons and five scarlets as against three of other colors. In this case it is probable that there was considerable crimson blood in the ancestry of the female parent.

The cross of crimson on crimson need not be taken very seriously, as it is the result of but a very small number of seeds, and I am inclined to think that there was considerable scarlet blood in either one or both of the crimson parents. Of course when we make mosaic crosses, such as white upon scarlet, pink, crimson, and other colors, we must expect a breaking up of colors in the progeny, and where we cross two of the same color we must expect more or less breaking up of colors in the progeny, especially where the immediate ancestry contains parents of widely varying colors.

Referring to examples of individual crosses, suppose we take cross 2313/07, a scarlet upon white. It will be noted that in these notes the pollen parent is mentioned first, as some other hybridizers mention the female parent first. Now, the color parentage running back for some 10 or 12 years, shows that on the male side there were six dark pink, six yellow variegated, five crimsons, three whites, two scarlets, one light pink and one white variegated. This pedigree is made up without reference to the nearness of any of the individuals of any particular color being particularly near to the seed and pollen parents, but it simply indicates that among the male parentage of both sides six dark pinks occur, etc., while, on the female side, five dark pinks, three crimsons, one scarlet, four whites, five white variegated and two white flaked occur. Assuming that dark pink and crimson, purple and scarlet would tend to produce dark pink or scarlet, we should naturally anticipate a large number of dark pinks or scarlets, whereas we get only one dark pink, one scarlet and one white. This indicates that other influences than the percentage of the same characteristics in either or both of the ancestors may determine the characteristics in the hybrid.

The results of these experiments and the study thereof has led to the conclusion that neither parent exerts predominant influence in determining the characteristcs of the progeny, but that said characteristics may be determined from either side of the parentage or may result from modified characteristics of both parents as well as both ancestry.

Exhibited at Carnation Conference by the E. G. Hill Co., Richmond, Ind.

Experiments in Carnation Growing.

Dr. Beverly T. Galloway, chief of the Bureau of Plant Industry, in his address before the society called attention to the experiments and tests of various kinds connected with the growing of carnations which have been carried on by the Department of Agriculture for several years. He stated that the work had for its object the securing of information on the following points:

(1) The relative yield and vigor of plants grown under glass all summer as compared with plants of the same variety grown outdoors during the summer season and moved to the benches in the usual way and at the usual time.

(2) Fertilizer tests to determine the value of different fertilizers alone and in various combinations on vigor and yield.

(3) A study of hereditary tendencies in so far as same may affect continuous vigor and healthfulness and yield.

(4) The securing of new and desirable types by crossing.

(5) A study of fundamental questions of breeding with a view to securing data that will be of value to carnation growers and others in the improvement of their crops.

(6) A study of diseases and means of preventing the same.

Dr. Galloway took up the subjects in the order given, using a table or chart, large enough to be seen by all present, to illustrate the results of experiments conducted during the summer of 1906 and the winter of 1907, to determine the relative yield of field and indoor grown plants. He explained how the experiment had been conducted, namely, that plants were propagated from stock of four varieties, care being taken to have the stock of as nearly equal vigor and productiveness as possible. Four benches in the greenhouses were given over to the work, each holding about 1,000 plants, and the same were planted with stock from 3-inch pots, two rows the entire length of each bench being reserved for the plants grown outdoors. Dr. Galloway stated that the field grown plants were given the usual treatment and produced fair average growth, but were not as large as those grown on the benches when brought in in September.

He stated that the results, as shown by the chart, were, without exception, very much in favor of the indoor grown plants, in many cases the increase being over 100 per cent. He added, however, that while the results were so strikingly in favor of growing plants under glass the season through, from the standpoint of the department, other considerations have to be kept in mind, such as the relative cost of the two methods, the production for an entire season, the utilization of the houses for other purposes, maintenance, etc., in determining which method to pursue.

The speaker also used the chart to illustrate his remarks upon the fertilizer experiments which the department had carried on. He said that this experiment had been planned to bring out, if possible, the fact that growers as a rule are too prone to count on the value of commercial fertilizers in crop production, and he said he believed the results of the experiment would show that there is no fertilizer so good, reliable and sure as well decomposed organic manure—something which could be secured anywhere in the country. He said, however, that experiments of this kind to be conclusive, must be carried on for a number of years in various places. He cautioned the growers to go slow on commercial fertilizers and to put their faith and work into good composts.

He explained the work the department had been doing in its study of hereditary tendencies in plants in so far as same may affect continuous vigor, healthfulness and yield. He said the question of whether there is true bud variation was still an open one, but that at the same time he did not think the importance and value of careful and rigid selection of stock could be questioned. This the department has been doing and he stated it was its intention to continue this selective work for several years until the effects could be fully demonstrated.

The speaker mentioned the work the department had been doing in the production of new types by crossing and referred to some of the crosses that might be seen in the greenhouses. He said that Prof. Norton, whose talk was to follow his, would explain in detail the fifth line of work, namely, a study of fundamental questions of breeding, which work he stated had been carried on by Prof. Norton before leaving the department. Dr. Galloway now took up the sixth line of work that the department had been conducting, namely, an investigation of the diseases of carnations. Among the diseases studied was the wet stem rot, due to rhizoctonia, which he stated continues to be one of the most serious diseases with which the growers have to contend, but that it could be controlled by growing the plants in well drained and well aerated soil containing plenty of lime, and by avoiding mechanical injury to the plants. He also mentioned the dry stem rot, a disease caused by fusarium—one of the wilt fungi, and stated that the only remedy for this disease was to use sterilized soil and the liberal use of acid phosphate.

Two other diseases to which attention was called were the macrosporium spot, which he said could be prevented by spraying with Bordeaux mixture, and the bacterial spot, a disease occurring only in wet seasons on the softer leaved varieties. This disease he stated might be controlled by light syringing with a mixture of two parts commercial formaldehyde to 1,000 parts water. Dr. Galloway closed his remarks by assuring the society that the department was always at its service and with an invitation to its members to visit the department greenhouses.

[An analysis of Dr. Galloway's table will appear in our next issue.—ED.]

Chas. C. Leedle, Springfield, O.

See page 82

THE CARNATION.

Carnation Winsor.

ED. AMERICAN FLORIST:—

In a recent issue "Penn" refers to the successes and failures attending the cultivation of the carnation, Winsor, a variety as meritorious in my opinion as any now being grown. The points he makes in his article are good. The fact that Winsor or any other of our really standard varieties is capable of securing the highest honors at our shows is an evidence of merit that cannot be overlooked, even if it is found that some growers cannot succeed with it. The advice of "Penn" to give it identical treatment with Lawson may or may not cure the defect, depending on what is understood as identical treatment.

If one is guided solely by the thermometer and the house is kept at proper Lawson temperatures, he will have given similar but not identical treatment. But, for my part, I would prefer to give any variety a soil as similar as possible to the one upon which it was developed and with this start I feel sure that I could soon discover the best temperature and moisture conditions.

It is an established fact that while variations of climate are conducive to producing marked changes in plant forms, it has been widely noticed also that a plant developed in a given soil will frequently take on a different form when grown in a soil considerably heavier or lighter than the one in which it was developed, though the climatic conditions remain practically unchanged. This has been clearly demonstrated with a number of field crops and garden vegetables, and is well recognized throughout the great wheat, corn, tobacco and cotton growing sections of our country where no progressive farmer would think of planting a variety that was not adapted to his soil. While good cotton soils may vary considerably in their texture in the same locality, by planting different varieties, adapted to the soil differences, as good yields are obtained whether the soils be of a lighter or a heavier sort. To plant a variety developed on one kind of soil upon a soil of different character is to court disaster. Truck farmers are familiar with the effect of soil upon varieties, and its influence is perhaps more marked upon vegetables than upon field crops. Now would it not be well if, before introducing a novelty into our houses, we would consider this phase of the question and ascertain something of the soil conditions under which the new variety was produced?

Surely it would be far better that our choice of novelties should be restricted to the productions of those introducers who grow under as nearly identical conditions as we have in our own houses than to meet with disappointment or even to risk it. It is not alone the price paid for the stock at the outset that counts but the loss of time as well. We cannot change our location and our soil to suit a new variety, but we can select a variety to suit our conditions, and by so doing reduce very materially the chances of failure. Moreover, by this means much will be done for doing away with the style of criticism of both the introducer and the plant that is quoted by "Penn". C. L. G.

THE ROSE.

Notes on Tea Roses.

PROPAGATING.

Blind or flowering wood is equally useful for cuttings and different growers prefer different sizes. Some take two, some three eyes. A keen-edged knife should be used, and the cut should be short and clean. Insert the cutting about half way between the surface and the bottom of the bench where the heat and moisture will be uniform. The temperature of the sand should be about 60° and the temperature of the house 56°. The lower temperature of the house retards the buds while roots are forming. The cooler the cuttings are rooted, the quicker they act after being repotted. During bright weather the cutting bench should be sprayed several times a day; the moisture of the foliage will greatly help the formation of roots. In about

four weeks they should be ready for potting.

As soon as the roots are from one-quarter to one-half inch long the cuttings should be potted. Two to 2¼-inch pots are right for Bride, Bridesmaid and Killarney. The soil should be a fibrous loam, four parts of soil to one part of rotted manure. This should be screened through a ½-inch mesh. In potting get the roots as near to the top as possible, and do not press too hard; only keep the cuttings standing firmly. Place them in a bench on coal ashes, water with a rose spray and shade them at once. The shading should be removed at night and on some cloudy days. Keep the soil moist, not soaked, and keep the rose house temperature at 58° at night with a rise of 10° or 15° in the day time.

PLANTING.

When the benches are filled and the soil well pulverized, spread bone evenly (about a pound to the running foot of bench) and mix it well by hand. If there are any rough pieces, the bone is well broken up. We prefer early planting and selection of good stock. A sickly plant is discarded and sound ones are planted firmly without damaging the ball of roots. After a bench is planted water carefully around each plant without soaking the whole bench. The houses should be planted in June, or not later than July.

Much of the success or failure of the crop is attributed to the care taken of young stock. The main effort should be to get healthy stocky growth by timely cultivation, watering, ventilating and feeding. The cultivation should be continued until the feeding roots reach so close to the surface that the work cannot be carried on without injuring the plants. Careful watering is of great importance at different stages of the growth. If evaporation is rapid because of a dry atmosphere the plants can hardly be over-watered; if the atmosphere is moist, watering must be done very carefully.

As soon after planting as time can be spared, the plants should have supports and be trained in such position that the light and air can have free access. If the soil had a proper quantity of fertilizer at planting time, very little feeding is required except a light sprinkling of bone meal and wood ashes at intervals, or a dusting of lime, until the bench is well filled with roots. There is no special time set for mulching; each grower must know when his plants need feeding. In raised benches with three and one-half or four inches of soil left after the summer's growth, the soil is naturally exhausted. A sprinkling of bone meal with a top dressing of two parts of rotten manure to one part of soil, is our first mulch. Air slaked lime, wood ashes, and bone are used alternately; later on a top dressing of cow manure and soil is used when the roots show on the surface.

Paul Niehoff's New Rose.

W. N. Rudd, secretary of the Society of American Florists, informs us that the rose originally named Aurora and raised by Paul Niehoff, Lehighton, Pa., has now been named Mrs. Mary Niehoff. This is the proper name and the one Mr. Niehoff wishes to stand.

FLORISTS' FERNS.

PROPAGATING BOSTON FERNS.—Instead of risking fine specimens of the new sorts of nephrolepis by continued division of all the stock, put a few in a bench solely for the purpose of increasing the stock, and leave the others alone. Instead of mutilating good-sized plants when enough small plants to increase the stock are not on hand, buy small plants of some one who has them in abundance. Nice plants of most varieties in larger pots than the ordinary size always sell at a good price.

CIBOTIUM SCHIEDEI.—Plants of this fine fern out of condition through having been used in dwellings or for any kind of decoration should go now into a gentle, moist heat. If any fronds are badly decayed cut them clean out, but otherwise leave them, as they help the roots. When root action is seen to be vigorous and new growth is starting, repot the plants. Do not break the old ball of soil, but lightly prick it with a pointed dibber. Give a small shift and by means of a thin potting stick, make sure that the new compost entirely fills the space between the old balls of soil and the pots.

Notes in Season.

Preparations for the summer crop of Boston ferns and the various other nephrolepises that are included among the florists' stock, are now in order. These ferns are readily multiplied by means of their many runners. Plant out the stock plants on a bench, giving them about four inches of good soil of very similar character to that one would plant roses in, and in a few weeks there are likely to be some young plants that may be taken off and potted. When first planted the nephrolepis bed will not require very frequent waterings, but as the plants become well rooted and grow freely they will take up a great deal of water, for they should be grown in a bright and airy house in order to keep the young plants short and stocky. A night temperature of 60° to 65° is quite warm enough.

These nephrolepises are sometimes troubled with a rather flat, brown scale, but the young insects are white and at first glance resemble tiny pieces of white cotton on the under side of the frond. This insect is very destructive, and its ravages soon show in the form of light colored spots that appear on the upper side of the leaf, proving that the insects have been satisfying their appetites with the juices of the leaf. A dipping in tobacco extract will help in killing this pest, but strong tobacco solution is also liable to injure the tips of the fronds. The growing tips of the nephrolepis fronds are quite tender, and it is better to throw away a plant that is badly infested with this scale than to risk further trouble with it. Be very careful to plant out none but clean plants for stock, else the trouble will become more marked the following season.

THE RETAIL TRADE

ASPARAGUS SPRENGERI.—For bold and striking effect in design work Asparagus Sprengeri is unrivalled by any other green. The stiff yet graceful leaflets hold up flowers used over it in a light, effective manner, not to be obtained from smilax, maidenhair fern or any other, and it is especially good for use with lily of the valley, sweet peas, or other light flowers, when these are thrown over a solid wreath, cross or other design of carnations. Its lasting character is also in its favor.

WREATH OF SWEET PEAS, LILY OF THE VALLEY AND FERNS.
By Henry Morris, Syracuse, N. Y.

A Fine Funeral Wreath.

Mrs. J. J. Belden, wife of the late congressman, of Syracuse, N. Y., placed an order with Henry Morris, of that city, for a wreath for the funeral of W. W. H. Gere, a prominent citizen and former public official. The accompanying photograph shows a remarkable reproduction of the florist's skill. It is 24 inches in diameter and is made of lily of the valley, white sweet peas and the following ferns: Cyrtomium falcatum, Pteris Magi, P. Ouvardi, P. Cretica albo-lineata, P. Victoriae, P. Wimsetti multiceps, P. magnifica, P. adiantoides and P. argyrea.

A. J. B.

Getting Business.

No matter what the size or location of the store, the owner who wishes to keep in the front of the procession has to exercise his gray matter occasionally in the effort to lure the dollar from the unwilling or lukewarm patron. If he keeps on putting the same old bunches of carnations, roses or whatever flower happens to come handy in his window, people will cross the street to avoid the store. Study the prospective customer before arranging the window and going to the books or to the make-up table to work.

Get customers interested in what you are offering. Get them into the habit of looking in the window for what is coming. A retailer in a fair location advertised, in his window, roses at 25 cents per dozen, and, beside the card, showed some fine Richmond and Killarney worth more than double. This drew customers and though some went away with the "chip" others remained and purchased at the higher figure. He had roses at 25 cents, as he had some design work in hand that called for short stock. He also had the goods the customers wanted, and, being in the store, took away with them. Once get a customer inside and interested and it is a poor salesman who sends him or her away empty handed.

Money spent on making the store attractive, inside and out, is always a good investment. A lady entered one of the finest retail stores in Chicago recently and, as soon as she was well inside, said, "My! they charge you $10 here before you look at the flowers." This was no reflection on the really splendid decorative scheme of the store. Quite the reverse. It is a compliment to customers to do the utmost that the place will stand in this way and the man who thinks otherwise is a back number from then on. It is a fine thing to have artistic ideas. Crude and badly blended arrangements are offensive, but if a customer wants a dozen cattleyas in the middle of about 500 violets and is willing to pay for them, let it go at that. Why turn down good money for the sake of the artistic idea? Shelve it for a time and put the dollars in the cash register.

But to get good patrons, and hold them, it is necessary to be always awake to what is going on. The man with a small store in a locality where cheap flowers are wanted cannot afford to spend big sums with the supply man, and to listen to the wiles of the drummer in this line may mean getting left, with stock that is just a cut above the trade. But always seek to show novelties in supplies a little better, a little fresher than the trade demands rather than the other way round. Never be afraid to see what the other fellow is doing and while not becoming a copyist, when you see a good idea carried out, get hold and improve on it where possible. Keep up with the band, in your own small way or in a big way, in the best way possible under the circumstances.

R.

A Salesman's Letter.

ED. AMERICAN FLORIST:—

The commercial bulb and plant salesman has been confronted by many weird tales in his career and like the regiments slain by Richard III, the end is not yet.

James J. Harty, Washington, D. C.

Among the latest "wonders" in this line may be mentioned the unknown habitats for lily bulbs with Latinized surnames for the variety types. It savors of quackery to state that the source has been found for lily bulbs of unquestionable healthfulness and that these bulbs are secured from the far away isles of the southern seas. Such a tale may have been credited when De Foe wrote Robinson Crusoe or the South Sea bubble claimed the attention of the English reading public. But in these days the "show me" spirit has spread over the land and confronts this new tale. The writer has seen countless horticultural fakes, including the resurrection plant, the Jadoo fibre, specially graded Harrisii that never were graded, etc., etc.

The successful bulb importer must not only have a proper sense of appreciation but also a well developed sense of depreciation so that the new rosy stories may be accepted at their proper worth. The horticultural traveler has his "package" of language and uses it in selling, but even he must feel as if he expected a knock down blow from an angry customer when he springs some of these new frenzied thrillers regarding the wonderful Bhong island and in the next breath adds the non-guarantee disclaimer. I say, let the growers and jobbers choose a sane conservative course, selling that which they know is good, which reasonable success has proven, and which is adapted to the needs of the trade. The specious plea of the anxious salesman that he has something new should be met with the phrase "show me and stand pat." I find that the salesman with the "dignity and the diamond" does not always range at the finish as much as the "house that furnishes the goods."

"SHOW ME."

James J. Harty & Co., Washington, D. C.

To the firm of James J. Harty & Co. must be given the credit of establishing the first strictly wholesale florist business in the national capital. James J. Harty, the leading spirit of the business, is a young man, who, from boyhood, has been identified with growing, and the retail trade. He was born in St. Mary's county, Md., but when quite young removed to Washington. For a number of years he was employed by Z. D. Blackistone, a well-known retailer, and formerly a grower of the capital. Mr. Harty occupied responsible positions while in the employ of Mr. Blackistone, which he filled with credit to himself

ESTABLISHMENT OF J. J. HARTY & CO., WASHINGTON, D. C.

and satisfaction to his employer.

It has long been the talk that Washington should have a wholesale commission house, but it is due to the energy and business ability of this young man that it now exists. He is building up a good business, and his trade with the south is particularly gratifying to him, though it is by no means confined to that section. Mr. Harty is a member of the Washington Florists' Club, has always been actively interested in the work of the different horticultural societies when their conventions were held in Washington, and has always been ready to contribute both of his time and means to assist in making these gatherings a success. Having, both socially and from a business viewpoint, an excellent record, we have no hesitation in commending his firm to the trade.

Our Peter Barr.

MY DEAR AMERICAN FLORIST:—

Although I have been out of business for upwards of 12 years, I am still interested in the peonies and our firm has one of the finest collections in Europe. I gave the subject many years of study and got rid of the synonyms and rejected the inferior ones. Call your peony society's attention to this fact and send for some copies of our catalogue. The officinalis types have long been known in Europe in one form or another and I think it was Linnæus who called them all officinalis, but later on attempts were made to make species of them. Of the albiflora I am of the opinion they may be sectioned into species, but I don't think anyone will succeed in the job.

Then there are the tree or Moutan peonies. A plant, until recently, has not been found wild but some botanist claims to have settled the question. The Japanese are giving considerable attention to improving this section, but they are not generally hardy. If you send me reports of the work of the American Peony Society I may have something to say on the subject. A man out of the running for so many years would be called a fogey. I am trying to improve the polyanthus and primrose. I don't mean the old florist's polyanthus but the soft colored that are useful for decorations, with good constitutions, large flowers, small eyes and well defined colors. My first year after getting my new garden, one-third of an acre, the northwest winds killed or crippled over half. I made my losses good and have erected windbreaks which, up to now, have saved the plants.

If success attends me I will in May present all but some special types to the Glasgow parks, so you see I am now working for glory. I worked 60 years for money and made little. I am just in this position. I have made no progress in my new study and, not being a good journalist, unless I am full of the subject, cannot write. My great trouble is correspondence, hardly leaving me time to deal with my plants. I am informing my distant friends they can write me as many letters as they please. I can only promise them one a year in exchange. I don't think you can grow primroses and polyanthus. They are best for a moist climate. John Dunbar is one of the finest men I have met in my travels. He is a genius, and in literature might rise high if he gave himself to it. I hope Barron is well fixed.

If you ever come across any of Grant Thorburn's writings, I would like copies. He wrote two or three books in his early days. He was a great character. I have a volume called "Laurie Todd" written by John Galt, who, in a historical novel, sketches out Grant Thorburn's career. I had been long hunting for it and found a copy in Brisbane and another at Cape Town. Galt was a novelist and had an idea he could develop colonization and got Guelph in Canada to work and there he met Grant and gives his early history. Grant once came to London to settle as an author, associating with Walter Scott. In a portrait gallery I have one

The Late J. B. Heiss.

by McLeishan, an Irish artist, of Laurie Todd with a great hat on his head and great spreadout feet. The literature idea did not come off and Grant returned to the United States to sell his canary seed. Dr. Masters a few weeks before he died wrote to me "We shall look to you to settle whether the oxlip came from the cowslip or the other way about." Whether he was serious or whether to make an April fool of me I cannot say. He had something in his mind. I am on the job.

With all good wishes and great prosperity,

Yours very truly,
PETER BARR,
(V. M. H.)

The Hermitage, Park Road, Kirn, Scotland, January 23, 1908.

London.

Trade is a little better since the weather became warmer. G. Monro, Jr., sold 1,000 bunches of lily of the valley in the morning of January 18. Lilium longiflorum is worth $1 per dozen blooms, callas bring $1, $1.25. Although carnations are not abundant the price is low.

Large pot plants sell better, but palms and ferns more slowly. Dutch hyacinths are worth $3.75 per dozen, genistas $2.50, solanums $2, lily of the valley $6 to $7.50. Good oranges with well colored fruit, are worth 60 cents to $3.75 each, according to size, and 5-inch cyclamens bring $4.50 per dozen. S.

OBITUARY.

Joseph B. Heiss.

Joseph B. Heiss, for many years a leading florist in Dayton, O., died suddenly while visiting relatives at Bethel, O. Although Mr. Heiss had been ailing with rheumatism for several months, none of his family considered it serious. Born in Frankfort on the Main, Germany, October 31, 1856, he emigrated to America in 1881. For several years he was engaged in landscape work in the vicinity of New York. He then came to Dayton, laying out the ground around the State hospital. Three years later he engaged in business for himself. For many years Mr. Heiss grew palms for the wholesale trade but of late years he has, with the able assistance of his wife, devoted his energies to the retail cut flower trade. As a result of his energy he leaves a successful business and a name in the retail trade that will hold for many years. The Dayton Florists Club attended his funeral in a body, sending as their tribute a magnificent six-foot Trinity cross.

Alonzo J. M. Watkins.

Alonzo J. M. Watkins, foreman at Allan Gardens, Toronto, passed away January 28. Mr. Watkins was formerly gardener for the Hon. Mr. Allan, and when the latter donated the gardens to the city Mr. Watkins kept his position, having been on the place at the time of his death for 33 years. For some time he had suffered with lumbago and rheumatism, but the immediate cause of his death was rheumatism of the heart. He was an Englishman by birth, having been born at Hereford, 69 years ago. He took an active part in the different horticultural associations, having often acted in the different offices. He is survived by a widow and grown up family. H. G. D.

George Morgan.

George Morgan, a well known landscape gardener, died at his home, 1833 Ansel road, Cleveland, O., January 24, after a short illness.

Crop to Grow With Easter Lilies.

ED. AMERICAN FLORIST:—

We have a house with three benches; in one bench we have our Easter lilies. What can we grow in the other two benches, either in pots or in benches for cut flowers? R.

Grow what you have the best call for. You might plant roses if you can devote the bench now devoted to Easter lilies to roses when these are past. Chrysanthemums may also be planted or even carnations, as probably the Easter lilies will want little forcing to bring them in on time. What you should grow depends really upon what you have a call for, as almost any popular crop may be grown.

G.

Swainsonas Losing Their Leaves.

ED. AMERICAN FLORIST:—

What is the cause of swainsonas losing their lower leaves? They are planted both on solid and raised benches in a carnation temperature.

C. U.

This we cannot tell without knowing something of the treatment the plants have had. It is natural for some of the lower leaves to fall annually, but if many fall something has probably occurred to check the free action of the roots. This may arise from overwatering or other causes and only those in charge of the plants or in a position to examine them can decide this. G.

ELECTRICITY is now employed in the growing of plants. It should prove useful in raisin' currents.

THE AMERICAN FLORIST

TWENTY-THIRD YEAR.

Subscription, United States and Mexico, $1.00 a year; Canada, $2.00; Europe and Countries in Postal Union, $2.50. Subscriptions accepted only from those in the trade.

Advertisements, on all except cover pages, 10 Cents a Line Agate, $1.00 per inch. Cash with Order.

No Special Position Guaranteed.

Discounts are allowed **only on consecutive insertions**, as follows—6 times, 5 per cent; 13 times, 10 per cent; 26 times, 20 per cent; 52 times, 30 per cent.

Space on front pages and back cover page sold only on yearly contract at $1.00 per inch, net.

The AMERICAN FLORIST Advertising Department is for florists, seedsmen and nurserymen and dealers in wares pertaining to those lines only.

Orders for less than one-half inch space not accepted.

Advertisements must reach us by Monday to secure insertion in the issue of the same week.

When sending us change of address always send the old address at the same time

We do not assume any responsibility for the opinions of correspondents.

Photographs.

We are always pleased to receive good pictures of trade subjects. Send them prepaid by mail or express carefully packed to prevent injury in transit. Pack them flat, not rolled, with name and address of sender on the back of each picture.

WEAK roots and strong soil form a bad combination.

JULIUS NIEDNAGEL, Evansville, Ind., has a climbing Killarney rose.

THE Waban Conservatories' white Killarney rose will not be sent out till 1909.

WE are pleased to print in this issue a characteristic letter from our never old friend, Peter Barr.

ARTIFICIAL flowers have now to pay a duty of 50 per cent only instead of 60 per cent as formerly.

SEE that a good supply of growing vine seeds are sown early, as the plants are greatly in request in June.

READ again Elmer D. Smith's article on making greenhouse benches in the AMERICAN FLORIST, December 14.

WHERE rough concrete work is in progress or contemplation save all clinkers and cinders for use with the cement.

THIS week's cold snap and snow seems to have been general, the thermometer ranging from 10° to 25° below zero in the north.

"XMAS TREES came out of the woods this year like frogs into Egypt in bible times," writes E. S. Kneeland, of Grand Forks, N. D.

THE FRENCH are inclined to give the English the credit for discovering the plan of retarding forcing roots and bulbs in cold storage.

THE pure white freesia of the new giant flowered types, of which there are now three or more good stocks, is a beautiful flower of delightful fragrance.

AN annual convention of the National Association of Gardeners is scheduled for February 27-28 at American Institute Hall, 21 West Forty-fourth street, New York.

CUTTING prices, to meet unfair competition by unprincipled dealers, has ruined many businesses that would have ridden out the storm had prices been kept at a point that left a living profit.

GLADIOLUS BULBS in North Texas do not winter-kill in the open ground. Growing these bulbs there in a commercial way may be undertaken, as the freight rates to market are not prohibitive as they are from Washington (state) points.

THREE Chicago growers tried the so-called Azores grown lilies this season with less satisfaction they say than with Bermuda grown L. Harrisii. They were Messrs. Kidwell, Wagner and Walter. Perhaps it was, as Jimmy Sproule used to say, "a season of growth depression."

CARNATION BULLETIN, No. 103, profusely illustrated, on the "Bud Rot of Carnations," from the Agricultural Experiment Station at Lincoln, Neb., is most timely and well worth writing for by every thinking florist. A mite accompanying the bud rot of carnations is also described, specimens having been received from Beatrice, Lincoln and Omaha. The bulletin gives nine different diseases of carnations and this list we reproduce in another column.

THE AMERICAN FLORIST has been favored through E. L. Crandall, with some beautiful photographs of the carnation houses of the United States Department of Agriculture, E. M. Byrnes, superintendent, as they appeared during the meeting of the American Carnation Society. Varieties there grown are as follows: Helen Gould, Beacon, White Enchantress. Winsor, Enchantress and seedlings of 1907. Except for the fact that our columns are crowded with commercial illustrations we should be pleased to publish these views.

THE passing away of J. B. Heiss, the well known Dayton florist, will be noted with regret by all the Dayton convention visitors, and by hundreds of his friends in the trade, north as well as south. Mr. Heiss, at the head of the Dayton Florist Club, which was organized to take care of the reception of the Society of American Florists, took hold of the proposition with that energy for which he was notable, and in the face of a very discouraging situation helped to carry the reception forward to such a success as has not been previously known in the records of the S. A. F. in a city of the size of Dayton.

National Flower Show.

The premium list for the National Flower Show is now in press and will be ready for mailing February 15. Many changes have been made in the list originally published in the trade papers and the same has been largely increased. It is believed that the complete list carries the largest amount in premiums, medals, cups and trophies ever offered at any floricultural exhibition at any time. Suggestions for premiums have been made and revision of all or parts of the list by about 100 individuals and firms and it is hoped that in the form in which it will appear on the above date all classes of exhibitors will be found to be amply provided for.

It should be noted that the suggestions made to the committee, if all had been carried out, would have required over five times the large sum of money which was available. This condition, of course, made it necessary to strike out many desirable suggestions. All suggestions, however, were given equal consideration on their merit without regard to the names of the persons making them. Copies of the list may be obtained on application to J. H. Burdett, secretary, 1411 First National Bank Building, Chicago.

W. N. RUDD, Chairman.

Plant Notes at Washington.

Rose Rhea Reid.—Very fine vase. Large, full flowers and good color.

Rose Queen Beatrice.—Showed up in splendid form. Large, full petaled flowers. Deep pink.

Rose Mrs. Jardine.—Very fine vase. Showed up well. Fine, soft, light pink, looks like a winner.

Violet Boston.—Shown by Wm. Sim. Cliftondale, Mass. Looks good to me, very large single. Long stems and fine, deep color.

Fern Nephrolepis Superbissima.—One plant shown by F. R. Pierson in 10-in. pan. It is entirely distinct from all others. Dwarf, bushy grower. Fronds in place of being flat are somewhat rounding, tapering to a point at the ends. Very dark green color. Appears to be rather coarse. W.

Meetings Next Week.

Baltimore, Md., February 10, 8 p. m.—Gardeners' Club of Baltimore, Florists' Exchange hall, St. Paul and Franklin streets.

Buffalo, N. Y., February 11, 8 p. m.—Buffalo Florists' Club, 383 Ellicott street.

Butte, Mont., February 14—Montana Florists' Club, Columbia gardens.

Chicago, February 13, 8 p. m.—Chicago Florists' Club, Handel hall, 40 Randolph street.

Cleveland, O., February 10, 7:30 p. m.—Cleveland Florists' Club, Progress hall, 2610 Detroit street.

Davenport, Ia., February 13—Tri-City Florists' Club.

Denver, Colo., February 14, 8. p m.—Denver Floral Club, 323 Charles block.

Hartford, Conn., February 14, 8 p. m.—The Connecticut Horticultural Society.

Lake Geneva, Wis., February 15, 8 p. m.—Lake Geneva Gardeners' and Foremen's Association, News building.

Madison, N. J., February 12, 7:30 p. m.—Morris County Gardeners' and Florists' Society, Masonic hall.

New Bedford, Mass., February 13.—New Bedford Florists' Club.

New London, Conn., February 12.—New London County Horticultural Society, Elks' hall.

New Orleans, La., February 9, 2 p. m.—Gardeners' Mutual Protective Association, 118 Exchange alley.

New York, February 10, 7:30 p. m.—New York Florists' Club, Murray Hill lyceum, 34th street, between Third and Lexington avenue.

New York, February 12, 4:30 p. m.—Horticultural Society of New York, American Institute rooms.

Omaha, Neb., February 13, 8 p. m.—Omaha Florists' Club, City Hall.

San Francisco, Calif., February 15.—Pacific Coast Horticultural Society.

St. Louis, Mo., February 13, 2 p. m.—St. Louis Florists' Club, Burlington building, Olive street.

Easter Lilies.

It is always easier to hold lilies back a little than to force them at the last and plants that have been rooting in a cool house up to now, and are well rooted and established, will be the better of a gentle warmth at night. The week or two that Easter is late this year will forward the plants more than a month would earlier in the season so probably nothing like forcing will be necessary at any time. When giving the plants a new stand pick out those that are most forward and place by themselves bringing them down in order and also keeping the latest together. This is not so much on account of the season as that the forward plants will usually dry out more rapidly and the grower in charge will have a difficulty in keeping them evenly watered if they are mixed. At present the plants may stand pot thick but more room may be given later if good shapely plants are needed. Where it is apparent that some plants are drying out more rapidly than others, even them up for water before giving a general watering as a constantly wet state is not good for the plants at this early stage.

W. J. Palmer.

VICE-PRES. AMERICAN CARNATION SOCIETY.

The vice-president of the American Carnation Society, W. J. Palmer, was born in Buffalo, and about as close to a greenhouse or potting-shed as one could be and not be in either, as their greenhouses and residence were at that time what is now Buffalo's finest resident property, the Circle; and from that time he has been associated with flowers.

After his graduation from school, he divided his time between the store and greenhouse at Lancaster for about three years, when he succeeded his father in the active management of the stores, but always spending his summers in Lancaster at the greenhouses, where, under the tuition of his father, he got a thorough knowledge of flowers and their growing, such as roses, carnations and general stock used in a retail business. The greatest part of their 300,000 feet of glass is given over to roses and carnations.

Mr. Palmer is known as Buffalo's carnation man, and the flowers produced show his knowledge on what are considered the best varieties to grow. The two stores in Buffalo are almost entirely supplied from Lancaster where his greenhouses are familiar to many of THE AMERICAN FLORIST readers.

Clinkers in Greenhouse Benches.

ED. AMERICAN FLORIST:—

I am building a new greenhouse and wish to use coarse cinders and clinkers in the benches. Please advise me if these will be any injury to the plants. G. W. C.

You can safely use them. G.

SITUATIONS, WANTS, FOR SALE.

One Cent Per Word.

Cash with Adv.

Plant Advs. NOT admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1908 is entitled to a five-line WANT ADV. (situations only) free, to be used at any time during the year.

Where answers are to be mailed from this office, enclose 10 cents extra to cover postage, etc.

Situation Wanted—In greenhouse, private or commercial establishment: several years' experience; single; age 25; English. Address WALTER DALE, Hancock Mich.

Situation Wanted—By an Englishman who is a first-class gardener and florist: either private or commercial: best of references. Address JAMES CREED, 28 Swift St., Auburn, N. Y.

Situation Wanted—As gardener on private place with glass; head or single; Chicago or California preferred; age 28, single; 15 years' experience; well up in gardening in general; references Key 420. care American Florist.

Situation Wanted—As working foreman; understands growing roses, carnations, violets, 'mums and miscellaneous plants; 40 years' experience, 21 years in England, 19 in United States; single; age 54; English. GEO. H. MORRIS Hudson, N. Y.

Situation Wanted—As responsible gardener; thoroughly understands the management of gentleman's estate; life experience in greenhouses, flowers and vegetables; good English and Canadian references; married; age 36; total abstainer. BATTEN, East Sherbrooke, Quebec, Canada.

Situation Wanted—By single man, age 27; strong, not afraid of work; first-class grower of roses, chrysanthemums, carnations, and all kinds of stock, having best references, European and American; wants position on private or commercial place; state wages. PAUL, care of Farley, 5th Ave., New Rochelle, N. Y.

Situation Wanted—By grower, German, 28, single; 15 years' experience cut flowers and general stock; specialty roses and carnations. To take full charge or will take section of roses or carnations on good reliable place; best of references; state full particulars with salary please. Key 416. care American Florist.

Situation Wanted—By Hollander as foreman on commercial place; 18 years' European and American experience in growing plants and cut flowers, including Farleyense and forcing, bulbs, valley, etc; three years in present place; good reference; age 34 single; state full particulars in first letter. J. P. NULLEN The Highlands, Newtown Square, Pa.

Situation Wanted—By a Frenchman; good grower and propogator in general line of cut flowers; roses, carnations Easter stock, palms, ferns, tropical plants; life experience in every line of the florist business; seven years' practise in America; can take full charge of wholesale and retail or private place; good references; am steady and sober man. Key 421. care American Florist.

Help Wanted—Rose and carnation grower: 25,000 feet of glass; send reference age etc.; $3.00 per day. EMIL GLAUBER, Montclair, Colo.

Help Wanted—Good carnation and rose grower for commercial place: state wages wanted, married or single. MUSKOGEE CARNATION CO., Muskogee, Okla.

Help Wanted—A man to work in rose section also two men for general greenhouse work; state wages without board. Address Key 340, care American Florist.

Help Wanted—Decorator and designer; one who has some knowledge of plants; single man preferred. References and wages in first letter. Address Key 410. care American Florist.

Help Wanted—Competent nurseryman who understands the retail trade, and can successfully handle men. Must have good knowledge of English language. Address J J M. care American Florist 1133 Broadway New York.

Help Wanted—A good live man for general greenhouse work; must have a good knowledge of roses, carnations, etc.; married man preferred; state salary and age, and send copies of references in first letter. Address ROBERT BEEB, Successor to Vaughan's Greenhouses, 35th St. and Ingersoll Ave., Des Moines, Iowa

Catalogues Wanted—Of seeds, nursery stock, bulbs, etc, A. A. ST. GERMAIN, 31 and 33 Station St., Kankakee, Ill.

Wanted to Lease—Place of not less than 8000 feet of glass in Pennsylvania, Ohio Illinois or Indiana with privi ege of purchase after one year. Key 417. care American Florist.

For Sale—A large florist refrigerator with mirrors and marble base at a bargain. A. B. ELLSWORTH, 17 N. 6th St., Allentown, Pa.

For Sale—Greenhouses in good condition; 8000 feet glass plenty of land; dwelling; central Ohio; good reasons for selling. Address Key 399. care American Florist.

For Sale—Two houses each 14x100 and one 5½x100, ft., opposite the largest cemetery here; one and one-half acres of land, living rooms above office; a good man on carnations and bedding stock can do well here. F. W. MEYER, Florist, Kalamozoo, Mich.

For Sale—A greenhouse plant in Colorado Springs, Colo., of about 19,000 feet of glass all stocked and just coming in good bearing condition steam heat; city water; cheap coal; six room cottage with plant, one acre of ground. This is a rare chance for a man with a family to help or a party that wants a higher altitude; good trade; fine soil and water the best. A. D. JONES, Broadmoor, Colorado Springs Colo.

For Sale at a Sacrifice.

TRADE QUIET.

Not since before Christmas has trade been so quiet as during the past week. The weather must claim the responsibility of the present depression as we have experienced a full week of severe weather. Several snowstorms, accompanied by zero temperature and considerable rain, have combined to keep people indoors, only the most vigorous braving the many exposures of shopping. A high wind prevailing most of the time has increased the difficulty of the growers in keeping up the heat. Carnations and bulb stock have weakened in price, both being received in far greater quantities than demanded. Single and double jonquils all dropped from $3 to $2 per 100, an unusual figure for this early season. In the effort of salesmen to force upon the market new varieties of carnations whose habits are practically unknown and, we are compelled to admit, oftentimes well known to be worthless as commercial products, many of the former favorites, with reputations well sustained, have been abandoned, and in this way the estimation of local grown carnations has been severely jeopardized. Considering the originations of the last three years without bias we must agree that a decided majority of carnations have been rank failures as commercial possibilities. While attractive perhaps when growing and for a few hours after cutting, the keeping qualities are utterly lacking, and, without these, carnations are positively worthless. There is a noticeable scarcity of American Beauty roses. The local growers and wholesalers have nothing to offer in this line and much difficulty has been experienced in procuring this stock from foreign markets. The prices are high and allow of but little profit for dealers. A superb line of Killarney is plentiful and well received. Richmond has fallen off considerably in quality and advanced correspondingly in price, a combination sure to wreck the future of the best rose ever grown. A limitless collection of the less important flowers is at hand and from the assortment many attractive varieties are renewing the favor attained in past seasons. Freesias were never so plentiful and seldom so well cultivated. Yellow marguerites are scarce and the present market condition in this line should awaken some live grower to his opportunity.

NOTES.

The election of M. A. Patten, as president of the American Carnation Society, brings to one of the most prominent of our local growers the greatest honor that his craft have in their power, and further extends the well guarded reputation of Massachusetts as the premier carnation district of the country. While of a quiet and retiring disposition, Mr. Patten has by his exceptional ability and thorough business aptitude forced himself into the ranks of the foremost carnationists of the country and is considered one of the leading authorities in the knowledge of his favorite product. He is frequently called upon to judge at exhibitions, a duty which he is eminently fitted for and in which he has always given the greatest satisfaction. Since returning from Washington Mr. Patten has been able to accomplish but little other than receiving the congratulations and good wishes of his acquaintances.

Wm. H. Elliott and wife celebrated their silver wedding January 30, congratulations and the good wishes of their friends pouring in upon the happy couple who have enjoyed 25 years of happiness. They entertained a party of old acquaintances in the evening with a dinner at the Hotel Thorndike. After dinner the party spent the evening at the theatre, the play being particularly adapted for the occasion, "My Wife," with John Drew in the leading part.

H. A. Stevens, of Dedham, formerly connected with the company bearing his name, and who is now conducting business independently, is succeeding far better than he anticipated. Although as yet working but a single house his products are of the same class which has brought his name prominently to the front of premier growers. Mr. Stevens caters to the local trade and finds little difficulty in disposing of his entire stock.

The Rosary, J. J. Casey, proprietor, has expanded and now presents a most attractive store with a center entrance. The new addition just doubles the floor space previously occupied and allows of greater ease in handling the rapidly growing business of the hustling owner.

Penn, The Florist, had the decorations for the Potter-Sargent wedding at St. Stephen's church; also at the dance given by Miss Eustis, of Milton, when Copley Hall was transformed into a Grecian garden.

Frank Morton, for several years identified with Edward MacMulkin, has severed his connection with that firm.

WELLESLEY, MASS.—Hundreds of valuable plants, including many rare specimens collected at great difficulty and expense, were destroyed January 28 in a fire which consumed a greenhouse and two stables on the estate of Frank P. Stone, on Grove street. The loss is estimated at $18,000. The fire started, it is believed, from defective heating apparatus in the greenhouse.

GREENWICH, CONN.—At the meeting of the Gardeners' Society held at 67 Arch street, January 15, Vice-president P. Flaherty in the chair, the following officers of 1907 were re-elected to hold office till January, 1909: Silas Frost, president; P. Flaherty, vice-president; P. Crighton, financial secretary; A. Mead, treasurer; Thomas Young, corresponding secretary. A vote of thanks was tendered C. A. Moore, of Belle Haven, for the presentation of a gavel to the society. The next meeting will be held February 5 at 7:30.

Indoor Culture of Carnations.

A paper read by Edmond A. Harvey, Brandywine Summit, Pa., before the Florists' Club of Philadelphia, February 4, 1908.

There is probably no cut flower of which the methods of culture have changed more in the past six or seven years than the carnation. When we began growing carnations, six years ago, we benched from the field about the middle of September, as this was the universal custom among Chester county carnation growers, and generally so throughout the United States, although some of the large growers around New York were practicing early planting. Now from the middle of July to the middle of August is generally conceded to be the proper time to house from the field.

The next development would naturally be indoor culture exclusively. To the writer's knowledge the first grower who practiced this method to any extent was C. W. Ward of Queens, N. Y., who has always been a leader in the development of this flower. I well remember seeing in 1903 at Mr. Ward's range a house of Enchantress that had been grown inside over summer and was struck with amazement at their magnificence. I do not think that I have ever seen them surpassed by any variety.

To succeed with indoor culture, strong, healthy cuttings should be put in the sand not later than February 1; those potted up before February 15 are preferable. We first use 2-inch pots, and when these are well filled with roots, plant in a bench four inches apart, each way. Some growers again repot from 3 to 4-inch pots and hold them in these until they are finally planted in the benches. When many plants are grown, this method makes a great deal of work in watering, as the pots dry out very rapidly when it comes hot weather, and the young plants are also liable to become pot-bound before the benches are ready for them. When their growth is once stunted they are practically useless. At each transplanting all the weak plants should be set aside. A weak cutting may recover in the field but will never pay for itself grown inside.

As soon after Decoration Day as possible the old plants should be thrown out, the houses refilled with a good rich compost and the young plants put in their final place. Care must be taken with the watering. There is not much danger of over watering in summer; still the benches should not be allowed to become soggy; far greater danger is in allowing the soil to get too dry. As soon as it begins to appear a light color on top it should be thoroughly moistened, otherwise the plants will become hard and woody, and will not break freely. Although shading is generally advised against, we believe a light shade is beneficial, and put a thin coat of whiting on every other row of glass about July 1, and remove it early in September. This will aid materially in keeping down the temperature and will not cause a weak growth unless the plants are over watered.

Edmund E. Harvey, Brandywine Summit, Pa.

Full ventilation should be given both day and night, except when a strong dry wind is blowing immediately on the plants, which drys out very rapidly both plants and soil, and is very likely to bring on an attack of red spider. This insect is about the only one that will cause trouble in the summer and a thorough spraying with cold water twice a week will, we have found, keep down this pest. Should it appear, however, the plants should be sprayed every day until they are clear, as the spider will cause a great deal of damage in a very short time, from which it will take a long time for the plants to recover.

The same care should be taken in pinching as in the field. Do not break back too high as this will cause a top-heavy growth, and the plants will be broken up by the spraying. As soon as the shoots begin to elongate and show the stem between the leaves, the top should be taken out, leaving three or four joints. Do not leave the plants two or three weeks and then break off all the shoots at once, but go over them every week, topping all the longest ones. This will make a more even growth and lessen the tendency toward cropping.

The benches should be frequently cultivated during the summer, both to keep down the weeds and to prevent the surface of the soil from becoming hard and baked. If the soil was well fertilized with cow manure and bone meal before it was put in the benches, no feeding will be necessary during the summer. Through the fall we use top dressings of bone meal and sheep manure every two or three weeks, omit-

ting all feeding through December. In January, when the days become longer and we get more sunshine, we use a stronger and quicker acting commercial fertilizer. Feeding with liquid manure would doubtless be beneficial, but we have never used this method.

If by July 1 the plants in the houses are as large as those in the field, you may consider that you have been successful, for, although through July and August the field plants will make a faster growth than the indoor stock, these will catch up later. There is always some check to plants benched from the field, and often it is very severe if the conditions are not right. This is especially the case in a wet season. One of the greatest advantages of indoor culture is the fact that we have control of the watering, and this is especially important since stem rot has made its appearance. How often does it happen that half of the plants die in the field and again half of those remaining, after they have been planted in the houses, and it is nearly spring before we begin to cut good flowers. With proper indoor culture the ravages of the dreaded stem rot are reduced to a minimum.

Another advantage of this method is that large flowers with long stems can be cut early in the fall, when they bring good prices and when none of the profits go into coal bills. A steadier cut is also assured through the winter, and the danger of getting a heavy crop, when prices are low, is diminished. Some varieties are undoubtedly better suited to indoor growing than others. As a rule, the broad foliaged, strong growing kinds are best adapted to it. Mrs. Lawson and Winsor are notable examples, in fact, we would not attempt to grow them any other way.

The greatest objection offered to indoor culture is the fact that the June cut is lost. However, at this time, carnations bring very low prices, and after all the problem is how to make each square foot of bench surface produce the most money. If we can make the returns through the fall and winter more than cover the loss during the summer by indoor culture we are foolish not to adopt it. It is not urged that this method is an easy way to success in carnation growing. It certainly will not help that grower who is used to letting the plants take care of themselves. A little neglect is far more disastrous to indoor stock than to plants in the field.

I would not advise anyone to change their whole plant immediately from one method to the other, but first try a house or at least a bench, and prove which way is the better under existing conditions. Some of the largest and best growers in the country practice indoor culture exclusively, and many others in part of their plant, and they certainly would not do so if it did not pay them. When any new method of doing things is taken up by the leaders in the trade, we owe it to the success of our business to at least see for ourselves if there is anything in it, otherwise, we shall soon be bringing up the tail of the procession.

*Carnation Diseases.

BY F. D. HEALD.

BUD-ROT.—During the past few years a troublesome and destructive disease of carnations has been prevalent in a number of the greenhouses of the state. The disease affects the buds in various stages of maturity and produces a rotting of the petals and other flower parts, at least the parts enclosed by the calyx, thus interfering with the normal opening of the flower. The disease has therefore been termed the "bud-rot" of the carnation.

The bud-rot of carnations was first reported in 1905 by Dr. Wolcott from specimens received from a greenhouse at Beatrice, Neb. He attributed the trouble entirely to a mite which was constantly present in the affected buds. The mite was briefly described as belonging to a new and hitherto undescribed species and possibly a new genus. At this time the fungus origin of the trouble was not suspected. Later in the same year the same trouble was reported to the writer and an investigation was begun. The first examination showed the mites, and in addition the rotting petals were found to be pervaded by the mycelium of a fungus. An examination of the rotting buds led to the belief that the mites were only secondary, and that the fungus was the primary factor in causing the disease. Fusarium spores were found upon the rotting petals and it was supposed that the trouble was due to this fungus. It was found later that the trouble was due to a different fungus, and that the fusarium was a contamination which developed during the transit of the specimens.

On January 29 of the present year a letter was received from Professor H. E. Hodgkiss, Geneva, N. Y., asking for information in regard to the bud-rot which was reported in Nebraska. He stated that the accompanying mite or a near relative had been sent to him. The fungus present with the mite was determined by Professor F. C. Stewart, as Sporotrichum anthophilum Peck. About April 30, in compliance with the request of Professor Hodgkiss, specimens of carnation buds affected with the disease under consideration were sent to him by the writer for comparison with the New York specimens. Not until August 21 was the information received that the Nebraska and New York mites appear to be identical.

*From Bulletin 103 Agricultural Experiment Station of Nebraska.

OTHER CARNATION DISEASES.

The carnation is attacked by a considerable number of diseases which affect the roots or stems and foliage, but only a few are known to affect the buds or flowers. The diseases are due in the majority of cases to fungi, bacteria playing a very insignificant part. The following are the principal diseases that have been described:

The Stem Rots.—Two different types of this disease have been studied by Stewart and Sturgis, due to a fusarium and to the sterile fungus rhizoctonia. What is probably the same fusarium disease has been studied by Delacroix and the causal organism determined as Fusarium dianthi Prill. and Delac. A somewhat similar trouble has been described by Atkinson under the name of "carnation rosette."

Bacterial Spot.—A true bacterial spot disease of the foliage has been described by Woods, while the disease formerly described by Arthur and Bolley as bacteriosis has been shown by Woods to be caused by the punctures of aphides and thrips and has been named stigmonose.

Anthracnose.—Three different writers have described an anthracnose of carnations affecting stems and leaves: Halsted found the disease to be due to Collectotrichum dianthi. Atkinson attributed the anthracnose which he described to a species of volutella. The anthracnose which Cooke described as occurring in England was attributed to Gloeosporium dianthi. It is quite probable that the causal organism is the same species in all three cases, but it can hardly be considered as proved in the light of present information.

The Fairy Ring.—This disease of carnations has been reported by various writers (Berkeley, Smith, Atkinson), and its common name has been derived from the fact that the fungus produces its fruiting hyphæ in concentric zones around the center of infection. While the disease attacks mainly the foliage and stems it has been reported as affecting flowers and buds. Selby mentions the same fungus (Heterosporium echinulatum (Berk.) Cooke) as the cause of leaf and calyx mold of carnations, which produces unsightly discolorations on calyces and pedicels as well as upon leaves. Sorauer has recorded a case in which the disease seriously affected the flowers. Many buds did not open

at all or only slightly, and flowers that did open showed brown dry spots upon the petals due to the growth of the fungus and the accumulation of the spores.

Spot of Carnations.—This disease, which is due to Septoria dianthi Desm., is known to occur in both this country and Europe. The spots are circular or oblong with a dirty white or brown center, bordered by a dark purple band. The central area shows black specks or pycnidia filled with spores. No mention is made by any writers who have studied this fungus of its occurrence on parts other than leaves and stems, although it is probable that it may be found on flower parts, at least the calyx.

Carnation Leaf Mold.—This carnation trouble has been described by Halsted and attributed to a species of cladosporium. No specific name was assigned to the fungus. The fungus caused a spotting of the foliage and in severe cases the entire leaves or entire top of the plant were affected.

Alternaria Disease.—This disease is known to occur both in Europe and in this country. According to Sorauer the trouble first shows as yellow, slightly swollen spots on leaves, stem and calyx. Later the leaf turns brown and is completely killed, while the affected spots show a blackish powder due to the accumulation of alternaria spores.

Rust.—This disease (Uromyces caryophyllinus (Schr.) Schroet.) attacks carnations at all stages and affects any of the green parts producing the characteristic rust sori. Although this disease did not appear in the United States until 1891, it is now very generally distributed. It is present to a greater or less extent in nearly all greenhouses.

Smut.—Carnation smut (Ustilago violacea (Pers.) Fckl.) is not known to occur in the United States except on other hosts.

Botrytis Disease.—According to Atkinson, carnation flowers and buds may suffer from the attacks of a botrytis. This trouble is prevalent, especially when the soil and air of the greenhouse are kept too damp. Selby has briefly described the same trouble, but neither writer refers the fungus to a definite species of botrytis.

In the foregoing list it may be noted that the only serious fungus diseases affecting the flowers are due to the fairy ring fungus and the unnamed species of botrytis, which is probably Botrytis vulgaris. In addition to these the trouble known as petrified buds, which is apparently a physiological trouble, was reported by Kennedy. Arthur has reported an abnormal condition of carnation flowers in which the petals become adherent. No animal or fungus parasites were found to be associated with this trouble.

The Baltimore Florists' Exchange.

The Florists' Exchange in Baltimore is an interesting place to visit. Established some years ago, it has gradually grown to be a great convenience to both grower and consumer. Starting with stock at $5 par value its business so increased in value that the company now has its own building, worth $30,000 erected and entirely paid for, with stock now having a par value of over $245 per share. The salesroom and offices are on the first floor. In the basement is a commodious apartment in which to keep and display cut flowers. This is cooled by the admission of air from the outside and J. Perry, the superintendent, says it is satisfactory in every way. The second story is a well lighted room, large and elegantly fitted up, where the Baltimore Florists' and Gardeners' Club holds its meetings. It is also rented out for entertainments. Mr. Perry says there is no reason why much more good could not be done by the exchange, for instance in the matter of buying of coal, glass and other supplies, that are used in quantities by the trade in that section. He is sure much better prices could be obtained by the purchases being made as a whole and delivered as required. Here is an example of what has been done by co-operation of the craft, a getting together that has brought tangible results. There is scarcely a city of any size in the country, but that could get together in this way and profit by the example set for them by the boys of Baltimore.

K.

Syracuse, N. Y.

The excessive cold and stormy weather of the past two weeks has put a damper on business and except for a number of funerals and social events, trade would have been very dull. The stock is coming in exceptionally well for this time of the year. Trade in general is somewhat duller than it was a year ago owing to the business stagnation. Bulbous stock has been plentiful and is in demand for center pieces.

Henry Smith, superintendent of the state fair grounds and John Smith, his son, who has been acting as gardener under his father, have resigned, to take effect April 1. Mr. Smith had full charge of the state fair greenhouses and every fall set out artistic beds. He has been there for eight years. His successor has not yet been appointed.

Henry Morris has a good display of azaleas, tulips, roses, callas, sweet peas, forget-me-nots, lily of the valley and primroses in 10-inch pans. A popular seller is the American Beauty rose in pots at $1 each.

P. R. Quinlan has had an unusual amount of funeral work. He is cutting violets from his Valley greenhouses and they are selling at $1.50 per 100.

A. J. B.

VINCENNES, IND.—Paul Schultz has had a very good trade recently, a great increase over that of last year.

STOCK SCARCER, PRICES HIGHER.

The severe weather, ushered in by the storm of last Saturday, has made itself felt on this market in the general shortening of supplies and advance in prices. Particularly is this true in the entire rose line. The glut of American Beauty roses is a thing of the past and prices have gone up one point. Bride and Bridesmaid roses have been even scarcer than they were a week ago. Both are seen in excellent form, the buds being large and shapely and the color of Bridesmaid excellent. Richmond roses are also in excellent condition. Short stems in all varieties seem hard to find. Carnations, in spite of the cold, continue slightly in excess of the demand. Generally speaking the quality is excellent, the flowers on long stems being easily obtainable. White Perfection and Aristocrat seem to be the leaders. Some excellent White Lawson is seen. Bulbous flowers are being received in quantities and the demand is only limited. Harissii lilies and callas are excellent property, a good demand existing in the face of advancing prices. Mignonette seems to be both shorter in supply and in better demand. The supply of violets is far ahead of the call, and not much can be said for the quality of the double. But some very fine home-grown single violets are shown.

At J. A. Budlong's several of the hands are busy at the grafting benches, this being one of the establishments where all rose stock, excepting American Beauty, is grafted. A house of Killarney is to be added this year and this stock will also be grafted. Afterglow is one of the new carnations to be grown here this season. The entire plant is in excellent shape producing nearly to its limit for this season. Bride and Bridesmaid roses of the best shipping grade are in heavy crop.

E. Wienhoeber, John Muir and Leonard Kill have been appointed to represent the florists on the business men's relief committee. The trade is asked to contribute clothing for the needy.

The S. L. Randall Co. reports good orders being received from their traveling salesman, F. J. Farney, who was recently heard from at Detroit, Mich. St. Valentine's day specialties are now the order in the supply line.

J. B. Deamud is back at his desk after experiencing 28° below zero in Michigan. This house is now receiving some exceptionally fine carnations, Enchantress, Lady Bountiful and Lawson appearing at their best.

A vase of white lilac was seen this week side by side with a vase of Winona carnations at Kennicott Bros. Co. This new carnation is reported in large demand, its color commending it to all buyers.

The Poehlmann Bros. Co. is cutting some very fancy Proserpine tulips, also lily of the valley. Some Richmond roses with stems over four feet long were seen here the past week.

Wietor Bros. are cutting some very fancy carnations. White Lawson has seldom, if ever, appeared better than at this range. Other varieties are doing equally well.

Some of the South Park Commissioners are criticized in the daily press as having made favorable real estate deals near parks which they located.

Peter Reinberg's plant is producing its usual heavy cut of roses. He is fortunate in having a good crop of American Beauty on in one of his ranges.

Chas. S. Stewart has severed his connection with the E. F. Winterson Co., and contemplates going into the retail cut flower business again.

Fritz Bahr, of Highland Park, is back from Cuba much impressed with the possibilities of that country. He also visited the Isle of Pines.

Mrs. May Hauswirth was appointed administratrix of the estate of P. J. Hauswirth in the probate court last week.

Michael Barker, of THE AMERICAN FLORIST, is taking a vacation and business trip through the South.

The Eaton Flower Shop is advertised for sale. It should be a good stand.

And the ground hog saw his shadow.

Visitors: C. S. Kunz, Manitowoc, Wis.; W. J. Sheap, Jackson, Mich.; Robt. C. Whitehill, representing Hammond's Slug Shot Works, Fishkill-on-Hudson, N. Y.; Chas. W. Reimers, Louisville, Ky.

FUNERAL WORK PLENTIFUL.

The weather the past week has been more wintry than we have as yet experienced so far this winter, cold and clear. On Carnation Day the thermometer registered 8° above zero but carnations were seen everywhere. Pinks and reds were mostly in demand, yet other colors were worn. Three, four and five cents was the price for dark pink and red and all were cleaned up. The demand for white stock keeps up as there is a great deal of funeral work. Roses are in good demand and bring good prices. Callas and Lilium Harrisii are coming in and disposed of at good prices; even violets, which have been very plentiful, took a brace and have risen to $4 per 1,000, but this cold weather will retard transient trade in this flower somewhat and with bright, clear, cold days stock in violets will accumulate and down will go the price. Tulips and jonquils are selling fairly well. Sweet peas are improving and arriving with longer stems.

NOTES.

The ordinances putting the employes of the Forestry Department on salaries and providing more stringent regulations against trimming and damaging shade trees which had been held up for some time were passed by the house of delegates. Andrew Meyer, Jr., city forester, deserves great credit for the framing up and pushing through of these ordinances.

Young & Sons were especially busy this week; they furnished the casket cover at Frank R. O'Niel's funeral. The beautiful window decoration by Willie Dee, who has charge of this department, shows him to be a natural decorator.

Fred Foster at the Century building has his windows looking well. He inserts a sign in the window "Roses 25 cents per dozen" as a drawing card. These, however, are not long-stemmed American Beauty roses.

John Nyflot, the florist opposite Calvary cemetery gate, is building a new residence and store which, when finshed, will be a beauty. He raises a large quantity of bedding stock which he disposes of at retail.

The spring flower show, to be given by the Horticultural Society, promises to be fully up to the standard and will equal if not surpass that of last year.

Max Rotter had several large funeral orders during the past week. He was in the wholesale district daily hunting white stock.

All the down-town storekeepers showed McKinley pictures on Carnation Day and helped to boost the sale of this flower.

Mrs. Buechel of the Riessen Floral Co. has completely recovered from the accident she experienced last week.

John Burke is establishing a fine trade for cut flowers at his busy corner at Sixth and Locust streets.

St. Louis Seed Co. is busy with extra hands filling vegetable and seed packages.

The Easton Floral Co., managed by Miss Lottie, reports business very good.

Henry Lorenz, of Park avenue, is around and always seems to be busy. W. F.

Cincinnati.

ROSES AND CARNATIONS SCARCE.

We have no complaint to make as far as trade is concerned, only a shortening up of roses and carnations all along the line, which at times makes it a difficult matter to fill orders. On Saturday a blizzard set in that sent the thermometer below zero and this undoubtedly will help keep the market short of flowers for a few days, with the exception of bulbous stock, which is coming along in fine shape and seems to be in good demand. Callas and Lilium Harrisii are scarce and everything coming along in this line is eagerly bought up. Lily of the valley is fine and sells out clean every day and the same may be said of good single violets. In the green goods line both Asparagus Sprengeri and A. plumosus are shortening up but we have an unlimited supply of smilax to fall back on.

NOTES.

Tromey's Flower Shop decorated the front of the store with pink carnations tied in wild smilax, with a large picture of McKinley in the center for Carnation Day, January 29. Mr. Tromey claims his efforts were liberally rewarded by the amount of carnations sold on this day.

The writer received a telephone message saying that J. B. Heiss of Dayton dropped dead near his place on Saturday. Mr. Heiss was a frequent visitor to our city and had many friends in the trade here who will join in sending their heartfelt sympathy to the bereaved family.

Miss Edith Kyrk of Avondale had the decorations for the Wiltsee reception last Thursday that was done in American Beauty and Killarney roses, Enchantress carnations and wild smilax, which made a decided hit with the guests.

Hardesty & Co. were unusually busy the past week with funeral work and several swell dinners at the St. Nicholas and Sinton hotels.

George & Allan are sending in some extra well grown tulips and daffodils which meet with a ready sale.

Tom Windram is cutting a fine lot of white carnations that prove to be good property at the present writing.

R. D. Ruttle of Covington, Ky., is one of the big buyers in this market and does a fine business. S.

Springfield, O.

Charles C. Leedle, whose portrait we give herewith, president of the Leedle Floral Co., together with Charles P. Brunner, Henry J. Roth, Mark M. Livingston and James Sager, have filed articles of incorporation with the secretary of state at Columbus for the formation of The Leedle Rosary Co.

Early in the spring this company will erect a large range of glass near The Leedle Floral Co.'s houses, which will be devoted entirely to the growing of roses for cut flowers and will be equipped with modern appliances for heating, ventilating and watering.

Mr. Leedle will give his attention to both companies. His son, Arthur C. Leedle, will be active in the management of the new company. Mr. Leedle is a natural born florist as well as a thorough business man, and judging from the success of The Leedle Floral Co. in growing and shipping rose plants, the new company will surely meet with success in growing roses for cut flowers.

Cleveland.

TRADE VARIABLE.

Business the past week has been such that one would wonder what was coming next. The first part started in good shape, with most all lines of stock sold. The middle of the week business slumped and by the end it was impossible to move stock, even at a low figure. Carnations are coming in with a rush; although the quality is excellent they move unusually slow for this time of the year. The result is that the prices have dropped considerably. American Beauty rose is scarce and the quality poor. The demand for this stock is greater than the supply. Richmond, Killarney, Bride and Bridesmaid are above par; they leave nothing to be desired in stem, color and flower, but they do not bring as high a price as might be expected. Tulips and daffodils hold their own and the same can be said of sweet peas and daisies. We had a genuine old-fashioned blizzard the latter part of the week, consequently the trains were several hours late. Numerous uncharitable words and phrases were heard in the wholesale district, but these did not help matters any as the stock did not arrive until after 10 o'clock. Monday saw no increase in business, but it did see an increase in the amount of stock that was coming in.

NOTES.

At Kirchner's on Quincy avenue we found the proprietor, T. J. Kirchner, hustling and busy as usual. In the houses we found several good benches of Boston ferns, all pot-grown, that were well done, also lilies, azaleas, bulb stock of all kinds and spring bedding stock that can be sold in a retail establishment. The cut flower houses are located on the farm out of the city, at this place; mostly carnations are grown and the cut shows up equal to any in this market. The retail place is one of the best equipped places for making up work and handling a retail business in this city and is always kept in good condition, cleanliness being the word throughout.

The writer recently paid a visit to the rose growing establishment of Isaac Kennedy at West Park. This is a modern range of glass, built in the last few years, and is planted entirely to Bride and Bridesmaid, some of the stock being six years old, but all of them in the best possible condition, showing a wonderful growth. From this place come the specials seen in this market and some of the finest stock produced in this part of the country. Mr. Kennedy has a white sport from Bride, the difference being in the size of flower and growth, that will be heard from later on.

The carnation exhibition takes place February 10. All are welcome to attend.

FUNERAL WORK PLENTIFUL.

Business is picking up in great shape, the constantly changing weather causing quite a few deaths. Stock has been a little scarce, but not enough to cause alarm. There was quite a call for white last week, especially white roses. There was also a slight demand for American Beauty. Dutch hyacinths are just beginning to show up but as yet the cutting is very light.

NOTES.

The Fifth Avenue Floral Co. reports that a nice lot of carnations and is cutting as high as 1,200 per day.

Last Tuesday the bowling club met for a couple of hours' sport. The highest scores were as follows:

McKellar	152
Curry	141
Blum	141
Seibert	130
Munk	130

Jake Ruchert, one of the stars usually, got rattled for some reason or other and succeeded in spoiling his record. He promises better next time.

CARL.

Dayton, O.

Recent trade has been good, just about using up stock. W. G. Matthews has joined the charity workers band by donating corn meal for the unemployed.

H. H. Ritter mourns the loss of a brother-in-law, who died last week at Arcanum.

W. S. Horlacher takes an optimistic view of the spring trade in this section.

The Miami Floral Co. has added to its staff John Ewing, formerly of Elgin, Ill. Geo. Bartholomew, of this company, has a very fine cut of carnations and roses coming in with brisk shipping demand and good prices.

A special meeting of the Florists' Club was held at H. H. Ritter's to arrange for the attendance of the club in a body at the funeral of J. B. Heiss. The club contributed a splendid Trinity cross. The death of Mr. Heiss will be keenly felt, he being a prime mover in the club.

H. W. Koerner, the dahlia and gladioli specialist, is building a warehouse 18x100 feet, with a cold storage cellar underneath, which will be used for storing dahlias. The warehouse will be for packing, shipping and potting plants, and a cold storage room for cut flowers. He is also going to build some greenhouses, but it is not known yet how much space he is going to cover. Everything is to be built of concrete, walls, floors, roof, potting and packing tables, all the bins in the cellar, stairways, the greenhouse walls, walks and benches, a tank holding 200 barrels of water, 14 feet above the ground. Mr. Koerner says he thinks this will be the first plant of its kind where there will be no lumber used, except doors, sash and rafters, in the whole construction.

CARNATIONS OVER PLENTIFUL.

"There is no snap to it;" so said a wholesaler when asked how business was going and this about sizes up the situation at this time. A little doing all the time, but not enough to keep the stock fresh, there always being something over that should have been sold the day previous. Carnations seem to be the most plentiful and hardest to move, although the stock is very fine. High grade stock is offered at $4, very good at $3, and in 1,000 lots these figures are almost cut in half. Roses are plentiful, but prices hold fairly well. The best American Beauty is now quoted at $6 per dozen, first grade Liberty and Killarney, $15; Bride and Bridesmaid, $12. Killarney continues to improve and is away ahead of anything else in its color. This rose appears to give the greatest satisfaction to the buyers, who speak of its long keeping qualities and its beauty when full blown. Daffodils and other spring bulbous flowers, such as tulips, freesias, etc., are seen in quantities with prices a shade lower; $3 now buys about the best. Sweet peas are better than ever and will be a strong factor in the market as the season advances. Lilac is fine, very good stock coming in from several growers. There is a fair demand for flowering plants; azaleas, cinerarias, daisies and primroses are most in evidence. A few very well flowered cyclamens are also seen. If the growers of cyclamens could only learn the trick of getting the same amount of flowers per plant at Christmas, all bank accounts would be much better for it.

NOTES.

The February meeting of the Florists' Club held on Tuesday evening was a most interesting gathering. The exhibits were large and while mostly consisting of carnations there were several very good things on view. The carnations staged by E. A. Harvey and Son, of Brandywine Summit, some 10 vases, were very fine as were those of the other principal exhibitor E. A. Stroud. The vase of seeding No. 100 of the Joseph Heacock Co., a fine pink, and the flowers staged by Wm. Batchelor, a blush tinted sport of Lawson, were very fine. Other exhibits were the pink sweet pea. Wm. Sim, from E. A. Harvey. Kramer's new rose, Queen Beatrice, showed up better than ever and sprays of Clematis indivisa, a white flowered variety, a very good thing from New Zealand. The paper of Mr. Harvey was full of his best experience and is a very valuable essay. It was voted to have a dinner during Lent. The money left over from the entertainment fund of last summer, a goodly sum, was voted to be turned into the club treasury. Discussion of Mr. Harvey's paper was very interesting, bringing out some valuable points from the members present.

All the Washington visitors report themselves much pleased with their visit. They declare the exhibits in many ways ahead of any previous shows. The only drawback is the very transitory life of the display, which was much past its beauty by Wednesday evening, only about 24 hours after the opening. It was said that the heat of the hall and the condition of the atmosphere caused by the great number of cigars being burned at the same time, the smoke being so thick that it could be cut with a knife, had much to do with the short life of the flowers. A lot of "no smoking" signs should be prepared for next year's show, as an experiment.

The large house at North Wales had a great trial in high winds on Sunday last. A more riotous and blasting day outside of a cyclone has not been seen here for a long time. The force of the wind was tremendous, but while the roof undulated considerably at times, it suffered no loss beyond about 25 panes of glass. There was no difficulty in keeping up the heat, although there was from 15° to 20° of frost, which, with the high wind, makes a most severe strain on the heating apparatus.

The Robt. Craig Co. shipped a large order of Ficus pandurata last week to New York, something over $750 worth, which shows how popular this plant is getting to be. Visitors to the president last week called favorable attention to the number of these plants used in the White House decorations.

Robt. Craig and John N. May stopped over in Baltimore to see John Cook's new rose, My Maryland. They both think it a lovely variety and one sure to be generally grown.

Wm. P. Craig says he booked a lot of orders for the new rose, Mrs. Jardine, which made a fine show in the hall and afterwards on the banquet table on Thursday night.

Wm. Kleinheinz is proud of winning the H. F. Michell cup. Mr. Kleinheinz is always a hard worker and something out of the ordinary has to be staged to beat him.

John McIntyre is making preparations to handle daffodils in quantity. When his southern stock arrives he will be able to fill orders for any quantity.

Joseph Heacock, Wyncote, is well pleased with his success, getting a certificate for his new pink one. It is certainly a fine thing.

Wm. McKissick's Richmond roses are in great demand, his special stock being fit for the exhibition table at almost any show.

The Leo. Niessen Co. is right in it with a fine assortment of spring flowers, bulbous stock and sweet peas in variety. K.

Convention City Notes

The cut flower stores of Washington, D. C., are for the most part commodious with large show windows, quite a number having the added advantage of corner locations with a front on the streets; Messrs. Small, The Washington Cut Flower Co., Cooke and Blackistone being so situated. Great attention is paid to window and store decoration. Gude Bros. have an effective setting in one of their windows in honor of McKinley's birthday. A large flag was thrown over an easel, in the center of which was placed a picture of the former president; around this was a large crescent wreath of bronze magnolia leaves, tied in the center with small flags. It was very effective and attracted a great deal of notice from the passers-by. The interior of the store was made gay with a fine collection of flowering plants, arranged around each side; a lot of white lilacs in pots being very showy and effective. Z. D. Blackistone had a fine window display of carnations, roses and blooming plants.

The windows of The Washington Cut Flower Co. were made gay with spring flowers and carnations, the firm having a very fine lot of Enchantress. Their mirrored cool room, in which the choice stock is kept, is large enough for several people to move around in at one time. It is mirrored on top and all sides, which makes the stock appear very large. Nearly all the flowers are from the firm's own nurseries and show good culture. A vase of the red rose, Cardinal, standing alongside of another of Richmond lost nothing by comparison and they say it is a good seller.

J. R. Freeman's large window, was full of flowers. Primula obconica and fine plants covered the floor, while suspended vases, of different kinds of cut flowers, filled the space to the top.

George Cooke had a nice window display of spring flowers; cut daffodils, azaleas and lilacs in pots. A large lilac plant, rather bare at the bottom, was made to look much more presentable and quite natural, with bunches of leaves stuck in the pot. Some pretty dou-

ble poinsettias were noticed here. Mr. Cooke says that poinsettias will keep for a long time, by filling the vase in which they are placed with hot water, just below scalding, and allowing them to remain until wanted for use. If placed in cold water and used in a window they would wilt in a short time, but with this treatment they will last until too old for use.

F. H. Kramer's Queen Beatrice rose was the attraction in the front decoration; there were fine flowers and he assured me they had stood three days in the carnation show. This was a great test, as generally such treatment is enough to ruin any cut flower, but this stock, while open, was still fresh looking without any sign of wilting. This certainly has the points of a good commercial sort, the foliage being fine and the stem, of even the small flowers, being stiff and erect.

The Washington Rose Co., across the street, had a showy window, advertising principally funeral designs; these, made mostly of milkweed balls, gave an idea of style and size, which could be carried out in flowers. In the central market, where quite a business is done in cut flowers, this idea is also carried out with waxed flowers; imitation roses of different colors are made into designs, giving an idea of form and size, which is carried out with natural flowers, although many of the made-up pieces are sold to be used at once. Quite a large stock of roses, carnations, tulips, in fact all kinds of flowers are displayed here in the market stalls, where they keep very well, and, on market days, three days per week, a very nice business is done. Business is carried on here by Kramer, Slye & Thomas, Schellhorn, Garden, Bowdler and Studer.

C. Schellhorn had several vases of the old time favorite rose, Meteor. This he claims to be the most prolific rose in cultivation, as he can cut four times more from this than from any other variety and he has grown them all. The large vase of Alma Ward carnations presented to President Roosevelt, on the day of the visit of the society to the White House contained the very best carnations that have ever been grown up to this time. As the line passed the president, Wm. P. Craig, noticing that Mr. Roosevelt was without a boutonnier, presented his, which was gracefully accepted.

Mr. Pfister's establishment, on Connecticut avenue, has been much improved the past season, the next door building being taken in, which gives much needed room and makes a very light and pleasant store.

Washington has set the pace in many things but the latest addition in buildings, the new Union station, stands head and shoulders above anything else of its kind in this or any other country. The corridor of the train shed, in which the passengers congregate, before the gates are open, is nearly 800 feet long by 150 wide, all covered with one span or arched roof. Every other part of the depot is on the same grand scale which must be seen to be appreciated.

Small's windows were decorated with American Beauty roses, azaleas and spring flowers.

K.

Pittsburg.

ROSES IN SHORT SUPPLY.

The extremely cold weather has cut short the supply of roses to a great extent, white being very scarce. The carnation supply has not suffered so much and there seems to be plenty for everyone excepting white, which is being used for funeral work. Bulb stock of all kinds is plentiful, good jonquils making a nice addition. Tulips are in fine condition, while lilies are not at their best. Carnation Day orders helped clean up the surplus of carnations which then existed.

August Pochlmann, Chicago, J. S. Wilson, Western Springs, Ill., Nick Zweifel, Milwaukee, Wis., and J. A. Evans, Richmond, Ind., stopped off on their way home from the Washington convention. While here they visited the Pittsburg Rose and Carnation Co., at Bakerstown.

Visitors at Fred Burki's, returning from the convention, found the stock very fine and about the best built range of houses around the Ohio river. Carnations, roses and Asparagus plumosus claim most of the space.

Mrs. Jacob Baldinger, who ran a stand for years in the Diamond market, died February 1.

E. C. Ludwig and family are spending the winter in Los Angeles, Calif.

J.

GRAND RAPIDS, MICH.—J. F. Nellest, who has just completed the geological map of Michigan, will start in the florist business in the spring. Mr. Nellest has a greenhouse in which he raises lettuce and other vegetables for the market, but has recently taken up the floral branch of the business and will extend it.

BOSTON, MASS.—Robert Cameron, superintendent of the Harvard Botanic Garden, gave an interesting lecture, January 25, on "Annuals and Biennials" in Horticultural Hall. He gave a long list of annuals, with suggestions as to their cultivation, and told which are best for cut flowers and for bedding, as well as for school gardens.

THE WHOLESALE CUT FLOWER DISTRICT, TWENTY-EIGHTH STREET, NEW YORK, JANUARY, 1908.

New York.

MARKET UNSTABLE.

With zero weather and pouring rain, coming within a short space of 48 hours, it is easy to imagine that the market would be unstable and unsatisfactory. Roses have not been over plentiful, and the better grades are moving better than most stocks. Of carnations and bulbous stock, there is a great supply, and it would be a relief to see the market cleaned up. It would seem that we have fallen on sad days, when the wholesale market is affected by street trade; but during the cold snap which made it impossible for the violet peddlers to do business, the effect was noticeable in violets. Saturday, which is usually depended on to brighten up a bit, was ushered in by a hurricane and pouring rain, and it was only necessity that brought anybody out. It is agreed that conditions might be worse, but they could likewise be much better, and it is hoped that something will be doing before Lent comes in.

February 3.—Cold and blustry weather is not improving violet conditions. Good roses are going fairly well but the carnation market is very stagnant and there is no relief in sight. Prices on violets and bulbous stocks are also demoralized.

NOTES.

The wholesale district has been much interested in the American Carnation Society convention at Washington, D. C. Several of the leading wholesale dealers have been in attendance. President Traendly, of the S. A. F., John Young, A. J. Guttman, Alfred H. Langjahr. Eugene Dailledouze, John Birnie, and other well known figures were present. C. W. Ward, of Queens, and F. R. Pierson, of Tarrytown, may not, strictly speaking, be of the wholesale district; the wholesale district, however, is greatly interested in them and their doings, and we hope that they are interested in us; both were present at the convention, taking an active part, and the honors awarded their exhibits, will be found in convention reports.

The first annual ball of the Greek-American Retail Florist and Growers' Association, was held at Palm Garden, Fifty-eighth street and Lexington avenue, January 31. The committees were as follows:

Committee of Arrangement—J. G. Garlaftes (chairman), James Tryforos, John Doganjes, Theo. Carampas, N. Lales, J. Andrianopoupos and C. Stavrianopoulos.

Floor—G. D. Nicholas (ex-officio), N. Lales and John S. Nicholas.

Reception—Geo. Cotsonas, Jas. Soleriades, Theo. Carampas, S. Lappos, S. Calamaras, John Doganjes, C. Stavrianopoulos and P. Theophilopoulos. X. G. Varem was floor manager, and John Andrianopoulos, his assistant.

The grand march at the Greek ball was led by D. N. Bottasi, Greek consul at this city, and the Countess Ralli. Over the orchestra stand, there was a magnificent horseshoe of Liberty roses presented by John S. Nicholas, a well known retailer of the Grand Central station.

A number of the leading American wholesalers were present, and they pronounce it one of the best managed and orderly events that has ever been given in connection with any branch of the florists' business in this city. The proceeds will be used for the foundation fund for the Greek school here.

The new firm which takes the Thomas Young, Jr., store, 43 West Twenty-eighth street, will be known as Millang Bros., consisting of Charles and August Millang. The business will be conducted as a wholesale store, making a specialty of cut flowers. The Millang family has long been identified with the florist business and all its members have a thorough knowledge of the wants of the trade. This firm should have liberal patronage.

The store at 43 West Twenty-eight street which has, for a number of years, been conducted by Thos. Young, Jr., has been taken by Chas. Millang, now of Twenty-ninth street. It is understood that the increasing business of Mr. Young's Fifth avenue store renders it imperative that he devote all his time to that center of activity. Other enterprises also demand his attention.

The wholesalers of Twenty-eighth street, have just awakened to the fact, that they have among them a prototype of the great Napoleon in the person of A. H. Langjahr. He looks like Napoleon, his pose is Napoleonic, and he is a Napoleon in the flower business, which should settle the question.

In the various activities at Washington during the past week there was no figure more prominent and potent than that of Charles Willis Ward, of Queens. He is a man of ability and versatility, or, to be more definite, he does many things, and does them well, and we are all proud of him.

Alexander J. Guttman, who went to the Washington convention, was unfortunate in having a bone felon develop on his thumb. He will have the sincere sympathy of all who have ever had experience with such terrors.

The February meeting of the Florists' Club will be held January 10 in the Murray Hill lyceum, 160 East Thirty-fourth street. There will be an interesting programme and a good attendance is expected.

L. B. Craw, manager for the Lord & Burnham Co., made the trip to the Washington convention, and was a popular figure among the delegates.

PROVIDENCE, R. I.—Frank Budlong, of the Budlong Greenhouses and gardening establishments of this city, is now, with his yacht, at Ft. Myers, Fla.

SAN DIEGO, CAL.—The Floral Association met January 16 at the home of James E. Wadham, corner Ash and Eighth streets, the members turning out to the number of 100. The tastefully decorated parlors easily accommodated the people who at once plunged into an animated discussion of matters pertaining to the proposed show in April. The resulting decision called for a show in the week after Easter, probably April 23-26, and a good list of premiums was arranged.

Propagation of Dahlias and Phloxes.

Few plants are as popular at present as the dahlia and the phlox. The propagation of both is very simple, more so than with a great many other plants, and anyone having a few feet of bench space to spare will do well to get a few roots of dahlias of the best leading varieties and plant same at once, in a temperature of 55°-60° at night. I recommend a bench for this purpose because it is such a temptation to put them under a bench on a shelf where nothing would do well.

Full sunshine is none too good if the best results are to be expected and, as they are of a rather succulent nature, they require all the light they can get. The bench on which they are planted should be deep enough to allow them enough soil to feed on, they being great feeders; five inches deep does very well, with good drainage so that no water stands around them for any length of time, and any good soil made quite sandy suits them. No fertilizer need be used to start with, but after they have been growing a while some feeding in a liquid form is very beneficial. Do not cover very deeply; just enough to keep the crowns moist. Give a good watering first, then water very sparingly till growth starts, and in 20 days, or less with some varieties, there will be plenty of cuttings.

These should be taken rather short and often, two or three times a week if necessary, rather than let them go too long as they will get hollow. There is quite a difference of opinion as to how the cuttings should be taken. Some advocate taking a chip off the bulb along with the cutting to make sure of its rooting, and if taken any other way they have a tendency to produce bulbs which will not send up eyes, or will be blind as it were. We find that by taking them at a joint just above the crown, so as to not entirely destroy the eyes, and make them with a good heel, nearly all of them root, and none of them come blind. Taking them this way they keep coming and it is surprising how many can be got from a few bulbs. While I believe the former method to be a good one where only a few plants are needed, I believe it would be a complete failure where many thousands are needed because naturally the best part of the tuber would be cut away. When in the sand they only need to be kept warm, 65° to 70° bottom with 58° to 63° overhead, or about the same as is used for most soft stock. The cuttings as a rule root very freely but occasionally there may be one that is a little troublesome; still they will all root if given time.

Hardy phlox can be planted in about the same manner as dahlias at this time of the year except that they require a much cooler house. The carnation house is perhaps as good as could be had. They should be watered rather sparingly as they grow very fast, and, as soon as the cuttings have made a good strong growth, they can be cut with a heel like salvias or dahlias and put in the cutting bench with the carnation cuttings. It is not a good plan to plant phlox in the same place twice unless the same variety is used, as they reproduce themselves from roots left in the ground.

To Illinois Florists and Neighbors.

The Illinois State Florists' Association will convene in their third annual convention in the city of Springfield, February 18-19. The local florists' club is making great preparation to entertain its guests and to make their convention one of the best that has ever been held. It particularly requests a good exhibition and calls on all who have anything of merit to bring it here and put it on exhibition; if you cannot come personally send it and it will be taken care of.

The public will be invited to visit the exhibition on Tuesday and it is expected an unusually large number of the citizens of the capital city and surrounding towns will take advantage of it. These open and free exhibitions are good features as they bring before the public the newer varieties of flowers, etc., and cause a demand for them, and also educate the people to a higher appreciation of the florist's art. It is also good for the florist who is not able to visit the many establishments and see the newer varieties growing, and from this viewpoint, as an educational feature, our association laid its plans wisely, when it decided that, at its annual conventions, there should always be an exhibition.

Let me urge upon all who possibly can to attend our convention—whether members or not all will be welcome. Our association stands for Illinois as our national society stands for the United States and through its combined efforts in legislature and other ways can do more to advance the cause of floriculture than anything I know. We shall be pleased to welcome and do cordially invite delegates from other state florist societies and florists' clubs to be with us and participate in the work of our society.

It will give me great pleasure to answer any correspondence in regard to our association and its work, and any of our sister societies who anticipate being with us will kindly let us know. You may possibly learn something from us and we know we will be willing to learn from you. Our association, through its members, has done a noble work in gaining recognition from the state for floriculture and establishing an experiment station. This is only the beginning—better things are in store for us.

The association is full of practical, energetic and patriotic workers who are willing to give of their best for the advancement of our cause. The day is not far distant when we will see a practical course for florists at our university. Illinois is big enough, broad enough and rich enough, and it is for this association to work without ceasing, to attain that higher recognition to which we are entitled as a science and one of the "arts." The reports of our experiment stations will be of an interesting character—also our national show in which the state association will take an active part. Many things of interest will be presented for your consideration and I will say to you one and all, be with us.

ALBERT T. HEY, President.

W. N. Rudd supplements this letter as follows: "I believe this convention should be supported to the fullest possible extent and every effort should be made by President Kill of the Florists' Club and others to take down as large a number of Chicago growers in a body as possible."

A Burbanker.

A farmer who was up-to-date
In tones of glee once said:
"I shall not bank my celery.
I'll Bur-bank it instead."

You should have seen the crop he raised.
Most celery just stalks,
But his could run and leap and jump
About the garden walks.

Nor with it could a person find
The slightest bit of fault.
Among its well blanched leaves there grew
Salt cellars full of salt.

The farmer who was up-to-date
In tones of glee then said:
"I shall not bank my money now.
I'll Bur-bank it instead."

You should have seen what happened then.
With interest it grew.
You have to draw most money, but
His painted, sketched and drew.

He never had to raise it, for
It raised itself, you see.
It sprouted one fine pension and
A large annuity.

And so the farmer up-to-date
In tones of glee then said:
"When you desire to bank a thing,
Just Bur-bank it instead."

—HARPER'S for January.

36 N. 4th Street, St. Louis, Mo.

The Seed Trade.

American Seed Trade Association.

Geo. S. Green, Chicago, Pres.; M. H. Duryea, New York, First Vice-Pres.; C. E. Kendel, Cleveland, O., Sec'y and Treas. Twenty-sixth annual convention, June 23 to 25, at Hotel Ponchartrain, Detroit, Mich.

CHINESE GIANT PEPPER and New York Purple egg plant are very scarce items.

DETROIT is said to be a good port of entry for imported seeds, the valuations there seldom being excessive.

THE Louisville onion seed market has been cornered all winter but holders are said to be about sold out at this time.

ONION SETS where stored in large lots should be moving out by the carload soon to justify the present asking prices.

SASSENHEIM, HOLLAND.—The firm Krosschell & Hansen Co., bulb growers and nurserymen, will discontinue business.

CHICAGO.—The gardener who bought the twelve year old N. B. G. onion seed is reported to have given it a fitting burial. R. I. P.

ONION SETS at Chicago are quoted in the wholesale market as follows: Yellow and Red at $2.25 to $2.40 per bushel. White, $2.75 to $3.00 per bushel.

THE uniform asking contract prices for California onion seed of 1908 crop indicates that some at least are agreed, following their conference, to maintain approximate uniform prices.

WILL the seed trade support with liberal patronage growers who strive to maintain highest standards in types and seed? Some say no, that the tendency to scrutinize prices closely still remains.

THE exports of fertilizers to Germany, during the six months ending December, 1906, and 1907, were 111,928 tons, of the value of $1,106,883 and 172,347 tons of the value of $1,522,776 respectively, showing an advance of 60,319 tons, of the value of $415,293 for 1907.

VISITED CHICAGO: W. J. Sheap, Isbell Seed Co., Jackson, Md.; Albert Guttman, Manitowoc Seed Co., Manitowoc, Wis.; C. S. Kunz, Madsen Seed Co., Manitowoc, Wis.; Wm. Hagemann, New York; C. R. Kimberlin, Santa Clara, Calif.; A. J. Pieters, Hollister, Calif.

AFFIDAVITS are being secured, pro and con, in the Burpee-Dreer law suit and it will be interesting to learn later on what seedsmen in the U. S. believe it the custom of the trade to respect the name under which an introducer of a new variety baptizes it, and how many believe that such a custom is "more (dis)honored in the breach than in the observance."

TOLEDO, O.—Frank I. King says: "The Ohio legislature is considering a bill which may put the seedsmen out of the clover seed business. It is proposed to require all seedsmen to label clover to be either medium or mammoth. Toledo is the leading clover seed market of the world, and because of short crops for the last five years this seed has been imported from Chili, continental Europe, England and Canada. Who can tell whether it was medium or mammoth or a mixture of both? Seed Inspector Wallace, one of the best expert judges, says it is impossible after the seed has been recleaned to tell which class it belongs to. "Every dealer," says Mr. King, "should write to his representative in the general assembly to stop, look and listen before they pass such a law."

Braslan Seed Growers' Co.

Growers for the Wholesale Trade Only.

SAN JOSE, CAL.

Bermuda Onions.

So-called Bermuda onion bulbs will be a big crop this year; the estimate now is as follows:

Bermuda grown, 350,000 crates.

So. California (Coachulla), 150,000 crates.

Texas (at least), 500,000 crates.

The southern Texas Truck Growers' Association shipped 742 carloads last year, and expect to make it 1,000 cars this year. Shipments will begin in 60 days or less.

Holland Dutch in Chicago.

A notable gathering of Dutchmen (bulb tourists) drew their chairs to the supper table of the Bismarck hotel, Chicago, one night last week, led by the bearded bell-wether of the flock who represents the Veldhousen-Van Zanten Co. The commercial mentality end of the barbecue had something of a crow flavor, the experience meeting indicating that Chicago, like New York and other eastern cities, had been hard-hit financially in its buying attitude toward Dutch products. A small auxiliary of Belgians present were disposed to concur. "Westward Ho" was the only promised land, the only hopeful light which cast something of a sunset glow over the coffee cups, "illustrating the lasting verity of the triumph of hope over experience."

Teneriffe Onion Seed in Texas.

Since the return of Sales Manager Campbell from Teneriffe, where he contracted for the seed for 1909, the members have largely oversubscribed the amount allotted. Mr. Campbell says he can only deliver 66 per cent. of the crystal wax and 51 per cent. of the white seed ordered by growers. The members have placed orders for 6,852 pounds of white seed and 4,139 pounds of crystal wax. This leaves only a few pounds less than 11,000 pounds and no such amount was contracted. Mr. Campbell will pro rate the seed among all ordering and for the following year he will be able to get a larger supply if needed. It would be impossible for the man in Teneriffe to furnish the seed ordered by the growers from the next planting. This will force some buying from the regular seed dealers. It will also give an opportunity to compare the relative values of the seed furnished through Mr. Campbell and the regular dealers.—The Produce News.

Imports.

During the week ending February 1, imports were received at New York as follows:

McHutchison & Co., 42 cases plants.

Vaughan's Seed Store, one case plants; one box seed.

J. M. Thorburn & Co., 84 bags garden seed; one case bulbs.

Wm. Elliott & Sons, 65 bags grass seed.

Brown Bros. & Co., 45 pkgs. seed.

P. Henderson & Co., 15 bags, 35 pkgs. seed.

H. F. Darrow, 39 pkgs. seed; two pkgs. flower seed.

To others, 54 cases plants; 237 pkgs. plants; four cases flower roots; 24 bags flower seed; 1073 pkgs. seed; 18 cases seed; 1338 bags seed; 20 bbls. seed; 250 bags poppy seed; 180 bags alfalfa seed; 225 bags clover seed.

Sweet Peas for Market.

The question frequently being asked is "Which are the most useful to grow for market?" and I must confess that it is difficult to give a satisfactory answer; this is emphasized by the fact that at the last show of the National Sweet Pea Society there were 205 varieties shown, and this did not include all the new varieties offered for the season, of which there are upwards of 70, yet out of all the new sorts added, there are very few which are likely to displace some of the older varieties for market purposes.

Taking the varieties noted in the market last season, Dorothy Eckford was undoubtedly the best white, but Nora Unwin may gain favor with some florists as the flowers have a more wavy appearance. Of rosy pink shades (which, by the way, the National Sweet Pea Society classes as orange, another error in color descriptions) Miss Willmott has been a great favorite; Helen Lewis may come to the front, but it does not appear to make such long flower stems as Miss Willmott. Evelyn Byatt may be worth a trial. Henry Eckford, which is the nearest to an orange color, is a beautiful pea, but will never make a profitable market variety. Of red shades, Salopian has proved to be one of the best, but King Edward, and Queen Alexandra, may prove to be more desirable. In the cream or yellow shades, Honorable Mrs. Kenyon has been largely grown, and last season it sold well; Dora Breadmore was also a favorite. In Mrs. Collier we have a variety which may prove a rival. In the mauve or lavender shades we have another color difficulty. A florist would hardly accept Mrs. W. Wright as a mauve, it may be a useful variety, but is too deep a color for mauve. Lady Grisel Hamilton is the accepted mauve of the market, and still remains one of the most popular sweet peas we have. Of the pink varieties (pale pink) it is difficult to say which is the best. I found last season that some salesmen were in favor of the best type of Countess Spencer, while others favored Gladys Unwin, and all the florists who saw Paradise, admired it, and it will certainly be worth a trial. Blues are not so much in demand; Navy Blue was seen in the market last season, but Lord Nelson may prove a better variety; Horace Wright is a fine deep blue. Of the darker shades of purple or maroon, Black Knight remains one of the best. In rosy red shades, George Herbert, or John Ingman should be grown.

For market work the striped, flaked, or any other undecided colors are of little use; the five best types are: Lady G. Hamilton, Miss Willmott, Honorable Mrs. E. Kenyon, Salopian and Dorothy Eckford; careful selections of these varieties are likely to hold their own for a long time. All growers should make a trial of some of the most promising of the new sorts, and price of seed should be no obstacle, for if they turn out useful, a good supply of seed may be saved for the next season, or perhaps some may be sold. Among the new varieties offered this season which should be worth a trial are: Sutton's Queen, Evelyn Hemus, St. George, Burpee's Primrose Spencer, Frank Dolby, Lady Althorp, Paradise Carmine, The Marquis

and James Grieve; others might be enumerated, but it would be of no use to give a long list.

In growing for market, long stems are of great importance, and are only obtained by giving them plenty of room, and deeply dug ground, which has been well manured the previous autumn. Good bunching and good packing are other important items. In cutting sweet peas, care should be taken that none that are far advanced are taken, one or two flowers that are too far advanced, if included in a bunch may spoil the sale of a whole box. I have seen various samples received to sell on commission where many of the blooms have been far past their best. It pays to take a little trouble when cutting or bunching. In the case of those with three flowers on a stem, the top one should be only half expanded when cut, and they will keep better for the next day's trade if cut early in the morning, the stems dipped into water, and packed and shut up in a close box. When cut in the afternoon after a hot sunny morning they wither quickly, and it is difficult to revive them. Always see that the empty boxes are kept in a cool place and are moist when used for packing, hot dry boxes will cause the flowers to wither quickly.—METROPOLITAN, in The Horticultural Advertiser (British).

Water Hyacinth a Pest.

The water hyacinth, which has closed to navigation many streams of Florida and Louisiana, has made its appearance in Texas and threatens to become a most injurious pest. It spreads with such rapidity that instances are known where a large and navigable stream has been choked up with the roots of the plant within two years after its first appearance. The federal government is said to have expended more than $200,000 last year in trying to eradicate or control the growth in the streams of Louisiana and Florida, but it is said that little was accomplished.

It is claimed that the spread of this pest is due to the carelessness of housewives who, admiring the beauty of the flower, obtained a few of the plants for domestic culture and then carelessly allowed them to spread to fresh water streams. This is known to have been the cause of the introduction of the plants into the Sabine river, which stream separates Texas from Louisiana. A woman at Orange, Tex., obtained a few specimens of the plant from Florida and after keeping them about the house for a time she grew tired of them and threw them into the river. From those first few plants the whole river above Orange now is choked with the tangled growth of hyacinth. Many of the water courses of Louisiana which formerly were used by boats to handle the lumber traffic of that region now are completely closed to navigation.

A few of the ornamental hyacinths placed in Sam Houston park in some manner got away from the artificial environment recently and made their appearance in the ship channel, commonly known as Buffalo bayou, which connects Houston with the Gulf of Mexico. The plants had gained considerable headway before they attracted the attention of those in authority. Energetic work has been going on ever since to bring about their destruction. It is doubted by those who have had experience with the plant if any means can be found which will bring about its complete extinction. Should it get beyond human control in the ship channel, which is Houston's only deep water outlet, the loss in business and trade of that port would be enormous. The next legislature of Texas will be called upon to pass a law prohibiting the growing of these plants near a navigable stream.

Gordan Van Tine Co., Davenport, Ia.

Gordon Van Tine Co., Davenport, Ia., issue a fine free millwork and building material catalogue which they offer to send to any one interested on application. Also a catalogue of gardeners' supplies, roofing and other specialties which the firm handles.

This great concern ships goods to every state in the union and guarantees safe delivery to the buyer's freight station. It makes prompt shipments because everything in brand new goods is carried in stock and the freight charges on this class of material are so small that it can ship anywhere and save the buyer half on his bill.

People everywhere are building their homes, painting their buildings and roofing their houses, barns and small buildings, and repairing their property, buying all of their supplies of this concern. None of Gordon, Van Tine Co.'s goods are sold through the dealer—they do a mail order business only—the biggest banks in America vouch for their absolute responsibility and their unfailing guarantee of satisfaction. Those contemplating building should get their prices before building or planning to build. Special seasonable items like gardeners' supplies, storm sash, screen doors, porch decorations and such things can be had of Gordon Van Tine Co. where ordinarily they have to be built to special order.

The St. Louis Seed Co., St. Louis, Mo.

The St. Louis Seed Co., which was originally the retail department of the long established Plant Seed Co., of St. Louis, Mo., has been for seven years a separate organization. St. Louis has needed a representative retail and mail order seed house, which this organization seems well organized to supply. A side line in their trade, and one which they are well adapted geographically to handle, is that of catering to the florists of the west and the southwest.

Wm. S. Nichol is general manager, trained in a good and reliable Ohio seed establishment; John A. Rau is secretary and store manager while Walter Retzer, the well known florist and graduate of the Missouri Botanic Gardens, is vice-president and in charge of the florist trade.

He has Been "Shown."

AMERICAN FLORIST CO.—I truly thank you for the splendid paper that you have been issuing for the past year. I enclose you $1 to make good for another. Wishing you all the success possible, and thanking you again for your good paper.

Very truly yours,
(Signed) W. T. LEAGUE.

Ends the growers' trouble; absolutely free from disease.

Alabama State Horticultural Society.

The fifth annual meeting of the Alabama State Horticultural Society will be held at Birmingham, Ala., February 13 and 14, 1908, at the rooms of the Commercial club. All persons interested in horticulture are cordially invited to attend. The following is the programme:

Opening exercises; address by President W. F. Heikes, Huntsville; "History of Fruit Growing in Alabama," Dr. P. J. Berckmans, Georgia; "Montgomery Flower Growers' Association," Mrs. W. A. Gayle, Montgomery; address by Prof. Samuel B. Green, president Minnesota Horticultural Society, St Paul; "School Improvement," Mrs. L. H. Craighead, Mobile; "Improving Our Country Homes," Dr. W. S. McCain, Livingston; "Relation of Horticulture to the Schools of the State," Prof. S. L. Chestnutt, Montevallo; "How to Reduce the Fertilizer Bill"—"Some Truths About Seeds," C. B. McVay, Birmingham; address by Hon. J. A. Wilkinson, Montgomery; "Results and Significance of the Plant Disease Survey in Alabama," Dr. E. Mead Wilcox, Auburn; "Laboratory Methods of Studying Plant Diseases," Prof. Stone, Auburn; "Cowpeas," Prof. H. O. Sargent, Hamilton; "How to Set Out a Young Orchard," Prof. E. F. Cauthern, Wetumpka; "Fertilizers," C. H. Billingsley, Montgomery; "Fruit Growing in the South," D. C. Turnipseed, Flora; "Notes," Herbert Chase, Huntsville; "Fruit Insects," Dr. W. E. Hinds, Auburn; "Notes on Fruit Growing in the West," M. C. Scott, Montgomery; "Fruit Soils," Prof. W. C. Smith, Montgomery; "Forestry," Hon. J. B. Powell, Montgomery; "Best Way to Sell Trees," A. G. Long, Andalusia; "Cantaloupe Culture," H. L. Trott, Montgomery; "Our Work at Lapine," C. W. Landers; "Home Fruit Growing," J. A. Kernodle, Camp Hill; "Notes," Prof. R. S. Mackintosh, Auburn. Reports of committees; business; reports of vice presidents. The programme may not be followed exactly as given above.

Auburn. R. S. MACKINTOSH, Sec'y.

Bulletins for Indiana Gardeners.

Three bulletins by the Indiana Horticultural Society for the use of its members and for free distribution have been issued in advance of the publication of the annual report, so that they may be in the hands of gardeners and fruit growers before the spring work begins.

Bulletin No. 3, entitled "Modern Methods in Growing Seed Potatoes," by J. D. Nysewander, Bridgeport, treats of the best up-to-date requisites belonging to seed potatoes and how to grow them.

Bulletin No. 4, by W. T. Blythe, of the weather bureau, treats of "Conditions Under Which Frosts Injure Vegetation and Means of Prevention."

Bulletin No. 5, by C. G. Woodbury, assistant horticulturist at Purdue Experiment Station, Lafayette, on "Hotbed Cantaloupe and Watermelon Growing in Indiana."

These bulletins are mailed to all members of the society, and the surplus is for free distribution. W. B. Flick, secretary, room 11, State House, Indianapolis, will send these bulletins to those who write asking for them.

MARKET GARDENS.

SOUTH FLORIDA is shipping carloads of new tomatoes now.

JERSEY seed sweet potato growers are reported holding back their crop.

TEXAS will ship 800 cars early cabbage this year beginning about February 15.

NEW YORK.—Onion bulbs are selling about as follows: Yellows, $1.75; Reds, $2; Whites, $3, per bag.

GREENHOUSE grown vegetables at Chicago have never been so low in price for 20 years, choice greenhouse grown lettuce selling at 10 cents to 15 cents per case, the cases alone costing seven cents. This exceedingly low price on vegetables can hardly be attributed to financial conditions because it begun before the panic came upon us. Perhaps the mild winter weather is the most logical explanation.

Prospects for the Season.

Although vegetable forces have had probably the most unsatisfactory season on record, as regards markets, they should not get discouraged at this stage of the game. The next three or four months will certainly be better, and May might turn out to be a good "home-run." I hear some growers say: "I am going to hunt 15,000 to 25,000 2-inch geraniums and use my space to better advantage." Now this is a wrong idea; to jump into an unprepared market that way is often disastrous; more often so than otherwise. As a rule, our markets have been fairly well supplied with bedding plants, and to turn any great amount of glass into another line is risky.

Very often April and May are the best months for lettuce. The south ceases to be a factor, the demand is increased by the smiling spring sun—everybody wants something green—and the chances are excellent that the regular line will pay best if adhered to. Better figure out how to time crops to best advantage and how to follow with a succeeding crop so no space is vacant.

Bear in mind that head lettuce generally is a failure indoors after April 15 in the middle states, and May 1 in the north. The same with radishes. In other words, whenever the temperature goes considerably beyond the normal, these crops should be through. A little planning now will avoid such loss. Grand Rapids lettuce is good for a longer period, as it will stand much heat. When replanting, remember it requires plant food in plenty under glass; if no old fine manure to top dress is at hand, use pulverized sheep or cattle manure and bone meal or, better, bone flour—proportion, three parts manure to one part bone. MARKETMAN.

Prices of Indoor Vegetables.

The prices of indoor vegetables at leading points February 1 were as follows: New York, cucumbers, No. 1, $1 to $1.37 per dozen; No. 2, $2.50 to $4 per box; lettuce, 25 cents to 75 cents per dozen; mushrooms, 15 cents to 45 cents per pound; mint, 50 cents to 65 cents per dozen bunches; radishes, $2 to $2.50 per 100 bunches; rhubarb, 40 cents to 60 cents per dozen bunches; tomatoes, 10 cents to 25 cents per pound. Chicago, radishes, 20 cents to 30 cents per dozen bunches; mushrooms, 20 cents to 50 cents per pound; Cincinnati, cucumbers, $1.25 to $1.50 per dozen. Boston, tomatoes, 15 cents to 20 cents per pound. St. Louis, cucumbers, $1 to $1.25 per dozen.

Fertilizer for Mushrooms.

ED. AMERICAN FLORIST:—

What is the best chemical fertilizer for mushrooms after the beds have borne a good crop for several months?

No chemical fertilizer we ever used gave such good results as salt and good Peruvian guano. An ounce of salt to the square yard of bed surface, followed in a week by a similar amount of guano we have proved an excellent stimulant. It should be frequently repeated rather than given in stronger doses.

G.

SPOKANE, WASH.—Fire destroyed the Lidgerwood greenhouse, owned by George T. Crane, January 20. The loss is estimated at $9,000 and only $2,000 insurance is carried. The origin of the fire is a mystery.

The Nursery Trade

American Association of Nurserymen.
J. W. Hill, Des Moines, Ia., President; C. M Hobbs, Bridgeport. Ind., Vice-President; George C Seager, Rochester, N. Y., Sec'y.
Thirty-third annual convention to be held at Milwaukee, Wis., June, 1908.

Non-Guarantee of Stock.

The following nurseryman's non-guarantee is used by the P. J. Berckmans Co., of Augusta, Ga. We do not remember to have seen it used by other nurserymen on their invoices.

We exercise the greatest care to keep our varieties pure and true to name, and we hold ourselves in readiness at all times to replace on proper proof, all stock that may prove otherwise, or refund the amount paid; but it is mutually agreed between the purchaser and ourselves that we shall not at any time be liable for any amount greater than the original price paid for trees. We also disclaim any responsibility for failure arising from defective planting, or from subsequent faulty treatment or cultivation If goods are not accepted upon these conditions, they must be returned and money will be refunded.

Important to Illinios Nurserymen.

S. A. Forbes, state entomologist, announces a practical course of instruction with regard to San Jose scale and methods of fumigating nursery stock at the Entomology building, Urbana, February 10-21. The instruction is free to any Illinois nurseryman, his foreman or employe, the only expense being railroad fare to Urbana and board there. Those intending to take the course should come prepared to spend four to six days. Weather permitting, demonstrations of the lime-sulphur wash will be given. Nurserymen who are required to fumigate and do not receive this course will not be permitted to fumigate for themselves and their stock must be fumigated under the superintendence of an assistant from the state entomologist's office, at a cost covering the traveling and living expenses of the inspector for the time required for the trip and his salary for the same time at $3 per day.

American Gooseberries in Sweden.

According to a special cable to the Chicago Daily News dated January 31, the Swedish academy of agriculture has petitioned the government to grant a general permission for the free importation of American gooseberry plants, those in Sweden having been killed by a local disease. The matter was investigated by Chief Gardener Dahl, who went to America in 1907, and the petition is the result of the report made by him.

VAUGHAN'S SEED STORE,

14 Barclay St., NEW YORK. 84 and 86 Randolph St. 206-208 W. Randolph St. **CHICAGO.**

EXPOSE all scions as much as possible should a period of warmer weather ensue and take every precaution to keep them dormant.

THERE was a falling off in the value of fruits and nuts exported from this country to Germany in 1907 of $57,853, the figures being respectively $318,596 and $260,743.

DELPHOS, N. M.—B. L. Adams, proprietor of the Bonham Nursery, Bonham, Tex., has started a nursery here and intends to grow peaches, pecans, walnuts and apples largely and plant at least 40 acres this year.

PHILADELPHIA, PA.—Wm. H. Logan, of Carrol township, near York, has sued the Pennsylvania Telephone Co. for $1,200 damage to his fruit and shade trees, said to be caused by the company's linemen when trimming the latter.

HOLYOKE, MASS.—The report of Olmsted Bros., of Brookline, has been received and is very favorable. Besides the opportunity for generating a large amount of water power the landscape possibilities of this city are great, so the report says.

FULLERTON, CALIF.—The Orange County Nursery Co., capital $50,000, E. S. Richman, president, T. J. Robertson, manager and N. J. Laufman, secretary, is doing a good business here in general nursery stock suitable for the coast of the southwest.

SPRINGFIELD, MASS.—Mrs. Augusta R. Pinney read a paper on "Plants and Their Environments" at the meeting of the Botanical Society at the Science building January 17. She showed specimens and detailed experiments that she had made proving the adaptability of plants to variations in soil, climate, light and heat. A vote of thanks was given Nathan D. Bill for what he had done to help along the lecture by State Forester Rane. Miss Minnie Donaldson was voted into membership. Notice was given of the meeting of the New England Natural History Society at Mt. Washington, in July. Plans were discussed for the coming season, including the systematic identification by members of the local society of all trees in this vicinity.

WINONA The True Pink Carnation for 1908.

A Color that Attracts Attention. Once Seen, Always Wanted.

Comes nearest to Fiancee, but is a different type flower. **Never Bursts—Every Calyx Perfect.** Good, shapely, active growth. Blooms early and in quantity. A grand commercial variety. Give it a trial and compare the returns. We have a large stock, clean and healthy. Will guarantee every cutting to be first class. Order now for early delivery. **Price: $12.00 per 100; $100.00 per 1000.** Larger lots, prices on application. With our additional glass we have more than doubled our stock of Carnation Plants, and can fill orders for rooted cuttings to even better satisfaction than in past years.

JOHN L. WYLAND, DeHaven, Pa

Los Angeles, Calif.

The stockholders of the Southern California Horticultural Society were called together recently at the Chamber of Commerce building, the object of the meeting being to chip in and make up the deficit that the society has got into by trying to run flower shows and vaudeville.

C. E. Morton, of Chicago, is the new manager for the Redondo Floral Co., succeeding Harry Friend; the latter is now managing the flower store in the Broadway department store.

Fine violets (Princess) are selling in some of the stores at five cents per bunch, 50 to 60 in a bunch. Wouldn't that jar you?

J. W. Wolfskill met with a painful accident dislocating his shoulder. The last report was favorable to a good recovery.

Pasadena, Calif.

We are quite busy these days and working hard on our third annual flower show, which is to be held April 2-4. The committee appointed on arrangement and detail consists of: Robert Pegg; Robt. J. Kroll; Richard Thomas; Geo. F. Nilsson; G. A. Sawyer; Otto Hutchey; P. W. Jannock; A. T. Hansen; J. McGilvray, and John Blake. Already a large number of growers have applied for space and the gardeners in general are giving extra care to their plants, in order to have ready for the exhibition the grandest and rarest collection of flowers and plants ever exhibited in southern California.

The Gardener's Association meets at the board of trade, 43 W. Colorado street, and the secretary is R. Mackinzie.

R. J. K.

SAN FRANCISCO, CAL.—Wm. Kent, of Chicago, has deeded to the government a tract of land of 295 acres of natural redwood forest in the southern slope of Mount Tamalpais, about six miles from this city. It is the intention to name the national monument Muir Woods, after John Muir, the noted naturalist.

PORTLAND, ORE.—A committee representing the Rose Carnival Association, met with the park board at a special meeting this morning to consider the proposition of planting roses in the city park blocks as an added attraction for the visitors who are expected in the city during the rose carnival next June. As a result of the conference the board decided to plant large massed beds of roses in three of the park blocks as an experiment. If the plan proves a success all of the park blocks will be adorned in the same manner. The proposal of the carnival committee to plant roses entirely surrounding the park block met with a blank refusal from the park board.

LLOYD Will Not Disappoint You.

The only ever blooming **White Carnation** in existence. It is the bread and butter white of the future. Size and stem of Enchantress, with the freedom of McGowen. Easy Rooted. Excellent keeper and shipper. Best seller of any carnation on the market.

H. A. JAHN, New Bedford, Mass.

NEW CARNATION

PRESIDENT SEELYE

The Unexcelled White

A Seedling from Mrs. T. W. Lawson and The Queen, now in its fourth year.

A large well-formed flower, long stemmed from the start; fragrant and productive; easy to grow; calyx does not split, and will do the best in a temperature of 50° to 52°

A money maker for the wholesaler and excellent for the small retail florist who grows but a few hundred of each kind.

The trade is invited to visit the greenhouses and see it growing. Every cutting guaranteed well rooted and free from disease. **$10.00** per **100**; **$75.00** per **1000**.

P. O. Box 29, **MINNEAPOLIS, MINN.**

NEW CARNATION **DEFIANCE** BRILLIANT SCARLET

There are Seven Reasons why you Should Grow Defiance,—and they are:

1st. **It is by far the best color** seen in a scarlet carnation; it is the true velvety scarlet and not red; it will average three inches in diameter throughout the season.

2nd. **It is unexcelled for productiveness** by any carnation in commerce to-day

3rd. **It is a clean and upright grower,** producing an abundance of high grade flowers without any special treatment.

4th. **It is in perfect health,** and not subject to rust or any other disease which is very prevalent amongst other carnations to-day.

5th. **It is of perfect form.** Blooms are very symmetrical: center nicely built up and very full, but not so as to appear crowded; stems are very stiff and wiry, holding the flowers perfectly erect.

6th. **It is a scarlet for the entire season,** and can be had in crop in October, continuing through the entire season. It does not lose its color in bright sunlight—in fact, it improves under a bright sun when other reds fade.

7th. **It is the only scarlet to-day,** and by growing **Defiance** you will be satisfied it has no faults, it is full of vigor and will do the work when other scarlets fail.

Strong well-rooted cuttings, every one guaranteed, **$12.00** per **100; $100.00** per **1000.** Usual discount on large orders. January delivery as yet.

Jensen & Dekema, 674 W. Foster Ave., Chicago. **W. N. Rudd,** Morgan Park Ill.

Toronto.

BUSINESS SLOW.

Real winter weather with the glass showing 14° below and any amount of snow is not helping the retailer any and as there has been a decided falling off in large social functions with little funeral work, there is not much to crow about. Roses, carnations and all stock are more plentiful than it has been all winter and prices are consequently easing considerably. Bulbous stock predominates and all the windows about town are showing daffodils galore with prices as low as 25 cents per dozen. Carnations in all the leading fancy varieties are plentiful. The very best bulbous stock is also plentiful, while of orchids there are not enough to fill orders.

NOTES.

At the last meeting of the Ontario Horticultural Society a committee on the nomenclature of plants was appointed: Prof. W. Hunt of the Agricultural College, Guelph; J. Cavers, Oakville; W. T. Macoun of the Central Experimental Farm, and H. B. Cowan, Toronto. The object of the committee is to correct as many mistakes as possible in the names and descriptions of plants in common usage and they hope to present to the association at its next meeting lists of the best varieties of some of the more popular kinds of plants correctly named and described.

The position for park commissioner is being sought for by a large number of persons, some with experience but mostly without. At the Gardeners' and Florists' meeting it was recommended that the vacancy be filled by Assistant Chas. Chambers.

SHIPPENSBURG FLORAL CO. Shippensburg, Pa

ALWAYS IN DEMAND.

Araucaria Robusta Compacta and Excelsa Glauca.

The lion of the Araucaria family, as big as a Christmas tree, perfect jewels in shape and color, about the same in width as in height. Specimen plants, 6 to 7-in. pots, 6 years old, 4-5 tiers, 28, 30, 35, 40 in. high, worth a ten dollar bill, only $3.00; 6-in. pots, 6 years old, 4, 5, 6 tiers, about 25 to 28 in. high, $2.50; 6-in. pots, 5 years old, 3, 4, 5 tiers, 20 to 25 in. high, $2.00; 6-in. pots, 5 years old, 3-4 tiers, 18 to 20 in. high, $1.50 to $1 75; 6-in. pots, a trifle smaller, 3-4 tiers; Glauca only (no Compacta), $1.25.

Araucaria Excelsa, 6 years old, 6 to 7 in. pots, 5-6 tiers, 25-30 in. high, $1.50; 6-in. pots, 5 years old, 5 tiers, 22-25 in. high, $1.00 and $1.25; 6-in. pots, 4 to 5 years old, 4-5 tiers, 20-22 in. high, 75c; 5¼-in. pots, 2 years old, 2-3 tiers, stocky little plants, 6-7-8 in. high, 40c. Sold out of 50-60c sizes.

Kentia Belmoreana and **Forsteriana,** Belgium and home-grown stock, 4-in. pots, 18 to 20 in. high, 35c; 5¼, 5½ and 6 in. pots, bushy plants, 50c, 60c and 75c each.

Asparagus Plumosus Nanus Compacta, 4-in. pots, $10.00 per 100.

Dracena Bruanti, from Belgium, full of green foliage from bottom to top, 6-in. pots, 22 to 25 in. high, 40c each

Begonia Improved Erfordii, 4-in. pots, very large, $2.00 per doz.; 5¼-in., in bloom and bud, 25c each, or $3.00 per doz. **Begonia Gracilis,** dark red, in bloom, 5¼-in. pots, 25c.

Cineraria Hyb., 4-in. pots, fast strain, $10.00 per 100; 5-in., $2.00 per doz.

Cyclamen Grandiflora, 4-in., in bud and bloom, 20c.

Ficus Elastica or **Rubber Plant,** home grown and Belgium stock, 5, 5½, 6 and 7 in. pots, 30c, 35c, 50c, 60c and 75c each.

☞ Now is the time to force **Hydrangea Otaksa** for Easter blooming. Remember only pot-grown will force successfully for Easter. We raise ours in pots outside in cold frames during summer. Can spare of these about 500 plants from 6 to 7-in. pots. Price, 25c, 35c, 50c and 75c each.

Cocos Weddelliana (Palm), 3-in. pots, 12-15-18 in. high, 15c to 18c each.

Azaleas, red and variegated, in bloom, 75c.

Azalea Indica for Easter blooming. Have an immense stock grown for us in Ghent, Belgium, by an expert in azaleas. Have only leading varieties, such as Mme. Van der Cruyssen (2,500 alone, all shapely plants, full of buds), Simon Mardner, Vervæneana, Bernard Andreas Alba, Apollo, Niobe, Deutsche Perle, Prof. Wolters, Empress of India, and others; 6-in. pots, 50c; 6-7 in. pots, 60c, 75c, $1.00, $1.25, $1.50, $2.00 to $2.50 each.

Latania Borbonica, 4-in. pots, about 18 to 20 in. high, 25c each.

Choice Nephrolepis, all pot-grown.

A middle bench full of choice **Whitmani Ferns** in splendid shape, 7-in. pots, bigger than 8 in., made up in July (three plants in pot), now big as a bushel basket, worth $3.00, and are beauties, cut down to $1.50 and $1.25 per pot; 6-in. pots, very handsome, 75c to $1.00 eacF.

Boston Ferns, 8-in. pots, made up, very bushy, as big as a wash-tub, worth $3.00, only $1.25 to $1.50; 7-in pots, as big as a bushel basket, worth $2.00, price 75c to $1.00; 6-in. pots, very large, only 50c; 5-5½-in. pots, 30c, 35c and 40c.

Scottii Ferns, 7-in. pots, very large, $1 00 to $1.25; 6-in. pots, 50c, 60c and 75c.

Piersoni Ferns, 6-in., good, 50c; 5-5½-in. 30c, 35c and 40c; 4-in. pots, 25c.

Please mention if in or out of pots. All goods must travel at purchaser's risk. Cash with order, please

TRADE FAIR.

The most important feature last week was the sudden change in the weather, which sent the growers hustling to the boilers which have not been to very much of a strain so far this winter. The bright sunshine of the last few weeks has put all kinds of stock in tip top condition, much better than the average for this time of the year. Trade in most stores was not as good, last week, as expected but the cold weather has made a different showing and preparations are being made for a good St. Valentine Day trade. Roses are fairly plentiful and prices keep up well, the demand being mostly for light stock. American Beauty seems to be losing in productiveness. Carnations are in good demand and the quality is worthy of some note. Bulb stock appears to be finding little or no sale. Violets are good and the supply is adequate to meet the demand. Funeral work keeps a large number of lilies moving. Greens are as scarce as usual.

NOTES.

Every indication of neatness and good management prevails at A. F. Barbe's Elmwood place. At present Mr. Barbe is supplying a general line of stock, the most of which is consumed by the cemetery trade, in his own store. Some splendid stalks of white snapdragon measuring 30 inches and with eight to ten flowers are among the good things seen at his place. He has just finished cutting the best crop of poinsettias grown in this locality.

The Peterson Floral Co. is now settled in the new quarters on West Tenth street. Miss Peterson thinks the new location a great improvement over the old one on West Ninth street, which has been left behind in the growth of the city.

Raymond Blessing of the Wm. L. Rock Flower Co., is out again after a week's sickness.

Visitors: B. Eschner, of M. Rice and Co., Philadelphia, Pa.; Wm. Hageman, New York; E. S. Truitt, Chanute, Kans.; Geo. B. Weigand, Indianapolis, Ind.; Martin Reukauf, Philadelphia, Pa.; A. C. Canfield, Springfield, Ill.; James Hayes, Topeka, Kans.; C. W. Scott, of Vaughan's Seed Store, Chicago.

NEW ROSE

MY MARYLAND

Best Up-to-Date Commercial Rose.

Read what others have to say about it:

Among the many new roses of the year; there is none which has impressed us more as being worthy of a thorough trial. It has been exhibited only as No. 294; being a seedling raised by John Cook, of Baltimore. A beautiful rose with an exqusite fragrance. In color, it may be described as a soft salmon pink, which brightens up beautifully as the bud opens. We are intending to plant this rose in quantity. A. N. PIERSON, Cromwell, Conn.

In reply to your inquiry what we think of your new Rose My Maryland. We would say that after seeing others, we still believe that you have the Best New Rose of modern times. GUDE BROS., Washington, D. C.

PRICES: 2 and 2 1-2-inch pots, $25.00 per 100; $200.00 per 1000; 3-inch pots, $5.00 per dozen.

JOHN COOK, 318 N. Charles Street, BALTIMORE, - MD.

To Be Done Now.

IN THE GREENHOUSES.

Wake up the mignonette with a little fertilizer if it seems to be shy in growth or flowering.

Begin to increase the temperature slightly for roses in pots that are to be in flower for Easter.

Repot autumn struck fuchsias and insert more cuttings if they are likely to be needed.

Where old benches of maidenhair ferns were cut back in fall and are now making a good growth a little feeding is in order.

A good application of bonemeal will be of great assistance to the roses that are making rapid growth.

Watch the carnations that are being fed and if any show signs of yellowing at the points cease feeding at once.

Keep well in front of the rose disbudding and do not allow the force of the plants to be wasted in forming useless shoots.

Keep the flowers picked off alternantheras or few growth shoots for cuttings will be produced.

Give the young beds of smilax a little liberty, to gain strength, before the strings are put on.

IN THE STORE.

Take all damaged ferns back to the greenhouses and let them be livened up a little.

A fine wreath recently noted was made with Sunrise roses and Asparagus Sprengeri, over white carnations.

Newspapers soaked for two weeks in water make excellent packing material for long-distance shipments of flowers.

Nothing is worse for the lasting qualities of flowers than being left about after cutting before being placed in water.

Killarney is one of the few roses that improve in color as they open.

Keep azaleas very cool and moist or the flowers will soon drop.

TAUSENDSCHON.

or in English, **THOUSAND BEAUTIES,** is the sensational new Climbing Rose of the year. Every florist should have it. Is not excelled for forcing purposes and for general planting by any Climbing Rose now known, **not even barring Crimson Rambler.** This is the coming forcing Rose. Get your stock early. It is beautifully illustrated in ten colors and gold in **Our New Guide to Rose Culture,** for 1908 the Leading Rose Catalogue of America. Copy **free** for the asking.

Strong plants of Tausendschon from 3-in. pots, 10 for $2.00; $15.00 per 100; $125.00 per 1000.

Single Hyacinths, all the leading named varieties King of the Blues, Czar Peter, Norma, etc., $3.00 per 100.

Single Hyacinths, all colors mixed, $2.00 per 100.

Double Named Hyancinths, Goethe, Lord Raglan, Pure d'Or, Blolksbergeb, etc., $3 00 per 100.

Crocus, Named Varieties, $3.00 per 1000; Mixed Yellow, Mixed Purple and Blue, $2.50 per 1000.

Narcissus, Paper White Grandiflora, $1.00 per 100; $8.00 per 1000.

Dahlias, all the leading varieties $45.00 to $50.00 per 1000. Send for list.

Cannas, all the leading varieties $10.00 per 1000 and upwards. Ask for list.

Rex Begonias, the largest and cleanest stock in the country, $5.00 per 100; $45.00 per 1000.

The Dingee & Conard Co., West Grove, Pa.

Mention the American Florist when writing

OUTDOORS.

All shrubs that commence to grow early should be planted as soon as possible after the frost goes out of the soil.

Finish up all pruning of hydrangeas as soon as possible. H. Hortensia and others that flower at the point of last season's growth must not, of course, be pruned now.

Look over all fall planted trees and if staking or tying is necessary attend to it at once.

Burning the top soil of any foul land helps kill many perennial weeds.

See that there are no woodbine or similar weeds around the roots of newly planted fruit bushes or they will lead to much trouble later.

As the bulb flats are emptied repair any that need it and store them away for next season's use.

NEW ROSE

MRS. JARDINE

Has All the Good Qualities, and

IS A MONEY MAKER

Easy to grow. Large flower; free bloomer; fragrant. It has already been awarded many honors — a silver medal from the Massachusetts Horticultural Society, a silver medal from the Pennsylvania Horticultural Society, and numerous certificates. It has also stood the best test that any novelty could possibly have, in receiving the highest honors of the Awards Committee of the New York Florists' Club, after their exhaustive examination of the growing plants in December; they having unanimously awarded **Mrs. Jardine** the club certificate, with a score of 92 points.

Our young stock is in superb condition, and all orders will be filled in strict rotation on and after March 15th, from 2 1-2 inch pots, $6.00 per dozen; $30.00 per 100; $250.00 per 1000; $1,125.00 per 5,000. Grafted plants on Dickson's Manetti Stocks, $5.00 per 100 additional. Send orders to

ROBERT SCOTT & SON, Sharon Hill, Pa. OR **WILLIAM P. CRAIG,** 1305 Filbert St., Philadelphia, Pa.

Baltimore.

GOOD STOCK SCARCE.

We have been brought up with a short turn in our dream of a wintery winter, and the past week has seen a change to arctic severity, with ice, snow and winds which qualify it to serve as an example of what our climate can do in the way of sudden and marvelous transformations. A blinding snowstorm one night, followed by a fierce windstorm, and this by zero temperatures, made an experience which is not met every year in this section. The effect on cut flowers has been very unfavorable, naturally, and it has been hard to fill orders which required good stock. Business would have shown considerable animation had the stock been obtainable to meet requirements, several large funerals making heavy drafts for good flowers, while a number of weddings added to the demands.

NOTES.

The new rose raised by John Cook, which has received the name of My Maryland, continues to attract much interest by its floriferousness, soft color and delicious fragrance, and the stock is being ordered from far and near. This rose was described several months ago in the AMERICAN FLORIST, and some of the profession here are outspoken in their belief that this veteran rosarian has capped his long experience as a hybridizer in this latest product of his skill and patience.

Quite a number of the trade from this city attended the carnation convention in Washington, and it was a matter of some exultation that when the society paid its respects to President Roosevelt the flowers which were required were drawn from this market. S. B.

STERLING, ILL.—The Sterling Floral Co. has decided to call its new carnation Sterling, instead of The Sport, as previously announced.

POEHLMANN BROS. CO., Morton Grove, Ill.

HOLBROOK, MASS.—C. L. Pierce is cutting from a full crop of fine early cucumbers.

PITTSBURG, PA.—An involuntary petition in bankruptcy was filed in the United States district court January 27, against Lincoln I. Neff, of 218 Sixth street. He resides at Springdale. The claims of the three petitioning creditors amount to $4,100.

NEW YORK.—Among the passengers who sailed on the Royal Mail Steam Packet Co.'s liner Magdelena for Colon, January 25, was R. S. Williams, assistant curator of the Botanical Gardens, who goes to the isthmus to collect dried specimens and rare plants for the Botanical Gardens. He said it was the first time since 1859 that any attempt had been made from this country, to get specimens of the fauna and flora of that region. On arrival at Colon he intended to take train for Panama and charter a small coasting schooner to go northward along the coast and make excursions at various points into the interior. He said he hoped to get some rare orchids. He will return in May.

Cash with order.

EDWARD TATRO,
401 East Iron Ave., SALINA, KAS.

Lexington, Ky.

In the blue grass region, famed for belles, beauty, Bourbon and race horses, may be found the model retail store of the west, Honaker's. Here is a salesroom equipped in the most complete manner with elegant furnishings, display refrigerator and the latest model convenient appliances. It is well worth a long trip to visit this retail salesroom, as complete as ingenuity and money can make it. D. B. Honaker is in charge of the store, while his brother, Ollie Honaker, manages the greenhouses. Messrs. Evans and Brothers, the former recently from Duluth, the latter from Peoria, are able assistants, the former bringing with him a young wife from the cold regions of the north. Wm. Cole is rose grower coming from the Brown establishment at Richmond, Va.

Wilson Tiplady, well known among the private gardeners about Chicago, is now at J. B. Haggin's Elmendorf estate.

Keller Bros., who succeeded John A. Keller, will rebuild their plant this summer.

J. B. O'Neil, of Vaughan's Seed Store, Chicago and New York, was a visitor last week.

Michler Bros. report a good demand for outdoor grown stock.

Des Moines, Ia.

Business the past week has been brisk in all lines, especially the funeral trade.

Guthrie-Lorenz Co. will open a store at 420 Sixth avenue February 6 with a full line of cut flowers, seeds, plants and poultry supplies. Under the management of Mr. Guthrie, who has been with the Iowa Seed Co. for the past 15 years, we predict a success for this new firm. Frank Stevens, formerly with the Alpha Floral Co., will have charge of the cut flower department.

J. T. D. Fulmer, at present the florist for the parks of the city, and one who has been in the florist business for a good many years, has been seriously ill with pneumonia, but is on the road to recovery.

New Violet Boston.

The people today are looking for New Violets just as much as they are for new roses or carnations.

The Boston Violet For the past two years has been before the most sceptical buyers in America, and they prefer it to any other.

There's a Reason The Boston Violet is the largest, the most fragrant, it has a pleasing color, and it is a great keeper.

The Boston Violet Is a variety that is easily grown; it is the strongest grower and is in crop from September to May.

The Boston Violet Was awarded a First Class Certificate of Merit by the Massachusetts Horticultural Society and a Report of Superior Merit by the Gardeners' and Florists' Club of Boston.

Distribution will commence in April.

Prices: $2.00 per doz.; $12.00 per 100; $100.00 per 1000.

WILLIAM SIM,

Cliftondale, Mass.

To Improve National Forest Ranges.

The government has planned a series of scientific reseeding experiments on several of the national forest ranges next spring and summer, to determine under what conditions and in what manner those portions of the range which have been seriously damaged by overgrazing may be restored to their former productiveness.

A great deal of the range land in the west is overgrazed and does not carry as much stock as formerly. The method of handling stock, particularly sheep, is, perhaps, more responsible for this condition than any other cause. But all causes of deterioration and all means for improving the forage crop need to be studied, that the range may be brought into the best condition to meet the imperative demand of the live stock industry.

The plan is to establish experimental stations in several parts of the country. Probably not more than six will be tried at first, but they will be so located as to secure typical conditions. The experiments will be begun on a small scale, on five or six-acre tracts. Both native and wild grasses will be tried, but it is believed that the plan of encouraging native grasses will meet with greater success than the introduction of cultivated species, at least in the Rocky Mountain region. In the coast ranges, with their greater rainfall, cultivated grasses are more likely to play an important part in range development.

The ranges of the northwest have not been so seriously damaged by overgrazing as those of the southwest, perhaps because of superior moisture conditions of the northern part of the country. It is a fact, however, that none of the ranges support the stock which they did formerly, and reseeding experiments will, therefore, be undertaken in this section of the country also.

Ten-Week Stocks.

ED. AMERICAN FLORIST:—

Does the term "Ten-Week Stocks" mean that these plants will flower in 10 weeks from the time the seed is sown? C. U.

Doubtless this was how this class of stock came to be so named. They usually flower in about three months under the best culture. G.

Chrysanthemum Novelties

NEWS NOTES.

MOBILE, ALA.—Mardi Gras will be celebrated here March 1-3.

NORFOLK, NEB.—L. Buckendorf says he is doing a good business this season.

FALLS CITY, NEB.—Simanton & Pence, report business good, last year being their banner year. They contemplate doubling their glass this season.

SALT LAKE CITY, UTAH.—The Board of Park Commissioners will send to the city council for approval the names of Henry F. Heath, as parkkeeper, and A. M. Holter, as assistant florist.

ST. JOHNBURG, VT.—John T. Borland, a clever gardener and horticulturist, died at his home January 20, from diabetes. He was a native of Dundonald, Scotland, and was 62 years of age.

BATTLE CREEK, MICH. As soon as the weather permits Burt & Coggan will enlarge their greenhouses near Oak Hill cemetery. It is the intention to double the present capacity of the greenhouses and make other improvements.

SANTA BARBARA, CAL.—The members of the executive committee of the Civic League, who have in charge the reception and floral display in honor of the arrival of the Atlantic fleet, perfected the naming of committees at a meeting held at the Potter hotel, January 16, at which time the committee members were guests of honor at a dinner of Milo M. Potter. The general scheme of decoration of the boulevard, the floral parade, floral ball, atheletic and aquatic sports and all other affairs of the three days' reception were outlined.

LINCOLN, NEB.—Chas. L. Saunders of Omaha was elected president of the State Horticultural Society January 22. Other officers elected were C. H. Green of Freemont, first vice president; J. B. Ream of Broken Bow, second vice-president: Peter Youngers of Geneva, treasurer; L. M. Russel, secretary. The following trustees were elected: W. G. Swan of University Place, J. A. Yager of York and J. Brown of Geneva. Scientific papers were read by L. O. Williams, F. E. Benny, E. F. Stephens, Dr. Charles E. Bessey and F. W. Taylor of Denver.

NEW HAVEN CONN.—At the regular meeting of the Horticultural Society Paul Bretschneider, gardener to Joseph Hubinger, exhibited some choice cut orchids and gave an excellent talk on the characteristics of these flowers and methods of growing them. He spoke of the orchid as being a splendid flower for amateurs to grow and told of the different varieties. At the end of his address the society voted Mr. Bretschneider thanks and a certificate of merit. The society meets the first and third Tuesday of each month, and invites the co-operation of all flower lovers.

Sherbrooke, Que.

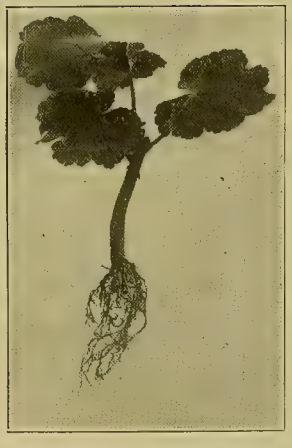
The annual meeting of the Sherbrooke County Agricultural Society was held January 18. There was a good attendance and Wm. Morris, K. C., presided. The report of Secretary W. M. Tomlinson was submitted and considered very satisfactory. The question of holding the annual seed show was discussed, and it was decided to take the matter up at a future date. The question of paying a visit to the Sir William Macdonald College at Ste. Anne de Bellevue, was discussed. It was decided that arrangements be made for a visit some time in February, some 20 of the directors and members having signified their intention of taking in the trip. The members recognize the good work that is being accomplished at this college and that a visit would be of material benefit to the farmers in this section.

The officers of the society for the ensuing year are: Wm. Norris, president; E. Fitzgerald, vice-president; W. M. Tomlinson, secretary-treasurer. Directors: A. Ames, W. S. Armitage, E. Wheeler, A. F. Ward, W. J. Hunt, W. W. Baker, R. Mitchell, A. Ward, J. L. Herbert, J. H. M. Parker.

WINNIPEG, MAN.—A. H. Stolper's business is now in the hands of Webb, Reed & Hagen, as trustees, and extensions are being asked on his accounts.

FARIBAULT, MINN.—Levi Ballon, of Morley, Mich., who has been engaged in selling nursery stock for O. F. Brand, was taken ill at the Superior house January 18, and was taken to the Hunter hospital.

ST. PAUL, MINN.—Two checks, one for $7 and the other for $1, were stolen from the office of E. F. Lemke, 91 West Seventh street, January 24. Some one entered the store and snatched the checks from a desk and departed unobserved.



GERANIUMS

Strong well rooted

S. A. Nutt Cuttings

from 2-in. pots, $18.00 per 1000.

GORDON, VAN TINE CO. 675 Case St., Davenport, Iowa

Forester says: The next place where we stopped was at A. M. Coe's about one-half mile further up the road. Here we found all the standard varieties of carnations in the best condition the most noticeable were the Enchantress family of colors and Vesper. While this place is not as large as the foregoing one, the quality of stock was up to the standard of excellence. There are several houses of smilax sweet peas and Princess of Wales violets grown on the same place, all of which are worth mention. Mr. Coe deserves credit for the condition of the stock and the fine shipments he has been sending in.

For the past six years Mr. Coe's houses have been **watered by a Standard Pumping Engine** and he is today just as enthusiastic as ever over the good qualities of our machines—Send for our catalogue now—It will pay you to put in **a Standard Pumping Engine Now.**—You can grow **better stock** if you have a **good water supply system.**

Best Atmosphere for Keeping Flowers

is inside a McCray Refrigerator. They are built with the patented system of circulation of cold, dry, fresh air, which preserves the beauty and fragrance, prevents wilting, and uses an astonishingly small amount of ice. This saving of ice pays for the refrigerator itself, as many florists have actually demonstrated. There is no stagnant air in the McCray.

McCray Refrigerators

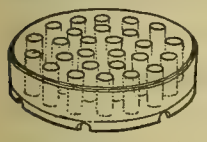
with their elegant finish will give your store a very attractive appearance. They can be furnished with mirrors, and are lined with white enamel, tile, opal glass, marble, etc., to suit your taste and pocketbook.

A McCray Refrigerator will last more than a lifetime, and will save ice for you daily, and will keep your stock in fresher condition than any other refrigerator on the market.

Write at once for Catalog No. 71 which gives you the details of the entire line.

McCray Refrigerator Company, 760 Mill St., Kendallville, Ind.

THE "JAPANA" CUT FLOWER HOLDER



Has Come to Stay. YOU be the first to introduce this long needed article. Made of glass in 3 sizes. Send for circular and price list.

THE WHILLDIN POTTERY COMPANY
THE LARGEST MANUFACTURERS OF
STANDARD FLOWER POTS
PHILADELPHIA, PA. LONG ISLAND CITY, N. Y. JERSEY CITY, N. J.

Tarrytown, N. Y.

The Horticultural Society held its regular monthly meeting in Good Templars hall, January 31. President Angus was in the chair, and there was a large attendance. William W. Weaver was elected to active membership, and one new nomination received. Several communications were read from friends regretting their inability to be present at our last annual dinner, and an invitation was also read from the New Jersey Floricultural Society, requesting members to attend their annual smoker on February 7.

As it was carnation night, and as Treasurer J. T. Lawrie had offered two prizes for the best 18 blooms, three varieties, six of each, a very fine display of flowers was in evidence. First prize was awarded to Samuel Untermeyer (gardener & W. H. Waite), Yonkers, N. Y., with Winsor, Enchantress and White Enchantress. Second prize went to Geo. Legg (John Elliott gardener), Tarrytown, with White Enchantress, Miss H. M. Gould, and Mrs. M. A. Patten.

F. R. Pierson Co. had, for display only, a very fine lot, which was awarded honorable mention. The varieties staged were: White Perfection, Red Chief, Victory, Melody, Beacon, Winsor, Rose Pink Enchantress, White Enchantress, Variegated Lawson.

Honorable mention was given Scott Bros., Elmsdorf Nurseries, for vases of Beacon and Miss H. M. Gould. A cultural certificate was awarded to W. H. Waite for very finely grown spikes of mignonette, May's Giant.

Quite a lengthy discussion on carnations followed, viz.: Cuttings, method of striking, temperature, growing ready for field or indoor culture, benching, etc., all listening with pleasure to the interesting remarks made by Wm. Scott, F. R. Pierson, D. MacFarlane and John Woodcock. The most entertaining feature of the evening was the brief account of visits made by F. R. Pierson to several growers in different parts of the country, also his attendance to the convention of the American Carnation Society at Washington; its great exhibition, banquet and reception, etc. We adjourned at a late hour, and were all delighted and conceded that we had spent a very useful evening.

L. A. M.

Albany, N. Y.

McKinley Day, January 29, caused a considerable demand for carnations. The favorite flower was Lawson which is of a color appropriate for the day as recommended by those who were instrumental in having McKinley Day observed. This city is now an active social center. Many dinners, luncheons and teas are being given by the society people, all of which call for floral decorations.

The Thompson-Easton wedding in St. Peter's church at noon on January 25 was a notable function and was attended by members of representative society people. F. A. Danker had the contract for many of the floral decorations and displayed excellent skill and taste in the the designs and flowers furnished.

Fred Henkes of the firm of Henkes Bros., attended the carnation convention in Washington and came back enthusiastic over what he had seen.

TRADE GOOD.

Trade seems to be quite satisfactory and everyone is getting his share of it. Funeral work is in good demand and uses the large supply of Roman hyacinths and Paper White narcissi. Banquets and dinners are in order now and call for numerous table decorations. Roses and carnations arrive in good condition. Lily of the valley is very good this year; practically none is forced here, but is procured from the west.

NOTES.

The annual dinner held by the Gardeners and Florists' Club, January 27, was a success in every way. About 45 members sat down to a richly set table. President J. Pidduck acted as toastmaster. The toast, "Our Country," was given by W. C. Hall, and M. Blair of the McDonald college responded. "The Craft" was responded to by Mr. O'Connel, representing J. A. Simmers, Toronto. James McKenna responded for the florists; George Trussel spoke on behalf of the gardeners. A. Bols spoke for the Montreal Horticultural Society, C. A. Smith for the Lachine Horticultural Society, and John Walsh for the Canadian Horticultural Society. J. C. Eddy responded to the toast, "The Incoming Officers," and J. Luck for the press. Songs were rendered by A. Walker, Glee Deeron, W. J. Wilshire, J. Langford, F. Allan and H. Eddy.

D. Harris, landscape gardener, St. Lambert, lost his pocketbook with valuable contents, on his way to the club dinner.

T. Martel was a week in Quebec attending the Snowshoers' carnival.

Visitor: E. Mepstead, Ottawa, Ont.

Neatness in the Houses.

The appearance of the greenhouses is a fairly safe indication of the status of the grower. Tidiness and good culture usually go together. Put two men to stage up a batch of lilies; one will clean off and level the ashes or whatever is used for staging, the other will put his plants down among weeds and rubbish, some of the pots leaning one way some another. So arranged, effective watering is impossible. The untidy grower is always in a muddle. He tries to make room by putting plants in the walks, "just out of his hand," where they will be knocked about probably by passers by and where they certainly will have to be handled again before being properly staged. Do one thing at a time. If there are plants on a bench or stage that is wanted for other plants, decide where these have to go, whether they have to be potted, cleaned or anything else before they go there and do it. Time will be saved in the end by not muddling up three or four jobs at once. The skilful plant grower likes to keep his plants moving. Every time they are moved, necessary cultural details, such as picking over, stopping or stirring the surface, are done at the same time and they are tidy again until they need more room, when the same process is repeated. A place is cleared for staging before plants are taken to the shed for potting and they are brought back and staged at once, only one handling being required. Walks should be kept cleaned regularly. Decaying leaves and rubbish lying about the houses are a fruitful cause of insect propagation and mildew, damping and kindred troubles are always worse in places out of order. Have a systematic method of carrying out this work and stick to it. It is far less trouble and much more satisfactory in every way than the slipshod, untidy methods only too often practiced.

LAWTON, OKLA.—Wallace Hornaday is incorporating and will add another house to his plant. He has built up a splendid business which he will extend to all the newly opened country to the west and south. He will install natural gas during the coming season.

Zech & Mann, Chicago.

Zech & Mann, the interior of whose store we show herewith, are nearing the end of their third year in the wholesale cut flower business, having been established since March 29, 1905. John Zech, one of the partners, is a man who had considerable experience in the business previous to his present connection, having been associated at one time or another with both wholesale growers and commission men. M. H. Mann, the other partner, was one of the first three consignors on the firm's books. Mr. Mann has a range of greenhouses at 3793 North Clark street, Chicago, and has long been known as a successful carnation grower. Harrisii lilies and gladioli are also specialties of Mr. Mann's. Albert Leis, with greenhouses at Niles Center, Ill., was another of this firm's earliest consignors. Formerly Mr. Leis grew both carnations and roses, but of late has discarded carnations and grows roses only. Several growers of roses, carnations and bulbous flowers have been added since and the business has had a steady growth.

AMERICAN ROSE SOCIETY.

Annual meeting and exhibition at Chicago, March 25-27, 1908. ROBT. SIMPSON, Clifton, N. J., president; BENJAMIN HAMMOND, Fishkill-on-Hudson, N. Y., secretary.

Alfred Austin on the Rose.

What is there that the rose cannot and will not do? It will cover the palaces of kings, and just as gladly embroider the porches of the lowly. It is as happy in the untrimmed hedge as in the well-ordered garden. It can look after itself, and needs no more help than the cloud or the wave. Yet it tolerates interference with no loss of temper and with its habitual smile. The rose is queen, but is a country maid likewise. It belongs to no class, but is at home with all. Of all love gifts it is the most expensive and seductive. Roses welcome our birth, are sponsors at the baptismal font, bridesmaids at our nuptials, mourners and white-robed petitioners to heaven at our interment.

SUGGESTIONS FOR FLORISTS.

Ventilation in Rose Houses.

Those who have much glass devoted to roses must often wish that automatic ventilators were more perfect in their action. They are doubtless a great aid in large plants, especially while the morning cut is in progress as it means a lot of running to and fro saved when they work properly. Unfortunately the majority of users have not found them perfect and it is better to have no automatic arrangement than one that won't work. Anyway the ventilation in early morning must be carefully attended to if a suitable atmosphere is to be kept up. When the sun shines upon a house kept closed, with the night air unchanged, the temperature rises much too rapidly unless ventilation is provided early, while if too much air is admitted the cold beats down on the plants and chills them. A natural and gradual rise must be aimed at by opening the vents slightly as soon as the sun reaches the house, increasing this as the temperature rises a few degrees. And in the afternoon the same gradual decline should be the aim of the grower. Then the plants dry off gradually and the foliage is kept hard and in good condition. Take care of the ventilating; it pays.

Violets.

With the increasing light, violets will make a stronger growth and more leaves will be produced. The strong growing, single flowered sorts especially become overcrowded if left to themselves and the shoots that push up from the base must be thinned or the plants will become a mass of leaves. Few flowers are produced in this case and the few are often of poor quality. The double flowering varieties such as Marie Louise keep in better shape but even here there may be a few shoots to come away. If at all short of stock these shoots may be rooted in a light, cool house in the sand and will make good stock. The plants should be frequently picked over, removing all decayed and spotted leaves. Stir a little bonemeal into the surface soil and a week later a little soot and lime or nitrate of soda. Either will help the foliage in color and increase the size of flower. Give full air all day as long as the weather keeps bright.

Primula Obconica.

The young plants for Easter decoration should be in their flowering pots by now, but if there are still some to have attention give them it without delay. These plants dislike large shifts or excesses in any way. Plants in 2½-inch pots may go into 4-inch and larger sizes have a similar shift. See that the soil is in a moderately moist condition and water carefully after potting. A tidy potter should do the work as nothing looks worse than plants leaning over or with the soil all over the leaves, while the crowns must not be too deeply buried on the one hand or left swinging on the other. Stand them level on an ash covered bench, sprinkling a little soot along the bench first. Keep the atmosphere moderately moist and spray the plants lightly every day when fine. Sow seed now for plants to come in during November and up to Christmas when they are very useful in connection with cyclamens. It is too early to sow for Easter of next year, the end of May being soon enough for this. The plant is so useful and free flowering that several sowings should be made to keep up a constant supply of flowers and plants.

Smilax.

Keep up as moist an atmosphere as the weather conditions will allow, in the house devoted to smilax, but avoid a heavy, damp and cold feeling. All plants cut over may be dried a little before being again started. After about two weeks of the drying treatment prick up the surface lightly, mulch with half decayed manure and give a thorough soaking of water. If the plants are strong, string them at once but if not allow them to spread a little first, cut the loose tangled stems away and let them go. Beds planted with young seedlings should also be allowed to make a little growth on the benches before stringing. If the strings are put to the plants too early the finished sprays will be thin and badly furnished. A little nitrate of soda is an excellent stimulant to plants that for any reason are slow in starting. It must not, how-

ever, be overdone, and must be supplemented later by a good concentrated fertilizer. Soot water is an excellent stimulant and has a good effect upon the color of the foliage.

Dendrobiums.

Though the rough pruning the plants get by cutting the growth away with the flowers does little harm to such species as D. Wardianum, D. nobile and others of the deciduous section it constitutes a very severe check to D. formosum, D. Jamesianum, D. infundibulum and others of the black haired, white flowering group. This check necessitates careful treatment afterwards and the best place for the plants is in a hot, moist and very light house where ammonia fumes are present. These can be provided by damping all available spots with liquid manure and by sprinkling soot and lime under the stages. None of these dendrobes like much room in the pots or pans and should, when newly imported, be squeezed in as tightly as possible. D. Wardianum, treated this way and hung up in a warm moist house will make growths a yard long in a season and two-thirds of the length of this growth will be covered with the beautiful flowers. D. nobile is not so impatient of root room as most others, its roots taking more freely to peat and moss and even a little well decayed cow manure or bones. This species may be easily propagated now by laying shoots that have flowered but are not shrivelled upon boxes or pans of moss. Keep these constantly moist and in a few weeks every node at the upper end will break into growth, and when these commence rooting they may be potted separately or several together, making nice plants by the end of the season.

THE ROSE.

OWNROOT roses of some varieties do as well as those grafted on the manetti, but those who look for a good growth of Richmond early should use grafted plants. The ownroot plants take much longer to take hold than do grafted ones, and this is true of other varieties. More than one variety of modern introduction to the growing plants would have had but a short life there had ownroot plants only been used.

ROSE KATE MOULTON.—One of the principal attractions of this undoubtedly fine rose is the grand foliage. We recently noted a bench of it in one of the large Chicago plants and were surprised at the fine appearance of the leaves. But the flowers too are excellent and though one is naturally unwilling to praise a new variety too highly until it has stood the test of time and seasons, Kate Moulton does not seem to have a bad point. Old growers and section men of experience praise it highly and it is without doubt one of the best pink roses of recent introduction.

Random Notes on Roses.

LARGE VS. SMALL HOUSES.

One of the most experienced rose growers in the vicinity of Chicago, in conversation with the writer recently, gave it as his opinion that the large houses that are used at present are not as satisfactory as the older, smaller style of house. This man is not a crank or a back number, but has charge of one of the finest ranges of glass in America and knows what he is talking about. In the first place he objects to the low, solid benches. When benches three feet or more high were in vogue the roots were kept up where there was an excellent circulation of warm buoyant air all around them. Whatever the ultimate result to the plants may be, there is no question but that young plants start away much quicker on such benches, while they are also more easily kept moving in winter. In a large growing establishment north of Chicago where Sunset had been grown for many years with success on the old-fashioned benches, some new houses of great height and with low, solid beds were built. Sunset was planted on these, but was a rank failure, though the same grower was in charge.

Some old houses wherein American Beauty never failed were torn down to make room for more modern structures where the same class of beds were used. The same system exactly was carried out; temperatures and soil conditions were identical, but the flowers are not as good now as from the old benches and fewer long stemmed blooms of No. 1 quality are produced pro rata with the bench space. I am not recommending small houses and have no reason to decry large ones, having seen grand crops of American Beauty and other roses grown in such structures and personally handled plants of all the popular varieties in each. If practical growers who have had experience with the two classes of house would send particulars of this to THE AMERICAN FLORIST, stating the conclusions they have come to and the reason, it would prove of great value to those who are undecided on this very important point.

CARNATION HARVARD.

Raised by J. D. Cockcroft, Northport, N. Y.

MME. CHATENAY.

It has been freely remarked that Mme. Chatenay is on the slide. Possibly it is, but there are many good points about this rose not possessed by the majority of varieties and before consigning it to the dump pile, either actually or in thought, growers should consider these. Have we a pink rose that, taking the season through, is as easily grown, winter and summer, as free from disease or insect pests, that thrives as well either on the manetti or its own roots, or comes into flower as quickly and produces as good flowers from small and weak plants? If so, what is it? Bridesmaid, of course, comes to mind immediately. But in summer Mme. Chatenay makes a cleaner growth, is not liable to mildew and keeps its color better. Killarney is a grand rose, but Mme. Chatenay planted at the same time will produce good flowers long before it and is usually of better substance in summer. Slightly shaded, the growth stands the hottest weather, while the roots are strong and get along well in any kind of soil. We may have to throw it out, but at least we intend to be sure that we have something as good all around before doing so.

FIRM PLANTING.

Firm planting has more to do with the health of young rose plants than some growers are aware. It is too much the custom to plant loosely "to give the plants a start." Provided careful watering is practised afterwards there is no advantage in loose planting, but where the watering is left to careless or unskilful help then plants in a loose soil are not so likely to suffer as are those planted firmly. The plan of setting the plants loosely and then going over the beds after a certain amount of growth has been made and treading them is not

good. Many young roots are injured and there is no reason why the firming should not be done in the first place. Then the growth from the beginning is solid and strong; it does not give way under the sun and when cut back produces fine, strong breaks that do something. The surface soil need not be very firm. Let the roots be in a solid soil and leave the surface loose for a time.

Loose soil on the top of a bench is the best indication as to how that bench is for water, and an experienced hand can tell to a plant how far the bench has to be moistened. Set firmly, leave the soil in a slight depression around each plant and keep the surface loose; then water with care, each plant individually, and there need be no fear as to results. R.

Rose Notes in Season.

During zero weather the stock is affected in a certain degree by the extreme outside cold, even if the proper temperature is maintained indoors. There is a noticable check at this time, not necessarily detrimental as it is only in the natural order of things. However, in order to keep the temperature say at 58° for the roses, the atmosphere in the houses is almost in a condition to do some damage to the plants owing to the fact that the purity has been greatly impaired by excessive heating. If the sash are raised for only a short while during the day several times, almost to their fullest extent, closing them immediately, the atmospheric conditions will be wonderfully improved. Keeping the walks dampened during continuous cold, cloudy weather, when syringing cannot be done, is quite essential also. Again if the temperature is run a little below normal day and night during the coldest of days, say 54° at night to 64° cloudy weather and 70° to 72° during the bright days with as much air as possible, this will lessen the artificial heat or over-forcing, and better the growing condition. The cut will be a little short for several days, but to preserve future cutting of good stock, the sacrifice is not worth mentioning.

Propagate now. The coal has to be used, so put them in and get as much of this work done as possible. Cuttings of the best can now be had and this will make the best of stock, and save some work in potting. The plants struck between February 15, and March 18, will seldom require shifting before planting into anything larger than a 3½-inch pot. The propagating house will have to be carefully shaded now that the sun is much stronger or the extra strong cuttings procurable at this season will wilt very quickly, and the wood taken off should be sprinkled thoroughly and made up in a cool place, care being taken not to have too much taken off at a time. Tie the old plants thoroughly now; more time can be spared than a little later. If the plants need mulching do not put it on too heavy; just a light covering of well rotted cow manure, until the plants can be given plenty of air and water. American Beauty being an exceptionally strong feeder can be mulched heavier, and, if fresh manure is used, it should be covered with a thin layer of soil to avoid spotting caused by the decomposition of the manure. Do not put too much dependence in the mulch, but continue with liquid manure if the plants show want of feeding after mulching. E.

THE CARNATION.

Cultural Methods for Carnations.

BY IRVING GINGRICH.

The subject of this paper is really one that should have been assigned to a grower of long and wide experience, as the writer feels that he is just beginning to learn something concerning the culture of carnations, his experience dating back only eight years; but during this time mistakes have been made that he has profited by and if he can say something that will be of benefit to but one out of ten of the growers here assembled he will feel well repaid for the effort. The writer will also endeavor to confine himself very closely to his subject as any slight digression will make the paper entirely too long.

Beginning with the propagation of the carnation we may say that in this country the commercial grower has but one method, by cuttings. The specialist makes use of seed propagation to secure new varieties but we will not discuss this method as the average grower cannot devote the time and attention absolutely necessary to success in this special field.

There exists a marked difference of opinion as to where and how to take a cutting and this subject received considerable attention at our Toronto meeting. There are, however, many present at this meeting who were not fortunate enough to be present at Toronto. At that meeting a discussion was raised as to what constitutes a top cutting, some being of the opinion that is was one taken rather high up on a flowering stem and others maintaining that it was the top taken out of one of the bottom shoots which would ultimately have become a flowering stem itself. The writer's own experience, supported by actual experiment, is that neither is an ideal cutting. The former soon sends forth a bud which, if removed, will send up four or five weaker buds, and if these are stopped or pinched back the plant is gone; the latter sends up a rank growth which on stopping several times as the growths are ripe for the operation, produces a heavy but rather slow growing plant with plenty of foliage and few flowers. These statements must be made with some reservation as the writer has not had much experience with different soils and these exert a marked influence on the growth of the plant.

SOILS.

A heavy, rich soil might produce a fairly good plant from a top side shoot cutting whereas a light, quick, sandy soil might have the same effect on the other. Our soil being a medium chocolate loam with considerable silt in its composition and not over rich, we much prefer a side cutting on a flowering shoot taken at one joint above and one joint below the usual point of cutting the flower. Cutting off the flower therefore requires some discretion as some varieties develop the cutting before the bud matures and some varieties do not develop the cutting until after the flower has been removed.

With us, January and February are the best months in which to take cuttings, though there are others who prefer March struck cuttings on account of the rapid growth made in their particular soil. Such slow growing varieties as Prosperity need to be taken in December to make profitable plants. It matters but little whether the cutting is taken with a heel or not. If taken with a heel it is grasped firmly between the thumb and forefinger and severed from the stem with an upward and outward movement. This takes the leaf and part of the wood of the flowering stem with the cutting. The old wood is then cut off an eighth or sixteenth of an inch from the end of the shoot and the cutting is ready for insertion in the sand. In March or later it is well to clip off the ends of the leaves to reduce the transpiration or loss of moisture. Cuttings not taken with a heel and cut off at the base to any extent should be cut slightly below a joint so that when the lower leaves are pulled off backwards they strip off the outer bark leaving the inner cambium tissue adhering to the wood. It is on this tissue that the roots form. Whatever may be the method of taking and trimming the cutting the most important thing is its treatment after reaching the sand. After trimming, the cuttings are given a drink by soaking for a half to one hour in fresh water to thoroughly fill the tissues and prepare them for the ordeal to come.

CARNATION FAUST.
Raised by J. D. Cockcroft, Northport, N. Y.

PROPAGATING.

The best propagating bench is six inches deep with a layer of brick on the bottom to distribute the heat and moisture evenly and filled up with clean sharp sand. This is wet down and packed hard with a brick. Then wet again slightly, cut a crack in the sand with an old putty knife and straight edge. The rows can be two inches apart and three-quarters of an inch in the row or three inches apart and one-half inch in the row. The cuttings should not extend more than one-half inch below the surface of the sand. After the cuttings are in, water with a sprinkling can or with the hose if you have it fitted with a sprinkler head. Syringe lightly for several mornings, then gradually let the sand dry out, always being careful, however, that the foliage is not allowed to wilt. During this period the cuttings are very impatient of drafts, and ventilation must be very carefully looked after, as a trifle too much air may result in the loss of an entire crop of cuttings when all other details have been faithfully carried out. Direct sunlight should not be allowed on the cutting bench at least until the cuttings show signs of rooting after which anything but midday sun will prove beneficial. The propagating house should be 45° to 50° at night with 60° in the sand. Some prefer to have no bottom heat but we have had no success without it.

In three or four weeks the cuttings will be ready for planting out, and, for speed and good results generally, we always plant direct to a bench in three inches of soil that is somewhat spent. If such soil is not available mix enough sand with it so it will not be too rich, as a rich soil will cause considerable damping off. If so desired, they can be potted in 2½-inch pots, using a heavy loam lightened with well decomposed leaf mould. They can be planted into the field without a shift and this ball of soil will remain intact when lifting time comes. December struck cuttings planted direct into a bench, four inches apart each way, and January struck cuttings three and one-half inches each way can be planted in without field culture by June 1. But by all means plant out into the field all cuttings coming from the propagating bench later than the middle of February. If you can have your bench for young stock arranged to give a gentle bottom heat for a few weeks after coming from the cutting bench the plants will show grateful appreciation. This is not necessary but it is desirable.

During this period weeding and stopping should be carefully attended to. We make it a rule to go over the young stock once a week regularly and then stop or cut back only those plants that are really ready for the operation. When a plant is ready for stopping it will be brittle and can be snapped off very readily and this method cannot be too strongly advocated since the knife will carry disease from one plant to another. At this stage the plants are very tender and disease is most easily transmitted.

PLANTING.

About May 1, the young stock is ready for the field. Benched plants can be taken up with a trowel with a good ball of earth slightly pressed together to keep it intact. Place in flats and take to the field. Let one man or boy distribute the plants about where they ought to go in and another follow with the trowel with which he makes the hole with a single stroke, inserts the plant and presses firmly into place without dropping the tool. The rows should be 16 to 18 inches apart and from eight to ten inches in the row. Weather conditions at this time of the year are uncertain and the work should be so planned as to get as many plants as possible out before a rain. In sandy soil without a bottom and in dry seasons a Wittbold or Skinner watering system is very beneficial in the field. Neither is expensive to install and the benefits are out of all proportion to the cost of installation.

After the plants in the field become well established, stopping should begin again and continue weekly to within a week or 10 days of lifting time. Use a hand wheel cultivator freely to keep the weeds in check and mulch the soil to conserve the moisture. If artificial watering has been resorted to, cease the operation long enough before lifting begins to ripen the growth. In our locality, lifting begins from July 15, to August 1, according to the quantity of plants to be benched. At this time have a convenient number of crates 18 inches wide and three to four feet long prepared and spread the bottoms with one or two inches of wet moss to keep the roots moist until planted. Two men with spades dig on both sides of the plant simultaneously and lift. A third shakes off the soil, inserts the roots in a bucket of water and places them in the crates with roots standing on the moss.

When the plants are lifted from the crates the roots are shaken out so they will spread and a man on either side of the bench does the planting by making a hole with the hand or trowel, spreading the roots out evenly, bringing the loose soil around the roots, jumping the plant up and down gently to distribute the soil particles among the roots and then firmly pressing in, leaving a shallow depression around the plant to receive the first few waterings. The plants should not under any circumstances be set lower in the bench than they were in the field. This will save many a loss by stem-rot. Care should also be taken to have the smallest plants on the south side of the bench and the largest in the center or north of the center of the bench. By winter you will be able to distinguish but little difference in the size of the plants. During the planting the glass should be heavily shaded with a clay wash squirted on the glass with a syringe to cool the houses and prevent wilting.

Petunia The Queen.

And now, let us take up a matter that has been omitted, the soil for the bench. If the top soil can be secured from a pasture where the soil is loamy and, to the feeling, velvety, this is an ideal carnation soil. We do not mean to say that carnations cannot be grown on any other kind for the writer has seen most excellent results secured from widely divergent textures of soil. We merely mean that the soil mentioned requires the least skill to get good results. When the soil is secured remove four or five inches of turf, place in piles grass side down with one-fourth good cow manure during the fall preceding the time wanted. Chop down and work over several times during the winter and spring, add a 4-inch pot of air-slaked lime to one barrow of soil, run through a coarse mixer and it is ready for use. If this is impracticable, take any good loam that contains no decaying vegetation, work it over several times to germinate and kill the weed seeds it contains and wheel on the benches after spreading one and a half inches of well decomposed manure on the bench bottoms. Add the lime as with the compost.

Resuming the treatment of the plants, syringe lightly several times a day and, as the plants take hold of the soil, gradually remove the shade. From now on, water the entire bench and after the weeds have been thoroughly disposed of, a mulch of spent manure mixed with light soil will be beneficial in retaining the moisture. Syringe once a week on bright days throughout the season to keep down red spider. Fumigations of nicotine products every two weeks will keep aphis in check.

If the soil has been well enriched, further feeding will be unnecessary until the first crop of flowers has been harvested. Then, after a week or two of rest, a light mulch of sheep manure with one-tenth part of dried blood added to give a generous surplus of nitrogen may be given to hustle the growth along. This may be followed two to three weeks later by a dressing of wood ashes to ripen the growth. After another

LYCASTE SKINNERI.

interval a dressing of bone meal will materially assist the development of the second crop of buds. This rotation may be continued to the end of the season by increasing the quantity according to the growth of the plants. Towards spring a mulch of rotted cow manure may be added. Among the commercial fertilizers as good a combination as we have yet found is 500 pounds of bone meal, 200 pounds muriate of potash, 100 pounds nitrate of soda, the latter two well pulverized and the whole well mixed and applied at three week intervals at the rate of a handful to two rows half way across the bench. In conclusion let me say that this is far from being an exhaustive treatment of the subject. It would be impossible to give one within the limits of such a paper. Every grower will find it necessary to adapt his cultural methods to his local conditions and these he can only find out by actual experience.

ORCHID NOTES.

Lycastes.

The accompanying illustration is of a neat specimen plant of Lycaste Skinneri, one of the most useful and easily grown of cool orchids. The plant is one of a shipment from Guatemala received by I. M. Roman, gardener to Geo. A. Joslyn, of Omaha, Neb., and was bearing nine flowers, each from four to five and one-half inches across. L. Skinneri, in its several varieties, is the finest species in this rather large genus and its large, brilliantly colored flowers are fine for cutting or for a display on the plants. They also last remarkably well owing to the good substance of the petals. The outer segments are a rosy white in the typical form, the markings on the lip varying in intensity, but usually a showy deep crimson. The most striking variety of this species is the albino, L. S. alba, having pure white outer segments and only a yellow stain on the lip.

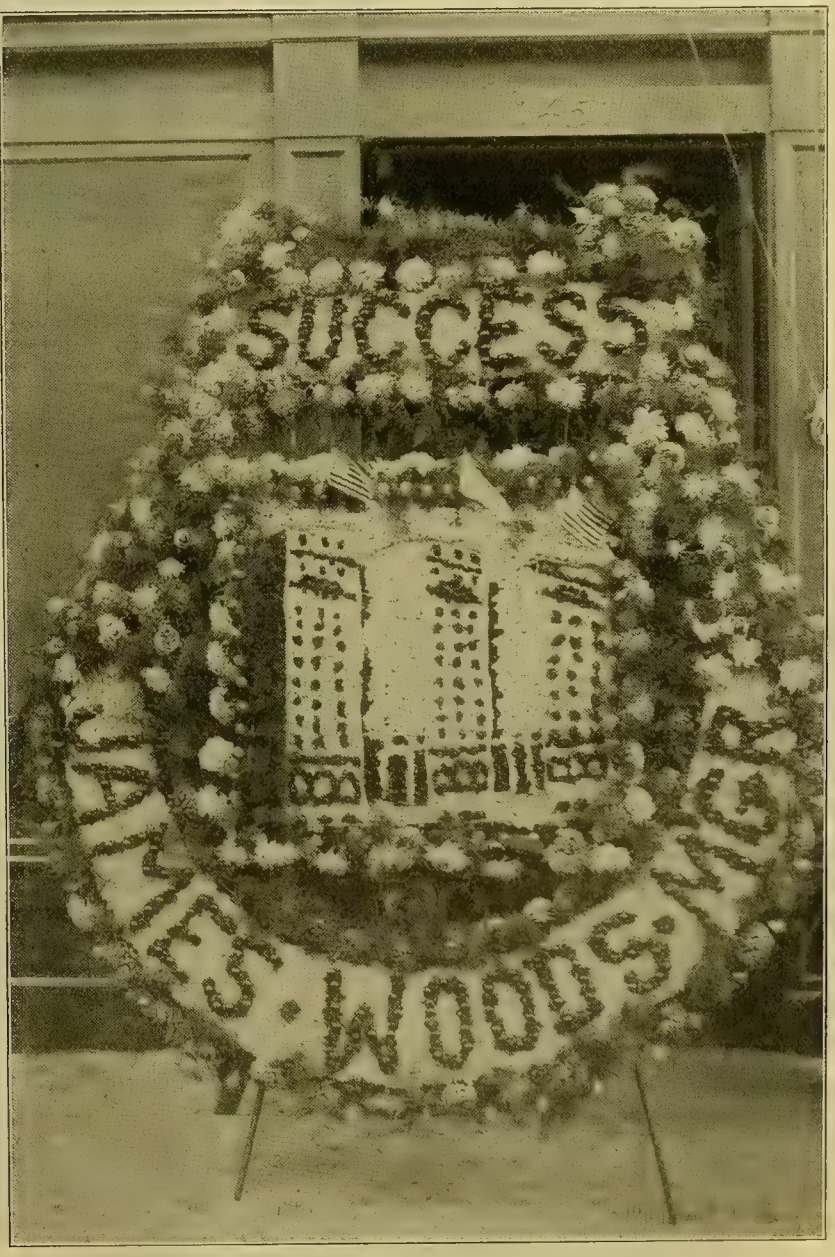
L. Skinneri is fairly widely distributed in a geographical sense, but always found where the temperature keeps moderate the whole year around and where day and night are more nearly equal than in northern latitudes. This suggests a constantly cool and moist temperature, shade from bright sun during our American summers and all the light it is possible to obtain in winter. A safe minimum night temperature is 50° in winter. In summer it is not always possible to get as low as this, but if plenty of air is left on and the atmosphere of the house kept moist the plants will thrive well. A great aid in keeping up the proper kind of atmosphere in the cool orchid house is light spraying over the head of the plants. But this must not be overdone and should be omitted entirely when the atmosphere outside is moist and during dull weather. A plentiful circulation of air at all times is necessary, as no orchid will continue long in health in a stuffy, close house.

The roots of lycastes are not so sensitive as are those of cattleyas, phalænopsis and other pure epiphytes. In form and texture they resemble more the roots of ordinary plants and, consequently, when making up the compost for them this may be made fairly substantial. The best lycastes we ever grew were potted in shallow pans, more than half filled with drainage, the compost consisting of good fibry loam two parts, one part of leaf mould and half a part each of sphagnum moss and fibry peat. In potting, plenty of broken crocks were thrown in to ensure thorough æration and allow the moisture to reach every part of the compost equally. Weak plants are usually elevated a little above the rims of the pots, but this is hardly necessary for strong specimens. During the time growth is active a very free supply of water is needed at the roots, and at no time ought they to be really dry for any length of time, as is practiced with deciduous species like dendrobiums or calanthes. A fairly equable condition, in fact, all the year around, is what the plants like, and given these few simple details these fine orchids are as easily grown as most greenhouse plants.

The genus contains many other species more or less useful and beautiful. One of the commonest is L. aromatica, a very free flowering kind, with bright yellow, heavily scented flowers. A plant of this, with dozens of its pretty flowers around the small yellowish bulbs, looks all flower. A similar kind, L. cruenta, can hardly be distinguished from L. aromatica, except that its flowers are not sweet-scented and have a crimson stain on the lip. Another well known old kind is L. Deppei, with pale colored flowers, in one variety heavily spotted. L. plana, L. lanipes and others are free flowering, beautiful plants, more or less useful for cutting. All of them thrive under the conditions noted for L. Skinneri. R.

San Francisco Design.

The electrical floral horseshoe, shown in this issue, was designed and executed by "The California Florist," Julius Eppstein, 1451 Eddy street, San Francisco, for the reopening of the St. Francis hotel, Nov. 30, 1907. The size of the horseshoe was 11 feet high by 6 feet wide, containing 600 miniature electric lamps. The cost was $350. The piece was presented by the hotel employes to the manager.



MAMMOTH ELECTRICAL FLORAL DESIGN.
Shown in San Francisco; 600 Lights Used.

Notes for the Retailer.

PLANT STANDS.

For decorative work plant stands of various heights are of great assistance. The little room that one often has to make a display in renders the use of boxes and unsightly impedimenta of this kind awkward while there is great difficulty in hiding these with foliage or flowering plants. There are several useful stands on the market and they may be used, not only in decorative work at customers' homes, but also in the store windows. They save their cost in a short time and are practically indestructible and very lasting.

DESIGN WORK.

When designs of various kinds are carried out in one variety of flowers there is often a lack of distinct outline that detracts from the finished effect. Crowns, emblems of societies and similar devices are often called for; frequently the customer will state the flower that is to be used in the make-up. In such cases always have the outline of the design carefully picked out in some flower that contrasts well with the body of the design. Violets are excellent as an outline to funeral designs, while holiday designs may well be picked out with small red carnations. There are many other combinations that will occur to those having the work in hand but the chief point is that the outline must be good and in sharp contrast to that of the body of the design.

SUCH a factor in the retail trade has the florist's shop become that the National Cash Register Co., in exploiting miniature shops in their big Chicago show windows, illustrate one with refrigerator and like fixtures.

Novel Window Arrangement.

A GREEN window recently noted was very effective. The scheme was carried out with hangings of smilax and asparagus. Green plush or velvet was tied around a mirror in the back of the window with ribbon of the same shade. The bottom was covered with moss and sprays of English ivy, fine specimen cibotiums and various sizes and varieties of nephrolepis being introduced. The electric globes were covered with green shades and only one color flowers were used, these being changed daily.

Wm. P. Craig.

Store Help.

ED. AMERICAN FLORIST:—

What number of persons is necessary for a store that averages receipts of $250 per day in a general retail down town district, comprising all the trade and the demand for help that an ordinary retail floral concern should have?

A. E.

Replying to "A. E." regarding number of help necessary for a store doing a business of $250 per day on an average, I would say from experience that it requires first of all a good capable manager who should do little else than to see that stock is kept in good shape, window display kept attractive, orders going out promptly and all other matters too numerous to mention, three or four good sales people, two ladies and two men preferably, are needed also. A first class designer and decorator and a helper, who would do a porters' work, or a regular porter if the store room was large. Also a bookkeeper and a stenographer. For delivery work one driver might do, but I should say two and also two boys. For holiday trade extra sales people and extra delivery men would be needed, and I would add that the very best help obtainable is absolutely necessary to increase trade and also to hold it, as I believe that the florist's trade depends more upon the ability of the help than any other trade.

O. J. OLSON.

HOOPESTON, ILL.—Peterson & Lawrence will succeed Andrew Peterson April 1. They will add the coming summer three houses, each 20x250 feet, for carnations.

OSHKOSH, WIS. — The Horticultural Association has postponed its February meeting and there will be no session until March.

FIELD OF HYBRID SEEDLING LILIES BLOOMING TWELVE MONTHS AFTER PLANTING.

Many Flowers Had Been Cut.

To be Done Now.

IN THE GREENHOUSES.

Keep Gladiolus Colvillei alba cool and make no attempt to force it.

Adiantum scutum is a very suitable species to grow for cutting from, especially the variety roseum.

Get the cannas bedded out on a bench for propagating, cutting into large or small divisions as necessary.

Allow tuberous rooted begonias to come in in a moderate temperature; they dislike much heat.

Soot water is an excellent aid to cinerarias when they have filled their pots with roots, and soft water, when it can be obtained, is the best to use either for these or herbaceous calceolarias.

Lachenalia Nelsoni makes an elegant basket plant; it is one of the best colored varieties.

Avoid overwatering Asparagus plumosus until well established.

Pick over the Easter lilies and place those best rooted together so they can be safely watered.

See that no frost reaches the house where azaleas are being kept back for Easter.

IN THE STORE.

Small plants of Cocos Weddelliana are very useful for dotting on large wreaths.

Grevillea robusta stands well as a house or table plant and may be recommended to customers.

Easter lilies and callas are quite out of place in small wreaths, but are excellent in large, bold designs.

Asparagus Sprengeri stands out better, from solid wreaths of carnations, than any other green.

Selling old or half wilted stock at low prices is not conducive to successful business.

Regular orders of the wholesaler will ensure his taking care of rush orders when necessary.

OUTDOORS.

Large beds of roses have a far finer effect than a few plants scattered about promiscuously.

In bad weather get all tools put in order, prepare stakes and labels and repair flats.

A thick coat of manure against the sides of a shed or house serves to keep out severe frost.

Mrs. J. Laing is one of the best hybrid perpetual roses to plant for late and continuous flowering.

In handling Azalea mollis be very careful not to break off the prominent flower buds.

A covering of straw manure helps to forward clumps of rhubarb that are not to be forced.

A few roots of Funkia variegata dug up in mild weather and potted are useful for forwarding in the greenhouse later.

All sand, grit and other lightening substances that are not required should be spread on the soil where it is of a heavy adhesive nature and dug or plowed in when this is prepared.

Have plenty of protective material ready for use when the herbaceous plants begin to grow.

Half leaves and half manure hold their heat longer and steadier in hotbeds than all manure.

QUERIES.

Carnations Splitting.

ED. AMERICAN FLORIST:—

My Enchantress are looking splendid but about 70 per cent are splitting. The foliage of the splits does not look as healthy as the others. Will you kindly advise me any special reason for such a large percentage of splits. W. E.

Overfeeding at this stage is a frequent cause of splitting of the calyces, but as you give no details of your culture we cannot say this is the cause. Write again giving these particulars and we will endeavor to help you further.

Nicoticide for Carnations.

ED. AMERICAN FLORIST:—

Will nicoticide sprayed on carnations keep red spider in check? If so, what strength should the solution be used at? We cannot syringe, as the carnations are planted too thickly and they do not dry off at night. C. W.

The time is at hand when the plants can be safely and thoroughly syringed on bright days almost anywhere, providing ample ventilation is given. This is much the best way to keep down red spider. We have used nicoticide with good effect on badly affected plants, adding just about enough of nicoticide to faintly color the water, but, before using this mixture to any great extent, I would advise experimenting on a small scale and note the effects. Also try a weak solution of salt and water, putting in enough salt to make the water taste of it. We use this in preference to the nicoticide, where the syringing with the hose will not keep the pest in check.

C. W. JOHNSON.

Carnations Going Sleepy.

ED. AMERICAN FLORIST:—

What is the cause of Boston Market, Prosperity and Enchantress carnations going sleepy on the plants? The temperature is 52° to 54° at night; bright days 70°; cloudy days 60° to 66.°

C. W.

The temperature that these carnations have been subjected to is altogether too high and is the cause of their going to sleep on the plants. The right temperature for the varieties mentioned to do their best is 48° to 52° at night; cloudy days 56° to 60° with a crack of ventilation on, and on bright days the steam should be taken off when the temperature of the house reaches 56°; after that the temperature should be governed by the ventilators. With plenty of ventilation on and not any artificial heat a temperature of 66° to 70° will suit them nicely.

C. W. JOHNSON.

Manure for Carnations.

ED. AMERICAN FLORIST:—

What proportion of water should be used with superphoshate of lime for carnations? E. W.

Superphosphate of lime is only another name for acid phosphate, or dissolved rock, being ground phosphatic rock, treated with sulphuric acid. It has an opposite effect on neutralizing acids in soil from carbon of lime (common burned limestone). Excellent results have been obtained with the following fertilizer: Dried blood 3½ pounds. Sulphate of potash one pound. Dissolved S. C. Rock 1½ pounds. Apply to 100 square feet of bed surface. Good growers do not advocate the superphosphate of lime and water treatment. E.

Treatment of Hyacinths.

ED. AMERICAN FLORIST:—

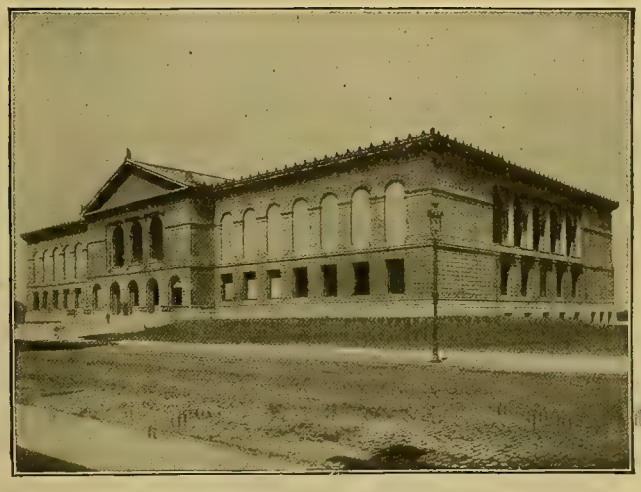
Can you give me some treatment for hyacinths that were potted December 26 and put in a cellar, where the temperature gets about 35° above zero; the bulbs are starting to make some top growth now. What would you advise to do with them to have good flowers for Easter? They are in 3-inch pots.

READER.

I would advise shifting the hyacinths to 4-inch pots. Put them outside, cover with four inches of soil and spread manure over to keep them from freezing. They are probably not started enough to be hurt by putting them outside. Bring them in 20 days before Easter in order to have them right. W.

The Coming Rose Show.

Chicago.—On Monday afternoon the Florists' Club committee of arrangements for the rose show met with Secretary Carpenter at the Art Institute and concluded arrangements for the use of Blackstone hall in that building for the show, opening 5 p. m. March 25, and continuing March 26-27, day and evening, with the privilege of making such admission charge as will probably meet requirements for the local expenses, giving free admission, however, to the members of the Chicago Horticultural Society and Chcago Florists' Club. There were present August Poehlmann, Leonard Kill, Geo. Asmus, J. Burdette, J. C. Vaughan and T. E. Waters. The Art Institute with its large and high class membership, its convenient location and general public interest in matters there, insures the best possible arrangements that could be made for the show in the city. Special premiums offered by local firms were reported by Chairman Poehlmann as now approximating $600.



THE CHICAGO ART INSTITUTE.

Where the Coming Exhibition of the American Rose Society Will Be Held.

THE AMERICAN FLORIST

TWENTY-THIRD YEAR.

Subscription, United States and Mexico, $1.00 a year; Canada, $2.00; Europe and Countries in Postal Union, $2.50. Subscriptions accepted only from those in the trade.

Advertisements, on all except cover pages, 10 Cents a Line Agate, $1.00 per inch. Cash with Order.

No Special Position Guaranteed.

Discounts are allowed **only on consecutive insertions**, as follows—6 times, 5 per cent; 13 times, 10 per cent; 26 times, 20 per cent; 52 times 30 per cent.

Space on front pages and back cover page sold only on yearly contract at $1.00 per inch, net.

The AMERICAN FLORIST Advertising Department is for florists, seedsmen and nurserymen and dealers in wares pertaining to those lines only.

Orders for less than one-half inch space not accepted.

Advertisements must reach us by Monday to secure insertion in the issue of the same week.

When sending us change of address always send the old address at the same time

We do not assume any responsibility for the opinions of correspondents.

Photographs.

We are always pleased to receive good pictures of trade subjects. Send them prepaid by mail or express carefully packed to prevent injury in transit. Pack them flat, not rolled, with name and address of sender on the back of each picture.

MARDI GRAS at New Orleans, March 2-7.

"SEED-PLANTING COMMUTERS," says Collier's.

BERMUDA is getting a good run of American visitors this winter.

HOLLAND PANTS are offered in a trade publication. Do they throw in the wooden shoes?

WRITE Julius Roehrs Co., Rutherford, N. J., for colored plate of their artistic new rambler rose, Newport Fairy.

PEONY growers will be interested in the account of a new yellow peony, noted under "European Horticulture," on page 169 in this issue.

THE CONARD & JONES Co., Westgrove, Pa., has a full page in colors in a January Spanish-American magazine; Mexican trade must be good.

ROCKFORD, ILL.—H. W. Buckbee has bought a farm just out of town, to be used in connection with his greenhouse, seed and nursery business.

ROSE MY MARYLAND is well spoken of by expert rose growers who visited John Cook's place both before and at the time of the carnation convention.

CROZY FILS, at Hyeres, France, will now be known as Vve Crozy Fils, his widow, for some years bookkeeper and correspondent, now taking over the business.

START cannas soon if strong plants are wanted for spring retail sales. See how the roots are keeping; if too dry sprinkle on some fine earth; if starting too fast, shake off some soil.

How is the stock of fertilizers? The season will soon be opening up and where good animal manure is scarce it is necessary to use artificial. Don't be delayed in the work for the want of these.

SPRINGFIELD, ILL.—J. M. Dickirson, secretary of the Illinois state fair, now permanently located here, is offering the premium list, which, as it did last year, contains a good line of valuable prizes for florists.

J. H. BURDETT, in charge of the publicity department of the National Flower Show, is asking the various chairmen of the general committees for the names of those whom they have chosen to assist them in committee work.

PRESIDENT ROOSEVELT at Washington last week stole in a side door on the visiting carnationists and was at once busy at hand-shaking, leaving the spokesman of the delegation with an unspoken speech on his mind.

ACCORDING to local papers the government will not now establish the proposed bulb farm at Bellingham, Wash., and Juenemann, the bulb expert who has been located there for some time, has been recalled to Washington, D. C.

WE would remind rose growers of the experiments that have been made with dilute sulphuric acid. When the mildew season arrives they will be wise if they experiment a little along this line for themselves. One part of sulphuric acid to 1,000 parts of water is a safe basis to start from, increasing the strength in bad cases. We would like to hear from growers who try or have tried this remedy for fungus troubles.

CARNATION WEBER'S TOREADOR will not go out till 1909.

FOLLOWING the carnation meeting, the next great event is the annual convention and exhibition of the American Rose Society, to he held at Chicago, March 25-27. Growers promise exhibits that will make this the greatest show in the history of the society.

IMPORTERS who are handling Formosa lilies claim that, although these are mixed to some extent as to types, they insist that such bulbs produce plants absolutely free from disease. This they deem of more importance to the lily grower than the mixture of types.

THE excellent practical paper on the culture of carnations, read by Irving Gingrich, of South Bend, Ind., at the recent convention at Washington, is printed elsewhere in this issue. It is worthy of perusal by all carnation growers.

BRIGHT mornings frequently follow cold nights, and at such times the firing and ventilation need especial care. If the fires are pushed early the effect of this and the sun is to run up the temperature more quickly than is advisable and the hot pipes make it difficult for those in charge to induce a natural and gradual rise. Especially is this the case where hot water is used; steam can be more quickly manipulated. Firemen and section men must work hand in hand in this to insure good results and careful observation of the weather, with altered treatment accordingly, is preferable to any arbitrary rule of temperature.

Orchids Popular in Japan.

"I see very few growers of orchids in America," said H. Suzuki. "In Japan they are very popular. In the city of Tokio there are about 500 greenhouses belonging to private people, in which mainly orchids are grown." One American firm exported $5,000 worth of orchid plants to Japan last year.

National Flower Show.

W. A. Manda addresses the following letter to those who have made pledges for the premium list of the National Flower Show:

Your being one of the guarantors for the National Flower Show indicates that you have a deep interest in the matter, and that you are willing to do everything you can to make this a grand success, not only on account of your being on the guarantee list, but from the professional pride that you have in this undertaking.

As it is, we want to encourage exhibitors to make a large exhibit, and with that in view it has been suggested to me that we should raise a special premium which is to be called the "Guarantor's Sweepstake Prize," to be awarded to the party taking the largest number of points, same to be reckoned somewhat as this:

POINTS FOR SWEEPSTAKE PRIZE.

Cup, vase, or other trophy.....10 points
Gold medal.....10 points
Silver medal..... 5 points
Bronze medal..... 3 points
First-class certificate..... 2 points
Award of merit..... 1 point
Money prize for each $1.....1-10 of a point

This would be a great stimulus to the prospective exhibitors and would make a prize worthy of the undertaking if each guarantor subscribes from $1 up, and not more than $10. Kindly let me know what amount you wish to subscribe for this purpose by return mail in the enclosed envelope. Of course no money is needed until the exhibition opens.

Meetings Next Week.

Boston, Mass., February 18.—Gardeners' and Florists' Club of Boston, Horticultural Hall, St. Paul and Franklin streets.

Des Moines, Ia., February 18, 8 p. m.—Des Moines Florists' Club, Iowa Seed Co's. store.

Building Storehouse for Vegetables.

ED. AMERICAN FLORIST:—

I want to build a storehouse for vegetables in winter, and would be glad of any information along this line. The vegetables to be stored are chiefly onions, cabbage, turnips, beets, parsnips, squashes, oyster plants, etc., in quantity sufficient for 1,000 persons. I wish to be as up-to-date with the structure as possible.

E. W.

This is a big subject to handle in a short article. Its full discussion would almost be out of place in a florist's paper; but the same structure that will nicely handle most vegetables will be a valuable place for most any florist to store bulbs and nursery stock, hence this question is worth much attention.

The subject must be divided into classes; namely, dry storage and cold, such as onions; dry storage and warm, such as squashes, pumpkins and sweet potatoes; and cool storage and moist, for all root crops and cabbage. One place will not suit all the crops mentioned.

Onions will winter best in a cool, dry building, left undisturbed. Any moisture will cause them to sprout and root. They will keep well in crates in heated buildings, where the air is dry and temperature very constant, as in a potting shed. If stored without heat, frost does not hurt them, if it is not too hard, and if they are not handled while frozen, and further, if the freezing is not alternated, thawing and freezing. The rule is to keep onions above ground. Squashes, pumpkins and sweet potatoes do best in warm, dry quarters; that is, above ground and heated.

Cabbage, turnips, beets, potatoes, etc., do better under ground; that is, cool and in touch with the earth's moisture. That is the reason why these are so generally buried in trenches. No other method will keep them so fresh and nice. However, where a few at a time are wanted, to dig in cold or wet weather is a bad job. Many a time a person prefers to do without rather than dig under such circumstances. A building that keeps these in good shape is a blessing. Our modern houses mostly have furnaces and boilers in the basement, and are too warm for such uses. The ideal storage is modern cold storage, and it is practically the only method that is up-to-date. Still, it is often unobtainable. The building that comes nearest to being handy, cheap and efficient is a type much in use among gardeners in Germany. They drive a series of stakes, in pairs, along a line to represent the outlines of their building. These stakes or posts are driven almost to the ground line. Upon these 2x6 are spiked, thus giving a plate to erect the roof. The space between is excavated four feet deep, leaving the walls slightly tapering inwards. These walls are afterwards coated with a thin coat of cement to prevent scaling off. The roof is then erected in span shape, much like a greenhouse roof, using common 2x4 for rafters. A model house is 12 feet wide, 4 feet under ground, 3½ feet above plate at ridge. The boards outside are nailed parallel with plate and lap each other to shed water. The inner boards are nailed up and down to conduct drip down to eaveline, to form an air space. Glass ventilators are provided for light and air on north side, near ridge, say one in ten feet. The first and second rafters are used to partition an entrance from the balance of building, thus making admittance easy in any weather. By providing good drainage a building of this type is most excellent storage. It is easily accessible, can be ventilated at will, and the depth is ample for uniform temperature.

The great drawbacks to ordinary cellars under buildings are lack of ventilation and too high temperature. An independent outside cellar like above is preferable where circumstances permit its construction. It can be made of permanent material and ornamental if desired; it can also be used for a greenhouse in the spring if planned accordingly. Do not get too far away from mother earth is a pretty safe rule.

MARKETMAN.

H. R. AKERS, Chatsworth, N. J.

Cleveland.

The most diligent people last week were the growers; they were kept hustling at the boilers on account of the extremely cold weather. The carnation is the predominating flower just now. The truth is, it would be a great relief to the wholesaler to see the market cleaned up for just one day as it is fairly flooded with carnations. There is a large supply of bulbous stock and it is hard to move. Roses are not over plentiful; the demand for short stock has been greater than the supply. American Beauty continues scarce. Callas and Lilium Harrisii are coming in better, they bring good prices. The call for violets is ahead of the supply; singles bring 75 cents per 100; doubles $1. Notwithstanding the fact that business is dull, a reasonable amount of cheerfulness pervades the wholesale district. We all feel sure that business will and must pick up before Lent.

The employes of the Cleveland Florist's Exchange had quite a scare the other morning, when they came to work as usual, and saw the fire department lined up in front of the store. The Chandler block, which is across the road, was completely wrecked by fire the night before.

D. Charlesworth & Son are establishing a good trade for cut flowers at their busy corner, Euclid and E. One Hundred and Fifth street.

J. M. Strejcek, Broadway avenue, has a large wedding decoration this week. He had several small funerals last week.

A. Graham & Son report a busy week in funeral work.

FORESTER.

Roses are in Large Supply

Maids, Brides and **Richmonds** are in with good crops while **Killarney** is coming fast and should be used in place of Beauties as the latter are very scarce. We grow all the stock we sell and guarantee our flowers both quality and freshness in every way.

BASSETT & WASHBURN, 76-78 Wabash Avenue, . . . CHICAGO.

The Boiler's Bursted.

HOW IT WAS REPAIRED.

This was the alarming report made by a careless and frightened attendant coming running up from the basement of a Philadelphia florist's establishment last week. He had been told to look to the fire as the temperature was getting low and finding the boiler hot with no water showing in the gage, turned in the city supply, with the usual result, a cracked tube or section, but luckily no greater damage. With 15° of frost outside and a badly damaged boiler the prospect was anything but rosy. However, the fire was drawn, the boiler cooled off as rapidly as possible, then filled with cold water to contract the iron and find out how bad the leak really was. Fortunately but one section was damaged, but this was badly cracked on both sides at edges, each crack being from 12 to 15 inches in length out of which leaked about a bucket of water every five minutes.

The flow pipe at the top of the section was disconnected and into the opening was poured three quarts of common bran. In about half an hour there was a perceptible decrease in the flow of the water, although one place between the sections appeared to have a larger opening. This was stuffed with cheesecloth which checked the rapid flow and appeared to give the bran a chance to accumulate and stop up the crack which it apparently did, for in half an hour, the leakage not being serious, fire was started, and half an hour later or about two hours after the accident steam was up, the leak had stopped almost entirely and the system seemed as good as ever. The next day the leak had entirely disappeared and the boiler has since worked satisfactorily. At the first mild spell the damaged section will be replaced, but the incident is recorded here to show by what simple means rapid repairs can be made. The iron being made cold contracts and opens the cracks, into which the particles of bran are carried by the water in leaking through; when the flow is stopped, or nearly so, it shows the crevices to be filled with the bran. Then when the fire is started the iron in heating expands, the crevices become smaller and with the aid of the bran and the rusting of the new surfaces the union is made complete. K.

Grand Rapids, Mich.

The weather the past two weeks has been the very opposite from what it has been all winter, and is making up for lost time. Heavy snow and winds have materially reduced the coal piles. The florists generally are all very busy with funeral work, and February sales will probably be very satisfactory. A great many of the society people have left the city, going to Florida and California, which make social events very scarce.

On February 5 three of Henry Smith's houses were broken in by the heavy snow. Prompt action prevented any serious damage to stock.

A representative of the A. H. Hews Co. has been in town for a few days and sold a carload of pots. B. S.

YOKOHAMA, JAPAN.—A. Unger is reported to have closed out his interest in the bulb and plant business of L. Boehmer & Co. here and Mr. Unger with his family will, it is said, return to Germany in the near future.

"MODERN TRAINING IN HORTICULTURE" is the title of a neat booklet issued by the Massachusetts Agricultural College, describing and illustrating the subjects taught in the horticultural division. These include "Pomology," "Horticulture," "Market Gardening" and "Landscape Gardening," and, judging by the illustrations from photographs and the names of the instructors, the courses must be very full and useful.

CHICAGO.—John F. Smulski has been appointed by Governor Deneen to succeed B. A. Eckhart, president of Board of West Park Commissioners.

Boston.

CONDITIONS UNCHANGED.

The quietest stretch of the whole season is that just passed; an encouraging feature was the strong reaction on Saturday. Market conditions are practically the same as last week with an increase in surplus stock of all kinds rapidly growing. There has been no opportunity afforded for the unloading of any great quantities. The early morning purchases are extremely light and the rest of the day is quiet. With the wholesalers, business is dragging heavily. The rose growers are the only exceptions, for their stock is traveling along at a remarkable pace. Stock of this kind is not over abundant and first quality roses are really scarce. An open market is readily found for all first class varieties. The American Beauty problem still remains the same with practically nothing in sight from the local growers. In view of the high prices asked for the foreign goods the demand has greatly fallen off, and no doubt will remain dormant until a more convenient market presents itself. The output of Killarney has never been equaled, and there is an increasing demand for this rose. Bulb stock is swamping the market and the abandonment of street vending has been seriously felt by the growers of this stock. Owing to the demands of the city government, the street men who disposed of great quantities of stock are now compelled to reimburse the city of rentals and it is now quite difficult to procure licenses. The most severe weather of the winter has made the last week a miserable one for shippers and this no doubt accounts in part for the light trade. Zero has been frequently reached in the city, and several times below that point, while in the suburbs a much colder average was recorded.

NOTES.

A. H. Hews & Co., Inc., are now running their pottery plant to its full capacity after a partial curtailment the past month due to heavy additions, which they were actually obliged to make to meet the constantly increasing demand for their goods. Two new boilers, kilns, dynamo, and specially constructed machinery for preparing clay have been installed, until today their output has been greatly increased. The firm for some years has maintained a large warehouse in Long Island City and has now opened a similar branch in Chicago to facilitate the handling of their western business. This concern has constantly in mind the welfare of its employes and has provided for their amusement a large recreation room 25x 35 feet with billiard and pool tables, various kinds of games and reading matter. The outlook for a prosperous year is particularly bright and according to present indications this plant will be forced to its full capacity filling orders for distribution throughout the country.

A serious fire ruined the establishment of George H. Arnold at Braintree February 4. Three greenhouses, well stocked with flowers and market vegetables, were destroyed, the blaze starting from an over-heated boiler. The loss was $5,000.

Joseph Free the popular salesagent of the Park Street Market who broke his arm in two places by slipping on an icy sidewalk is around attending to his duties with his arm in a splint.

Wm. Sim, of Cliftondale, is distributing a superb line of pink and white sweet peas, the equal of which has never been seen outside of his own establishment.

B.

Amoor River Privet.

We are reminded by the Peters Nursery Co. of the great value of this hardy hedge plant. They say: "When better known it will entirely supersede the California type, being far superior to it in every way."

A Good Advertisement.

The accompanying illustration shows a partial view of Geo. Corbett's place, College Hill, Cincinnati. It is situated on the North Bend road, a fine road which is used very extensively by automobilists. Mr. Corbett uses great judgment in putting out plants which make the best show as the season progresses. The picture does not do the place justice as it is a fine sight when all the plants are in bloom. The aristocracy of Cincinnati when passing the place in their vehicles, often stop and admire the beautiful flower beds and Mr. Corbett has gained many good customers by this method of advertising. No doubt a great many florists could follow his example and not lose anything by the experiment.

S.

Friendship.

Senator Grady summed up the case in responding to a toast at a Tammany Hall banquet on the east side, in New York, recently, when he said: "Friendship is as necessary to man's existence as water is to a flower. It is the golden ray that lights up our journey here below. It is the jewel without price. It is the thing that no man, no matter how rich he is, may spurn. It is a treasure that may be had by any man no matter how poor and wretched. The man without a friend is just in that degree more lonesome than the man without a country!"

WAPAKONETA, O.—"Business," says Wm. McMurray, "is very good in this section of the country."

ROSES, OUR SELECTION, short to medium stems, all fresh stock, $4.00 per 100.

Memphis, Tenn.

BUSINESS SATISFACTORY.

Business conditions have been quite satisfactory here notwithstanding the recent financial troubles in the north. There have been the usual social functions, but the great bulk of the business since the holidays has come from funeral work. Considerable demand for floral designs was created by the funeral February 9 of Capt. Wm. H. Forest, son of the late Gen. N. B. Forest, famous as a fighting confederate officer in the civil war. Every florist in town had some work for this occasion.

NOTES.

The Memphis Floral Co., which does an extensive mail order plant trade in this and adjoining states, has just mailed 20,000 catalogues. A like number of fall catalogues are mailed at that season. This firm is having unusual success with carnations and will build six new houses, 18x100 feet, for these plants as soon as the spring rush is over. Manager Hune expects to attend the coming meeting and exhibition of the American Rose Society at Chicago next month.

Otto F. Wohlroth, of the Idlewild Greenhouses, is busy with the varied catalogue plants handled by Otto Schwill & Co., also the decorative plants and cut flowers needed at their city store. A large quantity of Chicago stock is used at the latter place.

Otto Busek, at the Pierson-McCarty Co.'s establishment, adjoining Elmwood cemetery, has his place in excellent condition, with a good stock of bedding plants coming on for the spring trade.

Olaf Johnson is cutting some fine carnations and he has a large supply of bulbous stock in various stages of development, including lilies, Roman hyacinths, tulips and narcissi.

The plants at Stranahan's Greenhouses are being moved to another location on Evergreen street.

Tacoma, Wash.

Business is about equal to that of a year ago and notwithstanding the financial conditions in general throughout the country we have suffered no such siege of hard times as some other cities. Prospects are especially good. Many plans of improvement and much in the way of building is very encouraging for general business and florists will prosper accordingly. Most growers are off crop with carnations and we find generally the plants are very late in coming into a good cut as they were too small when they were planted. As regards roses few are grown and many shipped in during the winter season. Our best roses are received from east of Cascade mountains and from Sibson Rose Nursery near Portland, Ore. Conditions here are not favorable to successful winter forcing of roses but I believe we can equal any place on earth for fine outdoor grown flowers in summer, the soil and climatic conditions are so especially favorable. As usual asparagus and smilax are very scarce in supply for "greens" but florists in this section have abundance of outdoor greens, such as huckleberry, ferns and mahonia, or Oregon grape.

NOTES.

A. H. Hinze reports business about the same as last year for January, but not quite so good up to date in February. His son is quite low with lung trouble. We are all in sympathy and hope for his recovery.

The Bornerman Bros. said they have had about half an acre of sweet peas planted for some time. That should help some toward a supply of cut flowers.

H. W. Manike has a splendid cut of good carnations in at present, but he reports business poor as compared to that of last year at this time.

F. S. Smith says he has a good demand for all he can grow for wholesale. We regret to report the sudden death of his brother.

C. Halkur of Northwestern Floral Co. expects to add two houses, 20x100 feet, and reports several good gardening contracts.

The contract has been awarded for the building of the $10,000 conservatory to be erected in Wright's park this season.

We are greatly pleased to state that Park Superintendent E. R. Roberts is again reinstated to his former position.

California Floral Co. reports that the store trade has been good up to the present.

S. L. H.

Springfield, Ill.

The regular meeting of the Florists' Club, held February 10, brought out an attendance of 16 members. The coming convention of the State Florists' Association was the one topic discussed and all hoped for a record-breaking attendance. The various committees who have charge of the flower show and trade exhibits are all working hard to make this a successful exhibition and from the list of exhibits promised they will not be disappointed. This will be a good opportunity for western florists to see the novelties and prize winners of the Washington carnation show as they will practically all be here, in addition to novelties in roses and other stock. Boiler and supply men will be large exhibitors at this show as a dozen or more have reserved space in the hall.

Springfield is easily reached by all railroads and inter-urban lines and this should help to bring out a good crowd. The local club will give a banquet to the visitors Tuesday evening at 9 o'clock at St. Nicholas hotel. Prominent men of this and neighboring states are on the programme to respond to toasts and the club will try their best to give everyone an enjoyable evening. Come. FRANK A. FRIEDLEY.

AUBURN, NEB.—E. W. Sultzbaugh will build two greenhouses the coming season.

Chicago.

BUSINESS RATHER QUIET.

Trade has remained quiet, with the two holidays, Lincoln's birthday and St. Valentine's Day, making scarcely a ripple. It is true that there has been some extra call for violets and red carnations, but comparing this week with the corresponding week of last year brings disappointment to the heart of the wholesaler. This is, however, largely accounted for from the fact that the Mardi Gras festival last year came only two days after St. Valentine's day instead of early in March as it does this year. Receipts of carnations are approaching the conditions of a glut on this market. Extra fancy shipping grades are going out quickly, but other grades for the most part, are held over to add to the fresh receipts of another day until the waste barrel takes the lot. White carnations for funeral work and red for special dinners and valentine favors move best. American Beauty roses are becoming scarce and the prices of the best grades have advanced to $6 per dozen, and most houses find it difficult to fill all orders at that. Orders for grades at $3 and $4 cannot be filled in full. Bride, Bridesmaid and Richmond roses are coming in more freely and are fine. Uncle John is also a very good thing. Bulbous flowers are good property this season. They have been a little backward in coming in, but most of them are now seen in quantities. The quality is exceptionally good, too, with the exception of Roman hyacinths. Purple lilac is now in the market.

THE VIOLET SITUATION.

Violets are coming into this market in greater quantities than ever before and are moving more slowly. New York double violets are not up to the grade of a year ago, and the prices being lower this season seem to have made the eastern shippers somewhat more careless in packing than heretofore. The demand for St. Valentine's Day has been very good, most of the houses reporting larger sales than a year ago, with the consequence that there has been less cutting of prices and quotations have been somewhat better maintained. Still, outside of the strictly fancy grades of flowers, there is sure to be disappointment for the growers who held back stock only to unload vast quantities on the market with the hope of getting higher values from the St. Valentine's Day demand. There have been a few homegrown double violets seen on this market, which have been quickly snapped up. Single violets are good in quality and move somewhat better than the eastern doubles.

NOTES.

Bassett & Washburn are now taking out of the grafting bench 30,000 Bride, Bridesmaid and Killarney rose plants. C. L. Washburn says they lost less than one-half of one per cent in the grafting, which they think a phenomenal record. The grafted stock to be planted this year will include 20,000 Killarney, 20,000 Bride, 10,000 Bridesmaid and 2,000 Richmond.

Chas. McKellar is showing some fine lycastes, a fine substitute for cattleyas when the latter are hard to obtain. At the present time some fine Trianæ and Schroederæ in the latter line are seen. Mr. McKeller says St. Valentine's day had a noticeable effect on the demand for gardenias and orchids.

Calling on Luke Collins of the Parkside Nurseries recently, we found that both he and his wife had been down with pneumonia, but both were improving in health. A grand lot of Easter lilies was coming on and the stock of Boston and other ferns, Asparagus plumosus nanus and other decorative plants, was in good condition.

The E. F. Winterson Co. is displaying armadillos, a recent importation intended for plant boxes, or tastefully lined in various colored satins for florists' card receivers. The retail department is undergoing various improvements in the disposition of the floor space.

The Florists' Club at Handel hall, Thursday evening, February 13. An interesting meeting is expected in view of the forthcoming convention and exhibition of the American Rose Society in this city.

Delegates from here to the State Association meeting at Springfield, will probably include W. N. Rudd, August Poehlemann, Leonard Kill, E. A. Kanst, George Asmus, J. C. Vaughan and several more.

Carson, Pirie, Scott & Co.'s decorating department had the Chicago Athletic Club's big $1,500 decoration last week. The George Wittbold Co. took care of the greens and flowering plants.

Vaughan's Seed Store is making deliveries for large lots of new crop Asparagus plumosus nanus seed, their contract crops of which have ripened up liberally the past month.

Head Gardener Fred Kanst of the South parks keeps his pruning brigade in the tree tops these days. Tree planting work on Grant park lake front, progresses vigorously.

Frank Beu is again sending in some of his fine old fashioned wallflowers, but Mrs. Beu, who has the stand on the market says the demand is not what it used to be.

Rose Pink Enchantress is a favorite carnation with the Garland brothers, of Desplaines, and Percy Jones, who handles their stock, finds it a ready seller.

Bert Budlong, of J. A. Budlong's, is not alone a summer automobilist but runs his favorite "Four Eyes" night and day in the winter.

N. J. Kruchten is this year growing bulbous flowers on a small scale. His Paper White narcissi certainly look fine.

A. I. Simmons has been removed from the hospital to his home and is improving slowly.

Mrs. O. P. Bassett left Tuesday night to join her husband at Pasadena, Calif.

Wietor Bros. are fortunate in having a fine cut of American Beauty roses on.

The J. B. Deamud Co. has large receipts of very fine sweet peas.

The A. L. Randall Co. is now receiving purple lilac.

Joe Foerster is regularly receiving fine Winsor carnations.

Lake Michigan is frozen solid along shore.

Chicago Notes.

The Poehlmann Bros. Co.'s new building now nearing completion at Morton Grove, containing offices, packing, cooling and storage rooms, is shown in this issue. The structure, with a pressed brick front, rests on a foundation of concrete, and is 53x153 feet. The entrance to the offices and other rooms is seen at the left under the stone capping having the firm's name plate. August Poehlmann says the structure has all the conveniences that could be desired, not having been built for a day or a year, but to accommodate the needs of the business for 40 years to come. The two-story part of the structure at the right is for foremen's apartments. Carnations in the adjoining Plant A are now in prime condition. Five thousand plants of Winsor are in good crop and show how well this variety can be grown. Rhea Reid and Mrs. Jardine roses are to be tried out here this season.

A. L. Vaughan, of Vaughan & Sperry, says he has booked more orders for violets for St. Valentine's Day than he did a year ago, but he adds that the demand is by no means so great that some the Rhinebeck (N. Y.) growers who have held their stock and unloaded three and five times their usual shipments on the holiday market won't be about as badly disappointed as in former years.

Sharp, Partridge & Co. report inquiries for glass unusually brisk, with prospects for a very fair amount of building for the coming season. No large ranges are reported but many additions to present ranges are in prospect. Glass is exceedingly cheap, but indications are for better values; many are buying now on that account.

Poisoning from the handling of roses has been unusually prevalent this winter, F. F. Benthey has had to doctor his hands. In Weiland & Risch's place Nick Risch had to give up the work on that account, and at the present time H. W. Rogers is nursing a very sore thumb.

Guy French, carnation grower for the Poehlmann Bros. Co., was married February 5 to Miss Mary Parker, also of Morton Grove, and the couple have gone to Arkansas on their honeymoon. Mrs. French is a sister of Mrs. John Poehlmann.

Bassett & Washburn, Chicago, drain the rainfall from a large section of their greenhouses to an artificial pond at a great saving in cost of ice. Pond, ice house and rooms for storing and packing flowers adjoin the greenhouses.

The Atlas block is being repainted. This is the Rialto of the wholesale flower trade, and in it or within one-half a square is to be found the entire list of wholesale florists of the city.

It is understood that the executive committee of the National Flower Show will be called by Chairman Kasting to meet in Chicago March 26, the date of the rose show.

This week it was Lincoln's birthday and St. Valentine's Day. Next comes Washington's birthday and then the great southern Mardi Gras festival March 2-7.

Samuel J. Pearce is sending a full wagonload of bulbous flowers to market daily; double Von Sion and yellow tulips are good sellers just now.

The executive committee of the Horticultural Society will be held at 1411 First National Bank building, Monday, at 3 p. m.

C. A. Samuelson has had several big dinners recently, involving quite an extensive use of orchids for table decoration.

Klehm's Nurseries are shipping the Kennicott Bros. Co. some extra fancy La Reine tulips, grown pink.

The Benthey-Coatsworth Co. will try out a few of My Maryland and Mrs. Jardine roses.

E. C. Amling is receiving fine lots of both long and short-stemmed American Beauty roses.

Geo. Reinberg is now cutting some of the finest Easter lilies coming to this market.

Peter Reinberg is now cutting from fine crops of Richmond and Uncle John roses.

The supply houses report unusually large sales of cheap valentine boxes.

C. M. Dickinson, of E. H. Hunt's, has been at home ill since last Saturday.

Visitors: Andrew Peterson, Hoopeston; S. E. Lawrence, Arrowsmith; Herman Hunkel, Milwaukee, Wis.

SOUTH BETHLEHEM, PA.—Charles Vorkeller reports a very satisfactory trade with increase in business over last spring and excellent prospects for the coming spring. He adds, "I have not found it necessary to lower prices."

Bloomington, Ill.

Business continues fairly good. There has been an unusual amount of funeral work, using all surplus flowers. The Florists' Club is still doing business and the boys have not forgotten the Springfield rally on February 18-19.

K.

Ottawa, Ont.

This city has experienced some real winter weather lately the thermometer going as low as 34° below zero, with few exceptions above zero night or day for 10 days. But thanks to the heavy snowfalls lately which banked up the houses nicely outside, the coal bill has been lessened.

The annual meeting of the Horticultural Society was held last month in the town hall. E. J. Mepstead was elected president. The membership of the society is expected to reach 600 this year. The reports of the society were favorably received and showed it in sound condition.

A visit recently to Frank Williams' greenhouses at Rideau Gardens found everything in first-class shape. There is a good assortment of bedding plants and in fine condition. There is one large house devoted to lettuce and another, 10x150 feet, for early tomatoes.

H. Parks opened a store on Rideau street last week.

R. H. Wright is busy grafting roses. C.

Greenhouse Building.

Lincoln, Neb.—C. H. Frey, four houses 28x200 feet each.

Milwaukee, Wis.—M. P. Vallier, two carnation houses.

Auburn, Neb.—F. W. Sultzbaugh, two greenhouses.

Clayton, Mo.—Geo. Hecht, two greenhouses 25x100 feet.

BRAINTREE, MASS.—One of the large greenhouses of Geo. H. Arnold on Middle street caught fire February 4. The blaze started from overheated pipes in the boiler room in the house. It was confined to the building where it started, and damaged that structure $500. Mr. Arnold valued the plants and vegetables at between $2,000 and $3,000.

Illinois State Florists' Association.

SPRINGFIELD, ILL., FEBRUARY 18-19.

The following is the programme of the third annual convention of the Illinois State Florists' Association, to be held at Springfield, February 18-19:

TUESDAY AFTERNOON SESSION.

"Introductory Remarks," Antrim C. Brown, president Springfield Florists' Club; "Address of Welcome," Hon. Roy R. Reece, mayor of Springfield; "Response," Phil J. Foley, Chicago; "President's Address," Albert T. Hey; "Report of Secretary," A. C. Beal, Urbana; "Report of Treasurer," G. A. Kuhl, Pekin; "Address," E. G. Hill, Richmond, Ind.; "Report of Secretary Advisory Committee Illinois State Florist Experiment Station," W. N. Rudd, Morgan Park; "Floricultural Interests at the University of Illinois," E. Davenport, dean Illinois State University.

The members of the association will be the guests of the Springfield Florists' Club at a banquet at the St. Nicholas hotel, Tuesday evening, 9:00 p. m.

WEDNESDAY MORNING SESSION.

"Summer Bedding," Prof. H. C. Irish, Missouri Botanical Gardens, St. Louis, Mo.; "Our Experiment Stations and What We Have Done," Prof. A. C. Beal, University of Illinois; "Report of Auditing Committee," "Unfinished Business," "New Business," "Question Box," "Election of Officers," "Closing."

The exhibition will be open to the public Tuesday from 4 p. m. to 10 p. m. Hotels: Leland and St. Nicholas.

St. Paul, Minn.

Trade continues good except for an occasional slack day. Stock is rather plentiful, especially bulbous, which is in over supply. Roses are not doing any more than keeping up with the demand and those seen are hardly of as good a quality as might be desired. There has undoubtedly been a considerable saving in fuel this season on account of the very mild weather which has been very unusual. There have been lots of days when plants could have been taken out bare. In fact no wrapping to speak of has been done by those using heated wagons in moving palms. The present outlook for Easter stock is good, especially lilies, of which there will be a lot if nothing happens to them.

The next meeting of the Twin City Florists and Gardeners' Club will be held at the Park greenhouses in Minneapolis Feb. 17, when some very interesting subjects will come up for discussion.

Martin Reukauf, Philadelphia, Pa., was a recent caller. O.

Tel. Main 2617-2618. All orders will have prompt attention. A trial order will convince you.

Philadelphia.

STOCK IN SHORT SUPPLY.

With the thermometer playing hide and seek with the zero mark, as it has been the past week, the shipments to the market have been somewhat shortened and, as the demand has not increased, things are more evenly balanced. American Beauty roses are not at all plentiful, yet all orders appear to be filled at from $6 to $7.50 per doz. for the specials. Richmond is fine—$15 buy the best except possibly for a few of the extra long. Killarney still continues the favorite over Bridesmaid, some very lovely flowers of the former being seen. Robert Scott & Son are sending in a few of the new rose, Mrs. Jardine, very choice blooms, which are held and seem to sell well at $4 per doz. Carnations are in fair demand and since the cold weather set in are keeping very well; $4 is high for the specials, with the exception of a few of the newer sorts which command more. Pink Enchantress does not seem to come up to expectations. Winsor is, however, very well liked and will likely become a standard sort. Beacon is also a favorite and will be extensively planted next season. Tulips and daffodils are now coming in in quantities and prices rule low, $20 per 1,000 being the figure on large lots. Several of the stores have had special sales of these, advertising them at 50 cents per doz. Freesia is fairly plentiful at from $2 to $4 per 100 sprigs. Sweet peas were never more plentiful or beautiful at this season; 75 cents to $1 per 150 is the price. Forget-me-not is just in time for St. Valentine's Day and some good flowers are seen. Violets are in full supply at 35 cents to 50 cents for the single and 75 cents to $1 for the double.

Preparations are being made for St. Valentine's Day demand, some of the stores making quite elaborate window displays. Pennock Bros. and The Sign of the Rose have their windows quite attractive with heart-shaped baskets and boxes filled with appropriate flowers. Pennock Bros'. birch bark hampers are quite up to date, in fact the whole arrangement of their window is an illustration of up-to-date progressiveness that is hardly equaled by any other store in the country. The Sign of the Rose shows an elaborate dinner table decoration in which a cupid and heart-shaped devices play an important part. A surprise box in which when the telescope lid is lifted the sides of the box fall out flat displaying clusters of choice flowers is the center of attraction in another window.

NOTES.

All signs point to a considerable increase of glass the coming summer. Steven Mortonsen, of Southampton, Pa., is in the lead with a house for growing roses, 43x265 feet. A few years ago this would have been a record breaker but now it is just a good sized house. It will be heated by a No. 14 Kroeschell boiler coming all the way from Chicago.

The commission are all booking considerable orders from out of town. The Leo. Niessen Co. say they are having a run on choice spring flowers such as sweet peas, freesias, pansies and bulbous stock. Acacia is now a leader with them, fine sprays of this lovely flower being handled in quantity.

Wm. McKissick's force is kept on the go with the stock of carnations, roses and spring flowers in full assortment. Pussy willows are a strong card just at present.

Myosotis, the great St. Valentine's Day favorite, is well to the front with Edward Reid; one of his growers has a fine lot from which he is cutting very fine sprays.

John McIntyre's growers are having their largest cut of single violets at present and he is still crying for more.

K.

Buffalo.

TRADE QUIET.

Weather conditions the past week have been about as wintry as any in a great many years. Heavy snow, zero temperature and blizzards have been our portion for a week. With this to contend with trade has been quiet, while the supply has been good. Owing to the very cold day on January 29, carnations for McKinley Day did not sell any too well.

NOTES.

About 25 employes of the different stores and greenhouses met at Kasting's hall, February 7, then adjourned to Schlayer's alleys, where a bowling match was played between two teams captained by Edward Slattery and W. A. Adams, the former being the winners, with scores by some that entitle them to the name of champions, while the scores of the others were so small that one could hardly see them. But bowling was not all that the assemblage did. A meeting was called, and, as the crowd was so enthusiastic, it was decided to go into the Florists' Club and help to get the club livened up with the new blood. It certainly was astonishing to see the material at that meeting who were only waiting for an opportunity to get together and form an association with a good man to read a paper occasionally and a night given over to jollification. It will not be long before some representative of Palmer's, Scott's, Anderson's or some one of our enterprising stores or greenhouses will be called upon to read papers before other clubs, as they are certainly wide awake and hustlers. When the S. A. F. meets in August, there is every indication that this city will again be represented with a bowling team, baseball or any other game that will be played.

Wm. F. Kasting is in Erie, Pa., looking after the ice cutting at his big ice house. But before leaving he cut some in this city by being appointed one of the appraisers for the extension of Elmwood avenue, which commission is a very honorable one and one that several were suggested for.

W. J. Palmer, Jr., is serving the county now on the supreme court jury.

S. A. Anderson and wife were in Pittsburg, Pa., last week.

Visitors: J. E. Killen, Toronto, Ont.; C. B. Knickman, of McHutchison & Co., New York; Arthur Zirkman, of M. Rice & Co., Philadelphia, Pa., and M. Beattus, of the Dayton Novelty Co., Dayton, O.

BISON.

SILVER CITY, N. M.—Mrs. A. J. Adams says that business is keeping up well considering the depression in money matters generally.

STOCK OVER PLENTIFUL.

The few days sunshine brought out an abundance of everything, especially carnations; prices fell quickly and carnations are quoted at very low figures, wholesalers taking anything to make a sale. The only redeeming feature is a good demand for white. There is a noticable absence of extensive floral decorations at all the social events. This is especially hard on the sale of bulbous stock which is used so much on tables. Lilies are coming in stronger but are of poor quality. There is a scarcity of Asparagus plumosus, while A. Sprengeri is very plentiful.

The decision at the previous meetng February 4, was by far the largest and most enthusiastic that club has yet held.

The decision at the previous meeting to award prizes brought most every one out. It was carnation night and all who had been to Washington the week before declared the show here was fully up to that, excepting the new varieties. A first and second prize certificate was awarded to the best 50 each of white, red, Enchantress shade, Winsor shade, and deep pink. The club was fortunate in securing the services of Walter Breitenstein and John Murchie as judges. The following is the prize list:

White.—F. H. Westhoff, De Haven, first, with a magnificent vase of White Perfection; S. J. Hatch, De Haven, second.

Red.—F. H. Westhoff, first, with a vase of long stemmed Robt. Craig; Finleyville Floral Co., Finleyville, second, with Beacon.

Pink.—A. T. Lorch, De Haven, first, with Lawson; F. H. Westhoff, second, with Aristocrat.

Light Pink.—Fred Burki, first, with Winsor; J. L. Wyland, De Haven, second, with Rose Pink Enchantress.

Enchantress.—Fred Burki, first; J. L. Wyland, second.

old.

N. C. Madsen had a fine collection of primulas, his Gigantea strain, being the largest ever seen here. His floribunda (yellow), Sinensis (red) and oculata (dwarf) were much admired.

W. Price, gardener for G. M. Laughlin, showed some extra good cyclamens and genistas.

Dr. Shaffner had some very nice orchids including Odontoglossum crispum, O. Coradenei, O. tripudians and O. Andersonianum. He states he has been very successful growing these in this vicinity. The subject for the next meeting is bulb flowers, with a display.

H. L. Blind & Bros. have bought a large lot on Center avenue and are thinking of moving their Fifth street store there.

The Pittsburg Florists' Exchange is receiving a grade of choice carnations which sells well in spite of the glut.

By the reports from E. C. Ludwig, who is wintering in California, he certainly is enjoying himself.

W. R. Rhea has opened a flower store in New Kensington. J.

Plant Notes.

ROSE KILLARNEY, the ladies' favorite, continues to increase in popularity.

J. W. McINTYRE, the Philadelphia commission man, solicits shipments of good forcing lilac.

NEPHROLEPIS AMERPOHLI has been given an award of merit by the Royal Horticultural Society of England.

HYDRANGEA SNOWBALL (H. arborescens alba grandiflora) is being forced in quantity for Easter flowering by J. S. Wilson, of Vaughan's greenhouses, Western Springs, Ill.

SMILAX growers in England are being troubled by an insect that appears to be nearly related to red spider, but is more destructive and very fecund. Fumigation with hydro-cyanic acid gas is recommended for its destruction.

Twenty Years Ago.

Adiantum cuneatum grandiceps was among the novelties.

Madame de Watteville tea rose was being largely forced in New York.

A children's play house was erected in Golden Gate park, San Francisco, at a cost of $35,000.

The first number of Garden and Forest was issued.

Vanda cœrulea was rapidly coming into favor as a florists' orchid.

Overhead piping in greenhouses was coming into favor.

The Socicty of Minnesota Florists was organized at St. Paul, with 34 chartered members.

Cypripedium insigue was largely grown in the east for cutting from.

New York.

TRADE DULL.

The weather the past week was changeable, and, at times, disagreeable; nobody familiar with the ways of the wholesale district, expects it to advertise its prosperity, but there was abundant evidence of dullness. Good roses were rather scarce and kept moving better than other stock, but carnations and bulbous stocks piled up high. The cold winds put the street men temporarily out of business, or turned them into hot dog and roast chestnut channels, which offer no clearing house for surplus violets. While the retailers are buying much stock at practically their own prices, they would cheerfully pay more if they could see better business.

NOTES.

The twenty-first annual dinner of the Florists' Club will be held on the evening of February 29, at the St. Denis hotel, Broadway and Eleventh street, at 7 p. m. The price of tickets is $5 each to members and their guests. All are cordially invited to attend and their prompt acceptance is requested. Contributions of flowers for the decoration of the tables will be welcome and may be sent to W. F. Sheridan, 39 West Twenty-eighth street.

John Nathaniel Hauser, aged 18 years, a son of L. A. Hauser, a wholesale dealer in the Coogan building, has been appointed a cadet at West Point military academy and will enter on his scholarship early in March. In a competitive examination, in a class of 165, for a Cornell University scholarship, a short time ago, this young man passed No. 1, and he has also made a high average in the examination for West Point.

On February 8, Wernz & Koehne, of 61 Fifth avenue, executed a handsome wedding decoration in Grace Episcopal church. This is one of the most noted churches of the city and these young men are to be congratulated that their clientage extends to its members.

Carl Stumm of 237 Fourth avenue, who was closed up for a time on account of the insecurity of the ruins of the burned Parker building, is again doing a good business, and has very nice offerings in floral valentines.

Louis M. Noe, of Madison, N. J., visited the wholesale district, February 28. He has a large American Beauty rose range at Madison, also a large dairy. He says that just now, cows are better property than roses.

Joseph S. Fenrich is handling fine stocks, notably Richmond roses and sweet peas. He gets his peas from Charles H. Totty, of Madison, N. J., who grows everything well that he undertakes.

The new firm of D. Smith & Co. is showing a fine line of carnations, tulips and narcissi. In green, their strings of smilax are of a length and quality that should delight the heart of the decorator.

Up in the Coogan building, the American Beauty roses and Winsor carnations that are being shipped in from F. R. Pierson Co.'s range at Scarboro, are stars of the first magnitude.

The new Fleischman baths were opened February 6, Mr. Fleischman having arranged a fine entertainment to the press and private friends.

John Young's Cottage Gardens carnations are just now noteworthy features of the Twenty-eighth street end of the wholesale district.

It is expected that St. Valentine's Day will bring good business, notwithstanding dull times and a great army of unemployed.

Mrs. John J. Raynor is well on the road to complete recovery from a recent attack of pneumonia.

James Coyle, head salesman for H. E. Froment, is wrestling with the grip.

J. K. Allen is still suffering from the grip.

New York Florists' Club.

The regular monthly meeting of the club was held in the Murray Hill lyceum on the night of February 10 with a large attendance. The feature of the evening was the lecture of J. Thomas Withers on "Tree Doctoring." Mr. Withers' lecture, which was illustrated by stereopticon views, was very interesting and instructive and was well received by the members of the club. The lantern slides showed many fine views of shade and forest trees and various methods for the preservation and protection of trees. At the close of the lecture a number of questions were asked and there was a general discussion, in which Messrs. Scott, O'Mara, Hallock, Janecke and others participated.

The report of the committee on closer relations with the Horticultural Society of New York, which has been under discussion at the last two meetings, was finally adopted and the committee discharged. The report recommends that as many members of the club as feel that they can do so, unite with the Horticultural Society. Appropriate resolutions on the deaths of Victor S. Dorval, Sr., long a member of the club, and Mrs. A. M. Henshaw, the wife of a prominent member, were adopted.

Harry O. May, of Summit, N. J., exhibited pink seedling carnation No. 20, one of W. A. Manda's productions. Nicholson & Grassl, of Barneveld, exhibited Wa-No-Ka, a fine crimson carnation which was much admired. H. A. Jahn, New Bedford, Mass., exhibited his white carnation Lloyd, which showed up in good form. William Sim, of Cliftondale, Mass., exhibited fine blooms of his new violet Boston. F. G. Mense, of Glen Cove, exhibited a vase of fine blooms of the Princess Louise violet. Willis C. Hamilton, of Belfast, Maine, exhibited blooms of a pink chrysanthemum. Chairman Sheridan of the banquet committee made announcement of that coming event to an interested audience.

Keeping Gladiolus Bulbs.

ED. AMERICAN FLORIST:—

In reply to the inquiry as to the best method of keeping gladiolus bulbs at this season of the year I would say that if they have been wisely cared for up to this time there need be little difficulty, although it is true this is the time when trouble generally appears. It is very desirable that the drying process should go on without interruption, as soon after harvesting as may be. Not that the corm will not keep, under certain conditions, even though they remain wet, but there is almost always need for a further maturing and ripening process after digging. This is expedited by warmth and drying out, and contributes largely to the keeping qualities of the bulbs. A corm, even though immature, may pass the winter in good condition if left in situ, and protected only from frost, but it will hardly do this if it is dug and kept in a cold, wet state. The reason for this is that the corm, after being dug, is necessarily exposed to atmospheric influences, attack of germs, spores of mold, etc., from which it would have been protected if left where it grew. Stored corms, then, while presumably safe from freezing are subject to other vicissitudes, from which it requires care and watchfulness to protect them.

In general, they must not be exposed to extremes of heat or cold, of dryness or moisture, and should be fairly ventilated, or exposed to the air, as the results of improper conditions will become more apparent from this time of the year onward to time of planting. Usually they are stored in cellars, where the atmosphere is confined and has a tendency to be damp and cold. This condition will impair the vitality of the bulbs and probably induce decay. A well lighted and ventilated cellar with a furnace or stove in occasional or constant use, is an excellent storage room. But here the opposite extremes of heat and dryness are to be guarded against.

If the bulbs are too cold and wet they will decay. If too cold and dry the black spot, or some other fungus or mold, will appear. If too warm and wet, growth will begin, which is fatal to good result in the field. While if too warm and dry the bulbs will shrivel and shrink, losing vitality in the process. Frequent inspection will determine their condition and point out the proper course to follow. They can be very well wintered spread out in trays or racks, or on wide shelves four or five inches deep, or in baskets suspended from the cellar joists, or in the common potato crates filled about half full. A plan I usually follow in the later winter months is to carry the bulbs outdoors, on a fine, sunny day, when there is no danger of freezing, and spread them out for an hour or two in the sun, to aerate and freshen them up. This brightens them up greatly after a long period in close confinement. They need careful attention at this time, but if properly cured at the beginning of the season the difficulty of keeping them through successfully is greatly reduced.

CUT FLOWERS OR DESIGNS will be Delivered for the Trade on Wire or Mail Orders in Best Qualities and Prices.

St. Louis.

CARNATIONS GOOD.

All kinds of flowers with the exception of roses have been plentiful. Carnations, bulbous stock, lilies, violets, etc., have been in full supply with prices on the decline though very low prices have not as yet been reached on anything. It is expected that quite a demand for flowers will be called for on St. Valentine's Day, especially violets. Some very fine carnations are now in but roses do not seem to increase any. After Lent is in, roses it is expected with fair market will stand to bloom and then we may look out for a glut. Von Sion and other narcissi are getting plentiful, but as yet have moved fairly well. Smilax, Asparagus Sprengeri and A. plumosus are selling well. There has been quite a demand for wild smilax. Freesias are also coming in plentifully.

NOTES.

The Horticultural Society, in seeking a good location in which to hold its spring flower show, should bear in mind the large vacant buildings in the heart of the city caused by the western movement in trade circles. A good location and suitable building can surely be secured, especially considering the high standing of most of its officers and members. Let them get a hustle; we want the best and biggest show ever given here.

During the recent sleet storms, the good work of the forestry department showed itself. Hitherto after a blizzard the streets were strewn with dead trees and limbs of trees, now, owing to Andrew Myer, Jr.'s, ordinances requiring the cutting out of all dead wood, the streets are entirely freed of litter.

Young & Sons had a fire at their store Monday afternoon, some excelsior in the basement taking fire. It was quickly extinguished without loss. They have a very fine assortment of white and pink azaleas. They had the decorations at the second annual ball given by the Imperial club.

R. F. Donnell of Springfield, Ill., was in the city on behalf of the Springfield Florist Club, boosting up the floral exhibition to be given by the state society, February 18-19. It is expected quite a few will visit the show.

The Florists' Club will hold its monthly meeting on Thursday. Carnations will be the feature and a large attendance is expected.

Chas. C. Young, eldest son of James Young, will be married to Miss Katherine Courtney, February 22.

St. Louis Seed Co. is very busy with mail orders, disposing largely of seeds, canary birds and goldfish.

Geo. Hecht of Clayton is building two houses 25x100 to raise carnations, violets and sweet peas.

Chas. Hecht has three houses in which he grows carnations and violets.

Toledo, O., Florists on an Outing.

To stimulate more life in our club, which seems to have fallen in a long winter sleep, J. L. Schiller suggested the visit to some of our nearby out-of-town and local growers, and as the idea found sanction among the members, a trip to Tiffin and Fostoria was decided upon.

February 9 found eight members, led by our president, ready to go to Fostoria, where friend Sackett met us and joined us to Tiffin for a visit to Ullrich's greenhouses, which are now conducted by the late Lewis Ullrich's three sons. Ullrich's place has always had among us the reputation of an exceptionally clean place, and we were certainly not disappointed. This plant consists of several small houses and one up-to-date large house about 40x250 feet, in all about 75,000 feet of glass. Whatever a retail place demands is grown, while carnations and roses are mainly for shipping business. The roses were off crop, but looked very good and one could see that heavy cuts have been made. The main varieties are Bride, Bridesmaid, Perle and Meteor. The carnations also looked well, consisting principally of White Perfection, Boston Market, Enchantress and Mrs. T. W. Lawson, all in good condition. Good callas, violets and exceptionally good mignonette and antirrhinum were also there in limited quantities. The cold storage houses for bulbs and cut flowers were of great interest to our boys and the apple-pie order in which every tool and supply was found was highly commented upon.

Refreshments were served and the city store, recently opened, was inspected and found also up-to-date, as good and elaborate as many a high tone affair in a large city. The Ullrich boys then led us to a hotel, where an elaborate dinner awaited us. They gave us a treatment which has engraved their names in our hearts for a long time to come.

We then took our car back to Fostoria, accompanied by the Ullrich boys and we found here in the greenhouses of the Fostoria Floral Co., E. R. Sackett, proprietor, another treat. Sacket is specially fortunate with Golden Gate roses. Flowers on long, strong stems are cut in a very large proportion, as are also Bride and Bridesmaid. Enchantress carnation is grown here to perfection, one house was a sight, flowers perfect and of very good color, and all other carnations were of first quality as well. Roses and carnations are the main specialties here and besides, mixed stock for home trade is grown as much as needed. Sackett's place covers about 60,000 feet of ground and four more houses will be built this spring. The material has all been ordered and is expected to arrive shortly. Sackett wants to have his houses all planted by June 1.

Refreshments were served and unfortunately our time drew to a close, and we had to depart, but we did so with our hearts full of good feeling for our hosts. Try it, brother florists, and see how much nearer you can come together in good fellowship. We hope to derive lasting benefits from it for everybody.

SCH.

NEWPORT, R. I.—If the plans of the Horticultural Society are carried out before another winter it will have a large hall for its own use. For some time the society has been hampered for room when at its exhibitions, none of the city's halls being large enough to permit a proper display and the members of the organization are talking of erecting a hall of their own. The society has again decided to have a strawberry and rose show in June.

They Like It.

TYPICAL CALIFORNIA ONION SEED FIELD.

The Seed Trade.

American Seed Trade Association.

Geo. S. Green, Chicago, Pres.; M. H. Duryea, New York, First Vice-Pres.; C. E. Kendel, Cleveland, O., Sec'y and Treas. Twenty-sixth annual convention, June 23 to 25, at Hotel Ponchartrain, Detroit, Mich.

BARTELDES & Co., of Lawrence, Kans., carry a good line of tree seeds.

VISITED CINCINNATI.—A. J. Pieters, Hollister, Calif; C. R. Kimberlin, Santa Clara, Calif.

LOUISVILLE reports red and white onion sets scarce and yellows selling at about $2 per bushel.

COUNCIL BLUFFS, IA.—Burglars entered the offices of Shugart & Ouren recently but were unable to find any booty.

GRASS SEED contract prices on the board of trade at Chicago, February 11, are noted as follows: Prime Timothy, $4.85; medium red clover, $19.30; choice white clover, $14.50.

NASHVILLE, TENN.—L. H. Hitchcock & Son, seedmen here, say: "The seed business opens well, notwithstanding the so-called hard times. Seeds are higher than ever before, but the farmer seems to have the money to pay for them, and does not regret parting with his money to secure the seeds he wants."

MEMPHIS, TENN.—Seedsmen here are looking forward to good business this spring, on account of the high price which cotton is bringing. The Otto Schwill Co. has taken the store next door, making an extensive addition to its plant on Front street. Joe L. Ullathorne left for Springfield, Ill., February 10.

BIRMINGHAM, ALA.—The Amzi Godden Co. finds trade somewhat slower because of the severe cold weather, and quite contrary from February of last year. This firm found no falling off in the demand for flower seeds or ornamental stock, but rather an increase. Customers are somewhat disposed to delay orders on account of money matters and late season.

SAN JOSE, CAL.

Seed Crop Outlook in California Feb. 1, 1908.

This season, up to January 22, the weather has been mild on the Pacific coast, with no drying north winds and with a very moderate rainfall. This, however, has been sufficient since the conditions have given the crops the full benefit. The rain has also fallen at frequent intervals, enabling the growers to push steadily on with planting. Since January 22, the temperature has been somewhat lower, which has been welcomed by nearly all growers, as some crops have been developing too rapidly. More rain has since continued to fall and the fields have been too sticky to permit of any working in them, but this is a benefit rather than otherwise, as the rainfall is needed and the planting of seed crops is about finished.

Sweet peas are all planted and up. Onions are all set with the exception of a few odds and ends and lettuce planting is well along. There is really no hurry about this item until March 1. Radish, carrot, parsnip, salsify, etc., are all set and growing. Cucumber, tomato and tender flower seeds; also any other crops that light frosts will injure and kill are either now being started in cold frames or will be planted later in the open ground after danger from frost is past.

The total acreage of seed crops in the Santa Clara valley for 1908 will approximate 5,000 acres. The acreage of sweet peas and lettuce sown this year will equal that of each of the past two years and may be some larger. The onion area harvested in 1906 approximated 2,500 acres, in 1907 1,500 acres, and that planted for 1908 crop something over 2,000 acres. The acreage actually harvested will of course depend upon weather conditions between now and harvest time.

This winter some of the smaller growers of onion seed have set as low as one-fourth their usual acreage, while others have planted the full usual amount. The two largest growers have their usual acreage about full. With the exception of the onion the acreage of seed crops planted this year would seem to be a full average and on some items above the usual amount.

Some California onion seed growers had onion bulbs grown in Oregon the past year and are highly pleased with the result, having received good medium sized, hard and well ripened bulbs. Some experiments have been made with growing onion seed in the Salinas valley. There is a diversity of opinion, but a large majority of the California growers are agreed that it is not a suitable location.

It is reported that the new Spencer types of sweet peas cross fertilize badly owing to the open character of the flowers. Also that they are shy seeders and, when bred to increase the yield of seed, revert to the older types.

The Dreer-Burpee Dispute.

ED. AMERICAN FLORIST:—

We are glad to inform you that the unfortunate differences which have arisen between our houses have been amicably adjusted, and we hope for the good of the seed trade.

SEED TRADE NOTES

Seedsmen at Canners' Convention.

Among those in attendance at the Canners' convention at Cincinnati, O., were A. T. Terrel, Saginaw, Mich., W. H. Grenell, Pierrepont Manor, N. Y., Hogg & Lytle, Port Hope, Ont., C. B. Coe, of D. M. Ferry & Co., Jerome B. Rice, Jerome B. Rice, Jr., N. B. Keeney, John C. Leonard, Rogers Bros., T. F. Woodruff, Arthur B. Clark, C. S. Kunz, S. M. Isbell and Henry Bertoli; W. W. Barnard and one representative Leonard Seed Co., four representatives Albert Guttman, Manitowoc, Wis.

Seed growers report booking all the orders they cared to take for Alaska at $2.25 to $2.75; probably the average of the business was about $2.50. Wrinkled sorts were taken on at 25 cents per bushel higher. Surprise was in fair demand. The canners bit greedily and every seller came away well booked up. Spot Alaskas sold slowly as low as $3.50, while Horsfords and Advancers were offered at $4.25, possibly $4.

LOS ANGELES, CAL.—Four inches of rain fell last week; it was badly needed.

VISITED CHICAGO.—Albert Guttman, Manitowoc, Wis.; C. N. Keeney, Leroy, N. Y.

GREGORY & Son, Marblehead, Mass., list their Improved Yellow Globe onion seed at $6 per pound; this looks like old times.

L. L. MAY & Co., St. Paul, Minn., find the trade ahead of last year owing to the fine weather in January. They look for an early season and a short one.

INDICATIONS point to double the usual acreage of canteloupes says the Fruit Trade Journal. Arizona and California districts are doubling their plantings.

THE JOHN A. SALZER SEED CO., La Crosse, Wis., reports its mail trade 10 per cent ahead of last year and less of a tendency on the part of buyers to ask for special quotations.

LOUISVILLE growers are getting about $1.90 per bushel for onion sets this week, while dealers are asking $2.25. Louisville Hybrid seed of 1907 growth is offered at 75 cents per lb.

ROCKFORD, ILL.—R. H. Shumway reports his mail trade very good, returns averaging $1,000 per day. Another catalogue firm, offering Red Wethersfield onion at a low rate is said to be sold out and can hardly buy at wholesale to meet his retail rates.

CLEVELAND, O.—The trade will regret to hear that fire in the Plain Dealer office here, February 2, destroyed 90 per cent of A. C. Kendel's catalogues, all his electro plates and three-fourths of the electro cuts, delaying the mailing of the catalogue about 10 days.

LAWRENCE, KANS.—Barteldes Seed Co. reports increased orders with increased money value over the first week in February, last spring. The trade is running so far pretty heavily to vegetable and field seeds still with a liberal demand for novelties well exploited in the catalogue.

C. R. KIMBERLIN started his eastern trip with an experience in a serious railroad accident the first hour out, in which 30 persons were injured or killed. At Chicago he had a three days' attack of the grip. He reports the contract seed demand good, justifying, he says, an advance in onion prices.

NEW YORK.—Frank M. Duggan, with Rickards Bros., now proprietors of the Bridgeman Seed warehouse, 37 E. Nineteenth street, lately celebrated the twentieth anniversary of his connection with this house. Mr. Duggan came to this country in 1888 after serving an apprenticeship with McKenzie & Sons, Ltd., of Cork, Ireland. He has been with the Bridgeman house ever since.

FORMOSA LILIUM LONGIFLORUM
Ends the growers' trouble; absolutely free from disease.

Lily-Bulb Culture in the United States.

Extracts from a bulletin issued by the Bureau of Plant Industry, Department of Agriculture, Washington, D. C.

Disease in Imported Bulbs.

At the present time Bermuda is the main source of supply of Easter lily bulbs for the United States. The mild winter climate of the island is very favorable to the growth of these lilies in the open air, but the area of arable land is limited and many of the farms are so small that alteration of crops is not practiced with lilies, onions, and potatoes, which are the staple crops.

As a result of these conditions and the fact that careful selection is not practiced the vigor of the lily bulbs produced is lessened and weak plants are produced from them. As a consequence the plants grown from Bermuda bulbs in greenhouses in the United States are in a very unsatisfactory condition. In many cases from 50 to 75 per cent of the plants are diseased to such an extent as to be practically unsalable; in fact, they are so seriously affected that many florists would willingly give up their cultivation altogether were it not that their patrons demand the lily in its season. The problem how and where to produce the bulbs within our own borders therefore confronts those who would continue in this industry. That this has led to efforts being made in this direction by the department, by seed firms and others in various sections of the United States with results more or less unsatisfactory does not prove the impossibility of ultimately solving the problem by continuing the experiments as now carried on. By abandoning the propagation of lilies as practiced heretofore and adopting methods more likely to lead to a radical elimination of the disease, the principal drawback to lily-forcing, much would be gained, it is believed, toward rendering all further experimentation of practical value. This accomplished, the difficulty of finding localities in one or several of our states, where conditions of climate and soil favor the mass-production of marketable lily-bulbs, would not be so great. It is to this end the bureau of plant industry has undertaken to demonstrate by carefully conducted trials that success is to be looked for only in a first start with seedlings. The first step in an extended chain of subsequent trial cultures was the raising of lily-seedlings in the department greenhouses, and from these several pounds of seed resulted. This was distributed on the Pacific coast and in Florida. The seedlings grown in California showed conclusively that with liberal treatment first-class bulbs can be grown by this method much more quickly than by asexual propagation. The plants are almost free from disease. A few plants show it here and there in first generation seedlings, but in the second and third generations it is difficult to find an affected plant. These results have been so encouraging to practical men on the coast that several are now engaged in getting up a stock of seedlings upon a large scale.

Suitable Localities for Lily Bulb Growing.

Although enough has not been done in an experimental way to ascertain all of the localities where lilies can be grown successfully, it may be stated that the lily seedlings have shown great vigor where the winter temperature does not fall below 24°. Below that point the plants get a check to their growth and the foliage puts on an undesirable yellowish tinge, which remains during the winter.

In Florida, seeds sent to persons who undertook experimental work has not given good results. The northern and central parts of the state occasionally get much too cold to insure strong winter growth. In the southern part where seed has been sent the reports of those who were experimenting are not very favorable.

At Miami, Fla., as also at Key West, the conditions proved most favorable

Forcing Asparagus and Rhubarb.

NOW is the proper time to set your Asparagus and Rhubarb roots for **forcing.**

Fine 8-year-old roots of **Asparagus;** enormous; larger than the top of a bucket; will force readily; only $5.00 per 100. Fine **Rhubarb Clumps,** immense; will produce magnificent stalk; only $6.00 per 100; smaller, $3.00 per 100.

for the growing of lily bulbs, the climate closely resembling that of Bermuda. In the northwestern part of the state of Washington lilies may also be successfully grown, though the seedlings in the first year would probably need winter protection.

In many parts of California, especially in the hot interior valleys, where good soil and plenty of water are available and the winter temperature is not too low, the seedlings thrive well. At Loomis, a few miles northeast of Sacramento, the soil and climate are well adapted to their needs. Some areas in that vicinity are nearly frostless, and the lilies come into flower as early as anywhere in the state, with the possible exception of the foothills near Los Angeles. So far, none of the seedlings have been grown at Loomis, but judging from the growth made by mature bulbs sent for seeding purposes and comparing it with that made in other sections the advantage lies with the Loomis locality. Very little disease was apparent in the foliage, and the flowers were open several days in advance of those from bulbs planted at the same period in the valleys of the southern part of the state.

At several places south of San Francisco selected for experimental work, it was impossible to secure the carrying on of the work necessary for the raising of bulbs from seed. The seed would germinate well but when it came to planting out the seedlings in spring the farmers and florists could not be brought to believe that it was possible in 12 months' time to raise a flowering plant from a seedling not more than two inches high.

Other localities in California where thorough trials gave good results were Santa Ana, Ventura and Longbeach. Experiments with seedlings and matured bulbs at Yuma, Ariz., and at Brownsville and all the extreme southern parts of Texas proved that lily culture could be carried on there also with best success.

The Best Varieties to Grow.

During the past three seasons in California the best success has been with seedlings which were obtained by crossing the red-stemmed longiflorum giganteum with longiflorum Harrisi. The progeny is strong and in some localities totally free from disease. In the open fields they come into flower about a week later than the true L. Harrisi. These seedling lilies of the parentage mentioned are composed of four distinct types: Long-leafed and short-leafed green-stemmed plants, and long-leafed and short-leafed red-stemmed plants. All show a remarkable freedom of bloom. Fred. Rafferty, of Santa Ana, Cal., bloomed a large number of them in the spring of 1907. Although the seedlings were only about three inches high when planted out in June, 1906, some of them

Conway's White Branching Aster.

The flower is pure white, of unusual size and fine shape, with long stiff stems. Blooming from mid-season to late. Is considered by leading florists to be the best and most profitable aster ever grown. **Trade Packet, $1.00; Half Ounce $3.00; Ounce, $5.00.** Cash please.

DAHLIAS.

Now is the time to place your order for Bulbs which will insure you getting named varieties in any quantity; delivery to be made this fall or early spring.

DAVID HERBERT & SON,
Successors to L. K. Peacock, Inc., ATCO, N. J

had 28 flowers to a single stem in June, 1907. Two years ago at Ventura, S. Cole had some 2-year-old-seedlings of the same cross, one of which had 35 flowers to a stalk.

Advantages of Seedlings.

The seedling method of propagation not only has its advantages in so far as the elimination of disease is concerned, but it is also a much quicker method than propagation from scales or even from small bulbs. The seedlings one year after planting very often show as many as 20 flowers to the stalk. During the past season (1907), as already stated, Fred. Rafferty, of Santa Ana, Cal., had seedlings with 28 flowers. Such plants can be depended on to give bulbs of salable size the first year. Comparatively few of the 9 to 11-inch size are produced. The usual sizes are from 5 to 7 inches, but a considerable percentage of the 7 to 9-inch size is found in lots which have received good attention. The crop is ready for harvesting by the beginning of August. The smaller bulbs when replanted soon after being harvested grow much better than imported material.

The Pollination of the Flowers.

To insure the production of seed, the flowers must be artificially pollinated, as capsules are rarely formed without this operation. The pollen is not scattered by wind to any extent and insects evidently visit the flowers without accomplishing a satisfactory transfer of pollen from the stamen to the stigmas; therefore, recourse must be had to hand pollination. This consists in taking three or four stamens between the thumb and forefinger and rubbing the anthers, which are copiously supplied with pollen, against the viscid surface of the stigmas. It is best to transfer the pollen from the flowers of one plant to those of another, as the flowers then set seed better than when the pollen of one flower is transferred to the stigma of the same flower or to other flowers on the same plant.

The best time to select pollen is when the anthers have shrunk considerably and the pollen adheres to them in great masses. This should be applied to the stigmas shortly after the segments of the flowers open; the stigmatic surface will then be covered with a viscid substance which enables the pollen to adhere very easily.

Sowing the Seeds.

The seeds should be sown in well prepared beds and it is advised to sow them as soon as ripe, about the latter part of August. Good, porous soil for the purpose is necessary and if covered by some sort of airy roof, the material used, if cloth, serving also as a shading, success will be all the more certain. For the covering of the seeds, one-half inch of soil and cocoanut fiber in equal parts has been found to be the best. Kept moist and accorded proper attention, when above ground, which will be in from three to six weeks, there is little likelihood of meeting with discouraging failure in the raising of seedlings with which to stock the fields.

Planting Out.

It is understood, as in all good cultures, that ground in which lilies are to be grown, has previously been enriched and properly prepared. Very heavily manured the season before it is given over to lily-culture and first grown to something else is a good plan, followed by many growers.

The seedlings at planting time are necessarily very small, having only a few very short and narrow leaves—in fact, they seem anything but promising—and to one who has not had experience in this line of work the appearance of the seedling plants would very naturally tend to discouragement. The rows in the bed should be about eight inches apart, and the plants at least five inches. If the soil is loose and easily worked, they can be put in by hand; otherwise a short trowel is the handiest tool. Care should be taken not to have the seedling bed too wet at the time of transplanting, as this has a tendency to make the plants flabby. Water should be given as soon as they are put in the ground.

More Dissatisfaction with Burbank.

Has he produced a hurtless pain, a pangless insult, a privationless poverty, a maliceless hate, a hungerless starvation, a fatigueless weariness, a toilless work, a nightmareless mince pie, a leftoverless holiday turkey, a chestnutless minstrel show, a fidgetless boy, a colicless baby, a harmless gossip, a stingless hornet, a venomless rattlesnake, an innocuous poison, a scentless onion, a burrless chestnut, a chaffless sweat, a discordless peacock or a pianoless flat?

Has he? Isn't he neglecting the things he should have tackled at first had there been any real benevolence mingled with his skill? He ought to be investigated along with every one else. I am beginning to lose confidence in Luther and something ought to be done. This loss of confidence is an awful thing.

ROUND PEAK, N. C.—G. A. Holder, who handles galax leaves very extensively, says his trade has this season far exceeded that of any previous year.

JAMES VICK'S SONS

ROCHESTER, N. Y.

The Leading Specialists and Largest Growers of High-Grade Asters in the World.

Two New Varieties for 1908

VICK'S IMPERIAL SUNRISE.

A novelty of extraordinary merit. Seedling from Vick's Daybreak, but distinct in form of flower, each petal being perfectly quilled. Color, delicate pink. Plant a robust grower; upright branches, each crowned with magnificent double flowers three to five inches in diameter. Type securely fixed. Sure to be a winner. Packet, 25c; two packets or more, 20c each.

VICK'S EARLY BRANCHING.

Developed from Vick's Late Branching. Flowers of this new variety can be placed on the market ten days ahead of Late Branching sorts. Plants have few branches which are free from side buds, the whole strength of the plant being given to the development of large perfectly double flowers. Long stems. Two colors, white and rose. Packet, 25c; two packets or more, 20c each.

For prices in quantity see our "Aster Book for Florists."

OTHER FAVORITE VARIETIES.

Hohenzollern, early, Hohenzollern, late,
White Fleece, Early Wonder,
Empress Frederick, Giant Comet,
Semple's Branching Pink, Queen of the Market.

For prices see our "Aster Book for Florists."

MARKET GARDENS.

Transplanting Cucumbers.

Cucumbers for late spring and early summer are very likely to continue a most valuable crop for the greenhouse man. With the increasing enemies of the outside crop, there is no immediate danger of an oversupply. An important point in this work is transplanting, for we cannot very well sow the seed where the vines are to grow as the beds are then occupied by other crops and time is money. I prefer pots to boxes. If boxes are used, be sure and pound the soil into them as firmly as possible. Generally, damage occurs to loosely planted stock in handling. A good method is to use inverted sods, four inches square; but on the average commercial place sod is a slow process, or hard to get. By potting the seedlings into clean 2½-inch pots, and when root-circled shifting into clean 4-inch, grand plants can be produced at a small cost.

To get the young plants in just the right condition to pot, I prefer to sow the seed thinly directly on to the bottom of shallow flats, without earth. Cover less than one-half an inch deep with a mixture of coal ashes, sand and rich earth and place in a warm spot, where 60° is the minimum. This method produces flat rooted seedlings that will lift without any shock if potted the moment that the character leaf shows between the seed leaves. That is the right time for most any seedling to be transplanted; pot deeply and firmly and water only sparingly at all times; keep a little on the dry side and warm. No shade is needed if this is done properly.

MARKETMAN.

W. H. DESPARD, manager of White & Co., Ltd., Toronto, Canada, is secretary of the Celery Dealers' Mutual Organization, now three years old.

Getting Rid of Moles.

ED. AMERICAN FLORIST:—

Can you tell us how to get rid of moles? They have ruined a crop of lettuce grown in solid beds here. Any help you can give us will be appreciated.

LETTUCE GROWER.

We have found any one of the following traps useful in destroying moles: Out o' Sight mole trap, Animal Trap Co., Abingdon, Ill.; Brandt mole trap, L. M. Brandt & Son, Huntsville, O.; Reddick mole trap, W. A. Reddick, Riverside works, Niles, Mich.

Moles are insectivorous and do a great deal of good in destroying cutworms, white grubs and other noxious insects. Occasionally in hunting for their food they do indirect damage by disfiguring lawns and upheaving tender vegetables. It is stated that moles may be killed by inserting a crystal of strychnine in a decapitated earth worm or white grub, which should be carefully dropped into one of the fresh runways.

The Nursery Trade

American Association of Nurserymen.
J. W. Hill, Des Moines, Ia., President; C. M Hobbs, Bridgeport, Ind., Vice-President; George C Seager, Rochester, N. Y., Sec'y.
Thirty-third annual convention to be held at Milwaukee, Wis., June, 1908.

MONTGOMERY WARD & Co., the Chicago mail order house, now have a nursery at Arlington Heights, Ill.

THE finest booklet of fruits we have seen recently is George C. Roeding's of Fresno, Calif., containing some Burbank specialties in colors.

MOBERLEY, Mo.—J. P. Sinnock of the Sinnock Nurseries recently closed a deal whereby he sold a carload (10,000) apple trees to an Iowa firm, to be shipped in the spring.

WHEN dividing up old clumps of herbaceous perennials plant up the outer portions which are young and vigorous and throw away the older, worn out portions in the center.

FREDERICK W. KELSEY has been elected president of the American Nursery Co., a combination of several nurseries at Springfield, N. J., and Flushing, L. I. The capital stock is $100,000.

JEFFERSON CITY, Mo.—The Jefferson Floral Co. has secured the contract for beautifying the grounds of the new Jacob Moerschel place on Swift's highway. The grounds contain about six acres, and there will be drives, parks and artificial lakes of the finest surrounding the beautiful mansion.

PORTLAND, ORE.—As the result of the park board's decision to set aside three park blocks for the planting of roses and maintenance as permanent rose gardens, this city will hold one of the most unique civic celebrations ever planned in the United States. A day within the next few weeks will be selected for the setting out of 5,000 rose bushes in mid-winter, when howling blasts are sweeping through the middle west and east.

TEXAS NURSERIES.—The Texas State Department of Agriculture, gave out a list of nurseries doing business in the state January 22. The list shows the total number to be 234 which is a decrease of 12 from last year and six from the previous year. The list gives the names of the nurseries, the name of the manager or proprietor and the postoffice address. This list was prepared by Professor Dixon, the state nursery inspector, and the nurseries appearing in the list are authorized to do business in Texas.

NASHVILLE, TENN.—The third annual convention of the Tennessee State Nurserymen's Association, held January 31, at the Tulane, proved to be the largest and by far the most enthusiastic meeting in the history of the organization. Over 30 members attended and heard with interest the several papers and addresses by the different members. Following are the newly elected officers: H. G. McCord, of Pulaski, president; E. W. Chatten, of Winchester, vice-president of middle Tennessee; F. Byrns, of Sylvia, vice-president of west Tennessee; S. Dougherty, vice-president of east Tennessee; Prof. G. M. Bentley, Knoxville, secretary-treasurer.

ELIZABETHTOWN, KY.—The annual meeting of the State Horticultural Society was held at West Point, Jan. 28-29, with a large attendance from all over the state, especially from Jefferson and Hardin counties. A long programme of about 25 speakers was carried out, resulting in many good ideas being exchanged by the various fruit growers.

ALLENTOWN, PA.—The will of W. B. K. Johnson provides that his estate shall eventually go to charity. It gives the income to his wife for life and after her death, the entire estate, valued at upwards of $40,000, is to be divided among various churches and hospitals. Mr. Johnson had one of the largest nurseries in Pennsylvania on his farms near here and was long a lecturer on fruit growing for the National Department of Agriculture.

To Introduce the Lignon Berry.

Conrad Skarstedt, a Swedish horticulturist, who is anxious to introduce in this country the lignon berry, which is similar to the American cranberry, arrived at New York recently. Mr. Skarstedt believes he can educate the American taste to like the Swedish berry, and, if successful, will promote farms and factories for its culture and preparation for the market in this country.

Grafting Pecans on Hickories.

The following note is a reprint from the Cedar Rapids, Ia., Times, of December 12, 1907.

Dr. Dennis, of Cedar Rapids, a prominent member of the Iowa Park and Forestry Association, which holds its annual meeting this evening and tomorrow at the state horticultural rooms at the state capitol, has a unique scheme to grow southern nuts on Iowa trees. As a sort of a Burbank of Iowa he has carried out experiments and discovered that by grafting pecan shoots on the branches of common shell bark hickory trees that a fine grade of southern nuts can be produced. He has succeeded in growing chestnuts of a fine grade and also has managed to produce a fine sample of English walnuts off the graftings on northern nut producing trees.

Dr. Dennis refers to this matter as follows:

ED. AMERICAN FLORIST:—

The enclosed note of January 11 from you, and the Iowa paper clipping have been sent me by Prof. S. A. Beach for reply. I cannot account for the article, that is scarcely one-half truth, unless it grew out of the fact that I had quite a collection of nuts at the Iowa State Horticultural Society meeting at Des Moines in December last. Most of these were hickory nuts and chestnuts that were grown in the vicinity of Cedar Rapids, Ia. These chestnuts were my seedlings, some of which are hybrids of the native and European strains; these I originated and they are perfectly hardy and are large and fine. The pecans exhibited were specimens from the south, and so labeled; they were exhibited only to show Iowa horticulturists the possibilities in fine fruit of the pecan. At no time have I stated that these were grown in Iowa, but in a paper I read at the meeting I advocated the use of the red hickory for a stock to graft our shellbark onto and expressed a belief that hardy pecans might be made a success on the same root, for the pecan is native in southeastern Iowa as far north as Davenport and Clinton. These should be used instead of the tender paper shell varieties from the gulf states. The English walnut was not mentioned in my address. I have fruited the Japan walnut that I originated from seed, but not the English, either from seed or graft. However, if grafted on the native black walnut, it might do in southern Iowa, but I have never tried this for a root.

I have never posed as a Burbank although, in a small way, I have experimented in plums and nut-bearing trees for a number of years. In our severe climate it would take a greater mind even than a Burbank to merit all the claims of this clipping sent Prof. Beach. I regret that I am the innocent cause of such horticultural misrepresentation.

Cedar Rapids, Ia. A. B. DENNIS.

Beautiful Garden Hedges.

Hedges that are not boundary markers can be made of many beautiful flowering shrubs, some of which are seldom used for such a purpose. For example, says the Gardeners' Magazine, nothing can exceed the loveliness of "syringa" hedges enclosing a rosery, or beds of roses and liliums, set either in grass or gravel. There are several excellent varieties of the "syringa," or mock orange, Philadelphus rosæflorus being one with immense semi-double flowers; P. Gordonianus coming into beauty rather late, and being especially prodigal of bloom; and P. parviflorus claiming attention as an extra rapid and tall grower. Then the exquisite Philadelphus purpureo maculatus might be represented, whose large white blooms have a mauve-rose blotch on each petal.

Hedges of mixed varieties of one shrub are usually more successful than those in which different species of shrubs are combined, yet the latter have plenty of charm and should be planted in situations where uniformity of height is not required. One might contain Philadelphus rosæflorus, Escallonia macrantha, Viburnum Opulus. Cistus ladaniferus, laurustinus. Ribes sanguineum, and Symphoricarpus radicans, the snowberry tree. All could be pruned into some kind of regularity, and this hedge in a small garden would certainly serve to introduce beautiful subjects for which room could not otherwise be spared. Escallonia macrantha Ingrami is much hardier than is generally supposed; it seldom fails in the walled-round garden, except in coldest countries, thrives in a heavy soil, and grows remarkably thick and high; the bottom density can be annually increased by layering some of the lowest shoots. As a dividing line between flowers and vegetables, or to enclose the environs of a summerhouse, it is one of the most attractive of all shrubs.

Japanese honeysuckle makes a good hedge in time, if given some faggot supports in its youth: so, too, does the common white jasmine; this last we have seen delightfully used with the white Scotch heavily-spined rose as a kind of undergrowth; indeed, Rosa spinosissima shows at its best when thus employed, but is equally at home with the tall Penzance briar roses or common sweet briar. A well-grown hedge of sweet briar is, by the by, one of the most fortunate possessions of any garden, for it can be ruthlessly cut back and down to keep it trim and green, and serves as an ideal support for any of the light-growing summer climbers, convolvuluses, sweet peas, canary creeper, Lophospermum scandens, Eccremocarpus scaber; even the profusely-leaved cobæa will not harm it. Gardeners who wish to treat such a hedge in a unique fashion should plant out some Plumbago Capensis of good height against it in summer; supposing the hedge to have one side facing south; the gray-blue blossom will make a fine show.

Disease of Apple Trees.

Bulletin No. 12 recently issued by the Wisconsin State Horticultural Society gives detailed description and methods of treatment of a very dangerous disease of young apple trees known as blight canker. This disease attacks mainly young trees, 8 to 15 years old, killing the bark of the trunks in patches or girdling the main branches.

The disease appeared in the trial orchard maintained by the society at Wausau and destroyed several hundred trees before its nature was known. It is widely distributed through the state, having been found in 26 counties.

The blight canker is a bacterial disease and caused by the same organisms that cause the well-known fire-blight of the apple. Too often injuries caused by this canker are as-

cribed to sunscald, or winter killing. It cannot be controlled by spraying. Treatment consists in cutting out all diseased bark, disinfecting the wound with a two per cent. solution of copper-sulfate or a one-tenth per cent. solution of corrosive sublimate, and afterwards covering with paint.

Glen Cove, N. Y.

The annual dinner of the Nassau County Horticultural Society was held on the night of January 29. It was a real old-fashioned dinner like mother used to give us boys. The newly-elected president, A. Janecke, was in his usual pleasing and happy vein. Retiring President McKenzie was also entertaining and the mutual feelings of regard between himself and those present were pleasing features.

The seed trade of New York was well represented at the dinner by W. E. Marshall, Geo. Burnett, Wm. Spurling, Harry Watkins and the Rickards brothers. Other out-of-town guests were James Scott, of Elmsford; Joseph Manda, of Orange, N. J.; Robert Angus and J. McFarlane, of Tarrytown. Nearly everyone present had something to say, notably W. E. Marshall, James Scott, Wm. Spurling, Joseph Manda and Messrs. McFarlane and Lenker. The bright particular feature of the evening was the violin selections of old Scotch melodies, by Bob Angus, with piano accompaniment by W. C. Rickards.

OSHKOSH, WIS.—The Horticultural Society elected the following officers at its last meeting: Mrs. Edith Becker, president; Sarah Timan, vice-president; Anna Jones, secretary; M. E. Penniman, treasurer.

Gladiolus Taconic.

READY NOW! SHIPPING EVERY DAY!

Manetti Rose Stock for Grafting Smooth, evenly-graded, especially selected for Florists' use.

Grafting size, 3-5 mm $ 8.00 per 1000; $75 00 per 10,000.

STURGEON BAY, WIS.

Gladiolus Taconic or No. 605.

This variety, a seedling which appeared among the varieties of Arthur Cowee, Berlin, N. Y., has been grown and increased by him during the past few years under variety No. 605, and is known to many in the trade, who have noted its attractive appearance. Mr. Cowee writes us that under ordinary cultivation it attains a height of about four and one-half to five feet and is one of the most artistic flowers in this color. He gives it the following technical description:

"Bright, lively pink, flecked and striped with shades of the same color, the petals lightening to the faintest blush in the throat. The markings on the lower petals are deep crimson, running into a thin strip of pale lemon yellow. Plant vigorous and flowers large, 10 to 12 being in bloom at the same time."

LA SALLE, ILL.—Miss Ella Porter has removed her store from the building at 521 First street to the telegraph office, between Gooding and Marquette streets, on the south side of First street.

MONTCLAIR, N. J.—A fire which did $200 damage occurred at the greenhouses of A. D. Rose on Orange road February 1. The fire was caused by a defective flue. It was discovered by the night watchman, who turned in an alarm. The damage was mostly broken glass near the furnace.

Hardy Roses
American Grown—Superior to Imported

We have unsold at the present time the following varieties—**all field grown plants,** grown in our nurseries at Rochester, N. Y.:

Anne de Diesbach	Prince Camille
Clio	Ulrich Brunner
Frau Karl Druschki	Crimson Rambler
General Jacqueminot	White Rambler
John Hopper	Yellow Rambler
Mme. G. Luizet	Philadelphia Rambler
Marshall P. Wilder	Common Sweet Briar
Mrs. John Laing	Mme. G. Bruant
Paul Neyron	Wichuriana (The Type)

These plants are in our storage cellars and can be shipped at any time. Prices on request.

QUERIES.

Dahlia Propagation.

ED. AMERICAN FLORIST:—

Are dahlia roots produced from cuttings equal to those produced from divided tubers?

W.

My experience with the propagation of dahlias is that most varities do better from cuttings than from divided tubers. T.

Freesias Unsatisfactory.

ED. AMERICAN FLORIST:—

Can you tell me why the flower stalks of my freesias often come into flower in twisted and crooked shapes? W. K.

There may be several reasons for this: If grown too hot the stems would be weak and would not stand up properly; the plants may have been kept in a poor light and this would have a similar effect; poor bulbs may be the reason, small or badly ripened ones often throwing weak stems. You can best judge which of these reasons is the correct one. G.

One Better.

ED. AMERICAN FLORIST:—

I read your article headed "Hybridizing a la Chicago Record-Herald," in a recent issue. I can go you one better; we out here in the northwest may not know much as to hybridizing, but what do you think of us crossing the milkweed with the strawberry and thereby, without much work for the housewife, serving strawberries and cream from the strawberry patch. Can you beat it?

PAUL G. KRUGER.

To Chicago!

If you stand for your town your town will stand for you. At the late big banquet of the Traffic club, at the Annex, strong men of Chicago, all up, drank this toast to a wonder:

"To Chicago—the great, the beautiful—the one city of the world with its work places, its homes and its playgrounds all within its corporate limits—convenient, commodious, healthful; an infant in arms as the ages of great cities go, but a Goliath in the eyes of a wondering world. To Chicago—the greatest railway and traffic center in the world; to the men who struggled and fought and suffered and conquered to make her what she is—to the minds that plan for and guide and direct her to still greater and more glorious achievement. To her liberality and generosity, reaching with the one hand into the great west and gathering its vast wealth, and with the other dropping it at the doors of the needy and hungry and unclothed the world 'round. To her famed institutions of learning; to her free schools; to her charities; to her glorious situation; to her arts, industries and manufacturers; to her unbounded wealth and financial solidity that, Gibraltar-like, rebuff the wild commercial storms that futilely thunder at her base—to her heroic sympathy that mans the lifeboats and succors and saves from the dismantled and helpless wrecks tossing upon the troubled waters. To Chicago and to her two millions of inhabitants—and to the majestic state of Illinois!"

LLOYD Will Not Disappoint You.

The only ever blooming **White Carnation** in existence. It is the bread and butter white of the future. Size and stem of Enchantress, with the freedom of McGowen. Easy Rooted. Excellent keeper and shipper. Best seller of any carnation on the market.

OUR PASTIMES.

New York.

There is a movement on foot to organize a bowling team among members of the trade in this city. It is a matter for regret that little interest has been shown for the past few years in this popular and national pastime of the florists.

There is plenty of good material out of which to organize a first class team, and the fact that the next S. A. F. convention and bowling tournament will take place in this state, should be additional incentive for a united effort. The following named young men are active promoters of the movement: Fred Lentz with David Clark's Sons, Seventy-fifth street and Broadway; Maurice Kleinman, with Myer, Fifty-eighth street and Madison avenue; Henry C. Reidel, with Alex J. Guttman, of 43 West Twenty-eighth street, and N. C. Schreiner, with A. M. Henshaw, 44 West Twenty-eighth street. Good bowlers, who feel that they are also stayers, who would like to get into the game should see Mr. Lentz or any of the others at once.

Cincinnati.

This week we have the National Bowling Tournament on at the O. N. G. armory. As there are any number of florists that are good bowlers we expect to see quite a number of visitors and trust we will not be disappointed.

S.

Chicago.

Chas. Balluff and Geo. Asmus are getting after the bowlers. It is more than likely that a team will be organized at the next Florists' Club meeting.

At the Flood.

Hearing of a rising river at the headwaters of the Euphrates, with a falling barometer and indication of a flood in the valley, the pithecanthropus changed his mind and frankly admitted it to Noah. His manner was that of a chastened and softened person.

"You monkeyed too long," said the patriarch. "We gave you a chance to come in with us, and you wouldn't take it. Now we have arranged for all the stock we care about trying to float." The general liquidation which followed had the usual effect upon all but the insiders.—Puck.

Ole Oleson Perplexed.

Bay Yiminiy, Ay'm glad to hear
Yon Yonson's in the race;
A son of Svaden, gude an' dear,
Ay bat he'll vin the place.
Ay'd lak to see heem mak' a win,
An' at the White House visit;
The Svades will put Yon Yonson in,
But which Yon Yonson is it?

Ay know Yon Yonson yumping logs,
Yon Yonson milking cows;
Ay know Yon Yonson training dogs,
Yon Yonson making house.
Ay know Yon Yonson, railroad yack,
On heem ay mak wan visit;
Of Yonsons ay know wan big pack,
O, which Yon Yonson is it?

In Stockholm, Copenhagen, too,
Are Yonsons bay the score;
Bay Yiminy, Ay tal you true,
In Minnesota more.
Yon Yonsons, coppers on the beat,
Svade servant girls they visit;
So many Yonsons Ay have meet,
O, which Yon Yonson is it?

You bat Yon Yonson gat ma vote,
Ay know beem gude an' true;
Yon Yonson deckhand on the boat,
Or capting of the crew.
Yon Yonson, milking cows, maybe
Ay don't care; Ay won't miss it;
It makes no deeference to me,
Which Yonny Yonson is it.

British Columbia Forest Lands in Reserves.

At one stroke of the lieutenant governor's pen, 150,000,000 acres of forest land in British Columbia have been placed in reserves. This includes every acre of the province's timberlands, except what has been leased. This is as much land as was put in the national forests of this country between the years 1891 and 1907. The action was taken to check wasteful exploitation of timber resources and to bring the care and cutting of timber more effectually under government control.

The province has been leasing timberland instead of selling it. The most of the leasing has been done the past three or four years, and Americans hold the largest part of the 10,000 leases now in force. The lease is, in its effect, a long-term option at low rate. It runs 21 years and may be renewed at the end of the first term. The lessee pays 25 cents per year until he is ready to cut the timber, when he pays a royalty of 50 cents per 1,000 feet, board measure, for the timber removed. The income of the province from leases was about $1,275,000 last year.

British Columbia is the latest of the great soft wood timber regions to be invaded by lumbermen. The great industry began its work in Maine two or three generations ago; passed later to the pine and hemlock forests of Pennsylvania and New York, and, when supply ran short there, they moved to Michigan, Wisconsin, and Minnesota. The pine woods of the lake states held out a long time, but the decline finally became so rapid that the scene of operations was shifted to Washington and Oregon. The output of the Puget Sound region rose to first place, and it is still at top notch. But holdings are harder to get, and buyers and speculators have crossed into British Columbia. While there are many rich stands of timber in the province, it is doubtful if the forest woods furnish a cut of more than 100 to 150 billion feet of lumber, less than what this country uses in 18 months.

British Columbia does not permit the export of logs cut on provincial land. They must be sawed by mills in the province, which evidently intends not only to take care of its timber, but to make the most out of it. An export duty has been seriously considered by the dominion government for all the provinces of Canada. It is apparent that British Columbia will not be slow to take any advantage which the further diminishing of the timber supply of the United States may afford her in the lumber trade.

WORCESTER, MASS.—Mrs. George S. Colburn, was thrown headlong from a sleigh at the corner of Lake and Park streets, February 5, and received a gash over the right eye that required eight stitches to close and also bruised the skull.

STRONG, WELL ROOTED

Carnation Cuttings.

I have 50,000 Enchantress, 25,000 Mrs. T. W. Lawson, and 20,000 Boston Market, ready for immediate delivery, in as choice a lot of cuttings as has ever been offered, and **AT PRICES THAT WILL INTEREST YOU.**

Roses, Their History, Development and Cultivation.

The above is the title of a new book on England's national flower written by the Rev. Joseph H. Pemberton. The author is a well known rosarian, is a vice-president of the National Rose Society and, like many other English clergymen, is an enthusiastic and capable exponent of the art of rose growing. In size the work is large octavo, very nicely printed, and bound in green cloth. The frontispiece is a colored illustration of Rosa canina, the other illustrations being reproductions from various authorities on the subject. It is a bulky volume of over 300 pages and besides having full paged plates in black and white there are a number of others in the text explanatory of the various operations necessary to the successful cultivation of the queen of flowers. The book is divided into 18 chapters, without including the appendix and index. The subjects treated cover the widest possible area and are essentially of a practical nature. In our brief notice we can only glance at a few of the headings. In part I the chapters deal with "The Rose the Flower of England," "The Botany of the Rose," "British Wild Roses," "Wild Roses of Other Countries," "Summer Flowering Roses," and "Autumn Flowering Roses." Part II is devoted to cultivation, and among the subjects we notice: "The Soil and its Treatment," "Manures," "Planting," "Pruning," "Budding," "Cuttings, Grafting and Layering," "Raising from Seed," "Growing for Exhibition," "Exhibiting, Judging and Growing Roses Under Glass," "Pests," etc.

In a book of this character it is of course impossible to enlarge upon the cultural matters; details of culture in this country may differ widely from those in vogue in America, but we may justly assume that a volume of importance by a well known authority here in England may have many points of interest for American rosarians, and the newcomer is unquestionably a very important addition to the bibliography of this popular flower. Rose books are many, and the number of them increases year by year, but the one under notice will deservedly occupy a prominent place in the literature of the flower that everybody loves by virtue of the competence of the author to deal with the subject and his known position among European rose culturists. P.

FARGO, N. D.—Plans are being prepared for three large greenhouses at the agricultural college, and these structures will be erected during the summer. They will be 20x60 feet and one will be used for laboratory and propagating purposes, the other for experimental purposes. These houses are badly needed and will greatly facilitate the experimental work which is going on.

DALLAS, TEX.—Numa Reid Cook, for some time in the employ of the Green Floral and Nursery Co., died at the home of his sister, January 20. Mr. Cook was 30 years of age, was born in North Carolina and before coming to Dallas held positions with various growers in Pawtucket, R. I., Chester, Pa., and Lewiston, Me. He was a young man of much honor and ability and greatly esteemed by all his friends in the trade.

"THE TEST is what TELLS THE STORY."

NEW ROSE

MY MARYLAND

Best Up-to-Date Commercial Rose.

Read what others have to say about it:

Among the many new roses of the year; there is none which has impressed us more as being worthy of a thorough trial. It has been exhibited only as No. 294; being a seedling raised by John Cook, of Baltimore. A beautiful rose with an exqusite fragrance. In color, it may be described as a soft salmon pink, which brightens up beautifully as the bud opens. We are intending to plant this rose in quantity. A. N. PIERSON, Cromwell, Conn.

In reply to your inquiry what we think of your new Rose My Maryland. We would say that after seeing others, we still believe that you have the Best New Rose of modern times. GUDE BROS., Washington, D. C.

PRICES: 2 and 2 1-2-inch pots, $25.00 per 100; $200.00 per 1000; 3-inch pots, $5.00 per dozen.

JOHN COOK, 318 N. Charles Street, BALTIMORE, - MD.

Cult of the Sweet Pea in England.

There is every evidence of the continued appreciation of the sweet pea in the United Kingdom. The National Sweet Pea Society has just issued a comprehensive schedule of prizes for its eighth exhibition to be held in London, July 24, 1908, and its second provincial show to be held in Dublin on August 5. For the fourth year in succession it has published the Sweet Pea Annual, the issue for 1908 being a neatly printed and nicely bound book, with numerous illustrations, in all about 100 pages. Among other literary matter relating to the society are articles entitled, "Sweet Pea Enthusiasts," "Mr. Burpee's Impressions," "Sweet Peas in New South Wales," "The Popular Vote for Sweet Pea Novelties," "Sweet Peas in Devonshire," "Sweet Peas in the Antipodes," "Catalogue of Sweet Pea Names," and many others.

The secretary of the society, Chas. H. Curtis, has also just brought out a handy little cultural manual entitled: "Sweet Peas and Their Cultivation," for home and exhibition. The leading chapters are "History and Development," "Cupid and Bush Sweet Peas," "The Best Sweet Peas," "Seeds and Seed Sowing," "Staking and Tying," "Watering and Manuring," "Sweet Peas for the Conservatory," and others. It is a nicely gotten up little treatise. P.

A New Chrysanthemum Journal.

Many of our readers are probably aware of the existence of Le Chrysantheme, a monthly journal devoted exclusively to the autumn queen and published by the French National Chrysanthemum Society at Lyons. We have now the pleasure to announce the publication of a new monthly periodical devoted to the flower entitled La Revue Chrysanthémiste. No 1 lies before us dated January 5. It contains 20 pages of printed matter and is published at the headquarters of a new chrysanthemum society at 28 Rue Bandin, Paris. The contents are "Our Programme," "The Chrysanthemum in Japan," "For Amateurs," "Culture of the Large Flowered Chrysanthemum," "Rules of the New Society," etc. It is curious, notwithstanding the popularity of the chrysanthemum in England and America, that only in France a special journal devoted to the flower seems possible. P.

TAUSENDSCHON.

BUSINESS SATISFACTORY.

The past week's business was entirely satisfactory with something doing all the time, and stock cleaning up nicely every day. We are experiencing a shortage of roses with the exception of American Beauty with which Weiland & Olinger keep this market well supplied. Killarney is getting to be one of the most popular of roses, the demand for this beautiful variety being way ahead of the supply. Carnations are coming along in larger quantities; $3 per 100 buys a fair grade and the blooms must be good to fetch $4 per 100. Lilies, both callas and L. Harrisii continue to be scarce and it takes some tall hustling to fill an order for 100 blooms. Lily of the valley is in good demand and the same may be said of Paper White narcissi, daffodils and other spring flowers such as tulips and freesias; nor must we forget the violet. Smilax is in good supply and moving well, but there is a shortage of asparagus at present writing.

NOTES.

The past week we had the American Canners Association convention in our city, about 3,000 being in attendance, among whom were a number of prominent seedsmen. It was impossible for the writer to get the names of all attending, but we noticed J. Charles McCullough of this city with a big badge marked "reception committee," which alone assures us that the delegates had a good time.

Mrs. Martha Bright, mother of Mrs. Robert Betz, passed away February 9, from causes incidental to old age. Mrs. Bright was an estimable old lady and always enjoyed having a large circle of friends, who will be grieved to hear of her death. Mrs. Betz has the sympathy of the craft in her bereavement.

Clarence Ohner and E. G. Gillett have started in the wirework business. This will give us three establishments for the manufacture of wire designs and from now on we ought to be able to take care of all the orders coming this way in the wirework line.

Mrs. Potter Palmer 2½-in., $15.00 per 100; $125 00 per 1000; 3½-in., $150.00 per 1000.

Price list mailed on application.

POEHLMANN BROS. CO., Morton Grove, Ill.

R. A. Betz has moved his wirework establishment to 128 East Third street, the quarters formerly occupied by William Murphy, which will prove a better location and give him as much space again as he had in his old quarters.

Max Rudolph has not been around the wholesale houses much of late and he gives the excuse of being very busy with funeral work. We like to have Max come around occasionally, as he is always very optimistic.

London.

At the Royal Horticultural Society's meeting, January 28, H. B. May & Sons were awarded a medal for a fine exhibit of ferns, including Nephrolepis Whitmani, N. todeaoides, N. elegantissima and N. Amerpohli, the last named obtaining an award of merit. Banksian medals were also awarded H. Burnett and Hugh Low & Co. for carnations, the former showing Mrs. H. Burnett, White Perfection, Enchantress, Robt. Craig and a number of seedlings, Low's exhibit consisting of Helen M. Gould, Winsor, Salmon Lawson, Rose Pink Enchantress, White Perfection and Victory.

T. Jannoch, of Dersingham, Norfolk, says his cyclamens, figured in THE AMERICAN FLORIST, are much improved since being shown before the Royal Horticultural Society. He has had the honor of a visit from the king and Princess Victoria, specially to see them, and he was highly pleased.

At Covent Garden, white lilac in 6-inch pots made $1:25 each and bulb stock, both in pots and cut, is now plentiful. Azaleas are fine and trade is fair, but the frost does not improve matters any.

The untimely death of Geo. Rochford, well known as a grower of palms and ferns, is much regretted. He was flooding his lawn for skating when he tripped and fell, twisting his stomach. S.

Milwaukee.

BRIDE ROSES SCARCE.

Owing to the very disagreeable weather that we have been having the past two weeks there has been rather a slow sale on most articles. This has especially been true of all bulbous flowers which are not taking near as well this season as in former years. There is sufficient stock of all kinds for the demand with the possible exception of Bride roses, these being somewhat short of the demand.

NOTES.

At the last meeting of the Milwaukee Florists' Club it was decided to hold a dancing party, February 26. The committee consisting of Gustave Rusch, C. C. Pollworth and A. Leideger promise that every one will have a fine time. At the March meeting we will have a carnation show. All those desiring to exhibit will please correspond with the secretary, M. P. Vallier, Station D., R. 2.

Nic. Zweifel, who attended the carnation meeting in Washington, is back full of new ideas and enthusiasm for the carnation, which he grows so well.

Hunkel's Seed Store report that inquiries and orders are coming in a very satisfactory manner and the season promises to be a very good one.

John Arnold, who has been laid up for several weeks with rheumatism, is again able to be about his business.

M. P. Vallier intends adding two houses for carnations. H.

LINCOLN, NEB.—C. H. Frey is building four houses 28x200 feet each.

JERSEY CITY, N. J.—The wife of Daniel Cole, the Newark avenue florist, died February 1 at Morristown. Her death ends a protracted fight in the court of chancery to have her declared sane. Mrs. Cole, for several years had been confined—first in a sanitarium for the insane in New York and later in the state hospital for the insane at Morris Plains, a suburb of Morristown.

A FEW GOOD THINGS YOU WANT.

Massachusetts Horticultural Society.

Frederick Law Olmsted, Jr., was the speaker at Horticultural Hall February 1, in the Saturday lecture course under the auspices of the Massachusetts Horticultural Society. Vice-President William H. Spooner called to order the 100 or more people who had braved the storm, and introduced the speaker, whose subject was "The Treatment of Home Grounds."

Prof. Olmsted said that much of the best that could be said about the treatment of home grounds was written many years ago. The proper treatment was not one of decoration, but of the adaptation of the grounds to their uses. Home grounds should be refined. Every part and particle of the work done should fit with all the other parts. The beauty most to be desired is that of inherent and comprehensive quality, and decoration often hides this. In the treatment of home grounds decoration should be subordinated to the shaping and arrangement of everything so that one may do best that which he wishes to do on those grounds.

The principal elements which go to make up home grounds were then considered. There are certain spaces, each of which is wanted for some purpose. These may be distinctively differentiated by boundaries, or there may be only a suggestion of a division. The recognition of that division and the adapting of each to what is to be done are essential. The recognition of boundaries, more or less sketchy, is the fundamental feature. Each of these must be treated differently. You cannot raise hay and raise cattle in the same field. And the same thing must be done in an aesthetic way. You must have, within any space, beauty of a character different from that of the other spaces. A surface must be provided having a certain element of light and shade. You must have objects rising from the general surface, but they must be so limited that they will not be obstructions to the sweep of the eye or they must be boundaries of spaces, or of intermediate spaces.

In planting, a point constantly overlooked is that objects three or four feet high do not interrupt the sweep of the eye and fall into the general space, and that objects which are about the height of the eye interrupt the vision and detract from the plan. As many of the common shrubs are about this height or soon grow to it, they must be so arranged and so few in number that they will be an incident, and not a feature of the view.

The passageways from space to space, in the form of paths or roads, must be considered in each case by themselves. The proportion of the space through which one must pass, so far as its general aspect to the visitor is concerned, the space which is devoted to the more intimate family life and in some cases the servant's quarters, are to be considered separately. The English give little space to the first feature, as compared with Americans, but we do not sufficiently consider the difference between the part devoted to the public, so to speak, and the part used by the family. The segregation of the service portion is essential. You do not want to see fluttering clothes all over the place, or the ash barrels at the entrance. Each thing should have a place, and each thing should be kept in that place. Mr. Olmsted then showed on the screen a large number of beautiful views and plans illustrating further the points made in his lecture.

NEW VIOLET BOSTON.

In introducing this new variety to the trade I wish to state that I have been growing it in quantity for the past two years and do not hesitate to state that it is entirely distinct a strong grower a free bloomer and the finest single violet in cultivation. Ready for distribution in April and May. Orders booked now. **$2.00** per doz.; **$12.00** per 100; **$100.00** per 1000. 500 at 1000 rates.

1731 N. 18th St., Philadelphia, Pa.

Denver, Colo.

Business has been much better since February 1. Bulb stock is coming in very freely; daffodils and tulips are coming in in good condition for this time of year. The weather continues very mild, which probably accounts for our not having a brisk trade, as flower buyers appreciate cold weather.

We are going to have quite a number of changes in the business this coming spring. The Colfax Avenue Floral Co. has sold out to the Park Floral Co. who now control both plants. The Park Floral Co., has also bought out the Alpha Floral Co. It looks as though this company expects to control the florist business of the town, but I think there will be a good many changes this summer on the street that will counteract that, as there will undoubtedly be two or three new firms open up for business for next year.

BUSH.

Orange, N. J.

The fourteenth installation love feast of the New Jersey Floricultural Society was celebrated February 7, by the members and friends from various parts of the country. The new president, Malcolm MacRorie, acted as master of the ceremonies and a long programme, consisting of vocal and instrumental music selections and dialect character recitations, and a wonderful prestidigitator with addresses by many prominent in the craft. Among those present who addressed the gathering were: Thomas Gray of Boston, Mass.; J. B. Kidd, expert seed appraiser of the port of New York; Wm. Duckham; A. Herrington; C. H. Totty; and W. A. Manda. The presentation of four silver cups, won in the monthly competitive shows during the year past, was made to Peter Duff, Wm. Reid, Max Schneider and A. T. Caparn with appropriate remarks by George Smith.

Letters were read from H. Webber, John E. Haines, Chicago Carnation Co., and F. R. Pierson, in connection with the special carnation night to take place in March. The Rickards brothers dispensed sweet music. The floral decorations were contributed by growers upon neighboring estates and consisted mainly of carnations, flowering bulbs and a vase of Euphorbia jacquiniæflora with sprays two feet long, which Arthur Herrington declared he had not seen the like of since the days of his boyhood in England.

VAUGHAN'S SEED STORE, 84-86 Randolph Street, CHICAGO. 14 Barclay Street, NEW YORK.

Greenhouses and Nurseries: Western Springs, Ill.

Evansville, Ind.

Ben F. Kramer has had unusual success with his carnations this year. For next year he will grow Beacon and White Enchantress as his leaders. Miss Warnman, the young lady in charge of the cut flower work, says business during and since the holidays has been better than ever before.

Ed. Fenton, at Royston & Fenton's, recently established, is making good progress, his specialty being roses. Mr. Fenton was formerly with Poehlmann Bros. Co., Chicago, and later with Julius Niednagel, this city.

The Chicago exhibition of the American Rose Society will be visited by representatives of the Wm. Blackman Floral Co., Julius Niednagel and probably others. Miss Warnman, of Kramer's, expects to attend.

George Blackman, of the Wm. Blackman Floral Co., reports shipping trade as exceedingly brisk; his eldest daughter, who has been seriously ill, is now on the way to recovery.

Miss Nellie Goodge has a nice line of foliage plants, ferns and bedding stock coming on for use at Oak Hill cemetery the coming season.

H. Seymour has a fine lot of geraniums coming on for the spring trade. Funeral work has kept him quite busy lately.

The Ziedler Floral Co. reports heavy funeral business since the holidays. This firm's carnations are doing well this season.

John Elsperman's boys have been rushing the work on a nice line of bedding stock during their father's illness.

J. D. Carmody left for Panama February 8.

Visitor: Paul Halbrooks, representing the Livingston Seed Co., Columbus, O.

Chrysanthemum Novelties

Both Foreign and Our Introduction, **ARE NOW BEING DELIVERED.**

A FEW OF THE LEADERS

Now Ready in quantity.

The Wholesale and Retail Florists

both depend upon their refrigerators to determine whether their stock shall sell or stay in the store. McCray Refrigerators keep stock in such perfect, fresh and fragrant condition that it cannot help selling, and the McCray uses less ice than any other. It virtually pays for itself. The patented system of air circulation which cools all parts evenly, thoroughly, and with fresh, cold, dry air, is one of the features of

McCray Refrigerators

They are made in the most beautiful finish and substantial construction. They are lined with white enamel, or if you wish, you may have tile, opal glass, mirrors or marble.

There is a wide range of regular sizes of McCray Refrigerators for immediate shipment, although we build them to order for any requirement.

You should have our Catalog No. 71, which describes the detail of these successful and economical refrigerators for the florist.

Manufactured by THE KENTUCKY TOBACCO PRODUCT CO., Louisville, Ky.

Omaha.

January was one of the nicest winter months we have seen for over 20 years and has saved considerable coal for the grower. Business has been steady and up to last year, but prices have been lower, especially on carnations. There are few parties, but lots of funerals, which is really the bulk of the business. American Beauty roses are scarce; tea roses and carnations are plentiful and good. Violets are at their best and sell well. Bulbous stock is coming in and helps out considerably. Pot plants in bloom move slowly since the holidays and azaleas, especially, even at reduced prices, more slowly.

NOTES.

On February 1 one of our most prominent physicians was buried and a good many elaborate designs were displayed. McNamara & Evans made a panel 4x5 feet of bronze galax, with a cluster of callas, violets and lily of the valley. A Donaghue made a shield of violets and yellow tulips; in fact, all the florists had a goodly number of designs and sprays of all descriptions.

The wholesalers in this vicinity complain about low prices. Paul B. Floth brings in some very fine Aristocrat carnations; he grows this variety to perfection.

Geo. Sorensen, the violet grower, reports he never had such fine violets and so many before on account of the open winter.

The Omaha florists called by invitation, January 19, at Hess & Swoboda's greenhouses where they spent a pleasant afternoon.

Visitors: H. Bayersdorfer and wife, Philadelphia, Pa., on their way to California; A. Currie, of Milwaukee; C. W. Scott, of Vaughan's Seed Store, Chicago, and Wm. Hagemann, New York.

European Horticulture.

FROM THE BRITISH TRADE PAPERS.

PRUNUS JAPONICA FLORE PLENO. — Where hardy shrubs are forced into bloom during the early months of the year, this delightful little member of the plum family (which, by the way, is often known as Prunus Sinensis), occupies a foremost position. It forms a neat bushy specimen, and when at its best the slender, rather upright shoots are studded for some distance with large double blossoms, suggesting those of a double-flowered cherry. There are two forms, one in which the flowers are pure white, and the other in which they have a pinkish tinge. This latter feature is more noticed in the bud state, and just as the flowers are expanded, than it is afterwards. Another point in its favor is that it retains its beauty when forced, longer than many other shrubs, as a succession of blossoms is kept up for some time. This prunus may be grown altogether in pots, and under such treatment it can be depended upon to flower year after year, added to which, plants that are continually forced flower earlier than those so treated for the first time. In the case of those it is intended to keep in pots they should, as soon as the blossoms are over, have the flowering shoots cut back to within a couple of inches or so of the base. They must still be kept under glass and encouraged to make good vigorous shoots. Then when all danger from frosts is over the plants can be plunged in a sunny spot outdoors, where the wood will be well ripened. In obtaining plants of this prunus care must be taken to see that they are on their own roots, for they are often budded or grafted on to the sloe, and the suckers from the stock are always a nuisance.

A YELLOW PEONY.—Peony Mlokosewitschi is a prominent plant among the several figures in a recent issue of the Botanical Magazine. It comes from the Caucasus, is a thoroughly hardy perennial, and the best of the few yellow-flowered kinds. Philodendron Corsinianum, a climbing aroid, raised on the continent, and one that produces large red spathes; Viburnum utile, a shrubby, white flowered member of the laurustinus group, from China; Herbertia amatorum, a pretty iridaceous plant from South America, with vivid violet-blue flowers; and Pseudolarix Fortunei, a beautiful golden larch, first discovered by Fortune, are other subjects figured and described in the same issue.

HORSE CHESTNUTS.—The common horse chestnut (Aesculus hippocastanum) is a well-known large tree in this country, but some of the other members of the family are smaller in growth and equally beautiful. A. carnea (rubicunda) is of hybrid origin, and bears bright red spikes of flowers in late May; but A. carnea Briotii is much brighter in color and quite as easily grown, though it is not often seen. A. Californica is a small tree with erect spikes of white, sweet-scented flowers, opening in May, and A. Indica (the Himalayan horse chestnut) is a distinct and handsome tree, which will become popular when it is better known. The blooms are white with yellow and red blotches at the base of the petals, and open in July, when all the other horse chestnuts are past.

DIVIDING PERENNIALS.—Where borders of hardy perennials have not been overhauled in autumn it is necessary to go over them in spring, not in many cases to replant them, as that would injure the display of bloom for this year, but to reduce those which are overgrown and to take pieces off for propagating purposes. Many asters, sunflowers, and things of spreading growth should be either taken up, reduced and replanted, or pieces taken off. It is a great mistake to take away the outside of a clump, as this is the youngest and most vigorous part of the plant. Some of the outside growths should be replanted, and the effete central portion disposed of on the rubbish heap or burned with other rubbish. A large clump can be cut through with the spade, and the best time for this is when the young growths begin to push through. If left too long the shoots will be too long to do much with safety, as some of them are sure to be broken off at the tender stage at which they are. Where stock is wanted a growing crown with a few roots attached will supply a good nucleus for a plant.

POPULARITY OF KEW.—The number of visitors to Kew Gardens last year was 2,962,714, the number on Sundays being 1,268,501, and on weekdays 1,694,213. The total shows an increase of 623,222 visitors over 1906, in which year a record was established.

Why? Because many debtors will pay the Board, fearing otherwise a bad rating in our Credit List. Full information as to methods and rates given on application.

The Hickory.

"No wood will be more difficult to replace when the approaching shortage in the supply of hardwoods overtakes us than the hickory," one of the foresters in the employ of the government recently said. The truth of this statement is not realized by anyone more than the practical men of the various trades whose future prosperity is measured by the available supply of this valuable timber.

Hickory ranks only twelfth among the hardwoods in the country's annual timber cut, according to the census report for 1906. So far as quantity is concerned it is not to be compared with white oak or yellow poplar. But it is used today for a number of purposes which require great toughness and great strength, and no other wood occurring in considerable quantity combines these properties in a greater degree than do some of the hickories.

Peculiar interest is given to the situation by the fact that hickory is distinctively an American genus. It occurs only in the eastern part of the United States, and large quantities of hickory handles, spokes, wheels, and other parts of vehicles, and farm implements are exported each year to all parts of the world.

The requirements of the trade are very exacting. Hickory timber to be serviceable must be heavy, clear and straight grained. To this very essential qualification, custom and tradition have added an unnecessary burden in the shape of grading rules which discriminate against red hickory, and also against iron streaks, small bird pecks, and hard knots in the wood, which may not really affect the strength at all.

Practical users of this timber have realized for years that a revision of the grading rules was not only advisable but necessary, and now the National Hickory Association of Chicago has requested the United States Forest Service to cooperate with it in the revision of the grading rules for vehicle and agricultural implement stock. This association is composed largely of hickory and oak users, and its members represent the wagon, carriage, spoke, handle, hardwood dimension and agricultural implement manufacturers, together with the accessory trades.

The grading rules for the classes of material used by the manufacturers of this association are today largely what they were 25 years ago. The dissatisfaction constantly arising from the inadequacy of the present rules calls for a complete revision to make them conform with present day conditions.

During the past two years the forest service had been conducting a study of the vehicle industry, supplemented by a large number of tests to determine the relative effect of various defects upon the strength of vehicle stock, and to ascertain the relative strength of white and red hickory. The results of these studies have been made the subject of a forest service publication which will be issued shortly.

Fighting Insects in California.

The work of fighting insect pests for the year cost the Riverside county, Cal., horticultural commission a little in excess of $12,000, or about $1,000 a month, according to the annual report which was submitted to the Board of Supervisors January 23, by Secretary H. K. Smith. The exact cost was $12,763.31. From this amount should be deducted collections of $937.64 from Corona and $100 from Riverside, reducing the figures to $11,725.77.

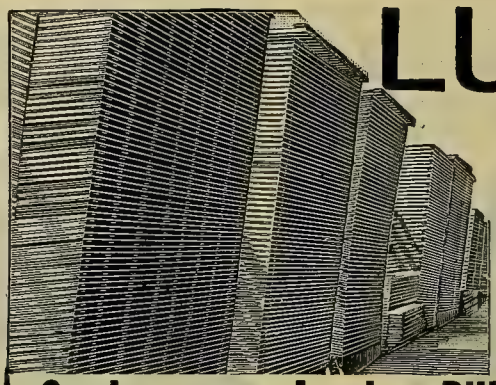
In the first district the commissioner worked a total of 304 days at an expense of $1,216; seven inspectors worked a total of 1,781½ days at an expense of $4,453.75, reporting the examination of 6,466 acres of orchards, finding and platting the location of 33,126 trees infested with insect pests that are injurious to fruit and fruit trees.

The eradication report showed that 267,512 trees were sprayed at the orchard owners' expense, or fumigated to destroy insect pests, as well as to clean the fruit in many instances and save the expense of washing after the fruit gets to the packing houses.

The amount paid out for new tents and outfitting, charged to this district, was $1,211.69. Enforced eradication bills were paid, amounting to $800.80. The last-named amount will be collected and returned to the treasury by the district attorney. A rental will be charged for use of tents to keep them in repair, and eventually repay the county entirely for the same. One hundred dollars has already been collected for tents and returned to the treasury, making a total for work and material in this district of $7,682.24.

In the second district the commissioner worked a total of 239 days at an expense of $956. Three inspectors worked 445¾ days, at an expense of $1,114.37, reporting the examination of 3,429 acres of orchards and finding and platting the location of 31,354 trees infested with insect pests. The eradication reports show that 117,433 trees were sprayed or fumigated to destroy pests and clean the fruit. The amount charged to this district for new tents and outfitting is $287.64. The enforced eradication bills amount to $1,069.29. Of this amount $937.54 has been collected and turned into the treasury. These tents are also in charge of the horticultural commission and will be used or rented at such a rental that the county will be repaid for their original cost.

In the third district the horticultural commission worked a total of 217 days at an expense of $868. Nine inspectors worked a total of 127⅞ days at an expense of $318.44, examining 306 acres of orchards and reporting the finding of 154 trees infested with brown scale and platting the location of same. These trees have been treated with kerosene emulsion or tanglefoot to eradicate the scale.



LUMBER
BARGAIN PRICES.

A wonderful opportunity is offered you to buy lumber and building supplies of every kind at ***Prices that will save you big money.*** Such a chance seldom occurs. Lumber for your house, church, barn, meeting house, crib, store, factory, and in fact, buildings of every kind. We can furnish absolutely everything needed in construction material. SUGGESTIONS FOR FLORISTS.

Moschosma Riparium.

As soon as the flowers are over, cut the plants back fairly hard and keep them on the dry side for a few days. They should go into a fairly warm house to produce plenty of cuttings, but when these have been taken and the young stock potted and well established, an ordinary cool greenhouse or rose house temperature will suit them. When the plants have made two inches of growth take the cuttings and insert in the sand with a slight bottom heat. Keep moist until rooted and when potting pinch the top out. This pinching may be repeated three times during the growing season and the result will be fine plants in 6-inch pots that will flower freely at Christmas. Later cuttings may be struck right on through March and April or even later and will make nice little specimens for smaller decorations. Pot firmly to induce a solid and stocky growth which will produce fine fragrant flower spikes.

Solid Growth.

It is useless propagating early unless the plants are going to be looked after when they are struck. A bouvardia, marguerite or any other plant struck early and kept in the moist soil of the propagating house soon begins to draw to the light and gets soft and spindly. Such plants will have to be cut back later, and, instead of saving time, the early propagator loses out in this direction in the end. Never propagate unless the facilities at command are such that the resulting plants can be properly grown in plenty of light and given ample room when they come out of the cases. There is a knack in handling young stock that only comes by experience and can be taught in no other school, but, as a help along this line, budding growers must be careful that the change from the cases to the cooler and drier air of the houses is toned down a little by frequent light spraying and by allowing less ventilation for a few days until the roots get hold of the new soil. There is a time when this has occurred and the plants are just picking up that is the best of all times for pinching young stock. Up to then, the growing point helps the roots; when this is reached the roots are in a condition to insure a free break of young shoots, and this is the time to pinch the tops out. Conditions will, of course, vary with the class of stock grown, but in all cases ample room, air and light, care in watering and perfect freedom from insect pests must be given.

Cold Frames.

The season for the use of cold frames is at hand, and very useful they are for hardening off stock of all kinds. Hardy plants raised from seed or division under glass, bedding stock later and small plants of various kinds all through the summer have to be arranged for, and it is necessary now to get the frames and soil ready for use. Any repairs necessary either to glass or wood should be done and they will be the cleaner and better for a good coat of white lead paint. In glazing see that the rebate that takes the glass is quite dry before placing the putty, and when painting use a thin paint for the first coat that will penetrate well into all crevices where insects or insect eggs may be hidden, killing these and preserving the wood. Put this work in hand at once, for, should mild weather occur in March many plants will be perfectly safe in the frames, and their removal there will make necessary room in the greenhouses.

Chrysanthemums.

It is not too early to start propagating chrysanthemums that have been carefully looked after and kept in a cool airy house. Should there be any stock under benches take it out and give the plants an airy, sunny spot on top of a bench for two weeks before taking off any cuttings. The propagating bench used for carnations answers also for chrysanthemums. There is less trouble rooting them now than in another month when the sun has more power. Stock of novelties may be increased by propagating now. After inserting the cuttings see that they are kept constantly moist. A cutting that once wilts never roots as quickly as one that is kept upright from the first. When everything is clean about them there is little fear of

damping no matter how often the cuttings are watered for the first two weeks, and after that most of them will be callused and safe to root. As soon as they show, by a picking up of the foliage and a stiffer feel of the cutting, that they are rooted give all the air possible to keep them hard, and only sufficient heat to keep them growing gently. Pot or box the plants before they have a chance to get starved on the cutting bench.

THE CARNATION.

Rooted Cuttings and Their Treatment.

The rooted cuttings of the novelties are now being shipped, and a few remarks on the handling and care of the cuttings upon arrival will be in order. First of all, the question comes to us as to what should be considered the proper time the buyer should expect his order of novelties to be delivered. We all know of the vast difference in the product per plant between February and April cuttings with most of the standard varieties. We have also in mind the variety Winsor, the last year's novelty credited with an immense sale, some of the cuttings being delivered very late besides being at the same time small and weak; consequently it was impossible to make a first class plant out of them for early work even under the most favorable conditions causing many unfavorable comments about the variety early in the season. With many growers it is only during the last month or so that Winsor has shown what it is capable of and just at this time it is a beautiful sight, full of blooms and buds just showing color but with all this we are convinced that Winsor is a fine addition to our list of fancy varieties, and that it will be a profitable variety to grow but for it to give the best results the cuttings should be ready to be out of the sand before March 15. It is the just right of every buyer, no matter how small his order, to receive from the seller some hints as to the behavior of every novelty being sent out. And when an order is placed in reasonable time for delivery before March 15 the goods should be delivered by that date or at the option of the buyer the order cancelled or delivered at a reduced price as he may elect.

Then comes the rights of both buyer and seller should the cuttings prove to be not satisfactory on arrival. We deem it only just and fair that a buyer is entitled to receive 100 well rooted cuttings in a healthy state for every 100 ordered, and all that do not come up to this mark should be returned upon receipt of shipment. Cuttings that have to be put into sand again upon arrival are not by any means rooted cuttings and should not be so represented. Also, as there is vast difference in the way the different varieties recover from shipping and take hold of the soil, we believe a little note in each shipment stating the pecularities of the enclosed varieties would be a great help to the buyer, particularly to those who are beginners in the business. We have wandered considerably away from our text about how rooted cuttings should be taken care of upon arrival after being shipped from a distance.

When they arrive they should be unpacked and the bundles in which it is customary to pack them set upright in flats and placed in a cool place previous to potting them, and when ready for potting open up each bundle as the potter is ready for them and not allow any to lay around loose exposed to the air which will quickly shrivel up the roots. When the bundles are unwrapped and all the moss or other packing material is cleaned away from the cuttings hold the roots in water, not too cold, for a few seconds then pot as soon as possible. They should be set in a moderately warm place for a few days and shaded from the sun until root action has taken place. Draughts must be guarded against until the roots are established in the soil. Water well after potting, then allow them to stand for a few days or until the soil shows signs of drying out. The roots by this time will be pretty well established. After this the young plants should be subjected to a cool temperature with plenty of ventilation on every favorable occasion and in a very short time rapid growth will commence and the shoots stretch out. Close attention must then be given them by keeping the tops pinched back to insure a sturdy plant.

C. W. JOHNSON.

Andrew Carnegie.

The illustration herewith shows the free flowering character of Andrew Carnegie, one of the latest candidates for favor sent out by the Chicago Carnation Co., Joliet, Ill. It has already been described in our columns and the characteristics of Rose Pink Enchantress are also now well known. The benches illustrated show the high state of culture to which these varieties and others are brought by this well known firm, now offering its high class novelties in immense quantities to the trade.

Carnations for Market.

ED. AMERICAN FLORIST:—

What would be the average cut from a plant from October 1 to June 1, and what would the price average per bloom of the ordinary market varieties? I intend growing about 7,000. Also what is the proper temperature?

SUBSCRIBER.

There are so many varieties now on the market that it is rather difficult to come at the average amount of bloom per plant, but a good commercial carnation should average from 20 to 25 flowers per plant during the period mentioned, and they should bring $3 per 100 to be profitable. The proper temperature for the general market varieties of carnations should be about 50° to 54° at night; daytime, from 60° to 70°, according to the weather, the higher temperature for bright days with plenty of air.

E.

F. R. Pierson Co., Scarborough, N. Y.

F. R. Pierson, the head of this firm, is well known to the trade in various capacities, but the object of this brief sketch is to give a few plain truths about the magnitude and importance of his work as a grower and disseminator of carnations. Anyone with a knowledge of carnations, going to this range would certainly leave with feelings of admiration for the quality of work being done, the results, and the man who is directing it all.

WINSOR.

Winsor should by this time be very well known to all carnation growers, and those directly or indirectly interested. It has frequently been seen on exhibition and the wholesale and retail stores, notably of New York, have for some time been handling it as a staple. Therefore, when the writer recently made a trip to Scarborough, the home of Winsor, he was prepared to see something good, but the magnificent exhibition there presented was far beyond expectations. Nothing yet said or written can give an adequate idea of what can be seen of it in its Scarborough home.

In constitution it is perfection; the flowers are of a faultless pink shade; it is prolific to as great a degree as we may ever hope to see any carnation, a keeper, a seller and it fills the requirements of the great public that knows what it wants. In addition to the immense cut of blooms that has been sent out from this range since the beginning of the season, there are now 100,000 well rooted cuttings of Winsor ready for shipment. Incidentally it may be stated, that of Winsor and other varieties grown at this range, 100,000 cut-

CHICAGO CARNATION CO., JOLIET, ILL.

House of Andrew Carnegie.

tings have already been shipped. The day of our visit an order for 10,000 rooted plants was being filled for shipment to Europe.

In discussing the merits of Winsor, Mr. Pierson said, in effect, that he has shown his faith by his works. This statement is verified in the fact, that of his range with a capacity of 75,000 plants for winter blooming, about 40,000 are Winsor. If intending to visit New York this winter the pre-historic fossils in the museum of natural history and other strange and curious sights of the metropolis may be missed, but take in Scarborough, the home of Winsor. The time spent, and the out-lay, will be insignificant, compared with the magnitude of the reward.

WHITE ENCHANTRESS.

This splendid scion of a noble family is running a very close race with Winsor at the Pierson range. Mr. Pierson is willing to stand for it as a white, unexcelled by any other variety now in commerce; and in health, fecundity, size of bloom and length of stem as shown in a large area of his range, there is ample justification of the claim. From four beds of the average width and 150 feet long, about 1,200 blooms per day of White Enchantress are being cut. Just at this time, if there is one of its points more notworthy than others, it is the splendid development of stem.

RED CARNATIONS.

Of the red carnations grown at this range, Beacon, Victory and Red Chief are very noteworthy. Growing as they do on beds side by side, there is an excellent opportunity to compare their merits. It is unnecessary to discuss Victory; to quote its dissimenator, "Victory has made good," and this is now accepted as a truism. Beacon is a production worthy of the originator of Enchantress and this should satisfy all doubters as to its merits. The writer had given Red Chief but little previous attention, but as grown at the Pierson range it is a grand flower. Its color is unexcelled by any other scarlet now before the trade. White Perfection, White Lawson, and other varieties are grown with success, but the number of plants of these varieties is small as compared with the leading varieties before mentioned.

PROPAGATION.

F. R. Pierson is a fine illustration of the progressive man who is not ashamed to change his mind if by experiment he can learn new methods. Some time ago he built a new propagating house, a model of its kind. With the great number of cuttings being rooted every bench was soon filled, and, more room being needed, the experiment was tried of propagating in a bed in one of the big 350-foot carnation houses. All the special work done in this connection, was to fill the bed with sand and provide a strip of cheese cloth for covering when there is sunshine. In Mr. Pierson's own words, "these cuttings have had the same heat and ventilation, as the rest of the house, where we grow flowering plants, and I believe 99 per cent of them have rooted; the work has been so satisfactory and successful, that I would never build another propagating house." What we saw fully justified the above statement. Not only were the plants well rooted, but the bloom on the foliage, dear to the heart of every good propagator, was a striking feature.

Much might be written of the various departments of the work carried on. The storage and packing rooms, particularly after a big day's cut, are not the least of the attractions. The concrete floors and walks, give an appearance both of neatness and solidity. The range is heated by three steam boilers of generous capacity; the steam is not run directly through the heating pipes of the benches, but through a large water heater, and by means of a circulating pump, the hot water is made to do the work in a very satisfactory manner. No. 3 "Buckwheat" coal is burned in the furnaces which are equipped with blowers to improve the draft.

CHICAGO CARNATION CO., JOLIET, ILL.
House of Rose Pink Enchantress.

THE RETAIL TRADE

St. Valentine's Day Business in Chicago.

Chicago retailers are, as a whole, well satisfied with their business on St. Valentine's Day. The violet was, of course, the leader and many thousands were sold in bunches and devices, but there were many choice showings of other flowers and plants. Small baskets of exquisite make with a single cyclamen or primula, or filled with sprays of cut flowers were very popular. Heart shaped boxes, large and small, filled or decorated with violets, lily of the valley and sweet peas were also noted while of the ubiquitous red hearts there were still too many to be seen. Art of this class is of the same kind that confectioners use on their cakes and should be pushed as little as possible by those who aim at an artistic or pleasing ideal in their work.

Fleischman did a very large business in the choice stock for which this fine store is noted, and Geo. Weinhober says they have been exceptionally busy right along. Over 15,000 violets were handled here, in sprays and boxes principally. The beautiful and sweetly scented Cattleya Schroderæ was well displayed here and other choice orchids were shown in quantity. There is always something choice and novel here, and besides a full line of the most exquisite china and glass ware there was a superb showing of brass boxes, vases and other receptacles for filling with plants and cut flowers. These are not on the transitory order usually seen, but are handsome and decorative after the plants or flowers are gone. Among the new, quaint and artistic designs are an old Norman water pail, scoops and vases of antique design and a splendid large pedestal vase of hammered brass. This kind of thing is costly and only suited to a high class trade, such as is handled here, but it is very beautiful.

Harry Rowe is a true florist, and has the happy knack of giving a light yet well finished appearance to the simplest arrangements. Besides a very large assortment of all that is best in valentine boxes, he showed an elegant line of birch twig and other baskets. Among them were some very pretty patterns, one with a lichgate roof and circular nest below being very pretty. Others of fine black twigs in all shapes were filled with bright and showy plants, very neatly and attractively displayed. Bulbous and other stock was in elegant shape, including grand carnations and some fine branching bougainvillea.

Hauswirth, Florist, had a remarkably good trade on St. Valentine's Day, and J. E. Hauswirth reports that business right along has been excellent. Visitors at the Auditorium Annex have been good patrons of late and the ordinary passing trade is good. We noticed some excellent Kate Moulton and Mrs. Potter Palmer roses; these are excellent pink varieties that are rapidly becoming popular. Bulb stock was in excellent shape here, some beautiful novelty tulips being especially good.

John Mangel had a very busy time and his store was bright and full of fine stock. Bright red azaleas were well shown, and we noted some remarkably well grown Nephrolepis Amerpohli from Vaughan's greenhouses at Western Springs. These were bright, fresh little specimens, quite characteristic of this elegant variety. Arranged in birch bark and other receptacles they were certainly very attractive. The Alpha Floral Co. handled a very large quantity of flowers on and around St. Valentine's Day. A charming heart shaped arrangement of violets, lily of the valley and white sweet peas was noted here, and the stock of bulbous and other flowering plants was excellent.

Miss Grace Sawyer, at West Madison street, again made a specialty of her Floradora valentines, and they were

more charming this year than ever. Tied with prettily colored ribbons, various sprays of flowers, such as roses, violets or pansies were attached, and beneath them lines suited to the flowers used. Miss Sawyer's valentines were handled by several of the principal down-town florists and she is to be congratulated upon her success with them. Her valentine window, in red, was pretty and effectively carried out, and this energetic little lady has made quite a name for her Pansy Garden Flower Shop on the west side.

H. N. Bruns made a fine show with St. Valentine Day's specialties and various pot plants and flowers, and reported a very busy time. His lily of the valley was, as usual, excellent, evidently the produce of the fine pips, for which this clever grower is noted. The show house alongside the store was bright with fine bulbous stock, cyclamens and other plants, the windows being filled with a fine assortment of the choicest cut flowers. The success of H. R. Hughes' valentine window was quite phenomenal and has made this clever advertiser's store much talked of. His Valentine Day story has been well distributed to thousands of his customers on the west side and the rebuilt and much enlarged store, with magnificent ice box and other special features, has a grand effect, especially at night, when lit with the dozens of colored electric lights.

Shonts-De Chaulnes Wedding Decorations.

For the home wedding of Miss Theodora Shonts to the Duc de Chaulnes, February 15, at the residence of the bride's parents, 123 East Thirty-fifth street, New York, the decorations were executed by M. Bowe, of 1294 Broadway.

Throughout the mansion there was an elaborate decoration, drapings of smilax, garlands, and vases of choice roses, being leading features. Lilies, lily of the valley, and other flowers were also used in profusion. The bridal room was rich in banks and garlands of American Beauty roses, there being an elaborate draping in shower effect of Asparagus plumosus nanus and adiantum. The bridal canopy was decorated with American Beauty and Bride roses and lily of the valley arranged in garlands and festoons. The halls, library and dining room of the Shonts mansion were all decorated on the same lavish scale as that which has already been described. The whole scheme was carried out with the attention to detail for which Mr. Bowe is noted, and the successful execution establishes his place in the ranks of the leading decorators of the metropolis.

Notes for the Retailers.

TABLE DECORATIONS.

A decorator attached to one of the leading New York hotels stated recently, that Killarney roses were very fashionable this season for dinner decorations. The manager of a retail store which caters to the exclusive set, when questioned as to table decorations, said that they were using about everything, including many tulips and jonquils. It appears that the forcing of so many flowering shrubs is cutting into the regular cut flower trade. I noted recently a dinner decoration in which a great bunch of forthsyia in a large vase was used as a center piece. Before the dawn of the forcing era, it would have been roses, carnations or other cut flowers. On the public tables of the leading hotels, there are usually vases of flowers, carnations being much used, but there is no attempt at elaboration. It is the private dinners and supper parties that call for style.

CORSAGE BOUQUETS.

Gardenias are now being extensively used in corsage bouquets, both by themselves and in combinations with violets and cattleyas. It is now considered smart to have at least one cattleya in a corsage bunch of violets.

COMBINATIONS.

Nothing can be found that makes up a prettier combination basket than bunches of lilac among Adiantum Farleyense. Erica melanthera, freesias and pink tulips are also admirable in combination with this fern.

FORCED SHRUBS.

Nearly everything that will force seems to be on the market this winter, from pussy-willows to good sized plants of magnolia; there is a great, if not an over abundance of spring flowering shrubs and plants. This includes the forsythias, Japanese quince and deutzias, which are all used effectively in window decorations.

Banks of Cibotium Schiedei and Ficus pandurata, with a border of azaleas, spireas or large primroses, make a very acceptable decoration, for variety in a large show window. Both the purple and white wistarias in large pots and in good bloom are now seen in the New York retail stores.

DAYTON FLORISTS' CLUB DESIGN FOR FUNERAL OF J. B. HEISS.

Illinois State Florists' Association.

THIRD ANNUAL MEETING, SPRINGFIELD.

Visitors to the third annual convention of the Illinois State Florists' Association at Springfield were given a tempestous welcome in a driving blizzard of fine soft snow which soon stalled most of the local and interurban lines about the city. Trade visitors, except a good delegation from St. Louis, which arrived a couple of hours late, fortunately came on by through trains and on time.

Delegates were, however, most conveniently located as to hotel and hall, the one simply across the street from the other. Ten o'clock found most trade exhibits and banners in place and by 1:00 o'clock the cut flowers had been staged in the handsomely laurel decorated hall.

President Hey appointed as judges of the exhibition Fred Rowe, of Bloomington, Frank A. Friedley, of Springfield, and A. F. Longren, of Chicago, and as committee on president's address, J. C. Vaughan, W. N. Rudd and J. F. Ammann.

OPENING SESSION, TUESDAY AFTERNOON.

President A. C. Brown of the Springfield Florists' Club called the meeting to order at 3 o'clock, assuring the members that the warm greetings in the hearts of the Springfield craft for their guests existed in direct contrast with the rough treatment accorded them by Old Boreas.

Speaking for the mayor, who was ill, Mr. Murray of the city administration made a short address of welcome, to which Phil. J. Foley, of Chicago, replied, explaining with his own pleasing logic the cause of the storm and in a soberer vein some of his experiences in laying the foundation, two years ago, for the favorable legislation recently secured by the association.

President A. T. Hey then took the chair and read his annual address, which was very favorably received and conceded to be a model president's address.

Following the reports of Secretary A. C. Beal and treasurer Geo. A. Kuhl, E. G. Hill made an informal talk, covering his visits to the rose growers of Lyons and M. Bruant of Poitiers. Mr. Hill spoke in high terms of the patient, conscientious and painstaking labors of the French rosarians at Lyons. He gave credit to M. Pernet for a most favorable mixing of the blood strains of the hybrid perpetual and the tea in rose growing from which several good roses had already been secured and more may be expected.

J. C. Vaughan for the committee on president's address recommended action by the association in the following particulars:

That a committee of three be appointed to aid in state fair work.

That a resolution be adopted asking that the University of Illinois keep in mind the need of the florists of the state for a practical course in floriculture at the university.

That the city beautiful suggestions of the president be commended.

That certificates of merit to be issued by the association and rules covering same be submitted to the executive committee for its approval that same may be put into effect at the next annual convention.

That the following resolution regarding statistics be adopted:

Whereas, Accurate census records of floriculture in all its branches are most important to its development in both city clubs and state work, be it

Resolved, That our national society, the S. A. F., be and hereby is requested by the Illinois State Florists' Association in convention assembled at Springfield, Ill., to urgently memorialize the census bureau of the United States to take some active measures to devise a practical plan for a correct census of our business in all its details.

The next paper was that of Secretary Rudd of the advisory committee for the experimental work.

Secretary Beal then read the address of Dean Davenport.

THE BANQUET.

A most agreeable feature in the face of storm conditions was the gathering at the St. Nicholas hotel at 9 o'clock Tuesday evening, and the Springfield Florists' Club in its arrangements made for the 150 guests present certainly carried out this phase of the entertainment with a completeness in menu, toasts, music and song which would do credit to any city in the country.

Hon. Chas. E. Hay, for many terms mayor of Springfield, and always foremost in horticultural efforts in that city, acted as toastmaster.

Albert T. Hey, Re-elected President.

TOASTS AND RESPONSES.

"Future of Our State Association," by J. Fred Ammann, Edwardsville.

"I Loved not Man the Less, but Nature More," C. E. Gullett, Lincoln.

"The National Flower Show," J. C. Vaughan, Chicago.

"Springfield as a Convention City," Nicholas Roberts, Springfield.

"The Hoosier Florist," E. G. Hill, Indiana.

"The 'Ruddy' Side of Life," W. N. Rudd, Mt. Greenwood.

"City Beautiful," Stuart Brown, Springfield.

"He Who Loves a Garden Loves a Greenhouse Too," Phil. J. Foley, Chicago.

Wednesday's Business.

(By Wire.)

A subscription of $50 was appropriated for a National Flower Show trophy to be offered in the name of the association.

Prof. J. C. Blair, of the university, made a general talk covering the lines which have been so far undertaken by the university and carried forward in the interest of the Illinois florists.

E. G. Hill, of Richmond, Ind., was made an honorary member.

Election of officers resulted as follows: Albert T. Hey, president; Geo. Asmus, vice-president; J. F. Ammann, secretary; Frank L. Washburn, treasurer.

Final resolutions were adopted expressing the obligations of the association to the Springfield Florists' Club for the careful manner in which every detail of the convention arrangements had been covered.

Treasurer's Report.

Whitehead & Hoag Co.	19.20
Cash in bank February 11, 1908	8.90
Total	$166.81

Pekin. GEO. A. KUHL, Treasurer.

Convention Notes.

The Ionia (Mich.) Pottery showed a new grass growing head evidently of a new hybrid type of Michigan politician.

The attendance compared favorably with that of the recent national carnation convention at Washington.

The song "Illinois" sung by the Apollo Quartette seemed to make the hit of the evening.

Chicago's democratic candidate for mayor, J. Hamilton Lewis, made a characteristically flowery speech to the banqueters, his honeyed phrases flowing softly as the current of Springfield's famous river the Sangamon.

Nels Cole of Peoria was not present.

The exhibition hall with its liberal display of "Allied Arts and Crafts" indicated effective work by the officers and was flattering to every Illinois florist.

J. F. Amman in his table talk well said that the Association would be what those present would make it. The start was well made, the child had become a youth and needed the careful guidance of its parents. It was a promising child and worthy our solicitude.

It was much more of an occasion of visiting—a making of new and renewing old acquaintances, than a record breaker in actual business done.

Quincy, Decatur, Jacksonville, Alton and Rockford were perhaps snowed in.

The bouquet programme like President Hey's address was broad, and covered well those sides of floriculture now in the eye of the trade and the public.

Chicago as well as St. Louis sent good delegations with perhaps a preponderance of commercial men.

Springfield is entitled to the next convention if she wants it.

A called meeting of the Florists' Advisory Committee failed to connect in the absence of Prof. J. C. Blair, probably storm-bound.

Peter Reinberg's cut flower exhibit missed fire, going to Springfield, O., greatly to the disappointment of Leonard Kill.

I. L. Pillsbury's new carnation staple device is highly spoken of.

E. H. Hunt's representative, "Billy" Lynch, had an effective call of B-a-a! B-a-a! in exploiting the Wizard brand of sheep manure.

The Annanias Club attempted a midwinter session in Rudd's room, but the same miscarried for lack of quorum; Phil Foley and G. Asmus were lonesome.

J. F. Ammann's display of roses and carnations was for foliage, stem, color and size a remarkable exhibit and attracted the attention of everyone.

Exhibitors.

The following firms were represented by either exhibits or banners:

Advance Co., Richmond, Ind.—Ventilators and other supplies.

J. F. Ammann, Edwardsville.—Bulbs, Asparagus plumosus and A. Sprengeri.

Chas. Afelt, Comfort, Tex.—Armadillo baskets.

George H. Angermueller, St. Louis, Mo.

Chicago Carnation Co., Joliet, Ill.

Crowl Fern Co., Millington, Mass.—This firm furnished the laurel wreathing for decorating the hall. It was fine stock and made a very fine display.

Detroit Flower Pot Manufactory, Detroit, Mich.—Display of pots in standard sizes.

A. Dietsch & Co., Chicago.—Greenhouse materials.

Eagle Machine Works, Richmond, Ind.—Carnation supports.

Geo. M. Garland, Des Plaines.—Ice clearing gutter.

Wm. Hagemann & Co., New York.

E. H. Hunt, Chicago.—To-Bak-Ine products, Simplex spray pumps, rubber hose and florists' supplies.

Ionia Pottery Co., Ionia, Mich.—Display of standard pots, bulb pans, azalea pots, hanging baskets and lawn vases. A creditable display.

Geo. A. Kuhl, Pekin.—Fine display of ferns.

Jensen & Dekema, Chicago.

Kroeschell Bros. Co., Chicago.

C. A. Kuehn, St. Louis, Mo.

A. F. Longren, Des Plaines, Ill.

McCray Refrigerator Co., Chicago and Kendallville, Ind.—White enamel florists' refrigerator.

Morehead Manufacturing Co., Detroit, Mich.—Morehead improved steam trap.

Maxfield & Dimond, Warren, R. I.—Artificial calyx.

McHutchison & Co., New York.

Chas. F. Mayer & Co., New York.

John C. Moninger Co., Chicago.

I. L. Pilsbury, Galesburg.—Split carnation mender.

Peters & Reed Pottery.

W. N. Rudd, Morgan Park, Ill.

Vaughan & Sperry, Chicago.

Vaughan's Seed Store, Chicago.—Display of bulbs.

R. M. Ward & Co., New York.

Christ Winterich, Defiance, O.

R. Witterstaetter, Cincinnati, O.

Address of President Hey.

Before giving my address I want to thank you for the honor you have conferred upon me. One year ago I was not able to meet with you at that time, only in spirit, but I appreciate the honor, and have tried to fill the position to the best of my ability. It seems but yesterday since we organized the society for the promotion of the best interests of our profession, but this is our third annual convention, and, as president of this association, it is my pleasing duty to address you on certain topics which I deem best to bring before you for your earnest consideration.

A brief resume of the work accomplished during the official year will probably be of interest to you. At our last convention, held in Bloomington, a report on the progress of our experiment station bill was made to you by J. F. Amman, who was then our president. After a great deal of work, the bill appropriating $15,000 passed the house and senate May 10. The governor signed the bill June 2, and it became a law to take effect July 1, 1907.

THE CHARTER AND BY-LAWS.

On carefully examining the charter of our association and the constitution and by-laws of the same, I found that it did not agree with the charter, and it became necessary to take steps to amend our constitution to comply with the same, so, pursuant to authority as president I called the executive committee together at the Leland hotel in this city on June 8, to discuss the proposed changes in our constitution. The proposed changes were published in the trade papers, so as to give six weeks' notice, according to the constitution. At this meeting I also appointed the advisory board, as provided for in the bill, consisting of the following named gentlemen: W. N. Rudd, J. F. Amman, J. C. Vaughan, C. D. Gallentine and F. Heinl. At a special meeting of this association (as per call through the trade papers) in this city August 10, the proposed changes were adopted as per constitution and by-laws now in your hands. It was also voted that the headquarters of this association should be changed from Joliet to Springfield, so as to have a representative of the association near the state capitol. Proper records of the changes were filed in the secretary of state's office and also in the court of Will county, Joliet.

It was also voted to have the constitution ratified at this annual convention, and this will come up for your consideration in due time. The first meeting of the advisory board was held in Champaign June 25 and organized with W. N. Rudd as secretary, who will give you a full and detailed report for your consideration. One of the main objects for which the association came into existence is now an accomplished fact, that of making at our state experiment station a beginning on lines of practical benefit to the florists and others who grow crops under glass. Our station is yet in its infancy and the work is very much impeded in not having the houses built to carry on the work. Plans and specifications have been made and are now ready. The plant will be in full operation in a few months and before we meet again we expect to have some good report for you through the trade papers. Some little work in the line of experiments has been done; part of the greenhouses of Washburn Bros., of Bloomington, have been rented for this winter, and report of what has been done will be given you by Prof. A. C. Beal, who has charge of the work. Apart from our experiment station, I believe this association should have in mind and take an active interest in the teaching of floriculture and garden topics in our public school system. Our agricultural friends are taking an active movement along these lines, and why not us? The time is not far distant for us in Illinois when we will see a practical course for florists established at our university. The coming florist should have a practical training combined with a knowledge of those sciences relative to our business. The agricultural department of the university is doing a great work on these lines, especially in the study of soils and fertilizers, and the florist who wants to rank high in his profession must attain a knowledge of those sciences, which can be used to a practical effect in our line of work, and it is for this association to see that a way is made possible for him to do it. I believe this association stands ready and willing to do its part in securing the necessary appropriation to carry out any defined plan for a practical commercial course of floriculture at our university.

As in all other trades and professions, we are today flooded by a great variety of chemical fertilizers, insecticides, etc., that are thrown on the market with all their excellent recom-

mendations for the innocent good natured florist to experiment with; very few of our trade know much of their adaptability to their different soils, etc., until they have found out, by sometimes costly experience. I want to see this put on the same basis as our pure food law and that any fertilizer and insecticide sold to the trade in Illinois should have the stamp of our experiment station analysis upon it. This is work for our experiment station.

The statistics of the florist business, as given by the government census, are very incomplete and inaccurate and cannot be relied upon. I believe this association should take some active measure by appointing a committee or adopting resolutions to bring this before the national society at its next annual convention, and see if this matter cannot be taken up with the census bureau to have some practical plan devised for a correct census of our business in all its details. We especially need this in Illinois, as we will have to come before the legislature at its next session for a larger appropriation than we have before, in order to carry on our work.

The National Flower Show, to be held in Chicago, November next, should meet with our hearty co-operation. I have authorized our W. N. Rudd to state that this association will sign as one of the sponsors to this great show, and ask your approval of the same. This will be the greatest flower show ever held on this continent, and our association should show its appreciation of the fact that it is held in this state. I would earnestly recommend that some trophy or prizes be offered in the name of the association, and that a committee be appointed to take up this important matter and report before this convention comes to a close.

CERTIFICATES AND AWARDS OF MERIT.

The exhibition given in connection with our annual convention is a very important feature of the association work and should be encouraged. I am of the opinion that the time is at hand when the association should recognize the exhibitor and his exhibits by issuing certificates of merit, on the same plan as our national and other societies. This course of action would naturally tend to bring out a better exhibit and act as a stimulus to the craft in bringing out the best they have. I would therefore recommend that this matter be referred to a committee to devise a plan of awards of merit and report back to this convention.

The Illinois state fair is known as the greatest and best agricultural fair in the United States. Through the efforts of this association the floricultural department has been greatly improved. The premium list has been revised and now equals any of the premium lists of our great flower shows. We were also able to gain recognition in having a practical florist appointed, J. F. Amman, of Edwardsville, assistant superintendent of that department—something which has never been accomplished before.

The importance of this flower and plant show at the state fair is, I am sorry to say, greatly overlooked, and the lack of interest shown by the trade in general is sadly to be deprecated. Those of you who have not given this any thought, should bear in mind that it is the ideal place to bring before the masses the importance of our business. You take the flower shows of our large cities—there is practically only a certain class of visitors, who are always lovers of flowers, but here at the state fair, the multitude of people who come from the country, who rarely see a greenhouse, get their first ideas about flowers. Also the people who come from every city and town in Illinois and other states who never think of visiting a flower show, pass through this section of the fair, become interested, and from this comes a desire to have plants and flowers, which sentiment may have laid dormant if they had not visited the state fair.

At the last state fair over 250,000 visitors passed through the gates; fully two-thirds visited the horticulture and floral display. The amount of premiums offered last year was $2,336, of which only $1,718 was taken up; $618 went back to the treasury. Nearly all of this last named sum not taken up was in the professional growers cut flower department. I think when the trade thoroughly awakens to a sense of its responsibility, this will all be remedied. The dome building is not a suitable nor adequate place for the proper display of the exhibits, and some effort was made last year to get a building adapted for floriculture.

I believe if this association will take hold of the matter it can be done. Also our premium list needs to be revised in some few items. This should be attended to at once. The superintendent of this department will appreciate any effort that this association will make towards making this department a success. I would therefore recommend that a committee be appointed on floriculture at the state fair.

CITY BEAUTIFUL.

The florists in the different cities have been very slow to take advantage of the idea of what may be termed "City Beautiful" and the possibilities that may arise and give such an impetus to our business. Last year the Springfield Woman's Club took up the idea and distributed several thousand packages of seeds to the school children at a nominal cost, with literature, giving them instructions how to plant and make their yards and gardens beautiful. In September arrangements were made for a flower show. This got so big an undertaking, that it was turned over to the Business Men's Association, who appointed a committee (of which your president was a member), to take charge of it, with the assistance of the Springfield Florist Club. Prizes were awarded for the best garden in each ward, and in September the flower show was held in which there were about 1,000 entries in the different varieties of plants and flowers by the school children. Several thousand people attended the exhibition, and in the evening over 3,000 people listened to an illustrated lecture by the National Cash Register Co. Prizes were awarded to the successful ones in the form of shrubs, vines and bulbs. This committee, in connection with the Woman's Club and the Business Men's Association, took up the matter of a general clean-up in the city with the mayor and superintendent of streets. Weeds were cut, alleys cleaned—everybody was full of enthusiasm. All the school children who took part in the city beautiful were presented with a button to wear, with the significant motto, "I have helped." This is an idea that our association and every florist club in this land should foster. It can be done in every village and city in Illinois. Not only does it attain to better moral and civic improvement, but it has an uplifting tendency to a better condition,—better manhood and better citizenship. Flowers and vice will not grow together and eventually the good will triumph. Now take this idea home with you, florists, and bring the matter up before your florist clubs. If you have not got one, get together, join forces with your woman's club, and if you don't get one penny in return, you will have the satisfaction of having performed your duty as a citizen and florist. Civic improvement is the cry of the age, and it is for the florist to show himself—come out of his shell—take an active part and be a leader in the new order, "The City Beautiful."

COUNCIL OF HORTICULTURE.

I wish to call your attention to the good work done by the Council of Horticulture in promulgating a correct knowledge of floricultural subjects through the press for the information of the public. This idea cannot be too highly commended, and should meet with the hearty approval of this association.

I have only had one death in our association reported to me and it is with sadness and sorrow that I announce to you the loss of one who was a faithful worker in our cause, ever ready and ever willing to give of the best he had, and in the annals of floriculture in Illinois his name will ever be linked with those who have stood for the highest ideals in our chosen profession. Phil. J. Hauswirth—Passed on December 4, 1907. I deemed it my duty as the president, to represent this association at the funeral, and also ordered a floral tribute to be sent to the family in the name of the association. The committee on obituary will in due time offer to you a tribute to his memory.

In making these suggestions and recommendations for your consideration, I do it for the best interests of our association. You may not all agree with me, but this is my viewpoint. You may have yours. In the deliberations of this convention, I hope everyone will express his views on the different subjects which may come up for discussion. It is through exchange of ideas we get information that is most useful to all of us. I wish most sincerely to thank those who have been always ready with willing hands and loving hearts to render any assistance I may have needed in promoting the best interests of our association, to the Business Men's Association of this city for the interest taken in this convention and to the Ad Men's Club for their kind offer to assist in entertaining, and also to the local florist club for their great interest taken in helping to make this convention a success, I tender my sincere thanks. Thanking you for the honor conferred upon me, believe me to be ever yours for the best interests of the Illinois State Florists' Association.

SPRINGFIELD, O.—P. P. Mast & Co., long prominent in the agricultural implement trade, are reported in the hands of a receiver.

PITTSFIELD, MASS.—Max R. Engleman, junior partner in the firm of R. Engleman & Son, has brought a bill in equity against his father through his attorneys, Green & Bennett of Springfield, asking that the partnership be dissolved and that a receiver be appointed.

ST. PAUL, MINN.—The following are the officers of the Twin City Florists' and Gardeners' Club: Theo. Wirth, 3800 Bryant avenue, Minneapolis, president; O. J. Olson, 20 W. Fifth street, St. Paul, vice-president; R. A. Latham, 83 South Tenth street, Minneapolis, treasurer; S. D. Dysinger, 20 West Fifth street, St. Paul, secretary. The club meets the third Tuesday of each month alternately in St. Paul and Minneapolis.

INDEPENDENCE, KANS.—G. A. Kishpaugh, of Iola, has purchased the Finley Brown and W. R. Mattock greenhouses and is consolidating them as one plant on West Main street, under the supervision of C. W. Lemmon, an expert scientific gardener and florist. Mr. Lemmon met with a painful accident at the greenhouse. He thought the gas had all been turned off under the boiler, but it had not, or there was a leak, and when he struck a match a fierce blaze struck him in the face. His head was badly scorched and his hands were burned.

OBITUARY.

Charles H. Foreman.

Charles H. Foreman, of North Ninth street, Louisiana, Mo., was killed by a falling chimney when his greenhouses caught fire, February 8.

R. P. Speer.

Capt. R. P. Speer, one of the best known horticulturists in Iowa, died at his home in Waterloo township, aged 80 years. He was president for four years of the Iowa Horticultural Society, and director for three years of the Iowa Agricultural Experiment Station.

THE AMERICAN FLORIST

TWENTY-THIRD YEAR.

Subscription, United States and Mexico, $1.00 a year: Canada, $2.00; Europe and Countries in Postal Union, $2.50. Subscriptions accepted only from those in the trade.

Advertisements, on all except cover pages, 10 Cents a Line Agate; $1.00 per inch. Cash with Order.

No Special Position Guaranteed.

Discounts are allowed **only on consecutive insertions,** as follows—6 times, 5 per cent: 13 times, 10 per cent· 26 times, 20 per cent; 52 times, 30 per cent.

Space on front pages and back cover page sold only on yearly contract at $1.00 per inch, net.

The AMERICAN FLORIST Advertising Department is for florists, seedsmen and nurserymen and dealers in wares pertaining to those lines only.

Orders for less than one-half inch space not accepted.

Advertisements must reach us by Monday to secure insertion in the issue of the same week.

When sending us change of address always send the old address at the same time.

We do not assume any responsibility for the opinions of correspondents.

Photographs.

We are always pleased to receive good pictures of trade subjects. Send them prepaid by mail or express carefully packed to prevent injury in transit. Pack them flat, not rolled, with name and address of sender on the back of each picture.

HARDY plants are sought for with ever increasing interest; read the article by H. G., page 198.

THE CONVENTION papers by Secretary Rudd and Dean Davenport will appear in our next issue.

A NEW single violet will soon be on the market, with the color of California and size of Princess.

ROSE IVORY is a great favorite of southern growers because of its prolific, keeping and shipping qualities.

CONCRETE GREENHOUSE CONSTRUCTION was covered in No. 923 of the AMERICAN FLORIST, price 10 cents, postpaid.

IN New Orleans, La., where the ground is usually in a saturated condition, raised benches have proved exceedingly serviceable in growing many lines of greenhouse stock outdoors.

CALLAS are extensively grown in the south, but the roots are usually lost after the first season, succumbing to dry rot. Northern growers could, perhaps, save these southern roots.

ADDITIONAL prizes have been announced for the Chicago exhibition of the American Rose Society in March, and everything points to a record breaking exhibition at the Art Institute.

A NEW JERSEY corporation has been formed with $180,000 capital stock "to manufacture and sell nitrogen gathering organisms or bacteria for use in inoculating plants, seed or soil." The Earp-Thomas Farmogerm Co. is the title of the concern.

AZALEA HEXE, now so popular, is by no means new. It was raised by Otto Forster, of Lehenhof, Germany, about 30 years ago. It was obtained by crossing Azalea amœna with a variety of A. Indica, Duc de Nassau, and retains the characteristics of A. amœna.

HON. FRANK D. CURRIER introduced a measure entitled "A Bill For the Creation of a National Highways Commission and for the Construction, Improvement and Maintenance of Public Highways," January 30, and this was referred to the committee on agriculture and printed.

IT IS a bad idea to condemn every new plant production. It is true that among the new vegetables produced each season, many are worthless. Remember that the varieties which have become your hobby were, at one time, absolutely new. Give the new varieties a chance—Market Growers' Journal.

RIVERSIDE, CALIF.—H. Suzuki, a director in the Imperial Yokohama Nursery Co. of Japan, answering a newspaper man in Los Angeles one evening, charged the bell boy with this reply: "Tell the honorable journalist that his servant is very fatigued and is now retired. Pleasure me by calling tomorrow morning."

WE have received the rules and premium list for the second spring exhibition of the St. Louis Horticultural Society, to be held March 10-12 at the Grand avenue Masonic Temple. The competition is open to all and there is a list of 26 classes, with premiums ranging from $15 down. In addition to the cash prizes, there are three ribbon awards, blue, red and yellow. Otto G. Koenig, 6473 Florissant avenue, is the secretary.

VISITORS at F. Dorner & Sons' establishment at La Fayette, Ind., are much pleased with the appearance of Winona carnation there.

BENJAMIN HAMMOND, secretary of the American Rose Society, is out with a prospectus for a new periodical called the Rose Journal, to be published in the interest of the American Rose Society. As we understand it, Secretary Hammond will proceed with the publication of this quarterly if he can secure 50 rose growers in America to join hands on the proposition.

American Rose Society.

COMING SHOW IN CHICAGO.

In addition to what have already been published, the following prizes have been sent in for the exhibition in March.

Kroeschell Bros. Co., Chicago—$10 in gold for the best vase of Killarney rose, 50 blooms or less; $10 in gold for largest exhibit of hybrid perpetual roses in pots.

Vaughan's Seed Store—Cup, value $25; will announce later what for.

Weiland & Olinger, New Castle, Ind.—$10 for 50 Mme. Chatenay rose.

H. N. Bruns, Chicago—$10; premium left to society.

Poehlmann Bros. Co., Morton Grove, Ill.—$100 cash; for best 100 pink roses, $50 and best 50 red roses $50. (American Beauty and Richmond excluded.)

Frederick C. Newbold, ex-president of the American Rose Society—Cash prize of $10 for the best display of white roses.

Emil Buettner, Park Ridge, Ill.—Cash prize $25.

We have this from the Chicago Florists' Club: "Be assured that you will find the Chicago boys on hand in good style for the rose show, but we want you to make an effort earnestly and vigorously to get pledges of attendance and exhibits from every leading grower east of the Allegheny mountains. Chicago will take care of the rest." Now, men of the east, do you hear the call? What shall the answer be? We are coming to Chicago with our "Jardines" and our "Smiths," "Wyndmoor and Beatrice" and hosts more besides, "Simpson and his Richmonds, "Burton and his Beauties," "Elliot and his Killarneys," "Farenwald with his Liberty." New Jersey sends the answer, "Dinna ye hear the slogan; the Campbells are all a coming."

All intending exhibitors are requested to send word to the secretary. "The Rose Journal" is receiving support as a proposition to interest the membership.

BENJAMIN HAMMOND, Sec'y.
Fishkill-on-Hudson, N. Y.

American Rose Society Rules.

ED. AMERICAN FLORIST:—

What are the rules of the American Rose Society regarding stems of roses for exhibition? Must the flowers be single on the stems or may two or more be allowed?

C. W. W.

The rule on this point reads: "All cut roses in the competitive classes must be from a single growth of the current season."

Essential to the Trade.

AMERICAN FLORIST CO.:

I appreciate your paper and realize it is essential to the trade and an excellent aid and help to the working florists who are keeping up with the times in their work. WM. THOS. STILLWELL.

Ogden, Utah, February 14, 1908.

Meetings Next Week.

Baltimore, Md., February 24, 8 p. m.—Gardeners' Club of Baltimore, Florists' Exchange hall, St. Paul and Franklin streets.

Boston, Mass., February 29, 11 a. m.—Massachusetts Horticultural Society, Horticultural Hall, lecture on "The Private Gardener," by Robert Craig, Philadelphia, Pa.

Cleveland, O., February 24, 7:30 p. m.—Cleveland Florists' Club, Progress hall, 2610 Detroit street.

Denver, Colo., February 28, 8 p. m.—Denver Floral Club, 323 Charles block.

Hartford, Conn., February 28, 8 p. m.—The Connecticut Horticultural Society.

Lake Forest, Ill., February 26, 8 p. m.—The Horticultural Society of Lake Forest, Council Chamber, City hall.

New London, Conn., February 26.—New London County Horticultural Society, Elks' hall.

New York, February 27-28.—National Association of Gardeners, American Institute hall, 21 W. Forty-fourth street.

Catalogues Received.

Holmes Seed Co., Harrisburg, Pa., 1908 Handbook of Seeds; The H. G. Madson Seed Co., Manitowoc, Wis., seeds; Home Nursery, La Fayette, Ill., nursery stock; V. Lemoine et Fils, Nancy, France, plant novelties; Ditlev Eltzholtz & Co., Ringe, Denmark, seeds; F. W. Dixon, Holton, Kans., small fruit plants; H. Kohankie & Son, Painesville, O., nursery stock; Ottolander & Hooftman, Boskoop, Holland, plants and shrubs; Walter P. Stokes, Philadelphia, Pa., seeds; Arthur Cowee, Berlin, N. Y., gladioli; Wilhelm Muhle, Temesvar, Germany, seeds, plants and nursery stock; Nonne & Hoepker, Ahrensburg, Germany, seeds, bulbs and plants; Peter Henderson & Co., New York, implements; Binghamton Seed Co., Binghamton, N. Y., seeds; Jackson & Perkins, roses, nursery stock, etc.

ASPARAGUS DECUMBENS.—This plant produces desirable strings (clusters of stems) of green foliage for decorative work. Usually these strings are allowed to droop from benches, boxes or suspended baskets, but Andrew Benson, of Bassett & Washburn's, Chicago, says the plants make better growth if grown in ordinary benches and the stems permitted to run on strings slanted at an angle of about 45°.

Greenhouse Building.

Paducah, Ky.—Schmaus Bros., one greenhouse, 40x125 feet.

Jacksonville, Fla.—Sawyer & Payne, several greenhouses.

Wyomissing, Pa.—Frank Shearer, one greenhouse.

Allegheny, Pa.—H. L. Blind & Co., one greenhouse.

Beatrice, Neb.—Dole Floral Co., additions to greenhouse plant.

Memphis, Tenn.—Memphis Floral Co., six carnation houses, 18x100 feet.

New Orleans, La.—Abele Bros., one asparagus house, 20x100 feet.

SITUATIONS, WANTS, FOR SALE.

One Cent Per Word.

Cash with Adv.

Plant Advs. NOT admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1908 is entitled to a five-line WANT ADV. (situations only) free, to be used at any time during the year.

Where answers are to be mailed from this office, enclose 10 cents extra to cover postage, etc.

Situation Wanted—Grass seed man, 45 years of age, 25 years' experience in Germany.
Key 437, care American Florist.

Situation Wanted—By first-class grower of all kinds of cut flowers and plants; good propagator to take charge of section; 20 years' experience.
Key 438, care American Florist.

Situation Wanted—Good grower of roses, carnations 'mums and bedding plants, also good designer, single, strictly sober and honest, wants position on retail place; references. Address
Key 429, care American Florist.

Situation Wanted—Young man wants position in New York or Philadelphia, or around, in store or greenhouse work; has been working in greenhouses before in Germany and England. Address
Key 436 care American Florist.

Situation Wanted—As gardener on private place with glass; head or single; Chicago or California preferred; age 28, single; 15 years' experience; well up in gardening in general; references
Key 420, care American Florist.

Situation Wanted—As foreman or assistant on private or commercial place, by young single German 15 years' experience; grower roses, carnations, chrysanthemums, palms and general stock; references, address EDWARD JACEGER,
401 E. 156th St., New York City.

Help Wanted—A good helper for general greenhouse work at an up-to-date commercial place.
Key 435, care American Florist.

Help Wanted—Young man with 2 years' experience in general greenhouse work; $12.00 per week and room. EDWARD TATRO, Salina, Kas.

Help Wanted—General foreman and rose grower at Poehlmann Bros. Co., Plant B. Address
ADOLPH H. POEHLMANN,
Plant B, Morton Grove, Ill.

Help Wanted—First-class potter and general plant grower; sober and reliable; references required; state wages expected.
STUART & HAUGH, Anderson, Ind.

Help Wanted—A man to work in rose section, also two men for general greenhouse work; state wages without board. Address
Key 340, care American Florist.

Help Wanted—Wire worker for a Kansas City floral concern; state experience, age, nationality and wages desired. Address
ALPHA FLORAL CO., Kansas City, Mo.

Help Wanted—Decorator and designer; one who has some knowledge of plants; single man preferred. References and wages in first letter. Address Key 410, care American Florist.

Help Wanted—Good salesman and maker up for retail store in large city on Pacific coast; give references, wages expected and other particulars.
Key 431, care American Florist.

Help Wanted—Experienced manager or foreman for large commercial place where all kinds of cut flowers and plants are grown; Pacific coast. American or Englishman perferred. Address
Key 432 care American Florist.

Help Wanted—A good grower of roses, carnations and 'mums to take full charge of 40 000 feet of glass, wholesale only; must have good references; sober and not afraid of work; must be capable of handling help; wages, $60 per month. Address Key 430, care American Florist.

Help Wanted—By April 1, a working foreman, married, to take charge of 35,000 feet of glass, where roses, carnations, 'mums and a general line of bedding and pot plants are grown for retail store; must be capable of producing first-class material and also fully able to handle men to best advantage, JOHN RECK & SON,
Bridgeport, Conn.

Help Wanted—We have a good garden on edge of Illinois town, with greenhouses, hotbeds, etc. We furnish team, seeds, implements, etc., and divide gross profits, which run about $1,200, but could be much increased by good man. Good schools and healthy location; living cheap. Good two-story house on place. Must be strictly honest and a good gardener. Will make favorable terms either for cash rent or share. Address
Key 433, care American Florist.

For Sale—Two small greenhouses, with stock. LIMITS FLORIST, 1741 Diversey Blvd., Chicago.

For Sale—A large florist refrigerator with mirrors and marble base at a bargain
A. B. ELLSWORTH, 17 N. 6th St., Allentown, Pa.

For Sale—Floral refrigerator and store fixtures suitable for retail florist store in first-class condition, almost new. BRIGHTON FLORAL CO.,
Station B, Cincinnati, Ohio.

For Sale—Two house, each 14x100 ft and one 5½x100 fully stocked opposite the largest cemetery here; one acre of land, living rooms above office. A good man on carnations and bedding plants can do well here. F. W. MEYER,
Kalamazoo, Mich.

For Sale—20,000 square feet of glass, well stocked; three acres of ground; six-room house; all modern, in good condition, and a money-making place in best city of Indiana; $4,500 required. Details to parties meaning business.
Key 427, care American Florist.

For Sale—A retail florist business consisting of 4200 feet of glass, well stocked, store building with living rooms above; on 2 lots 44x136 feet located in the heart of a residence city; county seat of 10,000 inhabitants less than 50 miles from Chicago with good surrounding towns. Address
Key 434, care American Florist.

For Sale—A large modern and successful floral establishment, the oldest established in the city, carrying a complete line of cut flowers potted plants, seeds, poultry supplies, etc. This place must be seen to be appreciated, and, under proper management, is a money maker. Will be sold at a price that is right. For further information address C. EDWIN OYSTER,
507-8 Dollar Bank Bldg., Youngstown, Ohio.

For Sale—A greenhouse plant in Colorado Springs, Colo., of about 19,000 feet of glass all stocked and just coming in good bearing condition steam heat; city water; cheap coal; six room cottage with plant, one acre of ground. This is a rare chance for a man with a family to help or a party that wants a higher altitude; good trade; fine soil and water the best.
A. D. JONES, Broadmoor, Colorado Springs, Colo.

For Sale—Greenhouse property. I offer for sale to quick buyer a splendid greenhouse property at Highland, N. Y., consisting of the following three houses, respectively: 161 x 26, 102 x 26 and 100 x 50, all of the most modern iron construction, heated with hot water, and supplied from village water system; also one propagating house 50 x 6, together with two acres of valuable land, all lying in the village of Highland. This property is in A1 condition, and will be sold at a reasonable figure, on easy terms; possession given June 1, 1908.
L. M. PARKER, Highland, N. Y.

For Sale—At a sacrifice. On account of failing health I now offer my business for sale. I have seven greenhouses well filled with carnations, ferns, palms and bedding plants; located in the center of the city. We have been established for over fifteen years on leased ground, but the owner has all kinds of vacant ground all over the city and does not need this which is safe for many years. I am doing a No. 1 business in cut flowers and have an immense bedding out trade. We run two wagons. If you wish to make money here is your chance. I will give possession at once. Must be cash. For further particulars, address
W. H. HUMFELD FLORAL CO.,
Kansas City, Mo.

A Undeveloped Gold Mine at a Bargain.

A snap for a live practical florist having a small amount of cash capital; my greenhouse plant and residence is offered for the next 60 days at a sacrifice; it is well located in the best city of its size in Michigan, having 14 profitable tributary towns and only one other greenhouse within 30 miles; first-class cut flower and plant business. Write for particulars.
A. W. TWEEDIE, Cadillac, Mich.

CARNIVAL DEMAND DISAPPOINTING.

Although the weather is hot, even for this latitude, the thermometers ranging around 75° the past week, but little local stock is offered. Violets, sweet peas, pansies, lily of the valley and Roman hyacinths are coming in from the growers, the first three items mostly outdoor stock. Violets from frames, shown in limited quantity, afford the best stems. The bulk of the stock now used, however, is received from Chicago, and among recent shipments from that city some unusually fine roses and carnations from Budlong were noted. Retailers here claim that Lady Bountiful carnations do not ship well and that White Perfection is much superior in this particular. The carnival functions, balls, etc., of which there are now about two weekly, create some demand for decorations and bouquets, and there is always some funeral work. But business generally is uncommonly dull and growers and retailers alike bewail the lack of orders and the evident curtailment in those received. It is hoped that the week of Mardi Gras (March 3) will stimulate the demand, but the prospect does not cheer the dealers greatly.

NOTES.

Harry Papworth, at the Metairie Ridge Nurseries, has about completed repairs, to the amount of $4,000, rendered necessary by the severe hail storm of last December, and his large stocks of roses and decorative plants, considering the destruction wrought by the storm, is in remarkably thrifty condition. An extensive line of young chrysanthemums was noted. Mr. Papworth expects to attend the Chicago convention and exhibition of the American Rose Society next month.

M. Cook's Sons grow a great variety of indoor plant stock, especially palms and ferns, which are in excellent condition. Callas and frame violets are well done at this place, and a house of bouvardia (a rarity nowadays) affords bloom in plenty throughout the year. M. Cook, the veteran founder of the firm, is planning to attend the S. A. F. convention at Niagara Falls next August with his wife, and he also hopes to visit Chicago during the National Flower Show next November.

Abele Bros. are picking outdoor sweet peas and find good demand for them notwithstanding the short stems. The brothers Abele produce large quantities of market plants, including calendulas, French marigolds, wallflowers and similar plants, and find ready sale for them, in 2½-inch and 3-inch pots. Pentas lanceolota, with white flowers, is extensively grown here for bedding and cutting. This concern has just cleared the ground for a new asparagus house, 20x100 feet.

U. J. Virgin has had a liberal share of recent funeral work and his force has been kept busy until a late hour evenings with shipping orders. Richard Eichling is now in charge of the greenhouse department and is sending in large quantities of Roman hyacinths, narcissi, lily of the valley, violets, etc., Mr. Virgin is acting as advisory director of those in charge of Canal street improvement by planting and he is also serving on the federal grand jury.

Chas. Eble says business in his new Baronne street store, which he has occupied four months, has kept him hustling all the time.

P. A. Chopin has plenty of funeral work in hand, but says that business in other lines should be a great deal better at this season.

Joseph Bernard has the new greenhouses of City park in full operation, rejuvenating and propagating summer bedding stock.

Manager Eichling, of the Avenue Floral Co., has been busy with important decorative work during the past week.

Frank B. Faessel has a fine supply of Asparagus Sprengeri growing outdoors on raised benches.

Visitors: O. G. Bishop, representing Vaughan's Seed Store, Chicago; B. Eshner, representing M. Rice & Co., Philadelphia, Pa.; J. D. Carmody, Evansville, Ind., who sailed for Panama February 15.

Cleveland.

MARKET IMPROVING.

The market condition shows a decided improvement over the past two weeks. Stock moves much more freely. Carnations have dropped off a little, but there are still more than enough on the market. Bulbous stock is seen at every turn; more tulips and daffodils are coming in than it is possible to handle to any advantage. The supply of roses is not over plentiful, all good stock being cleaned up daily. The few warm days we had last week brought the street venders out and carnations were sold at 10 cents per dozen. Although most of the retail florists complain of this method of disposing of stock, nevertheless it aids greatly in keeping the market cleaned up. All available violets, red carnations and roses were sold for St. Valentine's Day. These brought good prices. Shipping trade has been good the past week.

FORESTER.

FLORISTS' CLUB CARNATION SHOW.

At the carnation show held by the Florists' Club at Progress hall, February 10, the Lamborn Floral Co. showed a fine table of carnations consisting of Enchantress, White Perfection The Belle, Harlowarden and Lady Bountiful, the White Perfection being the finest white on exhibition. (Certificate of merit.)

F. C. Bartels showed a table worthy of special mention, his Lawson being the finest of this variety on exhibition. The light pink sport of T. W. Lawson is well worthy of close attention. Wm. Bartels was awarded a certificate of merit on his vase of Enchantress, which was very fine.

R. Witterstaetter of Cincinnati received a certificate of merit on a vase of Afterglow, this being the finest vase staged.

Carl Hagenberger, Mentor showed a vase of white lilac and a bunch of Princess of Wales violets, which showed the highest of culture.

The Chicago Carnation Co., Joliet, Ill., showed a vase each of Andrew Carnegie and Aristocrat that received special mention for fine culture.

The vases of Bride and Bridesmaid roses shown by Isaac Kennedy were the finest ever seen in these parts. He was awarded a certificate of merit on his improved sport of Bride.

Heepe Sons of Akron showed a table of mixed carnations and received special mention for high culture.

J. Merkel & Son, Mentor, showed a fine table of carnations. Those worthy of mention are White Perfection, White Enchantress and a vase of Beacon, for which they were awarded a certificate of merit.

Roman Wasko exhibited a bunch of Princess of Wales violets that showed fine culture; he was awarded a certificate of merit.

The F. R. Williams Co. showed a table of fine carnations consisting of Enchantress, Rose Pink Enchantress, White Enchantress, White Perfection, Robt. Craig and Beacon. A certificate of merit was awarded for a vase of sport from Enchantress, which shows a marked improvement over the parent. The judges were Geo. Bate, Wm. Sladie and John Keeley.

IF YOU ARE IN NEED OF

GOOD STOCK

We are fully confident that we are in a position to fill your wants.

Why? Because we carry the kind of stock that you are looking for, as we make a specialty of producing high grade stock of all kinds, being strong in

Roses, Carnations, Violets

Bulb Stock, as well as Smilax

and all other Greens

In addition to the cutting of a choice line of stock from our own large greenhouses, we also handle the productions of a number of the best growers in this city, thereby placing us in a position to fill all orders in a very satisfactory manner, as a trial order will convince you.

So if you wish to avoid disappointments and want your orders filled satisfactorily, just give us a call and you will be more than pleased that you called upon us.

J. A. BUDLONG

37-39 Randolph Street, CHICAGO.

Roses and Carnations A Specialty.....

WHOLESALE GROWER of CUT FLOWERS

SAN JOSE, CALIF.—Professor F. F. Bioletti, a former professor at the University of California, has been appointed a member of the County Board of Horticulture, vice William Palmtag, resigned. Professor Bioletti is a part owner of the Grass Valley vineyard. Dr. Ohrwall being the other owner.

SOUTH PORTLAND, ME.—The greenhouses of Miles Nelson were damaged about $500 by a fire which occurred February 9. The fire is supposed to have caught from crossed wires, near the dome of the boiler house, as it was there that the flames did the most damage. As soon as the fire was under control members of the hose company set to work bailing out the pit where the boiler is located, so that the fire did not go out and many valuable houses dependent upon the steam had their contents saved from destruction by freezing. Mr. Nelson will repair temporarily, and in the spring will probably make many improvements on the damaged part, on which there was no insurance.

CARNATIONS PLENTIFUL.

St. Valentine's Day business assumed proportions sufficient to justify all in reckoning this annual event as a most important one to the trade, as each recurring season shows a steadily increasing popularity of flowers as valentine missives. Most of the retailers made ample preparation this year to meet the prospective demand and decorated their show windows suggestively of the day. Many examples of the decorators skill and taste were seen, the most notable of which was that of B. Schroeter's, where Hugo Schroeter, the genius of the establishment, arranged an effect which was most elaborate in its conception and cleverly executed in the most minute detail. The weather on Friday was most unfavorable as a heavy downpour of rain continued throughout the whole day. Notwithstanding this deterrent factor all enjoyed a good business disposing of great quantities of cut flowers and plants. Violets and lily of the valley were especially popular, while bulbous stock both cut and in pots were much in demand. For the first time this season an excessive supply of carnations confronts us. Nearly every grower has a full crop on and a consequent reduction in price prevails, the best flowers bringing only $2 per 100 and much good stock selling for little better than half that price, while that of poor quality finds no sale whatever. Bulbous stock, now so plentiful, aggravates the situation and growers and wholesalers are worrying. Good roses are none too plentiful, the supply being about even with the demand. Violets, contrary to the reports from many other points, have lost none of their former popularity here and several thousands are sold daily, the supply coming chiefly from Mt. Clemens, and Rhinebeck, N. Y.

NOTES.

The Florists' Club meeting, February 19, is expected to be an interesting one. Geo. Brown will entertain the members on a subject not yet announced and Ex-President, Wm. Dilger will open a discussion on the "Bud-Rot of Carnations." President E. A. Scribner will designate some of the members to prepare papers to be read at meetings throughout the season. The officers and some of the members of the club are invited to attend an entertainment given by the Twentieth Century Society in their building, February 20.

Wm. Dilger contemplates a trip to Cuba about the middle of April and on his return will interest the members in a description of his observations while there. He will go in his official capacity as superintendent of Belle Isle and in the interests of the aquarium.

Vice President Philip Breitmeyer of the American Rose Society is making strenuous efforts to increase the membership of that society in this locality and will head a large delegation to the society's show to be held in Chicago March 25-27.

The small army of foreign bulb agents visiting here are unanimously optimistic in their expressed views of the present business situation, but the reduced size of the orders they are taking is not confirmatory of their favorable expressions.

Frank Holznagle, treasurer of Highland Park is now very conspicious in the politics of that thriving suburb of our city. His new carnation range is now yielding a splendid though much belated crop of the finest blooms.

Frank Danzer who sustained an injury by a fall on an icy pavement about 10 days ago is much improved, but is not likely to be able to resume his duties at Breitmeyer's for some time yet.

Chas. Warncke who was the victim of a similar accident to that of Frank Danzer's is suffering much pain and his complete recovery is not expected for a long time.

The bursting of a large water main, February 12, in front of G. H. Taepke's premises on Gratiot avenue flooded his store doing considerable damage.

J. F. Sullivan sent out an attractive valentine postal card to his customers which was much appreciated and helped business along.

Visitor: Martin Reukauf, representing H. Bayersdorfer & Co., Philadelphia, Pa.

J. F. S.

Baltimore.

BUSINESS BAD.

Most unpropitious weather and the general depression in business, with its accompanying financial stringency, are responsible for the stagnation which may fairly characterize the situation for the past week or two in the cut flower trade. The embarrassments to water-navigation and loss of employment by the thousands directly dependent thereon has interfered with social events and all other occasions which usually bring demands for flowers. Enormous receipts of carnations have fairly swamped the market and the conditions are about as untoward as often present themselves. St. Valentine's Day, which of late years has been the occasion of some well-distributed business did not seem to leave a ripple on the surface of trade operations, and beyond a few boxes of violets and an occasional bunch of roses which the stores sent out, the festival of the lovers' saint was a "dies non." All are living in the hope that milder skies and balmier air will soon replace the wild weather lately experienced and that improvement will result to the trade, which of late has practically depended upon funeral and hospital demands for any activity whatever.

At a special meeting of the stockholders of the Florists' Exchange held February 10, the by-laws were amended so that hereafter there will be semi-annual meetings of the corporation. It has been found by experience with an annual meeting only, most of the time is consumed in the election, and if there happens to be a contest there is no opportunity for considering any other business. It was also voted to have an auditing committee outside of the board of directors to go over the accounts of the financial officers and employes. For the current year the following were elected: Robert L. Graham, John D. Halliday and F. G. Burger. Notwithstanding the general dullness, the Exchange maintains its average amount of business, and the manager, John J. Perry, who has had numerous callers from members of the trade passing through our city to the carnation meeting and on other errands, has been much complimented on the convenient and handsome structure the concern occupies, and his excellent arrangements for facilitating business.

General Ferdinand C. Latrobe, who for seven terms served the city as mayor will soon be appointed, as is understood, president of the park commission, of which he is now a member, to succeed Major R. M. Venable, who has resigned that position on account of ill health. Mr. Latrobe has long shown a great interest in the management of matters connected with the parks, and is an able and experienced business man, with a great capacity for work and of marked industry and activity.

Miss East, who for several years has been employed with Thomas Vincent in his stores, has opened an establishment of her own at North avenue and Tenth street, a good field and one where at present there are no other florist stores.

M. Thau, who has been the manager of the greenhouses at Govanstown run for W. Ackerman, it is understood, has taken over the stock and lease and will hereafter conduct the growing business on his own account.

PETER REINBERG, 51 Wabash Ave., CHICAGO.

Largest Grower in the World. 1,580,000 Feet of Glass.

To Be Done Now.

IN THE GREENHOUSES.

Cut back a few plants of Begonia Gloire de Sceaux to produce cuttings.

Sow plenty of lobelia and pyrethrum (golden feather) if this has not been already done.

Pot off the seedling cyclamens. Keep the top of the corm level with the soil and give the young plants a light position.

Good bedding verbenas may be raised by sowing seed of a good strain now. The colors come fairly true.

The last batch of bedding geranium cuttings should be put in the sand.

See that spireas are not left about under benches after they begin to grow or they will not make shapely plants afterwards.

A few boxes of double tulips may be brought in but they should not go into heat until the first week in March.

Push on with the potting of geraniums for bedding. Never allow the plants to get very hard in the 2-inch pots.

Fuchsia cuttings strike well and make better plants in the same bed as carnations than if given more heat overhead.

IN THE STORE.

Buy only good well developed fern as it is much more lasting than the cheaper, immature stock.

Deliver orders on time. An hour late or early is not what customers want or they would say so.

Placing flowers in warm water immediately on arrival makes them last longer according to an experienced florist.

Long stemmed orchids, such as oncidiums and Mexican lælias do not keep as well as shorter ones like cattleyas.

Yellow and blue is a very beautiful combination for flowers by day, but is not so good for use under artificial light.

Keep flowers in semi-darkness if it is desired to hold them over for any length of time. They keep their color better.

OUTDOORS.

The hardy varieties of peas and parsnips should be got in as soon as possible when the frost goes out of the ground.

When dividing old clumps of hardy perennials save the young growing portions from the outside and throw away the dead or weak portions in the middle.

Get all old winter rubbish burnt up and the ashes spread on the soil.

See that no fences or wires of any kind are "growing in" to fruit or shade trees. Look over the supports carefully.

Get tools and implements of all kinds in thorough order to start up the season's work.

After high winds take a look over the protective material and where it has been displaced put it right.

Plant the Kilmarnock willow near ornamental water. Use plants worked high on a suitable stock such as the hardy sallow.

When planting trees firm the soil well around the roots but leave the surface loose for about two inches.

Head in all newly planted fruit trees. If the old growth is left they will never make shapely heads.

Quite time to get out last Easter's records and arrange matters to meet an increased sale this year.

European Horticulture.

FROM THE BRITISH TRADE PAPERS.

NARCISSUS TRADE IN THE SCILLIES.—The Scilly isles, where the narcissus harvest has just begun, exported more than 1,000 tons of cut flowers during 1907—which compares with 850 tons despatched in 1906. The largest quantity sent by steamer from Scilly to Penzance on a single day was between 30 and 40 tons. For the carriage of the flowers to London the Great Western Railway have designed a special truck capable of holding 2½ tons of cut flowers, since the blooms occupy a very large space in proportion to their weight. Altogether, with steamer freight and railway charges, it cost the Scilly growers £6 10s. per ton to get their flowers to London, and last year the Great Western Railway made £6,500 from this source. The great expense of carriage has a tendency to extinguish the trade in the commoner varieties of flowers. Then the quay dues of Dorrien-Smith (the "king") account for another £500. Arums are grown at Scilly in large quantities, as well as jonquils and narcissi, and command good prices, especially when the time of the maturity of their blooms and of Easter happen to coincide. These flowers are grown in trenches so as to escape the violence of the winds. I understand that at Tresco Dorrien-Smith's gardener has glass shelters mounted on wheels, which can be run in over the beds of narcissus when the time of the opening of the buds approaches.

WATSONIA ARDERNEI.—I can re-echo all that is said by S. W. Fitzherbert in praise of Watsonia Ardernei, which he says is identical with W. O'Brieni. Several years ago Mr. Arderne, of Claremont, Cape Town, kindly sent me several bulbs. They have grown well and increased greatly in my garden. I have now three large clumps, which bore about 50 spikes of bloom last year. Previously they had not flowered well. When they were lifted I found that the one clump I had had grown into a tangled mass of old and new bulbs. The old ones of previous years were then thrown away and three new clumps planted in good loamy soil mixed with leaf-mould and old manure. They responded well to this treatment, and last year were much admired. W. Ardernei is really a very fine plant, possessing a distant likeness to Gladiolus The Bride. It differs, however, very widely in height, leaves, size and shape of bloom, and the flowers are long and tubular and much smaller. I saved some seed last year, and if it germinates it will be interesting to see whether it reverts to type or still continues to bear white flowers. The leaves of my bulbs are now (January 22) growing apace; they are now all sizes, from six to 18 inches high. I have never grown or seen W. Ardernei in pots. It seems to me to be a bulb better fitted to growth in the open. I should imagine that the spikes of bloom would grow up too tall under glass to be effective, and, as Dean Hole once said of standard roses, you would require a balloon to see them properly.

Chicago.

MARKET VERY QUIET.

The market has been very quiet the past week. Roses have been in short supply, particularly American Beauty, Bride and Bridesmaid. Good American Beauty is an item that is now hard to obtain. Richmond and Killarney are the heaviest cuts at the present time. Perle is also in good supply. The supply of carnations seems to have had no limit, although conditions at time of writing seem to have somewhat improved. The quality has been exceptionally fine, but buyers were very discriminating. Cheap and common stock was entirely neglected and clean-up sales were made in many instances at very low prices. The white, including White Perfection, Lady Bountiful and Boston Market, were in largest demand. Easter lilies are beginning to be seen on all counters in liberal quantities. The indications are that the supply will be exceptionally large before Easter. Callas are also plentiful. Other bulbous stock has been moving slowly for more than a week past. La Reine (novelty) tulips go best. White and yellow move, but both are selling cheap. Roman hyacinths are poor sale with Paper White narcissus going somewhat better. Couronne d'Or (double orange tulip) is scarce and selling at five cents. Tulip bulbs with some growers have blighted badly.

FLORISTS' CLUB MEETING.

The Florists' Club meeting in Mandel hall, February 13, brought out a very good attendance. President Leonard Kill was in the chair. After the reading and approval of the minutes, the matter of again leasing Mandel hall for the club meetings was made a special order of business and was referred to the trustees with power to act. Several applications for membership were recorded, including: Herman Schiller, 897 W. Madison street; John Kruchten, 51 Wabash avenue; W. G. Hening, Blue Island; John Schillo, 218 Mohawk street.

The report of the finance committee was read by Chairman H. N. Bruns. August Poehlmann followed with his report for the special committee having charge of the rose show arrangements. President Kill then announced his appointments to the standing committees. H. N. Bruns was made chairman of the finance committee; F. F. Benthey of the transportation committee; P. C. Schupp of the committee on sports, and T. E. Waters of the committee on the good of the club. On the suggestion of the last named committee the sum of $15 was appropriated with which to plan some special form of entertainment for the next regular meeting.

Prof. A. C. Beal, of Champaign, was present and urged the members to attend and exhibit as largely as possible at the State Florists' Association convention at Springfield. On motion of Geo. Asmus, August Poehlmann was selected as manager of the forthcoming rose show.

A vase of seedling carnations was exhibited by Fritz Bahr, of Highland Park. J. S. Wilson, Andrew Benson and W. L. Polinsky were appointed as judges who awarded the exhibit 85 points and the club's certificate.

NOTES.

A suggestion, often made before and urgently repeated at the last meeting of the Florists' Club that the club arrange to furnish rooms of its own, including a suitable hall, reading rooms, etc., seems to be now meeting with considerable favor. Several of the growers and commission men are said to be willing to contribute toward financing the project.

E. F. Winterson says that the Fleischman Floral Co. has left a standing order for all the blooms of Fritz Bahr's new seedling carnation that can be cut at $10 per 100. This is a light pink that scored 85 points and was awarded a certificate of merit at the last club meeting. Mr. Winterson also handles W. N. Rudd's popular seedlings, Defiance, Sincerity and Pink Beauty.

Bassett & Washburn say they are about six weeks late with their carnations, but are just now coming in with a fine crop which they expect will last through until Easter. During the recent glut their O. P. Bassett carnation readily sold at $6 per 100. John Mangel and A. Lange have taken all that could be spared from the shipping trade.

Eighteen young ladies from this vicinity attended the Junior promenade at Madison, Wis., on St. Valentine's Day, and 18 large bouquets of sweet peas and adiantum shipped by C. L. Washburn were the favors at a dinner given that evening by his son, E. B. Washburn, who is taking a course in horticulture in the university there.

Geo. Reinberg is cutting some very fine cattleyas and large lots of excellent dendrobiums. Sweet peas are quite a feature with this establishment, and Mr. Reinberg expects to have an entire house devoted to them this coming season.

Weiland & Risch report having closed a contract for about five acres of land adjoining their greenhouses at Evanston. It is said to be the intention of the firm to build several houses thereon during the coming summer.

As an indication of the trend of the times, one prominent local retailer says his cash register this season shows 20 per cent more customers waited upon, with 25 per cent less money received.

Wietor Bros. believe their carnation houses never looked better than at the present time. N. J. Wietor says they are as nearly a solid mass of fine blooms as can be seen anywhere.

The A. L. Randall Co. is already busy with orders for Easter novelties. A feature here is a fine line of rustic ware for Easter and spring plant boxes.

Peter Reinberg and wife, John Schillo and wife and Mrs. C. W. McKellar say they will be in New Orleans for the Mardi Gras which opens March 3.

The carnation measure put out by the Kroeschell Bros. Co. now has the American Carnation Society's scale of points printed on it.

August Jurgens has been cutting fine La Reine, Yellow Prince, Proserpine and Couronne d'Or tulips since January 10.

Carnations are in their prime at J. A. Budlong's. White Perfection, Winsor and Aristocrat are exceptionally fine.

Our statement in this column last week regarding the demand for bulbous stock was too previous and in error.

Miss Hertha Tonner is handling some exceptionally fine carnations, especially Enchantress and white.

C. W. McKellar is shipping quite a number of cyclamen plants this season.

Andrew McAdams has left to spend a couple of months in Florida.

Chicago Notes.

E. E. Pieser, of the Kennicott Bros. Co., suggests that retailers generally should learn to use leucothoe sprays, boxwood and greens other than common ferns to better advantage, as he expects the present supply will hardly last past April 1. In his estimation ferns are getting smaller and poorer each year, and that complaints as to quality will increase rather than diminish if new fields are not found.

The blizzard with heavy snow Tuesday and Wednesday gave growers and commission houses their troubles. Cut flowers coming in by teams arrived, but with heavy wear and tear on the animals. Many out of town lots to commission houses were from one to several hours late. Peter Reinberg, George Reinberg, Wietor Bros., J. A. Budlong and Weiland & Risch all depend on their teams.

The Poehlmann Bros. Co. is growing more freesias this year than last which are moving off very satisfactorily, this flower being more popular than ever for floral work. Killarney and Richmond roses are now in good crop at this establishment.

Mrs. Frank Beu is showing fine callas with their own foliage. In spite of the poor season in all lines of stock she reports her wallflowers have all been bought up so far at very satisfactory prices.

Responding promptly to a want advertisement inserted by a misguided friend George Asmus was called on by about 30 colored men last week, each of whom sought the situation of porter at $12 per week.

Zech & Mann count themselves fortunate in the present state of the market to be receiving fine lots of Bride and Bridesmaid roses.

John Sinner, of Sinner Bros., reports having an excellent crop of Bride, Bridesmaid and Richmond roses.

The J. B. Deamud Co. is showing some exceptionally fine Harrissi and Couronne d'Or tulips.

Mike Rocklin, of Bassett & Washburn's, is now on jury service in the superior court.

Pansies and sweet peas are of excellent grade at E. C. Amling's.

Richmond roses are in exceptionally fine crop at Peter Reinberg's.

Visitors: Thos. E. Cashman, president Clinton Falls Nursery Co., and wife, Owatonna, Minn.; M. Langohr, Bozeman, Mont.; Philip Breitmeyer, Detroit; J. A. Lynn, Charlevoix, Mich.; A. C. Beal, Champaign; Albert T. Hey, Springfield; C. C. Pollworth and wife, Milwaukee, Wis.

St. Louis.

DEMAND GOOD.

The market the past week was a busy one; prominent weddings, funerals and receptions caused quite a demand for flowers. St. Valentine's Day was also a factor, but the inclement weather hurt sales considerably. The growers of violets kept the wholesalers guessing the early part of week; violets were scarce and Thursday 75 cents per 100 was asked for California flowers, Friday, however, the growers came in and crowded the market and prices dropped as if by magic and on Saturday, violets went begging at $2 and $3 per 1,000. Jonquils are more plentiful. Carnations have held their own mostly being sold at $1.50 to $3. Roses still remain very scarce. Callas and Lilium Harrisii are selling well owing to the demand for funeral work. Sweet peas are more plentiful. Smilax and Asparagus Sprengeri are selling well.

NOTES.

The Florists' Club met last Thursday, Will Young in the chair, 45 members being present. An invitation was received from the Springfield Florists' Club to attend its convention at Springfield, February 18 and 19. The Horticultural Society also sent a communication to the Florists' Club to co-operate with them in making the spring flower show a success. This is very commendable and should receive support by the trustees of the club. The following exhibited carnations: Chicago Carnation Co., Joliet, Ill., Andrew Carnegie; R. Witterstaetter, Cincinnati, O., Afterglow; Stevenson Bros., Baltimore, Md., Splendor; St. Clair Floral Co., Belleville, Ill., seedling. After the meeting the members and their friends were invited by Pres. Young to partake of refreshments and a good time generally was indulged in.

Park Commissioner Scanlan is directing the preparation of plans for a utilities building in Yeatman square upon the foundation of the old Hemen mansion. Shower baths will be installed as well as a shelter for children.

Among those who will go to Springfield are the following: Fred Ammann, B. Winters, Fred Ude, John Steidle, J. W. Dunford, Geo. Angermueller, W. Smith, and H. G. Berning.

Will Adels, for years with Ayres Floral Co. died after a short illness and was buried last Thursday. Several floral offerings were sent by retail florists.

Werner Bros., Clayton, are bringing in some fine violets and carnations. Their stock is successfully handled by W. Smith & Co.

The Horticultural Society will have a meeting this week when show matters will be the principle feature.

Ellison Floral Co. had several large wedding decorations during the week.

W. F.

PEORIA, ILL.—C. Klopfer has closed out his interests here and is looking for a new location. He has in mind some city centrally located in the state.

Kansas City.

FUNERAL WORK PLENTIFUL.

Trade for the past two weeks has been one of continuous surprises for the craft. The amount of funeral work which has been handled was unusually large which lessened the supply materially for St. Valentine's Day. Trade on that day was so far ahead of expectations that most every dealer was hustling about for stock before the day was well begun. Violets were in greatest demand, and as it happened most all the stock was exceptionally fine. A good deal of Hudson river stock was handled, but the home grown singles were most called for. Bulb stock was in good form, especially tulips and daffodils. American Beauty roses were noticably scarce, but some superb Richmond and Killarney took their places nicely. Red carnations were, as usual, good property as well as other varieties. Pot plants at present are a strong offering, and they comprise all the seasonable varieties. Primroses, cyclamens, azaleas and begonias were much sought for by valentine buyers. Tulip plants were in evidence, but they are somewhat backward in coming in. Green goods are more plentiful than at any time this season.

NOTES.

Violets did not fail to re-assert their popularity as a valentine offering, some of the retail stores handling as many as 25,000. Few novelties were offered this year. The Wm. L. Rock Flower Co. had a display of red heart hampers filled with violets which met with a good demand. Old fashioned bouquets with lace and paper holders were much in evidence. Samuel Murray had a strong offering of potted plants.

The trade will regret to learn of the misfortune that has befallen one of our oldest and best liked members, R. S. Brown. A recent illness deprived Mr. Brown of his hearing, which is a pretty bad handicap to one who is the hard worker and who has the admirable qualities which Mr. Brown displays.

J. E. Rodman, of Topeka, Kans., says the demand for flowers on St. Valentine's Day was unprecedented in that locality. It appears as though most every establishment in this section was unprepared to meet the demand, which, owing to the money conditions, was underestimated.

Mystery seems to surround the new greenhouses which are being erected near Nineteenth and Indiana avenue. Several houses of fairly good proportion are in course of construction, but to the present time no one has found out who is back of the venture.

Our old friend, D. Freudenthal, reports a splendid St. Valentine's Day business, and reported much difficulty in obtaining enough stock to fill orders.

The small daughter of E. A. Humfeld has been quite ill for several weeks, but at present is doing nicely.

The Peterson Floral Co. is establishing a nice trade in its new quarters on West Tenth street.

Frank Meinhardt of Leavenworth, Kans., was in the city looking for valentine stock.

BUSINESS GOOD.

St. Valentine's Day brought fair business; violets were in good demand, but only the home grown article gave satisfaction. Eastern doubles were poor and Michigan singles went to sleep. Carnations sold well and roses were scarce. The market for smilax and asparagus is improving owing to heavy funeral work.

Members of the executive committee of the S. A. F. are wearing a broad smile of satisfaction. They have selected the committees to arrange for the carnation meeting next February. The finance committee, especially, is well adapted for its work. Names will be announced at the next regular meeting.

Geo. Wiegand is enjoying himself in California. He wrote a postal with lots of lemons on it to his violet grower, saying: "Violets sell here at $1 per 1,000."

The Florists' Club met at H. W. Rieman's place and, as usual, had a very good time; the March meeting will be held at F. Hukriede's.

The spring migration of local florists to Richmond has been postponed from February 19 to 26.

John Hartje is considering an 11-acre tract south of the city for his new place.

The automobile delivery wagon is soon to make its appearance in this city.

G. Williams has secured a stand in Tomlinson Hall market.

A. Baur, who has been down with grip, is still a little shaky.

Visitors: Stuart & Haugh, of Anderson, and C. Knopf, of Richmond. J.

Mobile, Ala.

The Minge Floral Co. was incorporated February 7, with capital stock of $20,000 of which amount the incorporators, Miss Maria Minge, Wyndham Lyon and W. M. Bailey, all of this city, have subscribed and paid in for 83 shares of a par value of $8,300. The officers of the company are: Maria Minge, president; Wyndham Lyon, secretary and treasurer, and W. M. Bailey, manager.

The new company has purchased a 10 acre tract of land fronting on New Sage street and the Old Shell road, near the crossing of the Old Shell road and the Mobile, Jackson & Kansas City railroad. It has also secured options on lands adjoining for the enlargement of the greenhouses and gardens as this becomes necessary. The site was selected because the soil and locality are the most perfectly adapted for the culture of roses and flowers to be found in the vicinity of the city. The land is virgin and has received the loamy silt from Spring Hill for ages. The company has contracted for more than 25,000 grafted rose plants, which will be ready for shipment south and transplanting in the early spring. Orders are in and the manufacturers will soon have ready to ship a battery of 60 h. p. boilers, with steel tubing for steam heat to supply 10 greenhouses from the Foley Manufacturing Co., of Chicago, that are now ready for shipments, and will be set up upon arrival, without any delay, and when ready for use will cover 26,000 feet.

VALENTINE TRADE GOOD.

St. Valentine's Day business kept everyone on the move. It was one of the busiest days of the season outside of a regular holiday. The best sellers were violets, red carnations and red roses. All flowers appeared to be in good demand, however, quite a number of boxes of American Beauty roses with heart adornments making acceptable valentines. Pot plants also came in for a share in the demand and quite a number were disposed of for gifts of the day. In floral arrangements there was not much that was new brought out, heart shaped baskets and boxes seeming to be most popular. These, arranged with violets, forget-me-nots, lily of the valley, orchids, etc., sold very well. Pennock Bros. had a beautiful display of made-up work in their window. At the Sign of the Rose a feature was a collection of prints of popular love scenes in which cupid and his deadly arrow figured largely. These were mounted on larger red cardboards showing a wide red border, in honor of the day. They attracted a great deal of attention. Many, in fact all the leading stores made a point of decorating their windows with suitable flowers and baskets and found it profitable. Prices are softening a little. American Beauty roses are more plentiful and $6 is about high for the specials, with very choice stock going as low as $5; $12 is high for special teas; $15 for Killarney and Richmond. Killarney still gains in popularity and will surely put Bridesmaid out of cultivation. Violets are very plentiful and at the reduced prices are selling well; 75 cents is now high for the doubles. Bulbous stock is very plentiful and low in price, the best price in all of this class being $2 per 100 and often less; $3 is about high for lily of the valley.

NOTES.

Harry Van Koolbergen, of Ottolander & Hooftman, Boskoop, Holland, is in town with two new roses, one a hybrid tea, Otto Von Bismarck, a cross between La France and Caroline Testout which won the first prize, 3,000 marks, at the exhibition at Frankfort, Germany. This amount was put up in the hope that Frau Karl Druschki would win it, but this novelty proved to be of so much merit that it was a foregone conclusion as soon as they came together on the exhibition table. The rose is a strong grower of a beautiful shade of pink and likely to be a good forcing variety. Another novelty and a distinct break in color is the Veilschen Blau (Violet Blue) a hardy climbing rose with bright green foliage and a very strong grower of rambler type, bearing large clusters of flowers of a distinct violet blue. All who have seen the colored plate are much impressed with the possibilities of such a variety, which is a distinct break in color from anything yet introduced. It will undoubtedly be known as the Blue Rambler. Mr. Van Koolbergen starts for the west this week and will call on the principal nurserymen and rose growers to show plates of his novelties.

The Leo Niessen Co. is handling fine Acacia pubescens. This is a most beautiful flower, almost indispensable for fine work at this season.

A splendid assortment of fancy sweet peas is among the leaders.

John McIntyre is sending out daffodils by the thousand.

Wm. McKissick is busy with his stock of spring flowers. K.

Pittsburg.

BUSINESS IMPROVING.

After passing through about the worst week since the season opened, the market has toned somewhat and things are on a more even basis. The demand for white is still good owing to the large amount of funeral work. The utter lack of demand for medium priced colored flowers up until about Thursday caused the bottom to drop out of the market. Very fine stock went begging and then to the ash barrel. Roses fared better owing to the limited number coming in. St. Valentine's Day helped out considerably, especially on roses and sweet peas, while the usual big demand for violets took place. There were many poor ones on the market which caused considerable trouble. This event is getting more popular each year and florists certainly should take advantage of it by extensive advertising as it comes at a period when stock is generally plentiful and cheap. Lilies are in full crop, although not of best quality. All greens are again plentiful.

NOTES.

At the meeting of the Botanical Society of Western Pennsylvania held in Carnegie museum the evening of February 13, the general subject of the evening was "Mosses and Liverworts" as presented by the president, Otto E. Jennings. The lecture was illustrated by charts and specimens folded up in paper packets and distributed to the members. The meeting was well attended considering the weather and counter attractions. The speaker mentioned that there are about 8,000 species of mosses and 3,000 species of liverworts, and that many of the species occur in the old and new world. There are about 400 mosses and 100 liverworts in Pennsylvania. The sphagnum mosses were mentioned as often filling small lakes and ponds, forming first a quaking bog, and this later being often occupied by a tamarack forest. Sphagnumis very useful to the florist because of its great capacity for absorbing water, its thick leaves having large cells whose purpose it is to act as water reservoirs for the smaller food-manufacturing cells which make the moss so valuable to the florist.

A large table of flowering plants from the Phipps conservatory, together with a number of palms, added materially to the interest and enjoyment of the meeting. J. W. Jones gave an interesting talk on the different flowers exhibited, calling attention to a couple of fine specimens of yellow verbascum (known to florists as Celsia arcturus) and mentioning the somewhat poisonous properties of Primula obconica.

Chas. F. Edgar has returned to Philadelphia, Elmer Jolliff taking his place at The Pittsburg Florists' Exchange. This firm is handling baskets made of armadillo shells.

Mrs. E. A. Williams has leased her present quarters for another three years.

S. J. Hatch, De Haven, has added another grower to his force. J.

Boston.

EVERYTHING CHEAP.

A slight improvement has lifted the hopes of the discouraged florists. St. Valentine's Day, reflected pleasant views of prosperity and large quantities of stock were lifted from the market and disposed of at a remarkably rapid rate. The sentiments attached to the day itself with a large accompaniment of social functions presented an extensive demand for choice novelties and selected flowers. While this was only one period of brightness the addition of a few others combined to the successful accounting of the week. However, business is not what it should be at this time of the year. The weather has been variable, like the trade and, even to native New Englanders, rather puzzling. The cold weather showed its effect on stock, greatly to its advantage, and the present wave of warmth will increase the crops of the coming week, but not the quality, for such premature heat cannot but weaken it. The market is in a helpless condition, great quantities of bulb stock and carnations actually going to waste for want of any kind of a money offer. Buyers are gauging themselves by the

one day limit and hold aloof in spite of the temptations held out by desperate salesmen. American Beauty roses have not yet reached any sort of price. But slight demand is noticed or expected while the reign of abnormal prices last. Richmond, while as popular as ever is not in the best condition and traveling at much inflated value. Killarney has been the strongest supporter of the rose market, and, as such its credit has been greatly extended. An excellent line of Bride and Bridesmaid has also been appreciated. Violets, gardenias and orchids, with a splendid display of sweet peas, were universally popular for St. Valentine's Day messages, beside which from among an endless selection of new spring time novelties no trouble was found by even the most critical of buyers.

NOTES.

The next regular meeting of the Gardeners' and Florists' Club will take place at Horticultural Hall February 25. Owing to the various halls of the Massachusetts Horticultural Society being rented during the regular meeting week a postponement to the above date was necessary. The particular attraction of the evening will be a lecture on "Carnations," by Wallace R. Pierson of Cromwell Conn. This gentleman comes of the famous house which has achieved remarkable renown in the horticultural world and his talk is bound to be one of the most interesting and instructive of the season's list. This night will be devoted to carnations and a number of noted visitors have accepted invitations to be present among whom will be F. R. Pierson of Tarrytown, N. Y., and H. A. Jahn, New Bedford. An excellent exhibition of novelties in new and standard varieties of carnations is planned and growers are invited to send in anything of interest for the display.

Extensive preparations are on foot to make the exhibition of the Boston Cooperative Flower Growers Association, February 29, one well worth attending. A large assortment of valuable prizes has already been accepted and a large number is promised. Among the latest to be offered is a silver cup by James Wheeler, value $25, for the best display of a new violet. For the premier collection of sweet peas of Zvolanek origin a similar cup is offered by A. C. Zvolanek, Bound Brook, N. J. Two prizes, of $6 and $4, are offered by the F. R. Pierson Co., Tarrytown, N. Y., for the best vase of 25 Winsor carnations.

F. L. Hardy of Natick is cutting an excellent line of white and colored antirrhinums, which are among the most popular flowers in the market. Carnations and antirrhinums are the specialties of this establishment and the first of the large crop of the latter favorite is now just coming in.

John Fee, the famous bulb grower of the local market, is now among the busiest men of the city. With his endless collection of stock now completed and his matchless strain of Murillo tulips his stall is the center of the morning's business. B.

Columbus, O.

BUSINESS GOOD.

St. Valentine's Day trade reached far beyond the expectations of the local florists. Violets, lily of the valley and sweet peas, of course, formed the bulk of the orders. Between 5,000 and 10,000 violets were disposed of in this city. Floral hearts and heart-shaped baskets of violets and sweet peas proved quite popular. Bulbous stock is in fine shape and what is also very encouraging is the fact that the demand is equal to the supply. Of course funeral work, of which there is plenty just now, accounts for a great deal of this demand.

NOTES.

Owing to the great demand made upon it, the fern supply of our local fern man, George Bauman, has been entirely exhausted, making it necessary for local florists to be supplied from out of town.

A new florist has come to town in the shape of a bouncing baby boy belonging to John Williams, an east side grower.

Fifth Avenue Floral Co. and Graff Bros., both had a fine supply of violets on hand, both single and double.

Livingston Seed Co. had its window tastily decorated with floral hearts, baskets, etc., in profusion.

The Florists' Club will be entertained by Mrs. Griswold of Worthington February 25.

CARL.

New York.

EVERYTHING CHEAP.

St. Valentine's Day brought a lively trade in cut flowers, but it by no means cleaned up the wholesale district. Nobody seems to look forward to Lent with any forebodings, for it is not believed that conditions can grow any worse than they are at present. Carnations and very good ones at that, have sold as low as 50 cents per 100. It is not now a question of price, but simply to get rid of them. The last part of the week, the weather was mild and the street men again got busy. Roses, which have previously been doing a little better than other stock, are now in the general slaughter. Jonquils, tulips, lily of the valley, freesias and sweet peas, are in great quantity and of good quality, but there are no prices. Street men have been selling carnations, five in a bunch, at five cents per bunch, but Brooklyn has gone better—or worse—by selling bunches of 25 flowers for 15 cents. Violets, lily of the valley, carnations and jonquils, are all being sold on the streets, and under present conditions such results are inevitable. There is a moderate amount of table decorating being done, but with so much stock to choose from, no great reduction is made in any one surplus. Everything in the line of flowering shrubs that can be forced is now on the market and that is not improving conditions for the wholesale cut flower men. It must be acknowledged, however, that so much flowering shrubbery enables the retailers to make up very attractive windows. Richmond rose has been less affected by the slump than any other stock. It does not arrive in such large quantities, and, there being always a reasonably fair demand, holds up very well. St. Valentine's Day trade improved violet conditions for the time being, but it was only temporary. If the Rhinebeck growers believe that all the trade papers have been "fixed" in the interest of the wholesalers they have carte blanche to come to New York and investigate.

February 17.—The quantity of stock is very large; the week opens with favorable weather, but there is little prospect of a clean-up. The glut is greatest in carnations and bulbous stocks.

NOTES.

It is painful to reflect that in this great city there are thousands of people who know nothing of Lincoln or what he did. Other thousands know, but care not. A local paper thus comments:

In spite of the fact that it was Lincoln's birthday—that the day had been set aside to commemorate the life and death of the martyred president—his statue in Union square stood undraped and without even one floral offering on it until the attention of Sergeant F. F. Berger, of the twelfth regiment, who is a business man with offices on Union square, made good the deficiency with a small bouquet of flowers, which he placed in the hand of the statue.

It was in the early afternoon that Berger, passing through the square from his office, stopped to look upon the statue of the man in whose honor the day is named. Not a floral offering, not even a scrap of bunting or a copy of the flag he loved so well, was on the statue. To obtain a small bunch of flowers was the work of a few minutes and then Sergeant Berger placed them in the right hand of the statue, where they remained until nightfall, a tribute from a soldier to a dead leader.

A unique and attractive window decoration was recently noticed at Mrs. Scallen's Forty-second street store. The window was draped with long strings of Asparagus plumosus nanus decorated with jonquils. In the vases filled with jonquils, electric globes had been inserted and when the light was turned on the effect was very fine. The conception and execution was by Harry Lewy, now in charge of the store.

Meyer of Fifty-eighth street and Madison avenue has recently been making a very attractive sidewalk display in front of his store with large pot plants of forsythia. He had a good St. Valentine's Day business, sending out many boxes of cut flowers.

Wm. P. Craig, of Philadelphia, Pa., visited the wholesale district on February 13. He was accompanied by a member of the wholesale firm of Berger Bros. of that city. Mr. Craig continues to have strong faith in the rose, Mrs. Jardine.

Thorley's, Fifth avenue and Forty-fifth street, are showing one of the finest lots of Adiantum Farleyense, that can anywhere be found. It is Mr. Thorley's pride, that he knows where the best of everything can be found on short notice.

George M. Stumpp's expert window decorator is again to the front with an orchid window. He has created an imitation clump of dead trees which are thickly fringed with mosses and lichens and studded with cypripediums.

The genial Tom Jackson, of the New York Cut Flower Exchange, is sorry that the growers are not getting higher prices, but he has not time to worry over it as he is kept busy disposing of the surplus stocks.

Thomas Roland, of Nahant, Mass., was in the city February 11. He visited the F. R. Pierson range at Scarborough, and was much impressed with the great crop of Winsor and other carnations seen there.

Robert M. Schultze, of Madison, N. J., came down on February 15 to attend a meeting of the banquet committee of the Florists' Club. "Bob" is an indefatigable worker in the interest of the club.

Chas. A. Dards is showing a splendid line of flowering plants, noteworthy, being fine specimens of rhododendrons and snowballs; the last named are the first and best that have yet appeared.

The new store of Millang Bros., 43 West Twenty-eighth street, seems to be a success from the start. A large and attractive stock is always on hand, providing you are early.

Hanft Bros. will on March 1 remove from their present location, Fifty-eighth street and Madison avenue, to a larger store at Sixty-second street and Madison avenue.

Wadley & Smythe's is one of the busiest retail stores in the city. They seem to retain the trade of the smart set of Newport, when it return to New York.

David W. Howells, a well known designer and decorator, is now in charge of the floral work at the Cafe Martin, Twenty-Sixth street and Broadway.

A large bank of primroses and flowering quince have recently been attracting much attention to the windows of J. H. Small & Sons' Broadway store.

President Traendly of the Society of American Florists, will attend the rose convention and exhibition at Chicago in March.

Victor J. Prato has succeeded Arthur Merritt as manager of the Thorley store at Eighty-sixth street and Columbus avenue.

Herman Warrendorff showed some very attractive St. Valentine's Day specialties which sold well.

KNOXVILLE, TENN.—The Peters Nursery Co. has applied for a charter to incorporate, capital $25,000.

Davenport, Iowa.

The Tri-City Florists' Society held a well attended meeting February 14, with John Staack of Moline, Ill., nearly every member being present. The meeting was addressed by N. J. Rupp, of the John C. Moninger Co., Chicago, who spoke at length on "Modern Greenhouse Construction." The main discussion of the evening was on "Preparation of Easter Stock. One new candidate was admitted to membership.

The committee which has charge of the annual banquet submitted a report in which the date of the banquet was changed to March 19. The date previously arranged was found to be unsatisfactory, owing to the fact that the National Rose Society meets in Chicago at this time, and several local florists intend to be present. The banquet will be held at the Manufacturers' hotel in Moline, Ill.; $2.50 is the price per plate. Visiting florists are invited to attend.

The nomination of the officers for the coming term took place, and practically all the old officers were chosen. The election will take place at the March meeting, which will be held at the home of Harry Bills, of the Bills Floral Co., Davenport, on the evening of March 12. Following the business meeting a lunch was served by the host, and a smoker and social time enjoyed.

N. J. Rupp, of the J. C. Moninger Co., Chicago, has contracted for the following greenhouses: Henry Gaethje, Sr., Rock Island, two houses, 29x100 ft.; Ludwig Staapp, one house, 27x100 ft.; John Brookman, of Moline, two houses for vegetables; Harry Bills, of Davenport, one house, 27x50 ft.

Mrs. Julius Staack and Mrs. Henry Gaethje are both on the sick list. Henry Gaethje and wife recently celebrated their silver wedding. Here's that they both may live to celebrate their golden wedding.

Fire broke out in the boiler shed at Miss Waltman's place, but the quick work of her foreman saved the place from destruction.

Theo. Ewoldt has addressed several of the farmers' institutes around here on "Flowers for the Home."

John Umples will visit Chicago during the annual meeting of the American Rose Society.

Chas. Hummel will build this summer and install a new heating plant.

T. E.

DALLAS, TEX.—The Woman's Forum has decided to make the chrysanthemum show an annual event in future.

CUT FLOWERS OR DESIGNS will be Delivered for the Trade on Wire or Mail Orders in Best Qualities and Prices.

Albany, N. Y.

The next meeting of the Florists' Club is scheduled to be held at the Hotel Belvedere, 39 Beaver street, February 25. The members of the club anticipate a beefsteak supper and a joyous night. Preparations are being made for 100 guests. Among the number expected are several of the well known violet growers at Rhinebeck, Poughkeepsie, and other points down the Hudson. Hon. John A. Howe, Jr., formerly county treasurer, a friend of the club, has been asked to preside as toastmaster. Mr. Howe for some years has enjoyed a great reputation in this section as a reciter and speaker, and it is anticipated that the feast of reason will be equal to anything else that the committee has arranged to place on the programme. At the last meeting of the club Charles Limmer, a well known florist of Schnectady, and Edwin Sexton, of Elsmere, were admitted to membership.

The number of social functions thus far this season has been about equal to that of the past. At all of these floral decorations have been a feature. In addition to these private affairs this city has had several important conventions, the closing feature of which in most cases has been a banquet for which floral decorations of one kind or another have been in demand. On February 19 the annual dinner of the republican organization of Albany county was held in Odd Fellows' hall. About 400 guests were present. The floral decorations were by Eyres who used southern smilax and palms for decorating the balcony, laurel roping from the central electrolier in the dining hall to the corners of the room and palms, ferns, azaleas and lilacs upon the stage. A feature of note was a number of small rustic lanterns, each containing an incandescent electric light, suspended from the laurel roping at intervals. The tables were decorated with flowering plants, smilax on the cloth and at each plate was a buttonhole bouquet of Lawson carnation.

Louis Menand, of Cemetery avenue, is happy on account of the recent installation of a new Lord & Burnham sectional hot water boiler of the largest size. The boiler was installed just in time to help out in the recent severe cold spell, when the thermometer dropped to 16°. The boiler is in addition to the one installed by the same firm a few years ago, when the house was built.

Thomas Knight, of the new firm of Knight & Struck, Metropolitan building, New York, was a recent visitor in the local trade among whom he is well known. R. D.

WYOMISSING, PA.—Frank Shearer has commenced building another greenhouse on the north side of the present range.

LYNN, MASS.—Minnie C. Wilson has opened a new florist's store in the Touraine building, 18 South Common street. Miss Wilson was head designer for Quinlan Bros. for a number of years, and upon severing her connection with that firm, decided to embark in business for herself.

ALLEGHENY, PA.—H. L. Blind and Co. have purchased the Goettman property on Center avenue. There is a brick residence on the lot, and the latter measures 75x200 feet. The purchasers will put up a store and greenhouse on the premises, work to begin on the construction of these about April 1.

CARNATIONS A GLUT.

A wonderful change can transpire in the florist's business in 24 hours. Take the past week as an example. On Monday morning business opened up with a brisk demand for stock and by evening all the wholesale houses were cleaned out of roses, carnations, lily of the valley and violets. On Tuesday the long-expected big cut of carnations started to come along and by Thursday they were to be had by the thousand. One grower informed the writer if need be he could cut 25,000 blooms. St. Valentine's Day was a disappointment owing to the incessant rains. Violets were shipped in on this day by tens of thousands in a lot and it was simply an impossibility to move one half of the double received. Good single violets, home grown, proved an exception, these selling out at good figures, but as before stated, the shipped in stock simply was a glut. Early in the week every buyer wanted to place orders for a goodly number of violets, but the commission men were not inclined to book many orders as the growers only promised a given number. When the boxes arrived on Friday every grower had either doubled or trebled his promised number, and consequently the market went to pieces; the price dropping to 300 for $1. Bulbous stock is a glut, especially Von Sion narcissus and yellow tulips. Lilium Harrisii and callas are coming along in larger quantities but are all taken up at good prices. Another redeeming feature is the good demand for roses, which are fine in quality and larger in quantity. Asparagus, plumosus and Sprengeri is in good demand and supply. Smilax is a little too plentiful, but fine in quality. There is a good sale of florists' supplies.

NOTES.

Wm. Murphy has just completed another house, 30x200 feet, which will be used for the young stock at present. He will, on March 1, turn the greenhouse end of his business over to his son Ray and his son-in-law, devoting his entire time to his constantly increasing business at the wholesale house. The new firm will discontinue the growing of roses, and will plant the entire range of glass, consisting of 60,000 square feet, to carnations. By the way, Will has a new rose that he will sell to a good party at a price which will be satisfactory.

Hardesty & Co.'s window display of violets for St. Valentine's Day was a beauty, their stock of Prince of Wales being exceptionally fine. Mr. Hardesty stated that the stock displayed in the window cost him an even $100.

Albert McCullough is on his annual vacation. He is fishing in the gulf of Mexico, and his present address is Fort Meyer, Fla. S.

BUFFALO, N. Y.—A new greenhouse is to be erected in Humboldt park, which will be a great improvement.

The Seed Trade.

American Seed Trade Association.
Geo. S. Green, Chicago, Pres.; M. H. Duryea, New York, First Vice-Pres.; C. E. Kendel, Cleveland, O., Sec'y and Treas. Twenty-sixth annual convention, June 23 to 25, at Hotel Ponchartrain, Detroit, Mich.

VISITED WASHINGTON, D. C.—Chas. P. Braslan, San Jose, Calif.

CHICAGO.—Kirkeby & Gundestrup report a lively trade in onion sets.

LEM BOWEN of the D. M. Ferry Co. is in the California seed growing districts.

VISITED EVANSVILLE, IND.—Paul Hallbrooks, representing Livingston Seed Co., Columbus, O.

NEW YORK.—Chas P. Braslan is making an eastern trip, his present address being Waldorf Astoria hotel.

ST. PAUL, MINN.—A. Mathers, formerly with a Milwaukee seed house, is now with L. L. May & Co. here.

DES MOINES, IA.—The Guthrie-Lorenz Seed Co. has started in the seed business at 420 Sixth avenue.

NEW ORLEANS, LA.—Recent trade visitors include Rice's, Landreth's, Morse's, Vaughan's and Barnard's representatives.

FLORAL PARK, N. Y.—J. S. Henrickson of John Lewis Childs, is on the sick list. E. V. Hallock is busy with mail orders.

ONE onion set grower at Chicago will plant 20 acres with red Wethersfield onion bulbs this year to grow seed for his own use.

CHICAGO.—Vaughan's Seed Store reports mail trade good, an increase in the size and number of vegetable seed orders being notable.

HARRY PAPWORTH, New Orleans, La., says Phoenix Roebeleni is one of the few new things that do well in stores and dwellings.

VISITED CHICAGO: W. J. Fosgate, Santa Clara, Calif.; C. P. Braslan, San Jose, Calif.; F. L. Henry and Robt. Fulton, New York.

CHICAGO.—President Green of the American Seed Trade Association will visit Detroit soon in connection with the coming convention.

NASHVILLE, TENN.—Wood, Stubbs & Co. have a branch at this place, and are located at 312 Second avenue, north. W. B. Ewing is manager.

CLARINDA, IA.—The A. A. Berry Seed Co. is now incorporated. Mr. Berry has been ill. He will devote more of his time to his seed farm.

SEVERAL western onion set growers will reduce their acreage in the face of scant seed supply and high prices for seed they would have to purchase.

THE Albert Dickinson Seed Co., Chicago, is sending out a handsome sign hanger of metal with colored lettering exploiting their famous "Pine Tree Brand."

Braslan Seed Growers' Co.
Growers for the Wholesale Trade Only.
SAN JOSE, CAL.

SEATTLE, WASH.—There will not be enough onion seed grown in this state for local use the coming season, according to present outlook.—THE CHAS. H. LILLY CO.

JAPANESE lily bulb prices for 1908 crop, longiflorum and others, are somewhat easier than last year, though large sizes of Lilium giganteum and L. album are scarce.

NEWARK, CALIF.—The Braslan Seed Growers Co. is planting a considerable acreage of seed crops in this section this year. C. C. Morse & Co. have given up their growing station at this place.

LOUISVILLE onion set dealers claim to have made recent carload sales in Chicago, but this is difficult to verify. It is believed, however, that some Chicago houses are oversold.

GRAND RAPIDS, MICH.—Geo. S. Brown, representing the A. J. Brown Seed Co., is now arranging for buying agencies in various parts of the state for beans, grass and other seeds.

IT is a little surprising what lots of ancient onion seed are in existence, a western house lately offering over 1,000 pounds, four kinds sorted, a careful test of which gave the germination as .01 per cent.

THE RAMBLERS, a social club formed about six years ago and who meet for an annual dinner at the canners' convention, gathered to the number of 60 last week in Cincinnati; a royal good time was had.

JESSE E. NORTHRUP is taking a vacation trip on the Pacific coast. He originally intended going on with friends to Hawaii, but has given up that extended trip and is now quartered at the Hotel Angeles, Los Angeles.

TORONTO, ONT.—Our mail trade for February is considerably ahead of last year, approximately 10 per cent. We do not note any special variation in the demand over previous years for vegetable and flower seeds.—STEELE BRIGGS SEED CO.

SAN FRANCISCO, CALIF.—C. C. Morse & Co. report trade running better than 1906, but it is not fair to compare it with 1907, owing to serious conditions there. Orders are running about the same proportion as usual of vegetable and flower seeds.

LOUISVILLE, KY.—We have not figured out our February business as compared with last year, but the January business is about 20 per cent ahead of the business a year ago, and we think February will run equally as well if not a little better.—WOOD, STUBBS & CO.

PHILADELPHIA, PA.—W. A. Dennison and bride, the seed grower of Ellisburgh, N. Y., were visitors last week. D. and Fred Williams are the only growers now left in Jefferson county of the large number formerly operating there; all the rest have gone west or are out of it.

BOSTON, MASS.—W. W. Rawson & Co. say that while their orders to date in number are fully 40 per cent larger, the average so far is under former years, so that the trade in volume is running about even. It is a little early yet for the better class of orders in this vicinity.

JANESVILLE, WIS.—With the changing of the firm name from Walter Helms to the Helms Seed Co., this old established concern with headquarters on South Main street passes into the third generation of Helms as direct manager. It was first established 41 years ago by the father of Walter Helms, was handed down to him and now he turns the management to his son Edward.

DENVER, COLO.—Adrien Traverse is now located at 1427 to 1431 Wazee street making a specialty of fancy vegetable seeds for market gardeners. Mr. Traverse has been directly or indirectly connected with the seed business on Wazee street for the past 32 years and is probably the oldest active seedsman in the city, having sold bulk seeds in Denver in 1876, within a half block from his present location.

OHIO seed dealers continue in trouble over the proposed action by the legislature in a bill introduced by Frank Wood, of Medina. Cleveland dealers are now taking an active interest in opposing this bill. The Kelly Seed Co. of that city in a protest states as follows: "With this law in force no clover seed can be handled except in the immediate vicinity of the farm where it is grown. No one but the actual grower knows whether it is medium or mammoth and he alone can guarantee it."

HARRISBURG, PA.—The first days of February were slow, probably owing to the cold windy weather, but now, February 11, we are running ahead of last year. It is rather early to make comparisons as to relative sales of vegetable and flower seeds. We are running an advertisement for moving catalogues in one paper, asking 10 cents remittance and have received over 400 applications from one insertion, which cost us only $21. We are having a good sale of small tools and supplies.—HOLMES SEED CO.

THE onion seed situation for next year is certainly much mixed. Some seed houses will own onion seed on their advance three or five-year contracts at a cost of 40 to 50 cents per pound, while others will own seed contracted for in October last at 60 to 75 cents per pound. Still other seedsmen will make contracts on the present basis of $1 to $1.15 for yellow and red. The question arises at what price will these various owners of low and high priced seed

see fit to offer same in their catalogues of 1909.

DES MOINES, IA.—Iowa Seed Co. finds the increase in the number of orders for January moderate, but in value about 20 per cent gain. February so far shows an increase in the amount of money received but a slight decrease in the number of orders. There is an indication of heavy demand for dormant roses, hardy shrubs and plants. The number of inquiries for catalogues is with them larger than ever before, two days mail showing an average of over 4,500 pieces. Dealers orders to date are very light.

SIOUX CITY, IA.—The Sioux City Seed & Nursery Co., is asking for a temporary injunction and that it may be made permanent against the Sioux City Bird and Seed Store, (L. C. Wertz) on the ground that the names are so similar that customers of the former company are liable to be misled and take their business to the latter. The former business was established in 1889, while the latter was established about three years ago, and is said to have profited by reason of the similiarity of the names. In addition to the injunction $1,000 damages are asked. Judge Hutchison ordered the temporary injunction issued provided that bonds for $5,000 were filed.

Holland Representatives in Chicago.

Registered here the past week were: C. Fred Beerhorst, of Beerhorst & Son Co., Sassenheim; Henry Van Zonneveld and John Van Zonneveld, of Van Zonneveld & Co., Sassenheim; John C. Hillebrand and J. Keur, of Keur & Son, Hillegom; B. D. Kapteyn, of Gt. Van Waveren & Kruijff, Sassenheim; John Tegelaar, of Guldemond & Son, Lisse; John Vandermey, of Veldhuizen, Van Zauten & Son, Lisse; John Van Leeuwen, of L. Van Leeuwen & Son, Sassenheim; H. De Wilden, of Warnaar & Co., Sassenheim; W. Taat, of M. Van Waveren & Son, Hillegom; John Bokman, of De Graaff Bros., Leiden; J. A. Van der Voort, of C. J. Spielman & Son, Sassenheim.

Imports.

During the week ending February 15, 1908, imports were received at New York as follows:

Vaughan's Seed Store, 40 cases lily of the valley crowns, 20 pkgs., three bags seed.

Davies, Turner & Co., 153 pkgs. seed, two bbls. seed, two pkgs. flower seeds.

P. Henderson & Co., 20 bags seed, one cask seed.

J. M. Thorburn & Co., seven bags seed.

Frank H. Darrow, two cases seed.

Binghampton Seed Co., 1 case, one bbl. seed.

McHutchison & Co., 53 cases plants.

To others: 128 pkgs. plants, 38 cases plants, 483 pkgs. seed, one cask seed, 1,013 bags, 1,100 pkgs., 100 bbls. clover seed, 1,095 pkgs millet seed.

Iowa on Adulterated Seeds.

State Food and Dairy Commissioner Wright, Des Moines, Ia., has issued the following circular explaining the law relative to seed adulteration:

"The law of this state regulating the sale of agricultural seeds includes all the varieties of grass seeds, forage plants and the cereals. It prohibits the sale of agricultural seeds if any seeds of the following weeds are present: Wild mustard or charlock, quack grass, Canada thistle, wild oats, clover and alfalfa dodder, field dodder or corn cockle. The only exception to this prohibition is the sale of seed for export outside the state, and sales by the grower upon his own premises for seeding by the purchaser.

"Other weed seed, sand, chaff, dirt or broken seeds or seeds not capable of germinating are classed as impurities, and when present in an aggregate of more than two per cent the seeds may be legally sold only when tagged or labeled to show the percentage of each impurity present.

"There are special provisions of the statute defining adulteration of blue grass, orchard grass, red clover, and rape seeds; also prohibiting the sale of seeds not true to name. Standards of purity and germinability are established and penalty fixed for sale of seeds not conforming to the standard. Such seeds may be sold if labeled to show percentage of purity and germinability.

"The statute requires the food and dairy commissioner to cause to be analyzed any sample of agricultural seed submitted to him. A fee of 50 cents for each sample is fixed. A competent man has been secured for this work and returns can be promptly made. The importance of sale and use of good seed, free from weeds, is so great that dealers and purchasers can well afford to use every effort to keep and use only that which conforms to the law. Growers of seed should take notice that this law will be enforced and that clean, pure seed will be at a premium."

L. L. May & Co., St. Paul, Minn.

Our illustration shows the seed warehouse recently erected by L. L. May & Co., of St. Paul, Minn., on Como avenue, of that city. It is thoroughly fireproof, being built entirely of reinforced concrete. The floor area is 50,000 square feet. Its railroad facilities for loading and unloading cars are excellent, the seed being conducted from car direct to the bins by means of chutes, the capacity being 500 bags a day.

Three packet making machines, whose capacity is 150,000 packets a day, and three packet filling machines, with an equal capacity are kept working continually. The first floor is given to the filling of bulk orders in the wholesale seed department, and to the large catalogue department. The second floor is devoted exclusively to the filling of packet orders. The basement is used for the storing of seed for the wholesale trade and there are installed the engines, dynamos and heating plant. This heating plant forces the steam to heat the firm's greenhouses (buildings covering a block and containing 75,000 square feet of glass) through tunnels under two streets. The boilers are equipped with Murphy stokers which give great satisfaction in doing away with the smoke nuisance, as well as in proving fuel savers of a good order.

FORMOSA LILIUM LONGIFLORUM
Ends the growers' trouble; absolutely free from disease.

This building was commenced in July and completed in December. About a block distant from it are the greenhouses wherein are grown the flowers for the retail trade and 30 men are kept busy at this all the year around. There are 25 houses and these are crowded with all manner of plants, from American Beauty roses to lily of the valley. Each house is equipped with an automatic clock that registers the amount of heat in the house, and the temperature at all hours, thereby insuring correctness. All growing is done along scientific lines and only experienced specialists in their several branches are employed. Thousands of small plants are shipped annually from here to all parts of the world, and the cut flowers are sent fresh every morning to the retail store at 64 E. Sixth street.

In addition to these, L. L. May & Co. have an extensive nursery business which is operated at Lakeland, Minn. Here there is a nursery warehouse covering 40,000 square feet of ground. It is thoroughly frost-proof, has its own trackage, and is so large that wagons may be driven inside to be unloaded, enabling this firm to get out the spring deliveries earlier than nurserymen who must wait for the more clement weather. A mile and a half from Lakeland are the Mayfield nurseries and seed farms. These embrace about 300 acres under cultivation and are used to grow the nursery stock sold by this firm. All new varieties of fruits, shrubbery, ornamental trees, etc., are thoroughly tested, as to hardiness, prolificacy, and general qualities before being propagated and offered for sale.

Forty carloads of manure have been spread over these farms during the past winter. From 150 to 200 men are employed continually during the spring and summer. A complete system of water works, pipes laid to all quarters of the nurseries, supplied by an 800 barrel tank, irrigates the grounds.

The general offices from which this huge business is conducted are situated on the second floor of the retail store building at 64 E. Sixth street. The office force employs from 30 to 40 clerks. A more comprehensive idea of the magnitude of this business can be obtained from the fact that 1,000 persons are employed in its several branches, including traveling men, clerks, nurserymen, growers, etc., and its buildings alone cover 260,000 square feet. It was founded 26 years ago by its present owner, L. L. May, who has built up an immense business. For a better understanding of the business methods of this firm, one should have a catalogue, 300,000 of which are issued annually and sent free of charge to anyone sending their name and address to L. L. May & Co., St. Paul, Minn.

Growing Indoor Cucumbers.

ED. AMERICAN FLORIST:—

I want to follow the last crop of indoor lettuce, in April, with cucumbers and would be glad to have full particulars as to distance of planting and after treatment.

J. B.

Our correspondent, "Marketman," gave some directions in the last issue about cucumbers, and these are to be followed by others in season which you will do well to peruse.

Hotbeds.

The old fashioned hotbed is still a factor, and as there is a right way and a wrong way, or many of them, I will give a few points to help the beginner, and to make the old hand think it over. The hardest point to impress upon the ordinary laborer is that he must shake up the manure thoroughly and place it fine and even in the beds. He thinks forkfulls dumped side by side is easier and just as good. It is not. The heating depends entirely upon the amount of air embedded. And the finer the manure is shaken up and spread, the more air enclosed. Further, shaking it out evenly makes a bed of even firmness and prevents uneven settling, which is disastrous to crops.

Another point is the depth of earth. We see in good gardening books to use eight inches of earth in a hotbed. Now this is all wrong. The proper amount of earth is the smallest amount you can get along with, and that is about three inches, often less. If a florist can grow crops eight months on four inches of earth, why use eight inches for six weeks? This bulk of earth is costly in labor and disastrous on the manure; it overloads the manure and cools it down. As quickly as a bed is made, put the sash on and keep it tight. Do not put the earth in until bed has heated up. We have for years practiced a method of preparing manure that is very good. Commencing after January 1 we haul the manure as fast as we can get it, and put in one big, flat pile. Every two days we put a team on the pile, 15 minutes, to tramp it down solid. It can heat, but it cannot burn, being compact; and thus it will keep a long time and is always ready to use. It will heat more mildly, more steadily and settle less than fresh manure.

MARKETMAN.

Conway's White Branching Aster.

The flower is pure white, of unusual size and fine shape, with long stiff stems. Blooming from mid-season to late. Is considered by leading florists to be the best and most profitable aster ever grown. **Trade Packet, $1.00; Half Ounce $3.00; Ounce, $5.00.** Cash please.

The Nursery Trade

American Association of Nurserymen.
J. W. Hill, Des Moines, Ia., President; C. M Hobbs, Bridgeport Ind., Vice-President; George C Seager, Rochester, N. Y., Sec'y.
Thirty-third annual convention to be held at Milwaukee, Wis., June, 1908.

VISITED CHICAGO.—Thos. E. Cashman and wife, Owatonna, Minn., president of Clinton Falls Nursery Co.

PARMA, IDAHO.—The Parma Nurseries are to be enlarged by the addition of over 100 acres purchased by the proprietors, the Hawkes Investment Co. The new lands are at Council.

DEL MAR, CALIF.—C. C. Moll is laying out the hotel grounds here. Close to the Pacific coast it will be a beautiful place and about $2,000 worth of ornamental trees, shrubs and flowers will be planted.

THE Satsuma Co., Newark, N. J., was recently incorporated, with capital, $150,000; incorporators, Marshall C. Lefferts, Duff G. Maynard and Frederic R. Lefferts. The company is to deal in trees, shrubs, plants, etc.

THE Wyoming Board of Horticulture issued a bulletin recently on "Survey and Outlook of the Fruit Interests of the State." It is full of meat for the fruit grower and nurseryman. The illustrations are decidedly good.

PALISADES, N. Y.—The Palisades Nurseries were incorporated at Albany February 4, with a capital of $15,000. The directors are: Andrus McGillivary and John M. Stevens, of this place, and James Cochran, 49 Wall street, New York.

DURING the past six years the nut growing industry has been revolutionized. It is now well established in various localities upon a scientific and sound commercial basis. When followed in the light of recent experience, it opens for the farmer or capitalist a most inviting field.

OCONOMOWOC, WIS.—The Enterprise understands "that the White Elm Nursery Co. is planning to enlarge its branch at this place. More land has been secured and many thousand plants will be set out this spring. The business at this branch has so increased that the manager, A. W. Brown, of Watertown, has decided to move here."

SPOKANE has been selected as the convention city for the Washington State Horticultural Association for 1909. The officers for the coming year are H. M. Gilbert, North Yakima, president; H. W. Crowell, Spokane, first vice-president; H. Horns, Wematchee, second vice-president; Wm. Ritz, Walla Walla, treasurer; Levi C. Monroe, Spokane, secretary.

CLEVELAND, O.—Forester John Boddy did much good work last year in beautifying the streets. Many thousands of trees were treated to eliminate insects and disease. Many dead and dying trees were removed and over 3,000 new ones, in all, were planted. The nurseries at Warrensville are in excellent order. There are about 500 trees ready for planting, and nearly 8,000 younger ones, ranging in size from three to ten feet.

Hardy Plants and Their Environments.

An ever increasing inquiry for hardy plants seems to continue from year to year as the requirements of their wants, their durability, beauty and ease of culture become better known. The love of them is rapidly spreading and the number of varieties and the various uses to which they can be put is also rapidly increasing. Therefore, it behooves every wideawake florist to become acquainted with at least the leading and best varieties—to know their various uses, their periods of blooming, the situations in which they can be successfully grown, their habits and modes of growth, whether suitable for sun or shade, for rock, wall or border gardening, for growing alongside ponds or streams or the various other uses to which they can be put.

There is scarcely a suggestive position anywhere where a plant can find subsistence but what amongst the hardy plant collections of to-day some suitable plant cannot be found. Some people have a dry, shady place where nothing will grow, although they have tried everything, but that everything on close question generally ends with a very short category and quite frequently only some three or four very unlikely or altogether inappropriate species have been tried. Some have got a damp, shady or partially shady spot that is an eyesore to them, and this perhaps in a very conspicuous place, and they, too, have tried everything here with the same dire results and they are somewhat discouraged.

Two men went up into the woods of Vermont to spend their vacation and seeing some maidenhair ferns (Adiantum pedatum) growing there decided, on returning home, to load up and carry some along with them a distance of nearly 200 miles. One planted his in pots, stood them around the house, giving them the most assiduous care and attention, but only a few days elapsed and they were things of the past. The other carefully prepared a bed of soil in his back yard and there he planted his and four years later his plants were all alive and four times the size they were when first planted. The latter had carefully noted the natural conditions under which he found the plants growing and had tried to imitate them as near as possible.

If we would obtain best results we must observe these natural conditions of growth and environment and, by following them as closely as possible, success will usually follow. Many plants are adaptable to environment and many are not. The latter must be studied and their vagaries, wants and peculiar methods or traits noted and often minutely copied. The maidenhair fern, although quite amenable to cultivation under ordinary conditions, will not adjust or adapt itself to environment as readily as does Lobelia cardinalis, the cardinal flower, or Stokesia cyanea, the great cornflower. We shall also find many other plants of similar nature whose habits and conditions of growth must be studied and met if we are to be successful in their culture.

The home of Lobelia cardinalis is in low, wet ground by the side of streams in open glade and dense woodland. One of the best and largest groups of these plants we ever saw was growing in the bottom of a ditch or woodland stream where, during the winter months, it was constantly under water and which dried up, or nearly so, during the late spring and summer months, and yet plants dug from the bottom of this woodland stream and planted right out in the open ground in late spring lived, bloomed and improved wonderfully for several years. Stokesia cyanea grows in bogs in pine barrens and low places in North Carolina and Alabama, and yet how readily and amenable to general cultivation this plant has proved of late years! Helenium autumnale, generally found growing in alluvial soils by the side of streams, etc., is another of these accommodating plants that will grow in almost all kinds of soils and situations in open sun or in semi-shade. All these plants do best, if they are to be moved, when that operation is performed in early spring. Stokesia must have a well-drained soil and be thoroughly established to go successfully through our winters and heleniums and lobelias quite frequently resent being moved in the fall months.

The cimicifugas and acteas are denizens of moist, damp woods, generally found growing in open situations in semi-woodland shade. They will grow and bloom in open garden borders and beds, but are not so happy and do not grow with such luxuriance as they do in their native haunts or in similar partially shaded environments in the garden. If planted in too open situations their foliage burns under the influence of the hot summer sun, notwithstanding their being amongst the most beautiful and hardiest of our native plants, whilst the former mentioned plants are quite the reverse. Under skilful cultivation and management the stokesias, lobelias and heleniums have improved both in the size and productiveness of their flowers as well as in the habit of their growth and in the beautiful new hybrids and varieties they have given us. To be successful, therefore, in growing and recommending these as well as other hardy plants, we ought at least to become somewhat acquainted with some of the traits and characteristics as exhibited by the growth of this wonderful race of plants whose characters are as interesting and as varied as they are numerous and then and only then shall we be successful in recommending them to our various inquiring patrons for the various situations and uses they wish to put them to.

H. G.

Ornamental Planting.

It is, after all, more in the disposition of the shrubbery than in the varieties that a rational pleasure will be found. It is not a great burden of bloom from any particular shrub that I aim at. I do not want to prove what it may do at its best, and singly; that is the office of the nurseryman, who has his sales to make. But I want to marry together great ranks of individual beauties, so that May flowers shall hardly be upon the wane when the blossoms of June shall flame over their heads; and June in its turn have hardly lost its miracles of color when July shall commence its intermittent fires, and light up its trail of splendor around all the skirts of the shrubbery. I want to see the delicate white of Clematis Virginiana hanging its graceful festoons of August, here and there in the thickets that have lost their summer flowers; and after this I welcome the black berries of the privet, or the brazen ones of the twining bittersweet. Or, it is some larger group with which we deal—half up the hill-side, screening some ragged nursery of rocks—and a tall Lombardy poplar rises from its centre, while shining, yellowish beeches group around it—crowding it, forcing all its leafy vigor (just where we wish it) into the topmost shoots; and amid the beeches are dark spots of young hemlocks—as if the shadow of a cloud lay just there, and the sun shone on all the rest; and among the hemlocks, and reaching in jagged bays above and below them,

are sumachs (so beautiful, and yet so scorned), lifting out from all the tossing sea of leaves their solid flame-jets of fiery crimson berries. Skirting these, and shining under the dip of a willow, are the glossy kalmias, which at midsummer were a sheet of blossom; and the hem of the group is stitched in at last with purple phloxes and gorgeous golden-rods. I know no limit indeed to the combinations which a man may not effect who has an eye for color. There is, unfortunately, a certain stereotyped way of limiting these shrubberies to a few graceful exotics, and of rating the value of foliage by its cost in the nursery. It is but a narrow and ungrateful way of dealing with the bounties of Providence.—Press Clipping.

Care of Shade Trees.

The Municipal Engineering Magazine calls attention to the fact that cities in New Jersey and Pennsylvania are by statute now enabled to appoint shade tree commissioners to take care of the trees on their streets. Attention is also called to the large opportunity for good work, and, by way of illustration, points out what has been done by the shade tree commission of East Orange.

In the trimming of trees, great care is taken to cut off all limbs close to and even with the trunk. All scars are painted with a coat of thick coal tar. All trees on a street are pruned to a uniform height, and as far as possible that height is made 10 feet to clear all street lights. The campaign against the insects infesting shade trees forms one of the chief tasks of the commission. The control of the injurious insects not only preserves the foliage of the trees for the season, but maintains their health and vitality. What can be done by persistent work in this line is shown by the results with the woolly maple scale (pseudococcus aceris) which attacks the sugar maple. Other pests are the tussock moths, attacking the American elm and linden, the white maple and the horse chestnut, the cotton maple scale, attacking the white maple, the elm-leaf beetle, the spring elm caterpillar, the bag worm and the fall web worm. The idea constantly bore in mind is to destroy the insects in as early a stage as possible, to minimize both the amount of work required in treatment and the injury done to the trees.

A Winter Picture.

In the cardinal willow, the yellow willow and the dogwood we have a trio of cheap and common things that, suitably blended, says Gardening Illustrated, will enliven the landscape in the depth of winter with the brightest color. All who have a lake, stream, or damp spot should endeavor to plant a bold mass of these three. Each alone is exceedingly beautiful. The yellow willow (Salix vitellina) makes a handsome tree, but is, perhaps, most effective when occasionally cut down, so that it becomes a thicket of wand shoots, whose bark is of a rich yellow color. What the cardinal willow is exactly is not quite clear. Some make it a variety of S. vitellina, but instead of the bark being yellow, it is of a glowing red color. Under the name of the cardinal willow, however, it is largely grown in the Surrey nurseries chiefly for tying, as its shoots are exceedingly tough. No other tree or shrub that we have could produce such an effect in the midst of winter, and the harder and sharper the weather, the brighter the color becomes. This lovely willow retains its brightly-colored bark if permitted to grow into a tree, and then the dogwood comes in admirably for associating with it. The bark of the dogwood is hardly less bright in color than that of the cardinal willow. The dogwood will make a dense spreading mass, from which here and there trees of the red and yellow willows might arise, and the result will be a beautiful picture—a welcome relief from somber evergreens. Certainly these three things are in their fullest beauty when naked and leafless, for with the rise of the sap in spring, although the color does not wholly disappear, it fades, and later on is hidden by leaves.

PHILADELPHIA, PA.—An extraordinary display of orchids in full bloom is daily attracting scores of florists and botanists to Horticultural Hall, Fairmount park. The blooms were raised in the city greenhouses under the direction of the city florist, Xavier Schmidt, and are most gorgeous.

NEW YORK.—James Daly, who for 25 years past has been in the employ of J. Weir's Sons, died after a short illness at his home, 419 East Seventeenth street, Manhattan, on February 7, and was buried February 10 from his late home, the interment being in Calvary cemetery. Mr. Daly was one of the best known characters in and around the flower market for years. A large delegation of Brooklyn florists went to the house to pay respect to their dead friend, and the funeral was attended by florists and flower growers in large numbers. The floral tributes were numerous and magnificent. A widow and two children survive.

Date Growing in America.

Invesigations have gone far enough to show that the date palm can be grown successfully in California soil. At the government's experimental farm near Mecca, in the Colorado desert, several acres have been set out and the trees are thriving. They have not reached the full bearing stage, but several trees have produced as high as 20 pounds each.

The successful growing of the date palm of the desert in California is almost as great a triumph as the successful introduction in the past few years of the Smyrna fig. Some packing and shipping of both soft and dry dates may be done this year. Ultimately it is expected that the date will form an important addition to California's fruit product. So confident of commercial success are those who have been watching the date experiments that considerable planting has been done by private growers. The region selected for the experiment is the Coachella valley, west of Salton and north of Imperial valley. There is no reason, experts say, why it should not be covered with thriving date plantations that will produce the larger part of the fruit, which is now imported.

F. DORNER & SONS CO., La Fayette, Ind.

GENERAL NEWS.

MOLINE, ILL.—Wm. Knees has built four new houses, each 28x100 feet.

PADUCAH, KY.—Schmaus Bros. have placed an order for 5,000 feet of glass for a new house, 40x125 feet, to be completed about August 1.

NEW ORLEANS, LA.—Recent trade visitors included J. D. Carmody, Evansville, Ind., and B. Eshner, representing M. Rice & Co., Philadelphia, Pa.

MEMPHIS, TENN.—Recent trade visitors included B. Eshner, representing M. Rice & Co., Philadelphia, Pa., and J. D. Carmody, Evansville, Ind.

MASON CITY, IA.—The Perth Floral Co. is making preparations to move its place of business from South Main street to 109 West State, in the old Republican building.

BEATRICE, NEB.—The Dole Floral Co. is making preparations to add considerably to its glass area this season, a palm house 35x100 feet being among the additions.

BATAVIA, ILL.—Dr. J. C. Patterson of Bellevue, Place county, is spending his winter vacation in the Indian River country in Florida. He is getting more fruit than fish.

BRIDGEPORT, CONN.—Chas. M. Minor, aged 90 years, died here February 9. He was well known all through the Naugatuck valley, where he used to travel and dispose of nursery stock for N. H. Lindley.

DUBUQUE, IA.—McKinley Day and St. Valentine's Day were both much better than usual here, and there has been considerable funeral work, according to W. A. Harkett of Harkett's Floral Nursery.

DALLAS, TEXAS.—The Holloway Seed and Floral Co. of Dallas has amended its charter, changing the name to the Robinson Seed and Plant Co., and increasing its capital stock from $25,000 to $50,000.

COUNCIL BLUFFS, IA.—Things are moving lively here, especially considering the coming election, according to Peter Nelson, who thinks that everyone can get along if they get down to business and stick to it.

PASADENA, CALIF.—The Gardeners' Association announce its spring show for April 2, 3 and 4, and will mail schedule on application. The schedule is very complete, comprising flowers, plants, vegetables and fruits. Richard Thomas, 308 Stevenson avenue, is secretary.

ITALY.—Charles Sprenger, at Vomero, Napoli, having decided to devote his undivided attention to agriculture, has disposed of his entire stock of new and valuable plants, including his numerous hybrids of crinum, narcissus, yucca, etc., to W. Muller, who has acted for many years past as his assistant. Willy Muller has established himself as plant and seed grower at Nocera Inferiore, Provinz Salerno.

FARGO, N. D.—Seven hundred farmers of Dakota and Minnesota met here last week. These farmers were especially eager to learn the secrets of successful tree planting. One entire day of the convention was given to horticulture and its various branches. The importance of the subject of forestry was brought out by four speakers. These were G. H. Whiting, a pioneer nurseryman; Professor E. G. Cheyney of Minnesota; Professor C. B. Waldron, of North Dakota Agricultural College, and C. A. Kupfer of the United States Forest Service.

LLOYD Will Not Disappoint You.

The only ever blooming **White Carnation** in existence. It is the bread and butter white of the future. Size and stem of Enchantress, with the freedom of McGowen. Easy Rooted. Excellent keeper and shipper. Best seller of any carnation on the market.

Rooted Cuttings, **$2.00** per doz., **$12.00** per 100, **$100.00** per 1000; unrooted **$6.00** per 100, **$50.00** per 1000.

H. A. JAHN, New Bedford, Mass.

NEW CARNATION

PRESIDENT SEELYE

The Unexcelled White

A Seedling from Mrs. T. W. Lawson and The Queen, now in its fourth year.

A large well-formed flower, long stemmed from the start; fragrant and productive; easy to grow; calyx does not split, and will do the best in a temperature of 50° to 52°

A money maker for the wholesaler and excellent for the small retail florist who grows but a few hundred of each kind.

The trade is invited to visit the greenhouses and see it growing. Every cutting guaranteed well rooted and free from disease. **$10.00** per 100; **$75.00** per 1000.

White Enchantress.

ROOTED CUTTINGS

$6 00 per 100; $50.00 per 1000.

E. SCHRADER, New Springville,

RICHMOND BOROUGH, N. Y.

CARNATION CUTTINGS.

We are in unusally good postion to supply exceptionally well-rooted, healthy stock. We have such a large quantity of flowering plants that we propagate only from heel cuttings from flowering shoots. Our cuttings are rooted in light, sunny, airy, houses, and we are sure will satisfy the most critical buyer.

A prominent carnation grower writes: "You seem to be **the only firm in the business that knows how to pack stock and have it reach the buyer in good condition,** and I have always found your cuttings cheaper than the same varieties at much lower figures.

While our prices may not always be the cheapest, we certainly can give, quality considered, as good value if not better, than is obtainable anywhere.

WINSOR, which we introduced last year has proved to be the finest novelty introduced in years. We think it is the most profitable variety grown to-day, considering its fine color, splendid keeping qualities and productiveness. When properly grown it leaves little to be desired, and almost every one succeeds with it.

White Enchantress, the best all-round White Carnation, on account of its large size, long stem, earliness and productiveness. Our White Enchantress exhibited at the Carnation Convention at Washington, was the only White Enchantress exhibited that received an award.

Strong rooted cuttings, now ready for delivery, from sand, $6.00 per 100, $50.00 per 1000; from soil, $7.50 per 100, $60.00 per 1000.

We offer, also, **Victory** and **Red Chief,** from sand, $6.00 per 100, $50.00 per 1000; from soil, $7.50 per 100, $60.00 per 1000, also **Victory, Melody** and **White Perfection,** from sand, $4.00 per 100, $35.00 per 1000; from soil, $6.00 per 100, $45.00 per 1000; **Variegated Lawson, White Lawson** and **Red Lawson,** from sand, $3.00 per 100, $25.00 per 1000; from soil, $4.00 per 100, $35.00 per 1000. We can supply, also, **Winona** and **Afterglow,** at $12.00 per 100, $100.00 per 1000.

Buyers will find transplanted stock offered from soil well worth the difference in price.

F. R. PIERSON CO., Tarrytown-on-Hudson, N. Y.

"Two Shades of Red"

Do you want **THE BEST CRIMSON** on the market? f so, let us book your order for

HARVARD "A greatly improved Harlowarden, with a larger flower, better stem and very prolific." **Rooted Cuttings, $12.00 per 100; $100.00 per 1000.**

FAUST "A brilliant scarlet, very prolific, many plants last Christmas having 20 buds and blooms to the plant. Best of its color for commercial use." **Rooted Cuttings, $6.00 per 100; $50.00 per 1000.**

JAMES D. COCKCROFT, Northport, Long Island, N. Y.

Morristown, N. J.

We have been feeling to some extent the effects of the recent financial squeeze.

John Jones, of Convent, is waiting for spring trade and working up a large stock of bedding plants in which he has an immense trade. He has a fine stock of Jacqueminot, Paul Neyron, and other hybrid roses for Easter. He has recently purchased the entire contents of R. D. Foote's cattleya house, about 2,500 plants. Foote's place, so well known on account of the prize-winning chrysanthemums, roses and carnations that were formerly grown there, is being turned into a commercial establishment. Wm. F. Lyons is going to devote it to carnations entirely.

H. C. Holmes reports sales slightly below normal. Customers like to "switch off into sweet peas, snap-dragon, mignonette, or anything to get away from the regular carnation and rose orders." Mr. Holmes goes in for Enchantress for a money maker though Winsor and Welcome are grown well in good numbers. The new violet, Gov. Herrick, is grown by him beside Princess of Wales; whatever the case may be in other places, Princess has it on the governor here. A fine batch of Campanula calycantha in 8-inch pots looks well for Easter.

Mrs. E. A. Holton, of South street, says sales are not up to expectation. She grows most of her own stock in the Sussex avenue greenhouses, and Ed. Gallegher seems to know the trick. Carnations, roses and bedding plants are pictures of vigor and health; narrcissi, hyacinths, tulips and lilies are grown in immense quantities and look well.

Geo. Coombs, successor to Marshall Crissman is the only strictly wholesaleman in this city. The output of his 20,000 feet of glass is almost entirely carnations, and with prices a little higher George would make money this year. Most of his stock goes to the retailers of the town.

R. A. Elliott reports fair trade. Carnations are his specialty, Enchantress his favorite. His houses of palms are among the best in this section, clean, vigorous, large and wonderfully perfect.

J. S. Green, Sand Springs, is the noted "green carnation" man, and a thriving business he does around March 17, each year. Occasionally he carries on a lively discussion in the local papers on the subject of carnation coloring, and he keeps his end up well. E. R.

RIDGEFIELD, CONN.—Geo. I. Haight has purchased the lot owned by J. L. Dauchy, on the Danbury road. Mr. Haight expects to build on this site and remove his greenhouses there, also.

DEFIANCE

The only scarlet with the real velvet color. It is there for quantity and quality. Let us have your order for early delivery.

$12.00 per 100; $100.00 per 1000.

WOOD BROTHERS

FISHKILL, N. Y.

CARNATIONS.

WELL ROOTED.

We offer the following Carnations in excellent condition, better stock has never been offered: Winsor, Beacon Aristocrat and pure White Enchantress, $6.00 per 100; $50.00 per 1000. White Perfection Victory, $3 00 per 100. Lawson, Var Lawson, B Market, Robt. Craig Candace $1.25 per 100; $10.00 per 1000; 5 per cent discount cash with order. If not satisfactory return at my expense.

W. W. COLES, Kokomo, Ind.

Brampton, Ont.

Business here has been fairly good and about equal to last year, which is a good deal more satisfactory report than those engaged in some trades can give. A good sign of the times is the talk we hear of building. There will be several new houses go up this spring, according to calculations at the present time, which will add in the neighborhood of 40,000 feet to the 750,000 already in this small town. The supply of roses falls a little short of the demand, but the quality is very good, and the prospects are good for a larger cut in the near future. Carnations of the better grades are a little on the scarce side; splits are more plentiful, although they are easily disposed of. There is a heavy crop of violets on now and the quality was never better. Bulbous stock seems to be the only thing that is dragging at all. There are great quantities being cut, including some Lilium longiflorum from cold storage.

NOTES.

The Dale Estate has moved its large stock of orchids into a new range of houses, just completed. They are the most modern, up-to-date houses that can be designed for that purpose.

R. Jennings is picking some grand Harlowarden carnation, the best that has been seen in this district. He is going in largely for the scarlet sport, Andrew Carnegie, this year.

St. Valentine's Day created quite a demand for violets.

L.

LUDINGTON, MICH.—Wm. Gregory will shortly put up a range of five houses, 120 feet long. The John C. Moninger Co., of Chicago, has the contract.

LONDON, ONT.—At the last meeting of the Horticultural Society the members decided to offer the sum of $10 per school to both the public and separate school boards of the city to be used for the purpose of beautifying and fixing up the different school grounds of the city, with the understanding that the boards contribute a like sum themselves towards the work, which is to be conducted under the direction of Parks Superintendent Pearce.

Pacific Supreme

THE BEST EARLY PINK

A Seedling from Glory of Pacific,

Is a grand improvement in color! Does not fade! As early as Pacific! A trifle taller, with ample foliage!

Will Depose Glory of Pacific When Its Merits Are Known.

Buy now and increase your stock. Plant early (not later than May 15th). Take bud Aug. 20th to 25th, and success is assured.

Strong plants, from 2¼-in. pots, $35 00 per 100. Can ship stock day order is received.

OUR PASTIMES.

Louisville.

The Florists' bowling club is still breaking records and enjoying prosperity. The members were probably too busy to attend or take part in the Cincinnati tournament.

Cincinnati.

The A. B. C. bowling tournament being held in our city at present is creating quite a bit of enthusiasm among the boys, and there is some talk of starting a florists' bowling club. We have some excellent material for such a club among the local craft, and Wm. Gardner of Weiland & Olingers, is the moving spirit in the new venture. Billy has the fever very bad and the same may be said of Tom Jackson, who, though along in years, is young in spirit, and can give any of the boys a warm argument at a game of ten pins.

The Helk hand the Helephant.

"The helk hand the helephant hentered the Hark
When the helements hopened the ball.
"The helk hasked the helephant what's to heat?
Said the helephant, ' 'Ay is hall.'

"The helk hand the helephant hate the 'ay.
Said the helk with a heloquent sigh,
'Hi 'ope you are 'appy this 'orrible day?'
And the helephant hanswered, 'Haye.' "

A New Style of Hotbed.

Talk about being up-to-date, there is some talk prevalent among the Irondequoit gardeners, as to the best kind of hotbeds to germinate seed quickly, says the Market Grower's Journal. One gardener has them all beat. He spoke thus: "If you want to get your muskmelons started early the coming season, put your seed to soak over night in a rag. Next morning put them under your sitting hen, keep the rag moist, and your seeds will all be sprouted in three or four days. Just try it. You know it is all in getting the seed to sprout."

SAN FRANCISCO, CALIF.—With the scattering of seeds over the burned hillsides, the first actual work for beautification against the coming of the battleship fleet has been begun. At a recent meeting of the executive committee for the fleet's reception it was decided to plant at once nasturtium, eschscholtsia and Shirley poppy seeds, so that when May comes the slopes now dotted with vacant spaces will be bright with the gorgeous colors of many flowers.

"THE TEST is what TELLS THE STORY."

New "MY MARYLAND" Rose

BEST UP-TO-DATE COMMERCIAL ROSE.

The Gardeners' and Florists' Club of Boston: A report of merit is hereby awarded to **John Cook,** for Vase New **H. T. Rose, No. 294,** since named **"My Maryland."** Description and points of particular merit: This new rose has a pleasing shade of salmon pink. With other essential characteristics of a good commercial rose fully proven, much may be expected of it.

The Committee believes this variety will be especially valuable in the light pink class of winter blooming roses.

Given by the Gardeners' and Florists' Club of Boston, this 17th day of December, 1907.

ROSES SCARCE.

Business conditions the past two weeks have been very good, taking everything into consideration. St. Valentine's Day business this year was probably the best ever experienced locally. Good roses are somewhat scarce, and the demand heavy. Carnations of good quality are in good supply and find ready sale. Lily of the valley and violets have a fair demand. Bulbous stock, such as narcissi, jonquils, Roman hyacinths, and tulips are in good supply, and find a fair demand. Green goods are scarce. There are quite a number of flowering plants on the market, such as primroses, cyclamens, bulbous stock, etc., which sell well.

The regular monthly meeting of The Kentucky Society of Florists was held at Joseph Wettle's residence, with a good attendance and a jolly time prevailed. The coming show was discussed for a great deal of the time, and nearly $500 subscribed. Members are urged to keep the ball rolling, and have a good bunch of slips ready to turn in at the next meeting. From the present outlook it will be the biggest show ever held in this section. The society did one thing which should have been done long ago, that was to adopt a funeral design for its members and families. After the meeting was adjourned, the usual big lunch awaited the members, and the only thing which hurt the members was that their capacities were not larger. It would be needless to state that everybody had a good time, as we all know what 1,225 stands for. Many thanks to Mr. and Mrs. Wettle for their hospitality.

The retailers had very pretty windows for St. Valentine's Day. Jacob Schulz had the prettiest window seen in many a day, consisting of a great many novelties, and being illuminated with a number of small lights.

Chas. Markmeyer, of New Albany, has the sympathy of the craft in the loss of his wife.

Ferdinand Link has opened a store on Shelby street near Broadway, and the good wishes of the craft are with him. F. L. S.

J. L. Schiller, 929 Prouty Avenue TOLEDO, O.

Lincoln, Neb.

Business here has been very good all winter; the best in years. On St. Valentine's Day the demand was greater than ever before, everything selling well. Roses, carnations, daffodils and violets were in especially good demand also plants of all kinds, both flowering and decorative. Business, in short, could hardly have been better.

C. H. Frey is just completing a fine new range of glass. Unfortunately, Mr. Frey is in quarantine at his home, on account of the illness of his son, who has been down with scarlet fever, but is mending, and, it is hoped, will soon be around again. E.

LYONS, IA.—Mrs. M. E. Eaton has sold out to J. R. Bather of Clinton.

LOUISIANA, MO.—The greenhouses belonging to Charles Foreman caught fire early February 8 and were destroyed. Mr. Foreman was killed by a falling chimney and his brother George and several firemen were severely burned and otherwise injured. George Foreman will lose the sight of both eyes and it is doubtful if he will recover.

WILLIAM SIM, **Cliftondale, Mass.**

Mention the American Florist when writing

Springfield, Mass.

The Amateur Horticultural Society held an unusually interesting meeting February 7, at Odd Fellows' hall, when G. H. Sinclair of Northampton and J. Van Leuren of Holland epoke thus: "If you want to get your musk- "Horticulture in Holland, Belgium and England," spending much of his time describing the gardens at Kew in London, and of the wonders in the immense greenhouses there. He then spoke of the beauties of horticulture in Holland, and dwelt at length on the matter of bulbs. In speaking of Belgium he confined himself to the beauties of the country in general.

Mr. Van Leuren followed with a description of the raising of hyacinths, tulips and crocuses in Holland. He said that the tiny area included in a space 20 miles long and three miles broad was the only place in the world where the bulbs were grown successfully, and stated that he had been offered a salary of $5,000 a year and $250,000 working capital if he would find some place in this country where the bulbs could be grown as well. The meeting was a regular meeting, and the new board of managers and the women's entertainment committee of 18 were appointed.

London.

Trade at Covent Garden Market has improved for the week, possibly owing to the opening of parliament. Mid-week saw a real slump in daffodils and narcissi, English and Channel Island grown. First of Sir Watkin sold at $2 per dozen bunches. Lilium Harrisii is worth $1.25 to $1.50 per dozen.

In pot plants, which were a quiet trade, cinerarias and genistas made $2.50 to $3 per dozen; Azalea Indica a good trade at $1.25 each. Palms are a better trade for home grown. Imported palms, dracænas and aspidistras are also a rather better sale.

A CALL AT THE HOME OF FLOWERS.

There is always something of interest at H. Cannell & Sons', the home of flowers, Swanley, and when calling recently the begonia houses were very interesting. A large span-roofed house is full of the bulbs, laid close on sand or cocoanut fiber. They are in immense numbers and will be potted as they start. This firm supplies 12,000 bulbs annually for Hyde park for bedding. The cactus house, 160 feet long, was in fine shape, the plants perfectly clean and healthy. The "One and Only" fruit tree and plant wash sent out by this firm is a wonder. It is fatal to mealy bug, red spider and other troublesome insects and is also a fertilizer. S.

Dracena Bruanti, from Belgium, full of green foliage from bottom to top, 6-in. pots, 22 to 25 in. high, 40c each

Begonia Improved Erfordii, 4-in pots, very large, $2.00 per doz.; 5¼-in., in bloom and bud, 25c each, or $3.00 per doz. **Begonia Gracilis,** dark red, in bloom, 5¼-in. pots, 25c.

Cineraria Hyb., 4-in. pots, fast strain, $10.00 per 100; 5-in., $2.00 per doz.

Cyclamen Grandiflora, 4-in., in bud and bloom, 20c.

Ficus Elastica or **Rubber Plant,** home grown and Belgium stock, 5, 5½, 6 and 7 in. pots, 30c, 35c, 50c, 60c and 75c each.

☞ Now is the time to force **Hydrangea Otaksa** for Easter blooming. Remember only pot-grown will force successfully for Easter. We raise ours in pots outside in cold frames during summer. Can spare of these about 500 plants from 6 to 7-in. pots. Price, 25c, 35c, 50c and 75c each.

Cocos Weddelliana (Palm), 3-in. pots, 12-15-18 in. high, 15c to 18c each.

Azaleas, red and variegated, in bloom, 75c.

Azalea Indica for Easter blooming. Have an immense stock grown for us in Ghent, Belgium, by an expert in azaleas. Have only leading varieties, such as Mme. Van der Cruyssen (2,500 alone, all shapely plants, full of buds), Simon Mardner, Vervæneana, Bernard Andreas Alba, Apollo, Niobe, Deutsche Perle, Prof. Wolters, Empress of India, and others; 6-in. pots, 50c; 6-7 in. pots, 60c, 75c, $1.00, $1.25, $1.50, $2.00 to $2 50 each.

Latania Borbonica, 4-in. pots, about 18 to 20 in. high, 25c each.

Choice Nephrolepis, all pot-grown.

A middle bench full of choice **Whitmani Ferns** in splendid shape, 7-in. pots, bigger than 8 in., made up in July (three plants in pot), now big as a bushel basket, worth $3.00, and are beauties, cut down to $1.50 and $1.25 per pot; 6-in. pots, very handsome, 75c to $1.00 eacF.

Boston Ferns, 8-in. pots, made up, very bushy, as big as a wash-tub, worth $3.00, only $1.25 to $1.50; 7-in pots, as big as a bushel basket, worth $2.00, price 75c to $1.00; 6-in. pots, very large, only 50c; 5-5½-in. pots, 30c, 35c and 40c.

Scottii Ferns, 7-in. pots, very large, $1 00 to $1.25; 6-in. pots, 50c, 60c and 75c.

Piersoni Ferns, 6-in., good, 50c; 5-5½-in. 30c, 35c and 40c; 4-in. pots, 25c.

Please mention if in or out of pots. All goods must travel at purchaser's risk. Cash with order, please

VALENTINE TRADE GOOD.

The past week has been very changeable from extremely cold and deep snow to a very warm rain and the disappearing of the snow. Trade has been very good, especially St. Valentine's Day. From what was an ordinary day it has become one of the busiest of the year, Christmas and Easter excepted. It is safe to say that the retailers of this city were never before as busy on St. Valentine's Day as this year, nor were the receipts ever so large. There may be several reasons for this. It may be that the fancy hand painted silk valentine or the box of Huyler's decorated with hearts have become "passé," or the live florist, by a pretty window and a good, judicious amount of printers' ink in a daily paper setting forth the wisdom of sending a box of roses, carnations, violets, lily of the valley or a plant to the fair maidens has set the young man or the husband thinking that flowers are the proper and nicest thing to send. I think the advertisement in the paper does a lot to help solve the question. One may have an advertisement in a programme of a theater, dance, fair, church or any other attractive book and spend as much money, but will one get the results that can be obtained by one good, large advertisement in one, two or three of the daily papers for one day?

NOTES.

There was a meeting of the Florists' Club, February 14, which must pass down as a record breaker in the history of the club. There was a good attendance of the old members and applications from 20 new ones, which were acted on and all were elected. Motions, resolutions and amendments were as thick as in the legislature and were ably handled by President Neubeck. Nominations for office for the ensuing year were made and the following were nominated: Chas. Sandeford and Chas. Reickert for president; Geo. McClure, Jr., and David Scott, vice-president; Wallace Eiss, treasurer; J. R. Cloudsley, secretary; E. C. Brucker, financial secretary, the latter being the only one renominated.

Everything looks promising for a busy year for the club and from the interest manifested by all present, there will be something doing this summer. After the meeting a bounteous lunch was served and all had a very enjoyable time. The election will take place March 6 and from the committee appointed by President Neubeck to make arrangements for a banquet and entertainment, a good time is assured. Pre-Lenten entertainments have every indication of being brisk. It was very pleasing to see at the meeting D. J. Scott, of Corfu; C. White, of Gasport; C. Forbach, T. Venneman and W. Buechi, of Pine Hill; C. H. Keitsch, J. G. Pickleman and Geo. McClure, of this city. Such energetic business men as these are all that is wanted to make a club a success with their attendance.

BISON.

JACKSONVILLE, FLA.—Sawyer & Payne are preparing to build several new greenhouses and are going considerably into the nursery business.

TRADE GOOD, STOCK SHORT.

Very severe weather shortened up the supply of roses considerably, and with business increased in all lines it is more noticeable. The stock coming in is of the very best quality for this season of the year, and from the appearance of the plants there will be an increase in the cut in a short time. In American Beauty we almost forget what they look like. Bridesmaid and Killarney are of good color, while Richmond is all that could be desired. Carnations continue plentiful and of very best quality; some of the larger varieties are not keeping very well, but with more sunshine this will no doubt disappear. Violets and bulbous stock can be had in unlimited quantities and very good stock at your own prices. Orchids and lilacs are scarce.

NOTES.

St. Valentine's Day proved a good one for the retailers, the more enterprising of whom did considerable advertising in the dailies. The results were very noticeable as flowers seemed to be the favorite medium this year.

The rose ball, held at the King Edward, made this flower very popular for the occasion and depleted the stock in all grades.

There is the usual annual shortage of greens, the growers in this section seemingly being unable to supply enough at this season.

The delegates returned from the carnation convention well pleased with the exhibition at Washington. H. G. D.

Syracuse, N. Y.

Trade during the past month has shown some improvement, although it is not what we would like it to be. Collections are poor even with the wealthier classes.

The question whether or not the plans for the enlargement and permanent improvement of the state fair grounds will be adopted will probably be decided this week. The appropriation bill is now in the hands of the senate finance committee. If it goes through, there will be opportunity for a great amount of landscape gardening, flower beds, etc. The Park Commission has included the state fair grounds as a part of the system of parks, and it is probable that several thousand dollars will be expended in this improvement during the coming year. The boulevard leading from the city to the fair grounds is to be made a public highway. The plans for the improvement include the erection of a new floral hall which is to be one of the finest in the country. Plans for the whole scheme were drawn by Green & Wickes, of Buffalo, and have been adopted by the state fair commission.

Several representatives of Holland houses have been in the city during the past week to pick up orders for bulbs for next winter. Bulbous stock is about the best selling of anything at the present time. All stock is good and there is no change in price. A. J. B.

Oklahoma City, Okla.

The Wheleer Park Conservatories were visited by a destructive hailstorm February 13, which did considerable damage to glass and plants. It broke 300 lights 16x18 and 16x24, but owing to the condition of the weather it was impossible to do any repair work, and, not being able to get any glass to make repairs with, we used roofing paper and find it very satisfactory for that purpose until the glass arrives from Chicago. If other florists should have the same disaster in the winter time and should not be able to get glass to fill out with they will find it a quick medium to do repair work with. We had just completed two new houses 14x70 feet and had them full of plants.

Tulips, narcissi and hyacinths are out of the ground now and crocuses are in bloom. Rose bushes are beginning to start growth outdoors.

The florists are contemplating giving a flower show May 16-23. Their plans are practically completed. C. E. F.

Ogden, Utah.

The trade is in good condition generally, although at this season of the year business is somewhat quiet.

The beautifying of the parks and streets of the city has become of considerable interest since the establishment of Board of Park Commissioners to attend to that special art. The new park laid out the latter part of last summer will be one planted this spring. The planting plans were furnished by Howard E. Weed of Chicago, who is also preparing plans for the improvement of Lester park.

W. L. Porter had quite a loss, caused by fire through defective flue. About $3,000 damage was done. W. T. S.

SUGGESTIONS FOR CUT FLOWER GROWERS.

Pansies.

Never let the seedling pansies get overcrowded before pricking them off, either into flats or on a bench. If the latter, prick them three inches apart each way and, when they again meet, lift every other plant in the row and every other row, leaving the plants six inches apart for flowering. Keep the soil constantly stirred and work in a little old soot and bonemeal occasionally. Avoid covering the crowns of the plants and, as far as possible, water only on bright days and before noon. Keep the house cool and allow plenty of air on all possible occasions. Keep a close watch for insects as the small slugs and snails are as troublesome with these as with violets.

Feeding Easter Lilies.

Feeding Easter lilies is a point that needs attention when the roots are feeling the sides of the pots or flats in which they are grown. Good foliage is sometimes as important as good flowers and light feeding right along helps this. Should the foliage at the center take on a yellow tint, stop feeding at once and give less water. Nitrates and other chemicals that are used to give tone to the foliage of many plants are very easily overdone and many cases of this yellowing of the upper foliage can be directly traced to overfeeding and too much water. If growers would only get the fact into their heads that, before plants can make use of manurial support, they must be healthy and have plenty of live feeding roots and have used up most of the feed in the soil, there would be fewer complaints of overfeeding and unhealthy plants.

Sweet Peas.

Cut out the old plants that have been flowering and are now producing short stemmed flowers and give attention to the young vigorous ones just coming in. These old scrubby plants are not, in many cases, paying for the room they are taking up. Insects, too, are frequently present on them, and these spread to the healthy plants, giving the grower plenty of trouble here. The young plants set out last month will be needing support. Horizontal wires on the bed and upright strings from these to other wires at the roof are the best supports. Never let the young plants fall over before placing these strings and loosely tying the plants to them. There is an advantage in using these strings over any other method of support in small houses as they may be cut when the plants reach the top and then taken back over the bench at an angle of 45°, which will give the stems a little more room to extend. The strings must, of course, be lengthened and taken to the roof wires. Keep the surface soil stirred on the beds devoted to the young stock and avoid overwatering. If the soil was in fair condition when the plants were set out, little in the way of feeding will be necessary, but should the plants be apparently losing vigor a little super-phosphate or bone meal may be used. Nitrates are not very effective as a manure to sweet peas.

Marguerites.

A bench of marguerites planted now will enable the grower to throw out the old thrips infested plants that have been doing duty through the spring, when the hot weather sets in. If possible, plant the young ones in a house well away from the old plants so that they may be separately treated and there will be no risk of the insects reaching them from the old benches. About five or six inches of soil is enough; this should be of good sound texture and rammed firmly into position so that the plants will make a solid growth. If the young plants are small when put out pinch them regularly until about a dozen shoots have formed on each and then let them go. Never let them get out of cultivation. They take a whole lot of feeding when the flowers are being cut regularly and unless they get it the flowers will be small and short in the stem. Nothing but this frequent propagation and planting will ensure a constant supply of good flowers. A cool, airy house must be devoted to them and, as soon as this is safe, take the side glass out of the house. Spray frequently every fine day and, at the first sign of any insect pest, fumigate lightly on several successive nights. But keep them clean

and as soon as they show signs of getting out of hand throw them out and have new batches take their place. The white varieties are more easily grown than the yellow.

Single Chrysanthemums.

The grace and beauty of these charming varieties was well shown last year around Thanksgiving and there will doubtless be an even greater demand for them this year. If they are not in stock get some plants or cuttings early, not because they need planting early but in order to work up a good stock of plants. These are so easy to manage that very good flowers may be had from plants put out as late as June, and it will be possible to make a good many plants by then from 100 cuttings or small stock plants now. It is not necessary or advisable to put them in heat. Plant the stock plants on a light sunny bench and take the cuttings off as fast as they appear, rooting them and topping them again as soon as they are three or four inches high. Get in line with these for sale to the best class of trade.

Spring Bulbous Stock.

Benches are often used for gladiolus, anemone, ranunculus and other spring bulbs but it is questionable whether there is much saved by this method, over growing the same stock in moderately deep flats, and placing these close together on benches in a cool house. None of these plants like forcing and where it is practiced insects of all kinds soon become numerous and often ruin the crop. When the plants are in flats they may be kept out of the way until growth starts and may be shifted around as necessary to make room. If any gladioli are benched choose the large flowering hybrid forms and Brenchleyensis. As freesias are cut, place any that are to be kept over in a light position and the full sun; keep the roots moist as long as any growth is going on, but when the stems die off give them a thorough baking as close to the glass as possible. Bulbous stock of most kinds is impatient of fumigation and some of this may be saved by keeping a close watch for green fly and removing it by an upward stroke of a damp sponge.

Cypripedium Insigne.

This plant while flowering, is also commencing its growth, and must be very freely watered at the roots, the atmosphere being at the same time kept moderately dry to prevent water settling on the flowers in the form of dew. As soon as the flowers are cut, any that need it may be repotted. But the most free flowering plants are they that become somewhat potbound by about July, when they take a short rest. In sorting the plants for potting, select those that really need it and give a moderate shift only. The roots of this cypripedium are stronger than those of most any other orchid and like a more substantial compost. Two parts of good loam, one of peat and one of chopped sphagnum moss with a liberal sprinkling of broken crocks and charcoal will suit this species. Any plants not needing repotting may be top dressed with well dried cow manure and nut charcoal, this causing a very strong, healthy growth. But do not use manure to any extent when repotting. Grow them right along in a temperature of 58° to 60° at night and in June, when the bedding plants are out of the frames, the cypripediums may take their place. A thin shade at all times while growing, a nicely moistened atmosphere and plenty of air are necessary. When pulling the plants apart for repotting, shake away as much of the old soil as possible and cut away all decaying roots, carefully avoiding injury to the new ones that will usually be forming.

Clematis Indivisa.

A cluster of flowering sprays of this clematis was exhibited by the H. A. Dreer Co. at the last monthly meeting of the Philadelphia Florists' Club, where it created quite a sensation and was very much admired, its possibilities as a florist's flower being freely predicted. J. D. Eisele says it was recommended to him as a good thing for greenhouse forcing by European growers some three years ago. The company imported a number of the plants and found it to be all that was claimed for it. One plant set out in a table of stock ferns made a strong growth and was trained up one of the iron posts and along the purlin of the house, where it commenced to flower about the last week of January and looks as if it would continue until March or perhaps later. The flowers are from two and one-half inches to three inches in diameter, borne in large graceful clusters, but not so close together as to interfere with the blossoms showing their individuality. The foliage is a dark glossy green, in form and color not unlike wild smilax. It will, when it can be had in quantity, make very beautiful decorative effects used with wild smilax as a background. Wm. Robertson, of Jenkintown, has flowered it in pots, winning the Dreer prize for the best specimen of this variety in flower at the last spring exhibition of the Pennsylvania Horticultural Society. He says it should make a good plant for Easter sales. It is not a new variety, being introduced into England from New Zealand, its native habitat, in 1847. Mr. Eisele says that it does best in a carnation temperature, is easy to propagate and when better known will no doubt prove a welcome addition to our winter forcing flowers. K.

LOWELL, MASS.—A fire occurred over the store of James McMammon February 18, but it appears to have been a small affair only.

The Meaning of Bud Variation.

A paper read by Dr. E. M. East, New Haven, Conn., before the Horticultural Society of New York at the American Institute February 12, 1908.

Instances of bud variation have always had a marked fascination for horticulturists; but, owing to their comparative rarity, they have received but little analytic study. Carrière, in his "Production et la Fixation des Variétés dans les Végétaux," published in 1865, and Darwin, in "Animals and Plants under Domestication," published in 1868, have each collected many cases of their occurrence. Such tentative explanations of their causes as were given at these early dates, however, can have but little value at the present day, since we have come to see something of the possibilities within the terms "unit character" and "Mendelism."

In De Vries' monumental work, "Die Mutationstheorie," we might have expected an elucidation of these phenomena to fit our modern biology; but the subject is passed over in a scant ten pages. Because our present knowledge of inheritance is not sufficient to do much more than theorize concerning the mechanism of bud variation, was probably De Vries' reason for slighting the subject. I believe, however, that even now we can begin to divide bud variations into their proper grouping, and possibly draw some conclusions as to the relative frequency with which each group occurs.

De Vries divides mutations into three classes; progressive, degressive and retrogressive. The appearance of an entirely new character is a progressive mutation. It is this class that must have been the great factor in evolution. Degressive mutations are those which occur when a character appears that has been latent or hidden. A retrogressive mutation is a change in which a character previously active, becomes latent. As we have no reason to believe that bud mutations are specifically different from germinal mutations, we can use for them the same distinctions. What is the frequency with which these groups occur? If progressive mutations occur as often as degressive and retrogressive mutations, we can expect to obtain varieties with absolutely new characters by this means. If, however, progressive mutations occur with very great rarity, or possibly do not occur at all, then bud

A YOUNG NEW ORLEANS FLORIST—HARRY PAPWORTH, JR.

mutations can be expected to give but few novelties of real worth. Degressive and retrogressive mutations are confined to rather narrow lines, and will probably produce and reproduce certain definite variations of little economic value. In floriculture they may be of value where slight differences in color and other minor characters are important; but there will probably be little change in the factors which go to make up quality in agricultural productions.

Mendel perceived that if progress was to be made in the study of heredity the problem must be simplified as much as possible. There were two things especially necessary to be controlled, in such experimental work; namely, accidental mixtures due to crossing, and differences in too many characters. The common garden pea fulfilled these demands. It could be self-fertilized generation after generation without deterioration, and varieties were found that differed from each other in but few characters. Mendel selected varieties of the pea which differed from each other in such characters as "round or wrinkled seeds," "yellow or green cotyledons" or seed leaves, and "purple or white flowers." These varieties he found to be true to their characters by inbreeding. He then crossed them once and made careful records of their progeny when inbred for a number of succeeding generations. His results may be stated as follows: If two contrasted characters which have previously bred true are crossed, one only, the dominant character, appears in the hybrid. (The Law of Dominance.)

In succeeding generations, self-fertilized plants grown from seeds of this cross reproduce both characters in the proportion of three of the dominant character to one of the recessive character. Furthermore, the recessive character continues ever after to breed true; while those plants bearing the dominant character are one-third pure dominants which ever after breed true to the dominant character, and two-thirds hybrid dominants which contain the recessive character in a hidden condition. (Mendel's Law of Inheritance.) The theory supposes that on the average 50 per cent. of the germ cells will bear the dominant character and 50 per cent. will bear the recessive character.

Now, if we could pick out at random any 100 pollen or male cells to fertilize any 100 egg or female cells we can see that there are equal chances for four results. A D male cell might meet a D female cell, a D male cell an R female cell, an R male cell a D female cell, and an R male cell an R female cell. We have (D+D), (D+R), (R+D) and (R+R) formed in equal quantities, but as the two middle terms are the same, we can reduce the formula to one (D+D) to two (D+R) to one (R+R), But wherever there is a D present in the germ cell, the dominant character shows while the recessive character is hidden. The one part or the 25 per cent. of the individuals showing the character (D+D) will appear to be just like the two parts or 50 per cent. of the individuals having the character (D+R). Therefore there will be 75 per cent. of the individuals which will show the dominant or D character, while 25 per cent. will show the recessive or R character. These 25 per cent. showing the R character will ever after breed true because they contain nothing but the recessive character; while of the 75 per cent. showing the dominant character, one-third or those having the pure (D+D) character will breed true in succeeding generations, while the other two-thirds having the (D+R) or hybrid character will again split in the next generation.

CLEMATIS INDIVISA.

The original idea of the operation of Mendel's law has been changed by Bateson. His idea is that the two characters of a pair are not mutually exclusive in the germ cell, but that there is presence or absence of the dominant character. That is, the recessive character is always present, but is obscured when there is presence of the dominant character. On this hypothesis a yellow pea is based on green—i. e., the yellow color is superimposed upon the green. The yellow pea produces germ cells bearing two factors, one for yellowness (Y), and one for greenness (G). When it is self-fertilized or fertilized with another yellow pea, individuals are produced whose germ cells have the formula YG, but the resulting progeny always have the yellow color through the presence of the yellow factor. In the same way the pure green pea produces germ cells carrying two factors—one for greenness (G), and one for absence of yellowness (Y).

Out of several hundred cases of bud variation that I have collected from field, greenhouse and authentic literature, the great majority of those in

which something is known of the Mendelian behavior of their mutating characters, yield to the explanation that there has been simply the loss of a dominant character and hence the appearance of a related recessive character. Of course, there are a great number of changes that have taken place as bud mutations, of which we have no data bearing upon their behavior after crossing. Indeed, the cases that I present in which I believe there is reasonable evidence that the change is from dominant to recessive, are simply cases analogous to those in which the behavior of the crossed characters are known.

Again, there are bud mutations which consist of the addition of petals or the change of other flower organs to petals (doubling), which are only changes in the internal correlation of growth, in the sense used by plant physiologists. Some abnormal change in the mechanics of growth may also explain weeping branches, monstrous flowers, fruits, etc., but of these occurrences we have yet no reasonable explanation. I also leave out of consideration, the production of variegated plants. This phenomenon will, I believe, be soon explained as due to some pathological cause, as bacterial or enzyme action. They seem to belong to the same general class, as the production of "mosaic" or "calico" tobacco plants; and this disease, we know, can be communicated by touch. We will consider only certain cases in which we have some reason to believe that the characters would behave according to Mendel's law when crossed.

Color sports are perhaps the most common that we have. In the tomato, for instance, I have discovered four authentic cases in which a red tomato plant has produced a branch that bore yellow fruit; but I have heard of no instance in which a pure yellow tomato has sported to a red. In this plant Hurst has shown conclusively that red is completely dominant to yellow.

In the potato, most reported cases of bud variation are merely horticultural gossip. I am inclined to think that bud variation must be very rare in this plant. Such authorities as A. W. Sutton and P. de Vilmorin, than whom none are more experienced or more competent, were able to cite only four cases and two cases respectively.

Mr. Sutton says, "I have no hesitation whatever in affirming that there is no potato in commerce today in England, and I might say in Europe, which owes its origin as a distinct potato to bud variation in any form whatever." The instances he refers to are, he says, changes in color, alone. He cites Forty-fold, Beauty of Hebron, and Blue Giant as having varied from colored skins to white. Rector of Woodstock, however, appears to have produced a purple variegated skin from a white. In this case, though, it is unknown whether the parent tuber possessed the power of forming the purple dye, as is indicated by some of our own white varieties that have purple tinted sprouts.

There has also appeared a similar variation in White Pearl, reported to me by Prof. F. R. Bennet. This potato, white in color, with pink sprouts, appears to have produced a purple blotched variety. Old potato growers, however, say that the parent of the White Pearl had a purple skin. Vilmorin reports White Giant out of Blue Giant and Early Puritan (white) out of Early Rose (pink). Munson states that Bliss Triumph (red) has varied to white.

In my own experience I have noticed but three color variations after carefully examining 800 varieties. They are white variations out of the colored varieties, Early Sunrise, Bole Zoegling and La Bretonne. Other variations, apparently authentic, that have been reported in this country, are white variations from Early Rose, Early Ohio, Blue Victor and Peach Blow.

The chrysanthemum is a plant which produces probably as many bud variations as any of our cultivated species. I have never heard of a pure yellow chrysanthemum sporting to a color. On the authority of M. Ghys, who has given it a great deal of study, the general tendency is to sport from purple to red to white to yellow. A pure yellow, the original color of the plant, never sports to color. To explain this, we have only to imagine the germ cells of the blue chrysanthemum to contain the factors for determining blue, red, white and yellow color, possibly dominant to each other in the order given. Then, as one or more of these factors is dropped, a different color appears.

I think we may safely say that in horticultural plants which tend to sport in color, carnations, azaleas, geraniums, roses,—the tendency is toward the loss of a color factor. Of course there are many cases in which a color is deepened, in a variety which already possesses the ability to form the dye; but I do not think we need to consider this feature at present. It is a different thing from definite bud mutation.

FRUITS.

The same general feature is true of fruits: purple plums produce yellow plums, blackberries produce white variations; dark grapes throw white sports. Time will not permit me to cite all of the known instances, but in general, there is the loss of a color character. Even in the cases that are apparent exceptions to the rule, the variety may lose its color and afterwards regain it. We cannot help but feel, however, that there are distinct limits to the variation, and that we are not witnessing chance changes in any direction.

We can imagine that in the cell division that lays down the basis of the sporting branch, something may be left behind. Here we may have the entire loss of a color. Again, there may be such a shuffling of the cell contents, that a color cannot develop but remains latent. Years afterward, another shuffling of characters may allow the color to reappear. Of course this is speculation; but as speculation it is easier to imagine the production of degressive and retrogressive mutations, than the production of new characters by progressive mutations. Such speculation seems to be in accord with the facts.

Another common type of variation is the production of cut-leaved varieties in different species. These new productions sometimes retain the ability to produce entire leaves and so jump back to the original form. But here, again, the changes are definite, and have been noted in very unlike groups of plants.

The changes taking place certainly

CARNATION HARVARD.

Back view of flower, showing fine calyx.

affect unit characters, but there are few data concerning their behavior on crossing. De Vries, however, reports that entire petals are dominant to laciniated petals in Chelidonium majus. Brainerd has shown that in viola neither of these two characters is apparently dominant. But it is easier to imagine the loss of something that makes the plant produce entire leaves, than vice versa. It must be remembered, though, that absence is sometimes dominant to presence, as is the case of absence of horns in cattle.

A third common group of bud variations is the loss of a prickly, hairy or felted condition. The most common example of this is the production of the nectarine from the peach.

The cases where the behavior of such characters after crossing has been shown to be Mendelian, are: Hairiness dominant to absence (lychnis); hoariness dominant to absence (matthiola); felted ears dominant to absence (wheat); prickliness dominant to absence (fruits of datura).

An apparent exception to the majority of the cases under consideration is the classical example of the moss rose. It would be very interesting to know just what takes place when these roses are crossed with smooth varieties. It may be that this is one of the rarer cases in which something entirely new to the species appears in the sporting plant.

These data are merely presented for consideration and discussion. I hope more cases can be added to our present knowledge, and that our increasing understanding of the unit characters of hybrids will definitely point out what is to be expected from bud variation. It seems to me that progressive but mutation is very rare, and that outside of the domain of flower colors, but few bud varieties will come into cultivation through real origin of useful characters.

Keeping Dahlia Roots.

The best way to keep dahlia roots through the winter is to cut the stems off close to the soil as soon as the frost kills them down, take them up carefully and shake most of the soil away and then turn them upside down to allow any water to escape. Choose a warm drying day if possible. A dry frost-proof cellar is the best place to keep them, on a board floor or stage one foot above the floor line of the cellar. On this stage place three inches of fine dry sand and sprinkle a little air slacked lime on this. Set the dahlia clumps side by side on this in a single layer. Sprinkle a little more lime over them, some in the hollow stalks, and then give a further covering of fine dry sand.

The effect of the lime is to eat up all decaying matter, but it must be used with judgment. Many dahlias are annually killed by crown rot, caused by the poison of the stalks dropping on them, and this the lime renders harmless. Pot roots are the most difficult for inexperienced growers to keep, the roots frequently decaying in February or March. Well cut them out in the fall when taken up and dress the wounds with lime. The riper the roots are the better they will keep. If the stalks are very large, or the skin or bark wet from frost when lifting, scrape this off to prevent it spreading to the crown as described above. W. H. T.

CARNATION HARVARD.
Actual Size of Flower.

Early Outdoor Sweet Peas.

Comparatively few florists realize what a success can be made out of early sweet peas, by starting the seed, timely, in the greenhouse or hotbed, and transplanting to the field as soon as the ground can be worked. By this method plenty of the very finest flowers can be had at a time when they are most valuable; not only that, the flowers produced are so much finer, owing to the earlier, cooler weather and plenty of moisture, that greater popularity is obtained for sweet peas, in any locality. Further, the most valuable latest improved kinds can be used. Each seed can be made to produce a plant, and each plant will need one foot of space in the row for best results. Thus seed that would be too expensive for ordinary risky field sowing, can be used to good advantage.

The best method we have found is to plant three seeds into each 3-inch pot and grow in a carnation temperature. As soon as plants are nearing a root-bound condition, transfer to a cold frame to harden off. When ground dries off enough to work, plant out. They will stand hard freezing without damage, if hardened off. Let the rows be four feet apart, and the plants six inches apart in the rows, or 12 inches for scarce kinds. The best and cheapest support is a stake system; use 6-foot stakes, say 1¼x1¼ inches, drive 8-inch nails, every six inches, on both sides, and one stake every 10 feet. As the plants grow, use common white cord, on both sides of row, by winding around each nail.

W.

Carnation Harvard.

We referred to this fine novelty in our issue of February 1, on page 9, and also referred to the fine variety Georgia which was illustrated in the same issue. Since then we received the photographs from which the accompanying illustrations of Harvard were prepared and these show its excellent character. It was raised by James D. Cockcroft, Northport, N. Y., and is an excellent commercial variety, as proved by letters received by the raisers from some of the leading florists of New York and other cities.

Growers cannot have too many good scarlet carnations and a variety that produces well in the dark days when prices are high, is of excellent color, good calyx and borne on fine stems is certain of a welcome. As the variety was so recently described we refer readers to the description noted which is reliable.

Bloomsburg, Pa.—J. L. Dillon says: "The trade in this section has been extremely good considering the stringency in the money market all over the country. We have found the demand much larger than the supply."

PASS CHRISTIAN, MISS.—J. B. Adams has had excellent business so far this season. Last year he put up two new houses, 20x65 feet, and finding these insufficient to supply his needs, will build another the same size this season.

WILLIAMSPORT, PA.—Daniel E. Gorman, the florist, is rushing work on his proposed moving picture theater, on Third street. Several weeks ago the razing of a portion of the former office building that was purchased by Mr. Gorman was commenced. Since then the interior work on this part of the building has been rapidly advanced, and foundation walls in the rear are completed, so that with mild weather the remaining outdoor work can be pushed along in time, he thinks, to open the theater on April 1.

CHRYSANTHEMUMS

Plants and Flowers for Exhibition.

This year will be an important one for chrysanthemum exhibitions. At the great National Flower Show at Chicago next November, the chrysanthemum will be one of the most important features. Intending exhibitors of large specimen bush plants and standards will have their plants well under way by this time, an early start being a big advantage in growing these plants where size of plant is a very telling point. But size should not be the only object to be attained, because form will carry over size and so will the character and the purity of color of the individual flowers. A medium sized plant with perfect blooms of good size and color will beat out a larger plant with blooms of very little character or tone to them. There is a fascination in a plant carrying perfect, richly colored blooms of good size and character that judges cannot get away from. These little items are very important to consider when making the start with these specimens owing to the fact that there are a number of varieties that will make plants of grand size but lacking in quality of bloom either through their being of poor shape or not pure enough in color. This is why a few of the old favorities hang on so long, though not grown to any great extent for any other purpose. As a notable example, we may mention W. H. Lincoln, which, when well done, will give any yellow variety a hard tussle.

In the class for specimen bush plants white, May Foster, Mutual Friend, Mrs. H. W. Buckbee, Miss Clay Frick (White Duckham) and Miss Alice Byron are all good; they are easy to grow, have pure white flowers and are readily trained into specimens of good form. For pink, Wm. Duckham and A. J. Balfour are in a class by themselves. For exhibiting the first week in November they have the other pinks of this season beaten on several points. Dr. Enguehard makes a fine plant, but the vivid coloring is not there. For yellow, Golden Age, W. H. Lincoln, Cheltoni, Mme. Van Andre and Mrs. Wm. Duckham will all make good under careful treatment. The reds and other colors are now usually classed together, a mistake to our way of thinking. We fancy the red or crimson chrysanthemums grown into bush form about as well as any color and consider that this is the place where they show up to great advantage. But, as it is an "any other color" class, there is one variety that has responded well to our treatment and that is the old variety Brutus. It is slow in growth at the start and will not spread out over as many feet as some, but it tells on every point.

The standards and half standards are more difficult subjects to handle than the bush specimens and we seldom see an exhibitor show the same varieties in these classes two years in succession. They will not always respond the same to this method of culture, the white varieties being the most obstinate, but now that we have white Duckham, should it prove to do as well as the pink variety, we shall see some better white standards. We would select for white both standards and half standards, White Duckham, Mrs. Henry Robinson, Guy Hamilton and Mrs. H. W. Buckbee. Pink, Wm. Duckham and Dr. Enguehard. Yellow, Golden Age and Col. D. Appleton. Red, or any other color, Thos. Humphreys, S. T. Wright, Mrs. Geo. Heaume and T. Carrington. We advise also trying some of the newer varieties for this style of plants; it may be that some of them will supplant several of those mentioned. They have the color and many of them appear to possess the necessary growth qualities for this work. Mrs. Wm. Wells, Ongowa and Dakoma are beautiful colors in bronze, hard to describe, but, if they can be made to respond as specimens, they will command notice. Mrs. Walter Jinks is another of intense coloring that impressed us for this purpose. The varieties possessing clear intense and pure colorings are the only ones that are likely to prove valuable grown in this way. We have tried many of our finest and popular cut bloom varieties as specimen plants only to meet with failure. We never could do anything with either white or yellow Eaton or the Chadwicks. We got a fairly good specimen of Beatrice May, as far as the plant was concerned, but the color of the blooms was miserable and best described as dirty white streaked with pink. The loose petaled Japanese style of flowers like F. S. Vallis are useless as specimen plants; the petals take on a ragged appearance and look to be old before they are half finished.

Gates Ajar, by Ben. F. Kramer, Evansville, Ind.

Roses, chrysanthemums and carnations were the principal flowers used.

The classes calling for anemones, pompons and single varieties usually restrict the plants to a smaller size of pot than the large flowering varieties. It is therefore not necessary that these should be started as early and they are much better for it, because the foliage and habit of the plant can be kept in good condition, whereas, if they are given an extra start and then kept confined to a small size pot the plant loses its shape as a specimen and the foliage suffers considerably. All of the pompon and single varieties make pretty specimens as pot plants so that, in making a selection, the main thing to bear in mind is the blending of the colors. The pink and white are quite prominent among these types and are very pretty, but where a fine collection is desired the other colors must be well taken care of to get a good effect.

C. W. JOHNSON.

THE RETAIL TRADE

"WEDDINGS of the day in Pittsburg are arranged and carried out by the florists the same as funerals are handled by the undertakers," the Rev. Dr. McIlvaine is credited with saying.

Fine Floral Designs.

The accompanying illustrations show two fine pieces of artistic floral work by J. L. Dillon, Bloomsburg, Pa. The wreath is of callas, roses, carnations and narcissi with a bow of chiffon ribbon. The Elks design is made of white carnations edged with pink roses and white narcissus, with purple letters and figures.

An Effective Casket Piece.

A strikingly handsome casket piece was recently turned out at the establishment of U. J. Virgin, New Orleans, La. The broad ends of two large, tapering bunches of callas, lily of the valley and Asparagus Sprengeri were joined together, and clusters of white roses fastened on either side in the middle, with a bouquet of lavender tulle in the center. A bow of broad lavender ribbon was fastened in the center, with a streamer running to one end, where it was secured with a knot of the same ribbon. A similar knot was tied at the opposite end. The piece was the work of Miss Kate Rehm, the highly accomplished leading artist at this place, assisted by her sister, Mrs. Virgin.

Notes for the Retailers.

PRIMULAS.

Of the smaller plants, none have seemed to be more popular this season than the primrose. It is reassuring to the admirers of this old favorite, that it holds its place against newer and more showy plants. But there is a reason. I can think of no plant out of which a home-maker can get more satisfaction for a moderate outlay than this.

RHODODENDRONS.

Early in February, I noticed very fine rhododendrons in the New York retail stores. While there is always some demand for every variety of plants, in a great city, it may well be doubted if it is good policy for the growers to force extensively of such large plants in midwinter; particularly in a season when cut flowers are as plentiful as now.

To be Done Now.

IN THE GREENHOUSES.

Shift the young rose plants before they have time to get hard in the pots.

Keep the stock chrysanthemums cool in a house where there is abundance of air.

This is about the last call for sowing sweet peas with any chance of their being in for Easter.

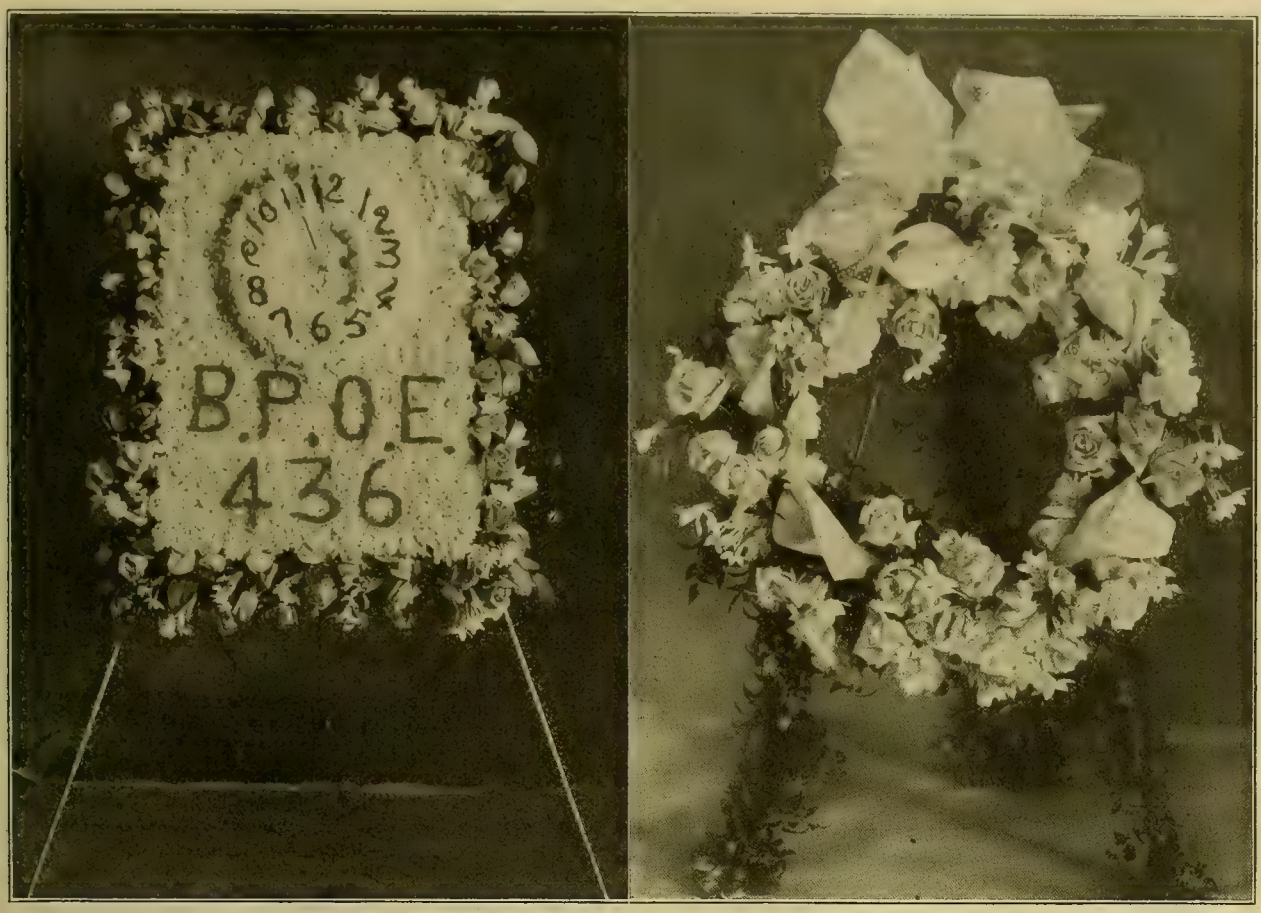
Benches cleared of stock chrysanthemums or mignonette may be conveniently planted with asparagus or smilax.

Choose a fine mild day for bringing in the bulb stock when possible.

Bougainvillea glabra and the variety Sanderiana come of better color in quite a cool house than in heat.

Sow plenty of Gypsophila paniculata for mixing with cut flowers in summer.

The double nasturtiums are useful for window boxes and a good stock should be struck from cuttings.



FINE FLORAL WORK BY J. L. DILLON, BLOOMSBURG, PA.
Elk's Design on Left. Wreath of Callas, Roses, Carnations and Narcissi on Right.

Look carefully after the young rose stock the first few days after it is removed from the grafting cases and see the plants do not wilt.

IN THE STORE.

Violets tied with a flat bow and a few lily of the valley make a charming corsage bunch.

Mixed pansies give a finer effect than mixed varieties of almost any other flower.

The yellow antirrhinums offering now are very choice, and more graceful for decoration than any other yellow stock in season.

Cool conditions are good for keeping flowers, but avoid drafty positions.

Freesias are too heavily scented to be much used for table decoration, though a few are acceptable.

OUTDOORS.

Good solid manure and salt, or nitrate of soda, should be laid on the late asparagus.

Choose a well prepared and only moderately rich soil for seed sowing. Very rich soil in the early stages is bad for all seedlings.

Allow about eight weeks after covering rhubarb with pots and manure before good stems are pulled.

Ashes from a rubbish fire or smother is excellent material to sow in the drills with the early seeds.

Shade anything tender that may be touched with frost in the morning and let it thaw out gradually.

Unless for forcing, never lift rhubarb roots until a little sign of life appears at the crowns.

A little nitrate of soda to each plant is the best stimulant to early cabbage.

Harden off all frame plants by giving them full exposure to the air every mild day. Plants so treated may, if necessary, be covered for a week or more of severe weather without injury.

OBITUARY.

Robert Petrie.

Robt. Petrie, of the Alameda Floral Co., Alameda, Cal., died February 7, after two weeks' illness. In August last, Mr. Petrie bought the business of H. Gresens. He was 29 years of age and had only been nine months in California. He was a member of the Horticultural Society of Oakland, the members of which paid their last tribute at his funeral.

Alexander Forsyth.

After a short illness Alexander Forsyth, a pioneer horticulturist of Denver, Col., died at his home, 1892 Humboldt street, February 19. Mr. Forsyth had lived in Denver since the early 70's and was one time superintendent of Riverside cemetery. Mrs. Forsyth and one daughter, Miss Jennie Forsyth, survive. Mr. Forsythe was 58 years old and had served 15 years for the Riverside Cemetery Association.

John A. Freeman.

John A. Freeman, Aurora, Ill., died at his home, corner of Illinois avenue and North Lake street, February 18, after a severe illness extending over a period of two months. Previous to the beginning of that period he had been in ill health but was able to be about. He suffered from tubercular trouble in his stomach and bowels and an operation was performed several weeks ago at the Aurora City hospital in hopes of bringing relief. For a time he appeared to be better.

Deceased was born in the province of Halland, Sweden, November 4, 1855, and came to America in 1872. Following a residence of several years in Batavia, where he was engaged in the greenhouse business he removed to Aurora in 1880 and had resided there since. For the past 15 years he successfully conducted a large greenhouse business at the corner of North Lake street and Illinois avenue.

Michael Coneeny.

Michael Coneeny died at the home of his son, John J. Coneeny, 15 Ellsworth street, Somerville, Mass., February 8, from pneumonia. Mr. Coneeny was born in Ireland 62 years ago. He was one of the first to engage in the florist business in Winter hill. Of late years he devoted his time to the caring of private estates.

OMAHA, NEB.—Mrs. Anna Hess, mother of Jacob J. Hess, of Hess & Swoboda, died at Burlington, Wis., February 21, and was buried two days later on the anniversary of her marriage. She was born October 10, 1825, in Zurich, Switzerland. She is survived by three sons and one daughter. Her husband, John George Hess, died July 18, 1866.

BIRMINGHAM, ALA.—The fifth annual meeting of the State Horticultural Society was held in the rooms of the Commercial club February 13-14. Many valuable papers were read and the members of the organization received a cordial welcome at the hands of the citizens. W. F. Heikes, Huntsville, was elected president and R. S. Mackintosh, Auburn, secretary.

SEDALIA, MO.—S. Pfeffer spoke on "Horticulture" to the members of the Anti-Trespass Association of Pettis county recently. Apple culture was a prominent point in his speech.

THE report of the secretary of agriculture on "The Southern Appalachian and White Mountain Watersheds," giving commercial importance, area, condition, advisability of their purchase for national forests and probable cost with map, may be had of the Department of Agriculture on application.

THE AMERICAN FLORIST

TWENTY-THIRD YEAR.

Subscription, United States and Mexico, $1.00 a year; Canada, $2.00; Europe and Countries in Postal Union, $2.50. Subscriptions accepted only from those in the trade.
Advertisements, on all except cover pages, 10 Cents a Line Agate, $1.00 per inch. Cash with Order.

No Special Position Guaranteed.

Discounts are allowed **only on consecutive insertions**, as follows—6 times, 5 per cent; 13 times, 10 per cent; 26 times, 20 per cent; 52 times, 30 per cent.
Space on front pages and back cover page sold only on yearly contract at $1.00 per inch, net.
The AMERICAN FLORIST Advertising Department is for florists, seedsmen and nurserymen and dealers in wares pertaining to those lines only.
Orders for less than one-half inch space not accepted.
Advertisements must reach us by Monday to secure insertion in the issue of the same week.
When sending us change of address always send the old address at the same time.
We do not assume any responsibility for the opinions of correspondents.

Photographs.

We are always pleased to receive good pictures of trade subjects. Send them prepaid by mail or express carefully packed to prevent injury in transit. Pack them flat, not rolled, with name and address of sender on the back of each picture.

J. D. CARMODY is due in San Francisco, via Panama, about February 27.

READ H. G.'s article on "Hardy Plants and their Environments," on page 198 of last issue.

MORE GREEN is the cry of retailers everywhere, Asparagus plumosus, A. Sprengeri, Adiantum cuneatum and the like.

A GUM SHOE campaign is reported on foot in several quarters for office of secretary of the Society of American Florists.

HARRY PAPWORTH, New Orleans, La., says Phoenix Roebeleni, is one of the few new things that do well in stores and dwellings.

"WOOD PRESERVATION" by the Forest Service, United States Department of Agriculture, Circular 139, is worth reading by every florist.

AN important address on the "Forcing of Vegetables Under Glass" is reproduced in part in the Market Gardens department of this issue, page 243.

THE way to use a telephone directory to advantage in towns where the population is 100,000 or less, is told under the head of Mobile in this issue, page 239.

IF the low price of carnations will serve to familiarize the flower-buying public with the grand varieties that are now coming to market, it will serve at least one good purpose.

THE sale of high priced nicotine preparations shows that growers are beginning to realize that while tobacco stems can be had for almost nothing, other preparations do the work and do not injure the foliage or discolor the blooms. A gain is also made on account of uniformity.

NEXT year is the one hundredth anniversary of the birth of Chas. Darwin, and opinions are expressed in Cambridge, England, that a celebration of the event should be held there. The world famed scientist was born February, 1809, and his noted book, the "Origin of Species," was published 50 years after (1859).

National Flower Show.

Chairman W. F. Kasting has instructed me to call a meeting of the National Flower Show committee to be held in Chicago March 26, at 2:30 p. m. The place of the meeting will be announced later. This date is during the convention and exhibition of the National Rose Society in Chicago. Very important business will come before the committee and each of the chairmen of minor committees is expected to report. The presence of every member is earnestly requested.

J. H. BURDETT.
Sec'y Pro Tem.

Live Florists' Clubs.

ED. AMERICAN FLORIST:—

Florist club meetings are sometimes pretty dry affairs; the rank and file of membership gradually lose interest and the attendance diminishes to a corporal's guard. But now and again some active committee get together, formulate new plans and with a little extra work manage to produce a spirit of interest that takes hold anew. Recently a committee was appointed in our local florist club to arrange a list of debatable and interesting subjects pertaining to the craft, and were given authority to select the essayists to handle the different subjects. Usually a man begs to be excused when selected to read a trade essay, but this committee thoroughly inspected the field and the work to be done, using care to approach the right man when assigning a subject. The result has so far worked to perfection, and we have had the pleasant experience of attending a club meeting ringing with enthusiasm, as each member waited patiently for an opportunity to express individual views in a concise manner and to an interested audience.

MATTHEW MACNAIR.
Providence, R. I.

Chrysanthemum Society of America.

The Chrysanthemum Society of America, realizing the necessity of closer relations with the various horticultural societies throughout the country, and agreeable to a vote taken at the annual meeting in New York November 6, 1907, the executive committee cheerfully invites the hearty co-operation of every horticultural society in the United States, and offers the following for their careful consideration:

Any horticultural society, or gardeners' or florists' club may become affiliated with the Chrysanthemum Society of America on payment of an annual fee of $25, such fee entitling it to the following privileges:

(1.) The C. S. A. will offer a substantial silver trophy as a prize for chrysanthemums; the character of the class, and conditions of the competition to be left to the discretion of the society so affiliated.
(2.) To receive 12 copies of the C. S. A. publication, free of charge.
(3.) To have two free passes to the annual exhibition of the C. S. A.
(4.) To elect one of its members as a delegate to the annual meeting of the parent society, with voice and vote on any subject, except matters of finance, such delegate to be annually elected by the society affiliated.

CONDITIONS OF AFFILIATION.

Subject to the foregoing, the affiliated society shall pay the above mentioned fee on or before April 1 of each year to the secretary of the C. S. A. and furnish the following information:

(a) The full title of the society, the name and address of the secretary, and the name of the delegate elected.
(b) The date on which the next fall show will be held, and the conditions under which the C. S. A. trophy will be given.
(c) A copy of the prize schedule of the affiliated society to be sent to the secretary of the national society as soon as possible after publication.

DAVID FRASER, Secy.

STOCK PLENTIFUL AND GOOD.

At the present writing, there is plenty of all kinds of stock for all demands. The stock is however, also very fine, some especially fine Bride and Bridesmaid roses being noted; Richmond is also good. Carnations are arriving in heavy quantities, but there is a fair demand for them. There was a very heavy call for violets for both St. Valentine's Day and Washington's birthday.

J. M. Fox & Son and August Kellner had the decorations for the Deutcher club ball. Large quantities of wild smilax were used and also several thousand Princeps narcissus.

The committee having the Florists' Club dance, February 26, in charge says that the largest gathering of florists that ever took place in this city is expected.

Arthur Leideger, of Edlefsen, Leideger Co., and Miss Elsie Dernehl will be married February 26 at the home of the bride.

James Chacona is handling large quantities of carnations and roses just now and reports business as being good.

Holton & Hunkel Co. are receiving some very fine Bride and Bridesmaid roses and choice carnations. H.

THE RECENT FESTIVE DAYS.

St. Valentine's Day business has become quite a feature here and florists' delivery wagons now find their way into all sorts of localities never visited for regular trade. The packages are nearly always small but choice in quality. The florist who fills all these orders as carefully as though they were for his best customers is sure to make new patrons. Washington's birthday is not such a feature for florists as it is for politicians. Aug. Kellner's decorations for the Bachelors' ball was the only noteworthy event on this occasion. For St. Patrick's Day there will be 3-inch pots of shamrock on the market this season. It is encouraging to find the supply of well grown stock on the increase.

Holton & Hunkel are handling Loeffler's excellent sweet peas with stems a foot long. This firm is also supplying the local retailers daily with fancy lily of the valley. Work is begun on its Brown Deer plant, the principal feature of which will be an immense asparagus house. Frank Barnes will in all probability take charge of this structure. The old plant will be devoted to pot stock under the management of Geo. Holton, who has made such a success of that feature.

Chas. Zepnick is sending in a few pansies daily. They are particularly praiseworthy and seven to nine long stemmed flowers, separated with green, make a large bunch. Color and form are the result of constant care in selection by Mrs. Zepnick. These flowers wholesale at five cents each and J. M. Fox & Son take them all.

A. Klokner, Wauwatosa, is sending in some light colored snapdragons and stocks of good quality.

The C. C. Pollworth Co. is supplying very fine Primula obconica plants.

W.

Lake Geneva, Wis.

The Lake Geneva Gardeners' and Foremen's Association held its annual meeting at the new quarters in the Metropolitan block, February 22. The most important business transacted was the election of officers for the coming year. The following were elected as directors: A. J. Smith, Axel Johnson, H. M. Dickinson, Wm. P. Longland, Frank Kuehne, John Tiplady, John Agern, R. J. Sampson, H. W. Illenberger.

Immediately after the election the board of directors met and elected the following officers: Axel Johnson, president; R. J. Sampson, vice-president; H. M. Dickinson, secretary; John Agern, treasurer.

Owing to the increasing size and importance of the association, the members decided that it would be better to have a regular lodge room to meet in; accordingly the committee secured the Woodman hall in the Metropolitan block. The preparations for the trial orchard are being pushed and there is some prospect of having the planting done this spring.

Fancy and Dagger FERNS $1.50 per 1000

Discount on large orders.

TRADE VARIABLE.

We are now bridging the gap between seasons, and every house reports its dull days, with here and there a good spurt. Stock of all kinds is abundant; carnations do not exceed the demand, especially in red and white. Roses are much more plentiful and are coming down somewhat in price. Bulbous stock is swamping the market; violets are first class, and the price keeps up. Azaleas, primroses and Dutch hyacinths are shown in every window, and are moving rapidly.

NOTES.

The Twin City Florists' and Gardeners' Club met at the Park Board greenhouses February 18. Aug. S. Swanson read a very interesting paper on "How the Club Can be of Benefit to its Members." The subject under discussion during the evening was "Bulbs," including the cost of growing, value of setting a uniform price, etc. Nearly all the members were present, and an interesting evening was spent.

Carlson & Sandberg are cutting some fine Richmond and Bride roses, and are making a harvest of single violets. This firm intends putting up a new violet house the coming summer 22x125 feet.

O. C. Swanson had a unique decoration at the Plaza hotel February 21, using pine trees throughout the dining room, a veritable isle of pines for a center piece banked with violets and daffodils.

Theo. Wirth will attend the S. A. F. committee meeting in March, and on the same trip will take in the rose show in Chicago. John Monson is also planning on going to the rose show.

The Minneapolis Floral Co. reports very good business. Geo. E. Valker, for the past two years packer for this firm, is going into business for himself in Minot, N. D., March 1.

Louis Bogley, head gardener to the park board, has returned from a two months' trip throughout the southern countries of Europe.

W. D. Desmond, of the L. S. Donaldson Co., is off on a two weeks' vacation in Milwaukee and Chicago.

Rice Bros. report business first class the past month, and out-of-town trade good.

T. H. Hall intends building a house for violets.

Visitors: H. Wilden, of Warnaar & Co.; Sassenheim, Holland; W. E. Pera, representing Segers Bros., Lisse, Holland; A. T. Shotwell, Fargo, N. D.; S. N. Mehlin, Fergus Falls.

WIETOR BROS.,

Wholesale Growers of ..... **CUT FLOWERS** **51 Wabash Ave., CHICAGO**

My Trip Abroad.

A paper read by H. Kleinstarink before the Kentucky Society of Florists at Louisville.

To describe orchid hunting in Central and South America, which I promised you in our last meeting, is, I find, not so easy after the lapse of 20 years, and many happenings are blurred by relentless time. As you all probably know, orchids are among the most interesting plants and nearly every part of the world has some representatives. In our own country we find some very beautiful terrestrial orchids, like cypripediums or lady slipper, but the most beautiful are the epiphytes or those that grow on trees, which are all natives of the tropics.

Here it is we look for that endless variety of forms and colors which no other family of plants can equal. For anybody who loves nature the collecting of these plants, which produce such lovely flowers, is one of the most attractive enterprises to undertake, and the young man who gets ready to spend a few years of his life in this business, usually does not take into consideration all the worry, hardships, dangers and risks he will have to encounter. The first thing an orchid collector has to do when arriving in a city like Mexico is to provide himself with a mule or burro, several Indians, plenty of ammunition and food, and set out as far from civilization as possible. You very soon get used to sleeping in a hammock slung between the trees, and never eat with better appetite than after a whole day's riding, marching, climbing and jumping. After coming to a place where orchids are found in abundance the best way is to make some kind of camp, and commence operations. Some trees are found, loaded with hundreds of orchids, often as many as 20 varieties on one trunk, and it is no picnic to get these down. Sometimes it is necessary to cut the tree down to reach them and, as you all know, we find some very large trees in these forests. Some of these occupy all of an acre, so large are the dimensions, formed from roots, which, coming down from the branches, form other trees.

After a collection is got together the plants have to be prepared for shipment, either sent to the nearest towns on burros or Indians' backs in boxes or mats, or by river on boats or rafts. On one of my trips from the gulf to the Pacific on the isthmus of Tehauntepec I camped for one night on the bare crown of the old Tuntla crater, several thousand feet above sea level, and it was my good fortune to see one of the most strange sights. Over the top of the mountain the sky was clear, but below a fearful thunderstorm raged, and it was a grand spectacle to see the clouds below us, every now and then torn asunder by vivid flashes of lightning. Very often our way went through impenetrable forests, and palms, ferns, bromeliads and other plants had to be cut to make a road. Upon other occasions dangerous passes had to be crossed, sometimes only one foot wide, while far below the giant trees looked like little azaleas, and it would not do to get dizzy.

Penetrating deeper in the forests we meet very few people, sometimes for days or weeks not a soul, and then but Indians, who are astonished to see a white skinned man; and soon you will be surrounded by men, women and children, all asking questions and staring with wonder. We do the same, till we get used to the scantily dressed natives, who do not use umbrellas when it rains, but to save their few clothes from getting wet, strip to the skin, wrap their raiment in a banana leaf and go on their way as if they were Adam and Eve. For the most part these Indians are harmless and very hospitable. They will work hard for five cents per day and can carry loads weighing hundeds of pounds for days at a time without getting tired. Animal life in these forests is sometimes very plentiful, while for days in others you will not see anything. Monkeys, jaguars, small deer, pumas and plenty of snakes are often very annoying, especially the monkeys, which will steal the food from under your hammock, while tigers, lions and jackals make a fearful racket all through the night. The scenery in the Cordilleras or Rocky mountains is grand in the extreme. The changes from the tropical heat to the frigid zone can all be had in one day by climbing several high mountain peaks. At the bottom we have palm forests, selaginellas, ferns, marantas, etc.; a little higher we will find the trees of the temperate zone, while still higher the dwarf oak and pine that can resist the cold. We find some orchids even where ice is found on the water in the morning, while others require always a warm climate. Cattleya citrina I found in the hottest place in Mexico, while Lycaste Skinneri was found 3,000 to 4,000 feet high in Guatemala. Often we had to pass through swamps which were beset by mosquitoes, so annoying that it was impossible to travel without a mosquito mask over the face; otherwise eyes, nose and mouth would be filled by these pests, and they would actually get to your skin through flannel cloth. In this neighborhood we were caught up by a little rebellion, which are, in these countries, of daily occurrence, and taken prisoners, but a few days later had the satisfaction of seeing our captors put all in a row and get shot by the winning side.

On one of my explorations my career was nearly cut short in an unexpected manner. Being accompanied by two Indians who were left behind in my haste to find some crytopodiums I spied one very large one below on a rocky ledge, and trying to go down to it, my hold slipped and I was whirling down when, luckily, a mesquite or acacia bush being in the way, I held on to this with all my might. Here I was hanging where I could see several hundred feet below me the scraggy rocks dipping in a shallow stream. There I clung for more than two hours till the natives, who spied me, got mesquite ropes and got me out of that ticklish position. It took several days before my hands and arms were pliable enough to use them. But who would care for this if a few days later he stands with open mouth and a beating heart to admire several thousand Cattleya Bowringeana in full bloom or he strikes the place where Odontaglossum grande displays all its glory, just ready to be taken up and prepared to send to colder climes; and then the eternal hope and expectation of finding a white Lycaste Skinneri or a new form of selenipedium, or an entire new species of orchid, palm or somthing else? Who would not eat tortilla and frigoles, black beans, unleavened corncake for weeks at a time, only now and then seasoned with lizard, monkey or snake, just for the glory of it all—just to stand on a hilltop and survey a scene such as Switzerland never could show, or listening with bated breath, under the forest giants, to the dreaming stillness of so much life, in such diversified form, where you feel like an atom in the atmosphere or a drop of water in an ocean, or go down in the Baranca (canyons, we call them) 2,000 or more feet deep, the perpendicular walls of which are clothed with a thick carpet of moss, and hundreds of varieties of ferns to stand at the bottom of these, look up and see, through the opening on the top, the stars shining in the middle of the day? It is impossible for me to describe this fully; it has to be seen to be understood.

MALDEN, MASS.—John Walsh & Son had the decorations at the home of the bride recently at the wedding of Chester Francis Gibbons and Miss Adele Marion Cox. The bride carried lily of the valley and Bride roses and her dress was trimmed with lily of the valley. Palms, laurel and carnations were freely used in the home.

German Horticulture.

FROM THE GERMAN TRADE PAPERS.

CLIMBING FERNS BY THE ACRE.—Specialization does not appeal to the old school gardeners, but for all that its benefits are now fully recognized everywhere. Energetic foregoing of modern business enterprise, vested in the younger generation, has wrought astounding changes in production and marketing of staples in the plant and flower line. It induced some of the more farsighted growers to plunge head-long into ventures which, but a few decades ago, would have seemed miracles of daring. One of these dauntless divers into unknown waters is F. Proeller, of Wittenberge, Prussia. Some years ago he selected Lygodium scandens, the well known but sparingly cultivated climbing fern, as his exclusive specialty, devoting an area of glass covering several acres to its culture. All the houses are especially designed for the growing of this fern into strings of about seven feet in length. At the time he started, Lygodium scandens had no place among the kinds of decorative greens then grown for the market. A demand for this new commodity had first to be called forth by persistent endeavor on the part of the producer. This, however, does not seem to have proved a difficult task, since but a few years later the establishment was greatly enlarged, so that now the annual output amounts to over 200,000 feet of fern strings. Lygodium scandens, in its propagation, requires about two years to become of bearing size, but after that it is a producer of marketable strings for an indefinite number of years. It thrives under very much the same cultural treatment, after being once firmly established, as smilax, but brings a much higher price. For loosely arranged festooning at room, hall and church decorations it is most effective and unequaled by any other green on such occasions for its grace, depth of color and lasting quality.

CROTONS COMING TO THE FRONT.—In an article on crotons and the many ways in which they might be used to advantage in Germany, as well as in most other countries of horticultural renown, American plantsmen and decorative florists are given due credit for having set the pace of freely employing crotons in all kinds of outdoor plantings during the summer, and as holiday stock in all forms of made-up decorative pieces throughout the months of fall and winter. Attention is drawn to the fact that now for several years crotons, used in combination with other plants or grouped by themselves in pans as well as singly in moderately sized pots, have sold rapidly at good prices at the plant markets of London and Paris. Of the many sorts now grown the best varieties for the commercial gardener are claimed to be Earl of Derby, Sunshine, Baron de Rothschild, Andreanus, Queen Victoria, Lady Zetland and Golden Ring.

LILIUM PHILIPPINENSE.—From Naples, Italy, it is reported that Lilium Philippinense, under careful culture, gave entire satisfaction. Although the bulbs, when received, were in bad condition, very small, shriveled and nearly dried up in the long transit, they all soon recovered after being potted into a mixture of roughly broken up turfy loam and coarse, sandy woodland mold, freshly gathered and carefully prepared. The pots then had been deeply sunk into loose soil, were covered to the depth of about 4 inches, where they remained until April, when every one of the bulbs began to make a sturdy growth. They flowered in July, were unusually fine plants and showed no trace of disease. The writer expresses in highest terms of praise his faith in this new species for the near future, convinced of its being one of the finest lilies for all purposes.

A MERITORIOUS INVENTION.—Rosenentstachelapparat is the name of a newly patented contrivance, helpful as a labor-saving device to rose grafters in particular, since it will do the work of 10 men in removing rose thorns or the spines on manetti and brier stocks.

WE ARE ON WITH A BIG CROP OF

EXTRA FANCY RICHMONDS

All other **Roses** in big supply. **Carnations,** too, are in full crop with us.

Largest Grower in the World. 1,580,000 Feet of Glass.

Nashville.

GOOD STOCK SCARCE.

Trade conditions have been quite favorable to the grower and much northern stock has been used here recently. The retailers are not always satisfied with the quality of the goods shipped in and there is a tendency among them to encourage the production of staple cut flowers at home. This is especially true of tea roses and carnations, for which there is always extensive demand. Some retail merchants claim that carnation stock recently shipped in has been so small as not to be worth the expressage, not to speak of the purchase price. Many of the roses received here have also been of inferior quality.

M. Stauch, of the Joy Floral Co., has the firm's greenhouse plant well in line for many improvements, some of which will be made this year, including an addition of three houses 32x400 feet. Rose grafting is still going on here, this work having been delayed by difficulty in securing manetti stocks early enough in the season. Mr. Stauch is well satisfied, however, with the appearance of the stock already grafted.

McIntyre Bros. are still cutting fine poinsettias and they are well pleased with the double form. The members of this firm are casting around for a new location. The present place is too valuable for greenhouse work and the supply of greenhouse soil in the immediate vicinity has become exhausted.

Geny Bros. carry a nice line of stock in their city store and find business booming. They will build two carnation houses this season, 24x100 feet.

Visitor: E. J. Fancourt, Philadelphia, Pa.

Birmingham, Ala.

BUSINESS GOOD.

The unsettled money market has not hurt business here to any great extent and the retailers still find plenty to do. The local growers are turning out some nice stock but not nearly enough for the demand, and in consequence, Chicago is called upon regularly for supplies. In plants Lindsay is showing some exceptionally fine Adiantum Farleyense and Primula obconica in variety, supplied by J. A. Peterson of Cincinnati, O. The dealers of this section are looking forward to good times, especially if the cotton growers secure the advanced price for which they have been holding their material.

Hugh Seales, president of the local Horticultural Society, had a serious accident in the bursting of his boiler last week, and had to keep his houses warm with stoves for three nights, while the damage was being repaired. Mr. Seales has some unusually fine carnations in leading varieties and to meet the increasing demand he will build a new range this season. He expects to attend the Chicago exhibition of the American Rose Society, March 25-27, inclusive.

The Amzi Godden Seed Co., devotes one of its windows to a flourishing cut-flower department, for which it is receiving some excellent stock from A. J. Koenig.

Wm. M. Lindsay is a candidate for the board of revenue, subject to the action of the democratic primary, his platform being good roads.

John L. Parker is making a good display of seasonable stock at his various stores.

G. E. Luffman is doing a nice business at Eleventh avenue and Twentieth street.

Theo. Smith is now conducting the business at 2106 First avenue.

Little Rock, Ark.

The State Floral Society, at its first meeting of the year at the Hotel Marion, February 19, started well. Those present were Directors J. J. Mandelbaum, J. F. Letton, Wm. Pollock, Paul M. Palez, Rees P. Horrocks, Geo. A. Stratman and Geo. R. Brown. The room was redolent with the perfume of Mrs. Potter Palmer and Richmond roses, and the business transacted demonstrated the usefulness of the organization.

There being four vacancies on the board of directors, the places were filled by the election of W. S. Mitchell, Ad Hamberg, W. F. Ferguson and W. B. Miller, bringing the number of directors up to 15. Bishop Morris, one of the most efficient of the directors, 'phoned his regrets at his inability to be present.

It has been the design of the society ever since it was organized to restore the city to its old place as the City of Roses, and to that end the organization has entered vigorously into a campaign for the beautifying of lawns and creating flower gardens. It was decided that on June 1 next valuable prizes will be awarded to the most attractive, the prizes being divided into two classes, covering both lawns and flower gardens, and in making the awards the committee to be governed by surroundings and the condition of the street to the center of it.

It was decided to make the proposition a competitive one, and on motion a committee of awards was appointed. This committee consists of Bishop J. B. Morris, chairman; Paul M. Palez, W. S. Mitchell, W. B. Miller and Geo. A. Stratman.

Chicago.

MARKET OVERSTOCKED—TRADE DULL.

The market for the past week has been badly overstocked. Never before, say those in a position to know best, has there been such a large supply of carnations in February as there was at the close of last week and the opening of this. Growers explain that carnations having been planted very late last fall did not really come into a full crop until recently, but now the plants are more than making up for lost time with the result that prices are low and buyers not near numerous enough to move off the glut even at a sacrifice. Quotations were not very materially lowered, the extra fancy reds bringing very fair figures and all shipping stock necessarily bringing a certain fixed minimum high enough to pay for the handling and the carriage risks. But the street vendors reaped the profit, as did also some of the legitimate local retailers who advertised their wares at exceedingly low prices in the daily papers. Bulb stock has only added to the difficulties of the market, coming in greater quantities as the season advances. Easter lilies and callas have been offered at very low prices. Roses are in a somewhat better position on the market than other items, but there have been increased receipts, so that by the fore part of the present week there were at least enough to go around. In most cases any threatened surplus was readily moved off by the making of very slight concessions. Long American Beauty is the one scarce item. Violets have been even more of a drug on the market than carnations and were offered in large lots at almost any price to move off even a portion of the great amount of stock received. There has been quite a little demand for orchids of late. Cypripediums are practically gone, but Cattleya Schroederæ and C. Trianæ are coming in.

THE J. B. DEAMUD CO.

The J. B. Deamud Co., which celebrates the second anniversary of its incorporation on March 1, had its beginning nearly 10 years ago, Mr. Deamud opening up a wholesale flower business under the title of the Illinois Cut Flower Co. This continued until September 1, when it was changed to simply J. B. Deamud. On March 1, 1906, incorporation papers were taken out, the incorporators being Mr. Deamud, W. P. Kyle, F. L. Emmett and Alex. Newett. The officers are: J. B. Deamud, president; W. P. Kyle, vice-president, and F. L. Emmett, secretary. The business has grown very rapidly from the start and the year just passed is said by members of the firm to have been the most successful in its history. This company, in addition to conducting the wholesale cut flower business, is interested in the Deamud & Young Fern Co., of Thompsonville, Mich. An immense number of cut ferns are handled, a great many being sold through the store here and a great quantity shipped to other wholesale flower houses.

THE DEERING BALL.

The ball given by James Deering to his two nieces last Friday night in the Commercial hotel involved a deal of table work for the Ernst Wienhoeber Floral Co. In the banquet hall there were 41 tables, and the general scheme of decoration was nearly identical on all. The table at which the Deering family sat was the largest, 16 covers being laid. A center-piece bearing an elaborate candelabra with an arrangement of spring flowers, was closely imitated on a somewhat smaller scale on the other 40 tables. Before the ball eight separate dinners were given in connection. The most elaborate was that given by James Deering at his home. Gold was the predominating color, the dinner set and the center-piece bearing six candelabra being of gold. From the center-piece, the bowl of which was filled with prunus, were golden vines, bearing morning-glory-like cups, which were filled with orchids. White lilac was also used extensively.

SPECIAL CLUB MEETING NEXT THURSDAY.

A special meeting of the Florists' Club has been called by President Leonard Kill for the evening of March 5 at 8 p. m. at the Union hotel, Randolph street. An amendment to the by-laws is proposed changing the time of meeting to the first Thursday of each month instead of the second Thursday as at present. Note also the change in the location. Other important business will be brought up.

NOTES.

Carl Netschert is still furnishing metallic and artificial wreaths to the trade at 140 Wabash avenue. He narrowly escaped destruction in the recent fire but suffered no stock damage and is shipping as usual.

L. Baumann is showing plant baskets filled with artificial plants, intended to give the retailer's customer an idea of the make-up of such work without actually carrying all the natural plants in stock.

The Garden City Sand Co., now in the Security building, Fifth avenue and Madison street, is contemplating moving into the Chamber of Commerce building, 134 Washington street, corner of La Salle.

Bassett & Washburn are offering $25 for the best 25 Bride roses and $25 for best 25 Bridesmaid at the rose show, contestants to be limited to growers having less than 50,000 square feet of glass.

A. L. Randall Co. will utilize some of the additional floor space it has leased for storing greenhouse glass, a line just added to the stock this house will sell.

Peter Reinberg's first season with Easter lilies shows a good crop on at the present time with all indications favorable for a good Easter cut.

Wietor Bros. are showing some exceedingly well grown Kate Moulton roses. This is a variety they have made a specialty of and regard highly.

John Zech, of Zech & Mann, is the same merry bowler as of yore, but a sore heel interfered some with a game at Ravenswood Monday night.

Growers have had reason this season to complain of results in forcing tulips, especially in such varieties as La Reine and Mon Tresor.

H. W. Rogers, of Weiland & Risch, was called Friday night to Spring Lake, Mich., on account of the serious illness of his sister.

Geo. Garland, of Des Plaines, says the recent big snowstorm has brought him an increased demand for his iron gutters.

Benj. Gruppe has bought most of the material for a new greenhouse at Park Ridge, 32x200 feet.

Geo. Reinberg is cutting quite a few Cattleya Schroederæ now and reports a good sale.

Vaughan's Seed Store on Saturday received its first carload of gladiolus bulbs.

Chicago Notes.

Mrs. Margaret Emmett, mother of Florence L. Emmett, secretary of the J. B. Deamud Co., died February 20. She had been sick for the past four years and for the past five months had been confined to her bed. Funeral services were held February 22 from the Church of the Nativity, where requiem high mass was celebrated. She was a member of the Woman's Catholic Order of Foresters, St. Columbine Court, No. 96. The body was placed in a vault in Mount Olivet cemetery.

At Morgan Park, Herman Selian had trouble last week with the bursting of a boiler; he has been in rather serious straits awaiting a boiler from the east.

J. A. Schmidt, who makes a specialty of floral lodge work is this week removing from Thirty-first street and Michigan avenue to 2417 Wentworth avenue.

Phil. Schupp, of J. A. Budlong's, says many advance orders for Mardi Gras have been booked. This firm has been having a growing southern business.

Bassett & Washburn early this week started to cut their second crop of ice which was 10 inches thick; 200 tons was the estimated cut.

The local delegates who returned from the Springfield convention are asking each other: "Who lost Willy Breitmeyer?"

Mrs. W. L. Kroeschell and daughter are making a trip south for a milder spring time.

The Kennicott Bros. Co. are still handling fine lots of Klehm's novelty tulips.

Visitors: Wm. Desmond and John Budge, of L. S. Donaldson & Co., Minneapolis; Jacob J. Hess, of Hess & Swoboda, Omaha; Wm. Dyke, representing Edward Jansen, New York; W. B. Shotwell, of the Shotwell Floral Co., Fargo, N. D., on trip to St. Louis, Mo., and Hot Springs, Ark.

Cleveland.

TRADE BETTER.

Business picked up somewhat during the past week, owing to several large weddings and George Washington's birthday. Many of the retail windows were decorated suggestive of the day. The greatest call was for red and white flowers, although violets and sweet peas cleaned up nicely. For the first time in several weeks orders could be filled in roses, not because the demand is lighter, for, if anything, it has increased, but because the crops have been off and now they are coming along in good shape. The quality of flowers is up to the standard. Bulbous stock continues to be a drug on the market. Carnations move better, although the prices remain very low. Adiantum is a scarce item. Asparagus Sprengeri and A. plumosus are coming in good condition but are not plentiful. Smilax just about moves along. There is nothing at all going on in the supply line.

NOTES.

Mrs. L. Brown had the decorations for the Strong-McIntoch wedding. A tree effect of Easter lilies with palms and southern smilax were used to decorate the church. The bride carried a muff of white sweet peas and lily of the valley. The effect was very pleasing.

F. W. Zeichman, Quincy avenue, is offering some very good lily of the valley. Mr. Zeichman reports a good trade in funeral work.

Some extra fine hardy fern can be seen at the Florists' Exchange. This firm has also a nice lot of forget-me-nots and single violets.

Smith & Fetters had a unique George Washington window display. This firm reports a good business.

C. Merkel & Son, Mentor, are sending in some splendid white lilac and adiantum. FORESTER.

Cincinnati.

ALL STOCK CHEAP.

Trade the past week was a little quiet with a bountiful supply of stock which accumulated accordingly. Carnations continue to be in oversupply, and the stock has to be exceptionally fine to fetch $3 per 100. The street fakirs were in their glory the past few days, as they could buy all the stock they needed at $1 per 100 and pretty fair stock at that. We have had an abundant supply of violets since St. Valentine's Day, the price having dropped to 50 cents per 100 for the finest grade and some few left over even at these low figures. The least said about bulbous stock the better, as about only one-third received is sold. It is certainly very discouraging to the wholesaler to have his boxes full of this stock and no market for it. At the same time we must not forget the grower who can hardly realize the cost of the bulbs out of his returns. Even the demand for lilies has fallen off and some of these had to be carried over. Roses, on the other hand, seem to clean up fairly well and the same may be said of lily of the valley and green goods.

NOTES.

The writer was the recipient of a package of green carnation coloring from Louis Elsass, the Chillicothe florist. This reminds us of the fact that St. Patrick's Day is only a couple of weeks off. Tromey's flower shop is advertising the dye in cans, and while we do not advocate its use, still the public seems to want green carnations for this day and immense quantities are sold in this city.

Geo. Corbett, of College Hill reports that, despite the hard times talk, he has done a better business this winter than last. He is also well satisfied with the way his violets have behaved this season. His pick for St. Valentine's Day was about 5,000 from two benches, each four feet wide and 100 feet long, the blooms bringing $1 per 100 right through.

Sunderbruch & Meier have purchased from Will Murphy the stock of his new rose and will grow it for outdoor planting. Gus Meier, who has charge of the growing end for this firm, is under the impression that the new rose will prove a good thing to use for cutting from in the good old summer time.

B. P. Critchell, after a four weeks' siege with rheumatism, is able to be about again with the aid of a cane and from appearances must have suffered considerably.

Several of the retailers made special windows for Washington's birthday using flags, hatchets, etc. Julius Baer had a cherry tree with a background of flags which attracted considerable attention.

We take this method of extending our sympathy to Jimmie Allan of the firm of George & Allan in the loss of his father, whose death occurred February 16.

Walter Gray contemplates building three or four houses for roses the coming summer.

Clarence Ohner, right hand man to E. G. Gillett, is confined to his home with tonsilitis.

Visitor: F. J. Farney of the A. L. Randall Co., Chicago. S.

Louisville.

TRADE SATISFACTORY.

Business conditions the past week were very satisfactory, the only shortage being roses. Roses are in fair supply, but the great demand makes them short. The quality is fair. Carnations are of the very best quality. They have a good demand, and the supply has been good. Lily of the valley and violets have been slow sale. There are a good many of the former in the market. Jonquils have been good sale. Narcissi are plentiful and move lively. Roman hyacinths are about gone, and it is very probable there will not be many grown next season. Green goods are still scarce. Pot plants continue to sell well.

NOTES.

The next meeting of The Kentucky Society of Florists will be held March 3 at Fred L. Schulz's store, and a good attendance is looked for, as there will be business of importance.

Henry J. Baumer, brother of August R. Baumer, was married last week.

Visitor: Frank J. Farney, of A. L. Randall Co., Chicago.

J. E. Marret has been sick for some time.

F. L. S.

NILES, MICH.—The market for lettuce has been good here all winter according to David Wolf. The price has been 15 cents per pound. Radishes have made 45 cents per dozen; spinach, 15 cents per pound; onions, 40 cents per dozen, and he is well satisfied with his winter's trade.

Many thousands of rose trees were planted here on Washington's birthday, a celebration that had been looked forward to by the citizens for a long time and great preparations made for. They are now looking forward to the June celebrations of the Rose Festival Association for which special tourist rates are to be asked of the Northern Pacific and other railway systems. Many prominent citizens are connected with the association and are helping the affair along with characteristic western energy.

At a meeting of the United East Side Push Club recently Geo. L. Hutchin, manager of the Rose Festival Association, gave an address in which he said that successful conferences were being held with the railroad officials and promises of special rates had been secured for long distances. He said that the Japanese had decided to make a reproduction of their "Cherry Blossom" parade, as produced in Tokio, during the rose festival, which would cost $10,000 at least. Twenty-seven committees had been appointed to take up the matter of raising money throughout the northwest for the Japanese. In conclusion, Mr. Hutchin declared the rose show would be the biggest thing of the kind ever held in the Pacific northwest, if not in the United States.

Following his talk Mr. Hutchin answered questions relative to the floral arches that the east side clubs propose to erect along the line of march. He strongly commended the plan and said that such arches could be erected at small cost. He said designs would be furnished free of cost to the clubs. These designs will be submitted at the next meeting of the club, when some definite action will probably be taken.

OREGON CITY, ORE.—The second annual rose show of the Rose and Carnation Society will be held in this city during the latter part of May, or, if the season is late, in the early part of June. It is planned to have an elaborate festival for the exhibition of roses, carnations and wild flowers, and the strawberry fair that was a part of the rose show last year will not be held this year in conjunction with the festival of flowers.

New York.

TRADE SLIGHTLY IMPROVED.

There was a slight improvement in business during the latter part of last week. Washington's birthday falling on Saturday, gave additional vim to the market and, though prices have not improved, it is a satisfaction to see stocks being, to some extent, cleaned up. There are plenty of roses to supply all demands, but they are not arriving in such a deluge as the carnations, which, it may be added, are of splendid quality, so good in fact that it is a pity to see them going at such a sacrifice. The great pressure of bulbous stock has, for the past two weeks, borne heavily on the carnation market; this, with a very heavy cut coming in, and the general dullness of all lines of business have combined to bring carnation prices down to very low figures. There is a prospect of a favorable reaction as the tulips and narcissus begin to thin out. Many of the double violets offered are poor. Lily of the valley, once considered among the exclusive stocks, is now side by side with violets on the trays of the street hawkers. It has not lost caste as yet with the society people on that account.

NOTES.

Hessians, of 984 Madison avenue, in addition to having a very handsome and convenient store, show a splendid stock of all that is required in a high-class retail business. Noteworthy is a fine stock of decorative palms. Having a conservatory connected with their store they are well prepared to handle quantities of pot stock.

Many fine designs were executed for the funeral of Mrs. Natica Rives Burden, a prominent young society woman, whose sudden death has caused much newspaper comment. It is less than a year ago that mention was made in these columns of the elaborate decorations seen at Mrs. Burden's wedding.

The pussy-willow man is one of the interesting characters of the wholesale district; he makes regular trips, carrying a basket of "pussys" on his back, and seems to consider his branch of the business as important as the rest of them.

Christatos & Koster, Madison avenue retailers, have an original window decoration in the form of a Swiss mountain scene. In addition to the plants and mosses, figures of peasants, cattle and sheep are appropriately introduced.

Plants of Nephrolepis Whitmani, now on exhibition in the store of J. H. Small & Sons, are of remarkably large size and great beauty. Whitmani has made good.

Braxton, who opened a retail store at Seventy-fifth street and Madison avenue, at the beginning of the season, has closed.

The Hart retail store at 1000 Madison avenue, is very attractive just now with a fine stock of flowering plants.

Detroit.

TRADE POOR GENERALLY.

Washington's birthday alone saved the past week's trade from being classed as utterly featureless. The absence of many parties and joyous occasions requiring flowers and the meagre line of funeral work called for, together with the visitation of the coldest spell of the season all contributed to the general result—poor business. On Saturday, however, a perceptible impetus was felt, due to the many events in celebration of the day, but not sufficient to make any considerable inroads upon the immense stock of all kinds of cut flowers, the accumulation of a large part of the week's heavy receipts. The glut still continues and no prospects of an early adjustment of the unequal supply and demand is now apparent. The florists' show windows are now all ablaze with the choicest of the season's products; Azaleas and pot plants of bulbous stock in the greatest variety, together with huge vases of cut blooms of the same kinds gives a spring-like appearance to the surroundings and the most powerful incentive to prospective buyers.

NOTES.

The appointment of A. Pochelon as state vice-president of the S. A. F. for eastern Michigan by President F. H. Traendly meets with the hearty approval of all the members here who are familiar with Mr. Pochelon's enthusiasm and energy in any work in the general interest of the trade, and a big delegation from here to the convention at Niagara Falls next August will be assured as a result of his work.

Owing to a terrible blizzard that raged at the time of the club meeting February 19, none of the members put in an appearance at the club rooms.

Visitor: Wm. Dykes, New York.

J. F. S.

St. Louis.

ROSES STILL SCARCE.

The market the past week, owing to the inclement weather, was somewhat crowded, especially as regards carnations and violets. Carnations were sold, in lots, as low as $6 to $7.50 per 1,000 and good stock in small quantities sold at $1.50 to $2. Roses, however, still remain scarce, but it is expected that before long they will come. Lent will start next week, but of late years it has not proved much of a factor in the business, only the first few days showing any material difference.

HORTICULTURAL SOCIETY'S SPRING SHOW.

The regular meeting of the executive committee of the Horticultural Society was held February 8, Henry Young presiding. Various committees were appointed, including one on premium list and arrangements for the spring show, which will be held March 10-12, in the Odean building, Grand and Finney avenues. A programme of lectures and essays is in preparation and Secretary Koenig has been instructed to mail premium list as early as possible.

NOTES.

Riessen Floral Co.'s show windows are a beautiful sight. Violets, jonquils, lily of the valley, carnations and roses are banked up in the center and both side windows. The business of Saturday last was immense.

W. C. Smith & Co. are showing some of the finest galax leaves in town. There seems to be no limit to their supply of violets and sweet peas, which they dispose of at good prices.

Oscar Heile, the old Broadway war horse, is still on deck and doing a steady reliable business. He has made great improvements and alterations in his store.

We regret to announce the serious indisposition of Mrs. Alex. Siegel, who recently underwent a very painful operation. A speedy recovery is hoped for.

F. C. Weber's windows are always bright and pretty, and show great taste as to arrangement and novelty.

Everything was lovely at the home of James Young, February 22, when his son Charles was married.

All the visitors to Springfield, Ill., last week, speak well of the splendid reception given them. W. F.

Montreal.

TRADE STEADY.

Since last writing trade has been very steady. The supply of cut flowers is overplentiful; a large amount of tulips, daffodils, and other bulbous stock gluts the market. The supply of roses is fair and quality good; prices about right. Carnations are plentiful and first class, but fetch low prices only at wholesale. Lily of the valley and violets are also below last year's prices.

NOTES.

Arthur C. Legare is cutting about 1,000 carnations per day. The large houses planted with carnations only, are a fine sight; there is no trace of disease and the plants are loaded with buds. Mr. Legare is proud of a bench of 80,000 cuttings.

P. McKenna & Son will do away with their ridge and furrow houses; same have been buried a good deal under the snow this winter. The houses will be put under one roof making a span of 42 feet wide by 155 feet long.

Bennett's houses, at Lachine, were partly buried in snow for a week. Mr. Bennett is well pleased with the trade he does at wholesale and does not intend to go back at retail for a while yet.

There seems to be a lot of restlessness among the gardeners this year; already a number of changes have taken place and the season is only commencing.

Campbell's are always busy; they keep a good decorated window at all times. One gets impressed with the abundance there is of everything.

The Gardeners' and Florists' Club mourns the loss of one of their oldest members, Edward Derynk, who died last week at Dorval, of cancer of the stomach.

Visitor: Thos. Manton, Eglington, Ont.

LUCK.

London.

Covent Garden market trade is improving with the better weather conditions. Azalea Mollis brings 85 cents each and upwards; Indian are a much better trade, especially for the colored varieties. Golden Spur narcissus in 3½-inch sold at $1.50 per dozen. Dutch hyacinths are a much better line, but tulips are still slow. With the shortage of French flowers, English and Guernsey daffodils and narcissus are selling better. Carnations are improving, as also roses. Supplies are generally shorter and prices much firmer. Herbaceous and perennial roots are coming in freely.

The meeting of the Royal Horticultural Society, February 11, was especially good. Besides the usual orchid display. Hugh Low & Co. showed their Salmon King cyclamen and received an award of merit. H. B. May & Son had a silver flora medal for 75 varieties of ferns. Sutton & Sons and H. Cannell & Sons each had silver gilt Banksian medals for primulas, the latter firm showing their true Giant White. Other Cannell varieties were Moonlight, white with yellow eye, Queen Alexandra and grand red, black, salmon and pink. W. H. Page, Hampton, had a fine exhibit of Lilium lancifolium varieties and American and English carnations, for which a silver gilt floral medal was awarded.

Oceanic, N. J.

The twelfth annual meeting of the Monmouth County Floricultural Society was held at the Red Men's hall February 14 and the following officers were elected: Joseph Kennedy, president; Malachi Tierny, vice president; H. A. Kettel, secretary; Ernest Palmer, financial secretary; N. Butterbach, treasurer. It was carnation night and we had a general carnation talk. Malachi Tierny reported about the Carnation Societies' exhibits and William Turner gave us a description of Peter Fisher's seedling and his carnations in general. At our next meeting, March 13, a schedule will be prepared for the lectures, during the incoming year. B.

COLUMBUS, O.—J. W. Meek, proprietor of a nursery, was nearly dragged to death in a runaway in North Broadway February 17. Although painfully injured, he is not expected to die. His head was severely cut in several places and his body is a mass of bruises. Mr. Meek was driving a young colt in a breaking cart when the accident occurred. The horse became frightened and ran up a bank, upsetting the sulky. The driver became entangled in the frame work of the cart and before he could extricate himself, the horse had started on a wild gallop.

CARNATIONS OVER-PLENTIFUL.

The carnation market was badly overstocked last week. For every flower sold it seemed as if two were received, until the storage rooms were so full there was scarce space to move about. Prices in large lots were ruined. First-class Enchantress was offered as low as $2 per 100; in fact this variety appears to be the most plentiful of all. Winsor is becoming a great favorite and will be generally grown in this neighborhood for next season. It seems to keep much better than Enchantress. Roses are in good supply, with white, which was scarce two weeks ago, the most plentiful. American Beauty roses are not over-plentiful, $6 per dozen being high for the specials. Violets move fairly well, but at reduced prices, 75 cents being high for the fancy doubles. Bulbous stock is still very plentiful. Some of the daffodils are very hard to move, the street men even refusing Princeps at $5 per 1,000. Tulips seem to hold at $2 per 100. Freesias are in good demand at $1.50 to $2. Orchids are scarce. Cattleyas are quoted at 50 to 60 cents. Harrisii lilies are in full supply in all the houses, as are also callas, both being sold at 10 to 12½ cents. Sweet peas are good stock and sell as well as anything, 50 cents to $1 being the price.

The feature of the Harris establishment at this time is the immense block of shamrock. Something like 50,000 pots of this bit of Irish sentiment is to be seen here in various sized pots and pans, some of them shaped in imitation of the leaf. Large blocks of this stock are grown to order for the department stores, who give the plants away to their customers during the week of March 19. There is considerable demand from the cut flower stores as well, and Mr. Harris says he finds an increasing demand with each season.

J. Otto Thilow will tell of "New Things in An Old Country," at the March meeting of the Florists' Club on Tuesday next. This should secure a large attendance as Mr. Thilow, being a close observer, always has something good and is ready at all times to impart his information to his fellow members of the craft.

Wm. Swayne of Kennett Square is trying some of the latest English carnations, importations of his own. One amongst them is a fine scarlet, called Britannia, which promises to be a very large, well formed flower of brilliant color, apparently quite equal to any of the new American seedlings.

The Leo Niessen Co. is finding a ready sale for Acacia pubescens. It has never flowered better than this season, the fragrant, graceful sprays being full of flowers and well clothed with foliage.

Wm. McKissick has just returned from a visit up the state, where he found the growers in a fairly good state of mind. He is receiving some very choice sweet peas.

The Philadelphia Cut Flower Co. has connected its establishment with Pennock Bros., with a private 'phone. This looks like keeping close up.

John McIntyre has been on the sick list the past week, but we are glad to say he is about again and hustling as usual.

Robt. Craig is to deliver an address before the Massachusetts Horticultural Society February 29. K.

Boston.

STOCK OVERPLENTIFUL.

On Monday morning the market opened up dismally, offering absolutely nothing to the overburdened salesmen who could do nothing but hang around with an air of distraction. Until the latter end of the week no progress was made, but the holiday—Washington's birthday—brought out a brush of liveliness and a large amount of stock was conveniently disposed of. The national colors were in great demand and anything applicable was the popular choice. Funeral work, upon which is placed the greatest reliance during these frequent periods of depression, has fallen off tremendously and for those houses who depend wholly on this line, there has been absolutely nothing doing. A few prominent social events produced a little business of the best grade. The market is trudging along under the heavy weight of a great surplus and much stock is going to waste. Carnations are offered at unheard of prices for this time of year. American Beauty roses are gradually becoming more plentiful with only a light call. The price is still too high to attract habitual buyers and others hastily pass to the less expensive varieties. Killarney has weakened and, as displayed during the week, is devoid of its particular beauty. Richmond is slowly improving and large shipments are being received from specialty growers. Bulb stock is the market leader at the present, the better varieties selling well and at the usual figures. An excellent display of flowering plants is seen in every store, but as with the cut flowers the demand is absent. Mahonia is in evidence in all the leading stores and pans of freesia and ixia are especially popular.

NOTES.

A new flower store known as The Kensington Flower Shop was formally opened February 24 at 689 Boylston street, by H. M. Collins and Miss A. B. Roberts. For the past two months they have conducted their place of business at the Copley Square hotel.

Sidney Hoffman was the contracting decorator for a number of social affairs through the week, the principal event being the second assembly, an exclusive ball at the Hotel Somerset, which was lavishly decorated for the occasion.

Walter Holden, the popular representative of L. E. Small in the Music Hall Market, re-appeared February 22, he having been down since Thanksgiving with an attack of typhoid fever.

Great interest is shown in the exhibition to be held February 29 in the Park Street Market and a large and enthusiastic competing list is recorded for the numerous valuable prizes offered.

Wm. Gilson for the past 15 years connected with the firm of T. J. Butterworth of Framingham has severed his connection with this house and at present is unattached.

Thomas F. Galvin, who has passed the last two months abroad, has returned to business after greatly enjoying his trip on the continent.

B.

Providence.

At the recent Monday evening meeting of the Florists' Club A. Macrea read a paper on "The History of the Greenhouse Business," going back to the first commercial enterprise in our state some 45 or 50 years ago, naming such men as Craddock, O'Connor, Wright, Johnston, McNaughton, Nichols, Noonan and Sweeney. The various starting points were named, the probable glass area, plants grown, style of work, etc. While not occupying over 15 minutes actual reading, Mr. Macrea's paper covered the ground, evoking a general discussion headed by W. E. Chappell who in turn read an original article, along with exhibits, on "Old-time Florists and Their Methods of Floral Arrangement." He had with him samples of old-fashioned bouquets, baskets and wire emblems, which were eagerly inspected by those present.

The next meeting has been assigned to a paper and general discussion on "Retail Flower Store Management."

PRICES STILL LOW.

The past week was somewhat more satisfactory than the previous one as stock cleaned up better, although prices are still very low. Better quality in everything, excepting lilies, could not be desired. A little famine in greens was experienced, but not noticed very much. Society still remains inactive as to extensive decorations, which is felt by the better stores.

NOTES.

E. C. Ludwig is sending some souvenir postals to his friends in the trade picturing people picking lemons, but he did not state whether he was in the group or not.

H. L. Blind & Bros. will remove their south side store, instead of their Fifth street store, as previously reported, to their new east end location.

Wm. P. Kroeck had a very bad experience with Paper White narcissus poisoning, his hands being entirely bandaged at present.

H. C. Beuchler, Sewickley; Elmer Jolliff, of the Florists' Exchange, and Ernest Zieger have been on the sick list.

Mrs. Fromme-Richter, mother of Mrs. Ernest Fisher, died February 23 from cancer of the breast.

J.

Mobile, Ala.

EVERYBODY BUSY.

Capt. Davis of the Chatogue Greenhouses, is a very busy man these days with his retail department, which has now been in operation for some time, and the captain claims it is growing so fast that he is having difficulty in producing material to fill his orders. He is shipping some fair rose stock to New Orleans, but owing to various mishaps it is not quite so good as this establishment usually turns out. More stock is needed and 25,000 feet of glass will be added to accommodate the customers of the establishment. This will be devoted mainly to roses and carnations. There is an excellent collection of adiantums on this place, perhaps the best private collection in this country, and A. Charlotte has been found the best for cutting and general decorative work. There is also a fine collection of begonias. The lilies are looking well and should afford a regular supply of good blooms and plants until Easter. The captain has devised an excellent local advertising scheme in arranging the telephone names of the local telephone directory numerically and printing the list for distribution among telephone users of the city, with the firm's advertisements illustrated with halftone engravings on front and back covers and printed hints and suggestions about flowers on several inside pages.

Miss Maria Minge is busy with plans for the elaborate new greenhouse establishment of the Minge Floral Co., recently incorporated. W. M. Bailey, who will have charge of the greenhouse end of the business, was formerly superintendent at the Chatogue Greenhouses, and Miss Minge now looks forward to supplying her many customers with home grown stock of the highest grade before another year passes over. The stock grown will consist principally of roses, asparagus, smilax, bulbous material, etc. Miss Minge will continue to give personal attention to work at the city store, for which a better location will be secured. It will be recalled that Miss Minge established the first greenhouses in this city and conducted them herself for many years, building up her present thriving trade. Her many friends throughout the country will wish her every success in the latest addition to her business.

C. Ravier & Sons report that business has been quite good since January 1 and the demand is increasing to such an extent that they will add a new carnation house this season.

T. Loding, brother of H. P. Loding, has purchased the original greenhouses of Miss Maria Minge and will operate them about four miles out.

Mrs. John Goodbrad has had brisk demand for funeral work.

CUT FLOWERS OR DESIGNS will be Delivered for the Trade on Wire or Mail Orders in Best Qualities and Prices

Baltimore.

TRADE STILL DULL.

There has been some improvement the past week, both in the weather and in trade conditions, but dullness is the rule. There have occurred some few weddings and funerals when the display of flowers was imposing, but the resumption of normal distribution seems delayed. This is the season for banquets and some have taken place where the decorating involved the use of large quantities of cut flowers.

NOTES.

Two daughters of John Cook, who are in his store on North Charles street, have had trouble by infection from the thorns which penetrated their fingers and gave great fear for a while of serious consequences in the way of blood poisoning. Miss Anna Cook was confined for several weeks to her bed and had to submit to a surgical operation to head off the attack. In her case it was thought some dye on inmortelle flowers, or some similar material, contributed to increase the trouble. Miss Ida's case was not so alarming, but disabled her from her customary occupation for several days. As a consequence of these occurrences, the young ladies at stores are taking to wearing rubber gloves at their work.

As indicated, General Ferdinand C. Latrobe was made president of the park commission, and George W. Williams was appointed a member of the board to fill the vacancy caused by his promotion. It is understood that the policy of the commission will not be changed and that the extension of the park system of the city will be vigorously pushed, and that in addition to the large pleasure grounds and boulevards, which will connect the various sections, several smaller parks and playgrounds for children will be provided.

The Fernery, a florist establishment on North Charles street, near the Union station, has gone into the hands of receivers. The concern was incorporated. The receivers gave bond for $3,000, indicating assets of half that amount. It is understood there are a number of out-of-town creditors. The receivers are Geo. M. Diedman and Joshua Horner, Jr., and were appointed by Judge Garter on petition of the Sanders & Johnston Co., which is a creditor to the extent of $36.75.

Frederick C. Bauer continues his experiments with seedling lilies, and has nearly 3,000 young plants coming on of various ages and sizes, all of them entirely healthy as to foliage, differing from the experience which has been so general and aggravating with L. Harrisii generally.

BUSINESS IMPROVING.

Business conditions in this city have been very quiet of late, and it has only been in the last two weeks that things have brightened up a little. Owing to a scarcity of flowers, especially roses, which are fetching high prices, everything the growers bring in is readily bought up at fair prices. After a wet and cold January, we have had two weeks of bright and warm days which is bringing into bloom a lot of bulbous stock, especially daffodils, narcissi, tulips, freesias and hyacinths. Violets in immense quantities are being disposed of every day, as they are very cheap. Fruit blossoms are to be seen in all the stores, but they are used up quickly for wedding decorations of which there have been quite a few of late.

NOTES.

The last meeting of the Pacific Coast Horticultural Society was not very well attended, owing to a heavy rainstorm, which lasted for two days without ceasing. The exhibition committee reported progress; they also reported a difficulty in procuring a suitable place in which to hold the exhibition, the nave of the Ferry building not being available this year on account of the arrival of the fleet of warships, which will be about the time the exhibition is to be held.

At the last meeting of the State Floral Society, February 14, one of the members had prepared a wild flower exhibit, which was very interesting; this lady had gathered 53 different varieties all in the neighborhood of the city. I think it would be hard for any part of the United States to make a better showing at this season.

We have had some of the drummers from the eastern plant and seedhouses in town. They are all reporting a great many orders in the city and vicinity. J. Karins was soliciting orders for H. A. Dreer, Philadelphia, Pa.; W. J. Schuch for C. C. Pollworth Co., Milwaukee, Wis.

H. Domoto of Domoto Bros., has taken unto himself a wife. He has built a fine residence on his new place in Elmhurst which he will occupy after he returns from the wedding trip.

H. Maier, superintendent for W. Tevis, has opened an office and salesyard near Burlingame station, where they are selling all kinds of nursery stock.

H. Plath has bought another piece of land adjoining his already extensive place on which he is erecting a new fern house, 26x235 feet.

J. W. Bagge resigned as superintendent at the De Sable place, San Mateo. He is now on Mrs. Franks' estate in Burlingame.

Mr. Ludemann, of the Pacific Nurseries, reports business quiet, especially so in ornamental stock.

Ferrari Bros. are bringing in some very good Harrisii lilies, of which they have quite a quantity.

H. Guttersloh at Millbrae is reporting business very good.

P.

HUTCHINSON, KANS.—The Hutchinson Floral Co. has moved its down-town office to the greenhouse office, corner B and Poplar.

MONROVIA, CAL.—John L. Graver, late of Fargo, N. D., has purchased a 10-acre ranch near here and will devote part of it to floriculture.

The Seed Trade.

American Seed Trade Association.
Geo. S. Green, Chicago, Pres.; M. H. Duryea, New York, First Vice-Pres.; C. E. Kendel, Cleveland, O., Sec'y and Treas. Twenty-sixth annual convention, June 23 to 25, at Hotel Ponchartrain, Detroit, Mich.

TOULON, FRANCE, February 8.—The growth of hyacinth bulbs is normal.

MAIL ORDERS are coming slowly this week, probably checked by the blizzard.

FIELD SEED CORN of high vitality is believed to be scarce all through the west.

CHICAGO.—A. H. Goodwin, of the W. W. Barnard Co., returned last week from the south.

FIFTEEN HUNDRED carloads of canteloupes is the crop estimate of the Imperial Valley, California.

RACINE, WIS.—The firm Olley & Osborne has succeeded David Lawton, a seedsman of long standing here.

G. B. MCVAY, of the Amzi Godden Seed Co., Birmingham, Ala., will spend his vacation this year in California.

HAMILTON, BERMUDA, February 18.—Lilium Harrisii plants are growing well in our fields this season up to this writing.—S. B.

ONION SET prices at Chicago for immediate delivery are about as follows: Yellow, $2.35; red, $2.50; white, $2.75@ $3.00 for 32 pounds.

SOUTHERN seedsmen selling cotton seed will be interested in Department of Agriculture Bulletin 314 on "Breeding Cotton," profusely illustrated.

THE Willamette valley in Oregon has grown a few thousand pounds of first-class onion seed every year, but it is not a location for growing seed cheaply.

JACKSON, MICH.—E. J. Sheap, of S. M. Isbell & Co., is visiting the trade in the east and southeast and has been quite successful in booking large contracts.

WASHINGTON, D. C.—Cole & Westwood, government seed contractors, are employing about 180 persons. Health Inspector Allen says 100 women working in an apartment 34x100 feet is too many.

SPEAKING of buying garden seed beans at the present low prices to carry over for next season's use an expert bean handler says, the quality and color of the 1907 bean crop is not such as to recommend it for carrying over.

ARRANGEMENTS have been made by which the Bureau of Plant Industry cooperates with the Nebraska Agricultural Experiment Station and will establish a seed testing laboratory at this place to expedite the testing of seed samples submitted by farmers and seedsmen in Nebraska and adjoining states, where the time required for mailing to Washington and return frequently causes serious delay.

Braslan Seed Growers' Co.
Growers for the Wholesale Trade Only.
SAN JOSE, CAL.

LOUISVILLE, KY.—Seedsmen here have taken up the pure seed law matter and have made recommendations to the legislature regarding same. They have also arranged for a conference with the director of the state agricultural experiment station. It is not thought now that the present bill will become a law.

PALM SEED PRICES IN LONDON.—According to the Horticultural Trades Journal, Cocos Weddelliana seeds were worth $3.50 per 1,000 at the end of January. Kentia Belmoreana started at $3 per 1,000, but this price was not maintained, some cases of 6,000 seeds going for $9. Two cases of K. Forsteriana only were offered and these were knocked down at $9 each.

DALLAS, TEX.—The Texas Seed & Floral Co. writes February 18: "Since our catalogue was issued December 20, mail orders have come along in a steady stream, both retail and wholesale. Few people north realize the amount of truck that is grown in this state. Orders come to us in lots of several hundred pounds. Potatoes are grown largely, while more sorghum and cane are planted than in any other state in the Union."

GILROY, CAL.—Waldo Rohnert has recently purchased a 200-acre tract of land at San Phillipe, about 12 miles east of this place. It is an excellent soil and a very choice location for seed growing. Mr. Rohnert has this all planted to seed crops and also about 200 acres in other places, making a total of 400 acres. He has about 90 acres set to onions for seed and the rest of the area devoted to sweet peas, lettuce, radish, onion bulbs for seed crops of 1909, and also some flower seeds which will be planted later.

SOME members of the seed trade think it a good deal of a hardship for the Department of Agriculture to print unfavorable reports on samples of grass seed where bought without knowledge of the seller and possibly in a rush season when some error might be made by an inexperienced clerk in putting up the package and then giving the seedsman no opportunity for explanation before advertising him broadcast over the country as a fraud. It is believed errors have been made in this way with no intent on the part of the seedsman to injure buyers.

Adulteration and Misbranding of Seeds.

Circular No. 26 from the secretary of the Department of Agriculture under date of February 15, is one which will attract considerable attention from seedsmen. Four seed dealers are mentioned as having supplied undesirable alfalfa, nine with meadow fescue open to criticism, six carrying a quality of Bromus inermis subject to criticism, while no less than 64 dealers in Kentucky blue grass are subject to remarks from B. T. Galloway, chief of the Bureau of Plant Industry.

Pure Seeds.

One of the ways for Nebraska farmers to retrieve such ravages as they may suffer from frost, panic and the beef trust is to make the new seed laboratory which has been established at the state experiment station one of the busiest places outside a bee hive. The day has passed when many farmers plant the potatoes that were too small to cook, and the seed corn is not shoveled out of the bottom of the crib with a scoop shovel as much as formerly. There are planted every year, however, some thousands of acres of alfalfa and clover and tame grass pastures with seed grown under unknown conditions. A government investigation of clover seeds made a couple of years ago discovered yellow trefoil present as an adulterant in every case. For a time Nebraskans who sowed alfalfa were amazed to find almost as many yellow as purple blooms in their fields, the consequence of adulteration. But worse things happen, such as the introduction of dodder, an impurity in seed that may lead to the destruction of one's own crop and his neighbor's. Agricultural scientists tell us that planting impure or imperfect seed is equivalent to building a house on a foundation of sand. The seed testing laboratory renders it unnecessary for any farmer to be cheated in his seed. It protects the honest seed dealer also.—Lincoln (Neb.) Journal.

[These are the views which stimulate the present legislative enactments oppressing the seed trade.—ED.]

Seed Re-Appraisements.

From Sluis & Groot, Enkhuizen, exported December 31, 1907; entered at New York. File No. 47860. Inv. No. 12849.

Findings of Sharretts, G. A. Radish Early Round Scarlet, entered at 49.9; advanced to 60 per cwt. Ditto Scarlet Gem White Tipped, entered at 50; advanced to 60 per cwt. Add bags and transportation.

On White Portugal, entered at 212.50, advanced to 250 fcs. per cwt. Add packing.

From Cooper, Taber & Co., London, exported October 30, 1907, entered at Chicago. File No. 47604; entry 19658.

Findings of McClelland, G. A. Beet Bastians, entered at 33, advanced to 36 per cwt. Cabbage Charleston Wakefield, entered at 84, advanced to 95 per cwt. Cabbage, Henderson's Summer, entered at 75, advanced to 80 per cwt. Carrot, Chatenay, entered at 80, advanced to 100 per cwt. Turnip, Purple Top Strap Leaf, entered at 32, advanced to 35 per cwt. Swede American Purple Top, entered at 34, advanced to 40 per cwt. And similar goods. Add bags, etc.

Imports.

During the week ending February 22, imports were received at New York as follows:
McHutchison & Co., 186 pkgs. plants, 92 cases trees and plants.
Rolker & Son, 29 cases plants.
P. Ouwerkerk, 21 cases trees.
Frank H. Darrow, seven cases trees.
P. Henderson & Co., 93 pkgs., one case seed.
Vaughan's Seed Store, five pkgs., one case seed.
J. M. Thorburn & Co., five pkgs., three bbls. seed.
Stumpp & Walter Co., 13 cases flower roots.
H. Nungesser & Co., 129 bags grass seed.
Rickards Bros., 21 bags grass seed.
W. E. Marshall & Co., 16 bags grass seed.
To others: 130 pkgs. plants, 67 cases plants, 18 pkgs. trees, 19 cases flower roots, six boxes bulbs, 2,230 bags seed, 365 pkgs. seed, five bbls. seed, 650 bags sunflower seed, 1,330 bags clover seed, 160 cases clover seed.

Seed Grain Needs.

Consul-General John G. Foster, of Ottawa, Ont., advises that the finance minister of the Dominion government has presented a supplementary estimate to the Canadian Parliament for the purpose of assisting western settlers of Canada whose crops failed last year to purchase seed grain during the coming season. The estimate includes three items, as follows:

To provide $585,000 to purchase seed grain for homestead settlers in Alberta and Saskatchewan, the cost of said seed grain to be repaid by the settlers with interest at the rate of five per cent per annum, and until repayment to be a lien or charge upon the lands of the settlers held under homestead entry.

To provide $440,000 to enable the government of Canada to advance to the government of Alberta, by way of loan, a sum for the purchase of seed grain for settlers.

To provide $1,825,000 to enable the government of Canada to advance to the government of Saskatchewan, by way of loan, a sum for the purchase of seed grain for settlers.

This gives a total appropriation of $2,850,000. It is understood that the seed wheat will be purchased in western Canada, but that part of the oats and barley will have to be secured outside of the dominion.

MARKET GARDENS.

UTTER'S CANTALOUPE has proven to be a good variety for forcing under glass. It is a little smaller than the Osage and nearly round.

GRAND RAPIDS, MICH.—F. M. Strong, E. E. Taylor, Frank Cook and S. J. Perry have consolidated their greenhouse interests under a corporate title of the Grand Rapids Greenhouse Co. Individually they control quite an expanse of greenhouses south of the city in which they have been generous producers of lettuce and other vegetables. The merger is for the purpose of reducing the cost and that the industry may be carried on to better advantage, especially as to the handling of the output. It is intended the work shall be carried on upon a more extensive scale and the programme calls for additional greenhouses. To provide for these $165,000 of preferred stock bearing 8 per cent cumulative dividends is being marketed.

More About Hotbeds.

Sometimes the question comes up whether to construct hotbeds entirely above ground, or to partly sink them. That is, excavate for the manure. This question is answered by force of circumstances. Where there is any danger at all that surface water may collect in an excavation, they belong entirely above ground. Water will very quickly destroy all heat and render the beds cold. On the other hand, where manure is scarce, and drainage ample, they can be sunk to advantage, as it saves much manure. The above-ground plan has other advantages. If no preparations have been made in the fall, it is the easiest plan to follow, and, although it requires more manure, if the whole plat is built close together, allowing only for narrow paths between the beds that is, eventually all the beds are on one big bed of manure. A more even heat is obtained, as the walks are also heated.

When the season is over, the frames, which were simply set on top of manure, are either carried away and stored, or even knocked down entirely and stored and the manure spread on the land for crops. This method is economical in lumber, as a 12-inch board on high side, 8-inch board on low side, makes a handy frame. As a protector we use heavy plant bed cloth tacked to frames, made out of 1x3 lumber, these frames 3x6. In cold weather these are a great protector on the glass; in milder weather they are used on crops to be hardened off, and on freshly transplanted stock they make a fine shade. In the summer they are also handy for shading tender crops and should be more generally used. A good depth of well-firmed hot manure is 12 inches. Greater depth is rarely needed, and less will do a little later in the season.

Forcing Vegetables Under Glass.

Synopsis of a paper read by Wm. Turner, Oceanic, N. J., before the Massachusetts Horticultural Society, February 8, 1908.

Rapid advancements have been made in recent years in all greenhouse products, especially in forcing of vegetables. Each and every grower of greenhouse vegetables has his own way of doing things, but we are all working for one aim—that is to produce the best we can from a given space. The first thing to be considered along those lines is the house or houses best adapted for the work during the winter months. Twenty or 25 years ago the average house at our disposal was anywhere from 10 to 20 feet in width; anything wider was looked upon with disfavor. But experience has taught us in recent years that a house anywhere from 25 to 50 feet in width is to be highly recommended, according to the demands. The house that I would recommend for the private establishment would be, say from 20 to 28 feet in width. Build as light a house as possible so that there will be no shade to speak of. As regards heating, either steam or hot water is successful.

There is quite a variety of vegetables that adapt themselves to forcing. I shall divide these into two grades, as it would be impossible to grow them all in the same temperature. Take, for instance, lettuce, cauliflower and radishes. These may be grown successful in the same house, while cucumbers, tomatoes, beans, etc., require a higher temperature. Vegetables are not particular as to soil. Experience has taught me that some soils will take much more food than others. There can be no hard and fast lines laid down in regards to how much fertilizer a certain crop shall receive for best results. Growers in different localities and different soils, by studying the condition of growing crops can best judge as to how much food will be of benefit and the grower who carves his own road, using his own good judgment, will usually come out the most successful. We know, to produce good crops, potash, phosphoric acid and nitrogen is a necessity. This should be applied to the soil, in some shape or form. I am confident that whoever has given this question study and deep thought will stand by their own good judgment; self taught experience one never forgets.

LETTUCE.

The demand for lettuce is ever increasing, and without doubt this is one of the main winter crops. Whether for private or for commercial purposes, monstrous houses have been built for this industry within the past few years. A sandy or gravelly loam is to be preferred, more especially for the head lettuce which is the main lettuce grown for the New York market. Years ago lettuce was grown on raised benches. It was thought a benefit to have the plants near the glass, but this was certainly a mistaken idea. It is too hot for the roots, and plants require too much water. Lettuce, to be appreciated, must be grown quick and without a check, therefore to produce a quick healthy growth, a rich soil is necessary. Eight inches of good soil is none too much. A week or so before planting, a good coat of well rotted farmyard manure should be dug in; then, when ready for planting, a light application of hard wood ashes raked in. In the vicinity of New York the first lot of seed is sown around the latter part of August. Then a sowing every week or 10 days for a succession. The aim should be to keep a constant supply ready for use all through the winter months. The seed may be sown at one end of the house or in flats. When large enough to handle transplant again into flats or in the bed four inches apart. In three or four weeks they will be ready to set in their permanent quarters, planting in rows about eight inches apart each way. One great advantage in solid beds is, the crops do not require water very often. If the surface soil can be kept on the dry side, providing there is plenty of moisture below, the roots will have a tendency to work down, giving the plants health and vigour which is all important for best results, but a thorough good watering just as they commence to head will help to increase the size and quicken maturity. Give the plants all the air possible. Too much coddling is a mistake, as the foliage will get soft and then be in a condition to catch any disease that comes along. There is more disease brought on through careless airing than any other one cause, while we are growing lettuce artificially.

When growing in the open garden lettuce makes ideal growth when the temperature

ranges around 45°—50° at night, with 10°—15° higher during the day. Always put a crack of air on before the house rises much above night temperature and gradually increase as the conditions require. When the first crop is gathered there must be others ready to plant at once, keeping the space filled. In forking over the bed after every crop, a sprinkling alternately of bone meal and wood ashes is beneficial. It will take about seven weeks after planting till ready for use. The most dreaded fungus or disease is commonly called sunburn, although this is an erroneous idea, as the disease spreads more readily in a spell of dull weather than when it is bright. When a crop is badly infested it is useless; better throw it out, take the top soil out and replace with fresh or sterilize the soil. Lettuce requires very little surface feeding, provided it is growing in rich soil. A crop may be hastened somewhat by a watering once with nitrate of soda, say a level tablespoonful to three gallons of water. As the days increase in length there is not so much danger in over-feeding. There is quite a variety of lettuce adapted for forcing purposes, the best thing the head lettuce Boston Market, Glass House and Ideal, the last named being one of the best that I have ever grown inside. It was one of Weeber and Don's novelties a year ago.

CAULIFLOWER.

Probably there is no vegetable more improved by growing under glass than cauliflower; it requires the same treatment in every respect as lettuce, in regard to temperature, solid beds, etc., but the soil used may be of a trifle heavier nature and it is perfectly safe to feed it considerably more than lettuce, even during the short days. I would not advocate starting young plants before the first week in September. If started before that date they are apt to head up prematurely or "button." Sow according to the number of plants required. Transplant once about four inches apart, then in about three weeks transplant again where they are to mature in rows 18 inches apart and 15 inches in the rows. The first crop should be ready to cut from December on. For a succession sow seed every two weeks. I question if there is another vegetable forced that will take as much nitrate of soda to good advantage as the cauliflower. They will take at least three waterings with soda to good advantage, with a watering just as they begin to head up with cow manure water. This crop takes considerably more water than the lettuce. Snowball and its varieties, the Early Erfurt and First and Best are admirably adapted for forcing purposes.

RADISHES.

Radishes are easily produced under glass. I have seen it recommended to take a crop of radishes from among lettuce or other crop, but however, I am not in favor of this method. Radishes are rank feeders; they delight in a fairly sandy soil, well enriched with well decayed farm yard manure. Seed should be sown in rows eight inches apart, fairly thin, and, before they get crowded, they should be thinned to two inches in the rows. Radishes to be appreciated must be crisp and tender. If left in the bed too long they get soft and pithy. The very best seed obtainable should be used and if there is much seed noticeable it would pay to screen this out, the object being to have all the seed near the same strength, so that the crop will come even. A batch of radishes properly handled should be cleaned off with a couple of pullings. Where it is necessary to keep up a supply, seed may be sown every five or six days according to demands, and if possible keep them in solid beds. For forcing select those varieties that do not produce much top, Non Plus Ultra, for example. Radishes can be grown successfully in a lettuce house temperature.

TOMATOES.

Coming now to a class of vegetables that will thrive better in a warmer climate: Good tomatoes can be had either in solid beds or raised benches; for the winter months raised benches are to be preferred. Start the plants in time so as to have a good set of fruit before the shortest days set in; this will give a heavy picking through the shortest days. To get this, seed should be sown not later than August 1. For winter forcing I prefer growing on to 5-inch pots, potting firm to produce stocky, short jointed, thirfty plants. A good rose soil would be ideal for tomatoes, with about half the quantity of manure. Four or five inches of soil is sufficient to mature a heavy crop of fruit. Supposing the house to be running east and west, the tomatoes may be planted in rows crosswise the house, 18 inches apart and 15 inches in the rows, growing the plants single stem, pinching away all lateral growth, having a wire running across say four or five feet above the bench for each row to secure a five-foot stake to. After planting, the soil should be made firm, even pounded down. We are not anxious for the plants to reach the five feet too quick, but rather keep them short jointed. From such plants we expect a heavy crop, with not much difficulty in setting the fruit. This crop should be grown on the dry side, particularly during the short days, otherwise the result will be long jointed, soft growth, but give the plants a thorough watering when they need it. Oftimes they will look dry on the surface, but if the foliage looks vigorous, with no signs of wilting, they do not require water. During the winter months it will be necessary to pollinate the flowers. This may be done very rapidly at midday when the pollen is dry. Tap the flowers gently, allowing the pollen to drop on the finger. Then just allow the stigma to come in contact with the pollen lodged on the finger. This crop will take a considerable amount of feeding after the vines are well set with fruit. In chemical fertilizers, potash and phosphoric acid should be applied in a much larger proportion than nitrogen, giving a firmer growth to both vines and fruit. For an early spring crop of tomatoes seed may be sown any time in December, grown on in pots for a while, then planted as recommended for the winter crop, or they may be planted in solid beds. One of the main features in keeping a healthy vigorous growth is the temperature. I am not an advocate of high temperature, say 60° at night, 70° to 75° in the day according to conditions of weather and air at every available chance. Two of the best tomatoes I ever tested for forcing purposes are Comet and The Don. I think if anything The Don is the better. Stirling Castle is a very free setting tomato, but rather small.

CUCUMBERS.

The demand for cucumbers is equal to that for the tomato, and there is a call at all seasons. The white spine types are grown principally in the commercial establishments, while on the private places we oftener see the English or long Telegraph type. Both types are worthy of a place in the forcing house. Cucumbers can be grown successfully during the short days with a comparatively small amount of soil. They delight in a sandy loam, that cut from a pasture preferred, laid up for a month or so before using. Avoid using green manure. If farm yard manure is used, have it thoroughly decayed. The English varieties are better planted so the vines can be trained on trellises about 15 inches from the glass. We usually make our first sowing some time in August in small pots, one seed in a pot, then, before they get pot-bound, shift into four or five inch pots. From those, plant on raised benches three to three and one-half feet apart, using say three shovelsful of soil for each hill. As the roots work through, keep adding fresh soil with a little fertilizer.

A bench five inches deep and two feet in width is sufficient to mature a heavy crop of fruit. Heat, moisture and careful airing are three important items to contend with. Liquid manure may be applied when the vines are in heavy crop; that from the cow barn is the best. Be very careful in regard to feeding during the short days, otherwise it will damage the vines rather than benefit them. A temperature of 65° at night, 75° by day is necessary for the Telegraph types, or 80° with sun heat. The white spine types may be grown successfully in a trifle lower temperature. English cucumbers need no fertilizing, unless it is necessary to procure seed.

BEANS.

While beans are not much grown commercially, under glass, still they are very acceptable for the private table, and far superior to any that can be procured in the open market during the winter. When grown successfully it is surprising the amount that can be gathered. There are two methods of growing this crop, in pots or planted on raised benches. If grown in pots half fill 6 or 7-inch pots with fairly rich porous soil, then plant about six beans in a pot. As the beans grow keep adding soil by degrees, until filled. It takes about seven weeks to mature a crop grown in a temperature of 60° to 65° at night with 70° to 75° day temperature. I prefer the bench system, as there is not so much labor and attention required, and results are equal, if not better. Plant in rows across the bench 18 inches apart and the beans about two inches in the rows. One of the worst enemies is red spider. If that once gets started it spreads rapidly. Moisture and light spraying is the remedy. Careful airing is necessary or mildew will make its appearance and when this once attacks the foliage it checks the growth severely. Black Valentine, Wonder of France, Suttons Forcing and Suttons Perfection are all adapted for forcing purposes.

RHUBARB.

I do not consider the forcing list complete minus the rhubarb. There is considerable demand for this wholesome vegetable both private and commercially, and it requires very little attention. The main secret is if the roots are dug for forcing they should get a thorough freezing before they are taken into the forcing house. Leave as much of the soil adhering to the roots as possible. These roots may be forced successfully in the mushroom house or under the tomato house bench, setting the roots close together and filling in the hollow spaces between the roots with soil or leaf mould; anything to hold moisture. Every two weeks a fresh supply of crowns may be brought in according to demands.

Davis Perfect Cucumber

I have a quantity of fine stock of this seed to offer the trade. When first introduced, I secured a quantity of the seed from the introducer and from the crop I grew selected the finest for stock seed. From this I grew the seed I now have to offer. Let me make you prices.

My contract list for 1908 on the finest specialties in vine seeds will be ready in a few days. If you wish quotations, let me know.

The prices of indoor vegetables at leading points February 22 were as follows: Chicago, mushrooms, 25 cents to 50 cents per pound. Cincinnati, cucumbers, $1.75 to $2 per dozen; mushrooms, 40 cents to 50 cents per pound. St. Louis, cucumbers, $1.50 to $1.75 per dozen. Boston, tomatoes, 25 cents to 35 cents per pound; cucumbers, $9 to $12 per box.

Hunt Grazing Decision Affirmed.

Washington, D. C.—United States Attorney Carl Rasch, of Montana, has notified Gifford Pinchot, chief of the United States forest service, that the United States circuit court of appeals at San Francisco, has affirmed the decision of Judge Hunt in the grazing trespass case instituted by the government against Thomas Shannon. No copy of the decision has yet been received by the forest service, but it is believed that it forbids stockmen to allow their cattle to drift upon the national forests, and that the national forests need not be fenced to prevent such drifting, although the state laws may make such fencing necessary for private lands.

In December, 1904, Shannon allowed his cattle to drift upon the Little Belt National Forest in Montana. To put a stop to this, suit was brought by the United States, and on March 18, 1907, Judge Hunt, in the United States circuit court for that state, rendered a decision in favor of the government, and issued an injunction perpetually restraining Shannon from allowing his cattle to drift upon the forests. Montana has a fence law by which land owners must fence their lands before they can obtain redress from stockmen whose cattle, feeding upon the open public domain, range upon and injure the private lands.

Shannon's counsel argued that this state law should apply as against the United States, but Judge Hunt held that the power of congress over the public lands, including the national forests, is complete; that congress has lawfully delegated to the Secretary of Agriculture the authority to make regulations to protect the forest; that the secretary had properly made a regulation that cattle must not range upon the forests without permit, and that consequently Shannon was a trespasser when he allowed his cattle to drift upon the Little Belt Forest, although it was unfenced. Shannon appealed from this decision, and as Montana is in the Ninth federal judicial circuit, which embraces most of the Rocky Mountain and Pacific states, his appeal was heard by the United States circuit court of appeals for the Ninth circuit, sitting at San Francisco. The court has now affirmed Judge Hunt's decision and this judgment is binding upon all federal courts in the circuit. A similar case is pending in the United States circuit court for Colorado, which is in the Eighth circuit.

VAUGHAN'S NOVELTIES and SPECIALTIES for FLORISTS

ASTER, Vaughan's Upright Branching.

White re-selected, extra choice, trade packet, 20c.; oz. $1.50.

ASTILBE DAVIDII.

This is one of the most attractive and remarkable herbaceous plants. It is quite hardy, and a native of China, growing in shady places and by water courses. It is a strong-growing perennial, with elegant tufted leafage and graceful spikes of deep rose-violet or mauve-colored flowers, borne on stems 6 or more feet high. Trade pkt., 25c.; ¼ oz., 60c.

DAHLIA, Exhibition Single.

A very choice selection from large single flowers, many with broad edged petals in various colors. This is a particularly early flowering strain. Seed sown April 10th last year produced blooming plants July 5th which continued to flower until fall. Trade pkt., 35c.

SHASTA DAISY.

Alaska, flowers very large, pure white, on long stiff stems.
California, flowers very large, similar to above, but the buds and half-opened flowers are of a most pleasing clear pale lemon yellow with two rows of petals. When a day or two old these gradually change to pure white.
Westralia. This is distinguished by its branching habit. Buds and newly-opened flowers are of a pleasing cream-color, semi-double, 3 to 4 inches across, and are produced on fairly long stems in great profusion. Price: Any of above, ⅛ oz., 35c; oz., $2. The three colors in even mixture, same price as for separate colors.

CYRTOMIUM FALCATUM. PTERIS WIMSETTI.

This is superior to Wilsonii, as it does not rust.

We just secured from a fern specialist a grand lot of seed of these two ferns, both of which are necessary in every greenhouse. While this stock lasts we make the low rate of $1 per 1-64 oz. (about 10,000 seeds); $1.90 per 1-32 oz.

PRIMULA OBCONICA GIGANTEA ROSEA.

The well-formed flowers are the most pleasing pink, are 1½ inches in diameter and clusters are 4 to 6 inches across. With good culture this Primula attains giant dimensions and is equally valuable for pots and cut-flowers. Trade pkt., 50c; 1-32 oz., $3.

PRIMULA OBCONICA GIGANTEA KERMESINA.

Like the above, but bright crimson. Pkt., 35c.

GYPSOPHILA ELEGANS ALBA GRANDIFLORA.

Every florist should have a line of it for cutting. It comes up and blooms in a few weeks' time, and several sowings should be made during the season to keep up a supply. Trade pkt., 10c; oz., 20c.

PRIMULA KEWENSIS.

Awarded a First Class Certificate at the Royal Horticultura Society.

This charming addition to greenhouse Primroses originated at the Royal Gardens, Kew, as an accidental cross between Primula floribunda and P. verticillata. The plant is a strong grower, with bright green leaves, numerous erect flower-scapes, 10 to 18 inches in height, producing flowers in whorls at intervals along their whole length. The flowers are fragrant, bright yellow in color, with a slender tube and spreading limb, nearly 1 inch in diameter. As a winter-flowering decorative plant it is an acquisition. The florif-erousness in a very small state is quite remarkable; the spikes are useful for cutting, and the flowers continue to open for some time after being placed in water. Small plants in bloom may be effectively used in table decorations. Pkt. (150 seeds), 35c.

ZEA JAPONICA QUADRICOLOR PERFECTA.

This splendid variety differs from Zea Jap. quadricolor by its dwarfer and bushier habit and also by the more intense coloring of the broad yellow, green, rose and dark red stripes on the leaves. The male flower spikes are black, the sheaths of the leaves and stems reddish brown and the seeds dark red. It will be found very valuable for borders or planted singly, and even for pots. Trade pkt., 15c.

VAUGHAN'S IMPROVED SCOTCH VIOLAS OR TUFTED PANSIES.

The Scotch Violas or tufted Pansies have of late years been greatly appreciated. There are a great number of varieties varying in color from pale lavender to deep rich purple with many charming intermediate shades. They are very free flowering, and cannot be surpassed for bedding purposes; in light rich soil and a moist situation they will continue to bloom from spring till late in the autumn. They are also useful for ribbon borders, where they make a fine display. This new strain produces flowers with "faces," every flower having a distinct face, which puts a remarkable amount of life in a bed of these. Trade pkt., 25c.

VAUGHAN'S SEED STORE,

14 Barclay St., NEW YORK. **84 and 86 Randolph St., 202-208 W. Randolph St., CHICAGO.**

Illinois State Florists' Association.

CLOSING BUSINESS OF CONVENTION.

Wednesday morning's session included an address by Mrs. Walker, president of the Springfield Woman's Club, on "Springfield Beautiful."

J. F. Ammann made a stirring talk on his election as secretary, outlining the work of the association briefly and offering his services freely for all things connected with his office and the association.

A box of Sarah Hill and Lawson-Enchantress carnations from the B. K. & B. Floral Co., Richmond, Ind., arrived Wednesday evening in good shape.

Thursday morning's express brought a box of Mrs. Jardine from Robt. Scott & Son, Sharon, Pa. They were fine blooms and carried well, although they had probably been snowbound.

Prof. Irish, of the National Council of Horticulture, was not able to attend.

Springfield was chosen for next year's meeting.

WESTBORO, MASS.—The N. P. Brown place on East Main street appears to have been let go out of business entirely and the flowers allowed to get frozen. The proprietor, it is said, could not make it pay, so closed it up.

Report of Advisory Committee.

BY W. N. RUDD.

Your committee begs to report, as required by law, a summary of its proceedings up to this date. The first meeting of the committee was held June 25, 1907, at Urbana. At this meeting W. N. Rudd was elected secretary. A general discussion of the situation and of the needs of the trade took place. It was decided that from the funds available for the current year, namely $7,500, $3,000 should be set aside as a building fund. On the motion of J. Heinl, it was decided that a sum not exceeding $2,500 of the appropriation for the current year should be expended to cover expense of a field inspector and for an investigation into the damages and ravages caused by thrips especially, and other insects and diseases infesting plants and vegetables grown under glass in Illinois, and for conducting experiments in controlling and preventing destruction and damages by such insects and diseases.

A careful investigation of the facilities of the university and the experiment station carried out by the members of the committee, demonstrated that the present greenhouses by reason of faulty design, bad location and defective construction were inadequate and not adapted to the carrying forward of the necessary work covered by the appropriation made by the state and that the construction of an up-to-date commercial greenhouse plant at the experiment station was essential.

It also appeared that the use of over $3,000 of the annual appropriation of $7,500 for building purposes would so cripple the department that the work could not be carried forward with any degree of success, and it was plain that the sum of $3,000 on the other hand, was inadequate to erect commercial houses suitable for even present use. Under these circumstances the authorities in charge of the experiment station were requested to make a careful survey of the situation and to appropriate from general funds available, a sum sufficient, in addition to the amount before specified, to make a start in building a commercial greenhouse plant, such as would be erected by a man desirous of going into business for profit with a reasonable, but not excessive, amount of funds at his disposal. The idea expressed was that the requirements of the situation called for the erection of a modern commercial greenhouse plant, due attention being paid to economy in cost of construction, economy and efficiency in operation and the greatest possible capacity for intensive culture consistent with the previous limitations, proper provision to be made for future extensions. In other words, it was the sense of the committee that such a beginning in building should be made as a man thoroughly conversant with trade conditions and with a moderate amount of money at his command, would erect for the purpose of growing plants and cut flowers under glass for a profit.

A subsequent meeting was held in Chicago, October 17. On the suggestion of J. C. Vaughan, it was decided that, as soon as feasible, a general summary of the work done in the various experiment stations in the line directly covered by our appropriation, namely: the growing of crops under glass, be presented to the committee.

A. C. Beal presented a summary of the published work on thrips and made a number of recommendations. Dr. Forbes, the state entomologist, offered the assistance of his department in so far as other requirements and the limitations of his appropriation would allow. This offer was gladly accepted, and it was

FORMOSA
LILIUM LONGIFLORUM

Ask your dealer for our own special grown stock or write us direct for quotations. Only a limited quantity available for the coming season 1908. Delivery will be made the first part of August.

The bulbs are thoroughly ripened one month before the Bermuda Harrisii and are considered far superior in quality as they are **entirely free from disease.**

Careful trials were made for two years and were so successful that we imported over 300 cases last season. Our cases will be marked Y. N. Co.

Yokohama Nursery Co., Ltd., 31 Barclay St., New York.

decided that Mr. Beal should take up the work in co-operation with Dr. Forbes' department, it being generally understood that such work as could be best handled by the entomological department should be undertaken by that department and that such other work as might be more conveniently handled in the floricultural department should be taken in charge by that department.

A proposition was presented by A. Washburn of Bloomington, allowing the use by the floricultural department of the university of a greenhouse in his plant for experimental purposes. This proposition seeming to be the most advantageous of any before the committee was accepted. A third meeting of the committee was held in Chicago November 9. At this meeting a short statement of the conditions and progress of the work was made by Dean Davenport and by Prof. Blair. Mr. Beal also reported more in detail as to the progress of the field work on thrips. J. J. Davis, assistant to Dr. Forbes in the entomological department, gave a most interesting report on the preliminary practical work done. It was decided at this meeting to go on with the investigation of the life history of thrips with the hope that new facts might be brought out which would indicate the vulnerable point on which to attack these insects, which in the opinion of the committee are causing more financial loss to the growers of vegetables and flowers under glass in Illinois than any other disease or insect or, possibly, than all others put together.

Preliminary sketch plans of the proposed greenhouse plant to be erected at the station were shown and discussed, and it was decided that these plans should be submitted to the various members of the committee, individually, for criticism, after which complete plans and specifications for the erection of the houses should be got out. This ends the formal proceedings of the committee up to the meeting which is called at this place for this evening. The secretary begs to add the following.

Through the courtesy of the Foley Manufacturing Co. after the sketch plans made by them of the proposed greenhouses had been submitted to the various members of the committee and the representatives of the department, their architect proceeded to make thorough investigations including consultations with expert heating engineers, and has prepared and turned over to the writer a complete set of plans and detailed specifications. These plans and specifications, of course, are subject to careful revision and criticism by the committee and by the department.

The writer is convinced that after these plans have undergone the above revision, they will provide for the most modern, complete, and up-to-date commercial greenhouse plant of reasonable cost that exists at this time in the United States, that they will embody no fads nor freakish construction, that they will be economical and yet will sacrifice no valuable point for cheapness and, in fine, will come pretty close to being a model for commercial men to study and pattern after. The plans and specifications will be displayed at the close of the reading of this paper and it is hoped that every member present will carefully examine them and criticise them, it being understood that no person shall be at liberty to condemn any point unless he is prepared to suggest something better.

The writer cannot close this report without testifying to the appreciation of the committee of the enthusiastic manner in which Dean Davenport, Prof. Blair and the officials of the experiment station have taken up this work. The funds of the station are inadequate to its needs in other lines and yet these gentlemen have added $5,000 to our building fund which will enable them to construct and equip the houses complete and leave us still a fair sum for operating expenses. They are ready and anxious to push our work in every possible way but funds must be provided. This is your part of the work. When the time for the next appropriation arrives we must collectively and individually see to it that this appropriation is doubled.

We want to know how to eradicate thrips. We want to know how to fight other insect pests and diseases. We want to know a whole lot more about fertilizers, and about soils, and about new methods of culture. We want to know whether there are not locations in this state where bulbs, plants and seeds for which we now send our good money abroad can be produced cheaper and better. Above all and beyond all, we want a great school where our sons and daughters can be educated into our business instead of away from it.

Money in Cottonwood.

Lincoln Crowell, forest assistant of the Department of Agriculture, estimates that a 300 acre tract of cottonwood trees planted on the banks of the Mississippi in 1904 by Ferdinand Neidringhaus between Granite City and Nameoki, Ill., will be worth $350,000 to the owner. The trees were a year old when planted and were designed to prevent the erosion of the river's bank at that point and to protect the land from overflows.

In all 544,500 trees were planted, but only about 150,000 of these are expected to be thriving at the end of 15 years. The commercial value of the timber at that time will be about $7 per 1,000 feet, Mr. Crowell estimates. Three trees will average 1,000 feet of lumber.

The trees have increased their diameter by an inch a year, so that 20 years after planting they should be 20 inches thick. Cottonwood is used in manufacturing boxboards, excelsior and packeting for bottles and pails. Mr. Crowell will visit the Neidringhaus plantation to obtain photographs and to get information on which the Department of Agriculture will probably urge the cultivation of cottonwood along the river between Alton and Memphis.

PROVIDENCE, R. I.—Over $100 was raised, and presented to the widow of Henry Hobday, who was killed recently, by the employes of J. A. Budlong & Sons Co., at whose greenhouses Hobday worked.

The Nursery Trade

American Association of Nurserymen.
J. W. Hill, Des Moines, Ia., President; C. M. Hobbs, Bridgeport, Ind., Vice-President; George C. Seager, Rochester, N. Y., Sec'y.
Thirty-third annual convention to be held at Milwaukee, Wis., June, 1908.

PERRIS, CAL.—L. J. Marshall is preparing to plant 20 acres of Eucalyptus rostrata. About 1,000 trees are to be planted to the acre.

THE Kapok fibre tree is described in No. 3100 of Daily Consular Trade Reports, Department of Commerce and Labor, Washington, D. C.

KNOXVLILE, TENN.—The Peters Nursery Co. has been incorporated by S. V. Carter, L. D. Tyson, G. W. Callahan, R. P. Gettys and R. E. Gettys; capital, $25,000.

WATERVILLE, ME.—Headquarters have been established in the Savings Bank building by the Phoenix Nursery Co. of Bloomington, Ill., which will be the general office for the state.

WINCHESTER, TENN.—J. W. Shadow of the Cedar Hill Nursery and Orchard Co. has made a voluntary assignment in favor of his creditors. The estimated cash value of the assets is $60,000 and the liabilities $42,000.

THE interior flats of Jamaica Bay, N. Y., will, if the movement for the purpose proves successful, be turned into an immense water park in which will be enjoyed all the sports of smooth water. Harold A. Caparn of the American Society of Landscape Architects is interested in and has reported on the matter.

BROOKINGS, S. D.—N. E. Hansen, of the experiment station here, is distributing the Hanska plum, a cross between the wild northwestern plum of America, Prunus Americana, and the fragrant apricot plum of China, Prunus Simoni, popular in California orchards; also three or more other plums, crosses made, as we understand it, at the station. Their circular of new varieties should be in the hands of live nurserymen.

THE following circulars have been recently issued by the forest service of the Department of Agriculture: "Forestry in the Public Schools," by Hugo A. Winkenwerder; "The Seasoning and Preservative Treatment of Arbor-Vitae Poles," by C. Stowell Smith; "Forest Tables—Western Yellow Pine," by E. A. Ziegler; "What Forestry Has Done," by Treadwell Cleveland, Jr.; "Production of Veneer in 1906;" "The Estimation of Moisture in Creosoted Wood," by Arthur L. Dean.

NEW YORK.—A movement has been started by the Municipal Art Society to have the city acquire for park purposes the western slope of the ridge on which stands Fort George, with adjacent land, and to acquire an area bounded approximately by the ship canal, Kingsbridge road, Broadway, Seaman avenue and Isham street. Both of these tracts are rocky, wooded heights, practically useless for building purposes. Landscape Architect Harold A. Caparn, who has made a report to the society regarding the possibilities of these areas, advises that the city acquire land in addition to that needed for public use and sell it again after the improvements are made so as to recoup itself for the expense.

Corylus Colurna.

Corylus Colurna, or the Constantinople hazel, as seen by the illustration herewith, is a showy, handsome tree, said to grow 70 feet high in its native habitat in southern Europe and thence east to the Himalayas. The tree illustrated is growing at Highland Park, Rochester, N. Y., where, John Dunbar says, it has been found hardy, and attains a height of 30 feet or more. It forms an irregular pyramid, being handsome in outline, the lower branches sweeping the ground, the higher ones billowing out in the characteristic manner of the genus. The leaves are roundish and slightly lobed. Although this tree produces a nut of good quality it is never likely to be grown for this purpose, but it is certainly a handsome tree and should be planted freely in all localities where trees hardy in New York will succeed.

Facts About Conifers.

In an excellent address given recently, John Dunbar gave some good advice to private gardeners and growers, from which we have made the extracts below. Mr. Dunbar's long experience as superintendent of parks in Rochester, N. Y., gives special value and interest to anything he may write or say on the subject of trees. We have no higher authority on their culture and hardiness in this country and we are glad to have had the opportunity of placing these notes before our readers:

"In the older settled portions of this country conifers have been extensively planted on private estates, and a few interesting collections have been formed. Undoubtedly the finest private collection in this country is the Hunnewell pinetum at Wellesley, Mass. The oldest trees are about 65 years of age and are now in the stage of what might be termed adolescence, and show a high state of intelligent cultivation, and perhaps from no other source in this country can such object lessons be learned about the hardihood of the best species and varieties for the northeastern states.

"The winter of 1903-1904 was the severest test that conifers have been subjected to in many years in this country. A few conifers we were experimenting with, were killed outright, and quite a few were severely injured. We were, therefore, able to form important deductions about the hardihood of a number of species.

"Some species of conifers are liable to attack from different insect pests. During the past two or three years, the arbor-vitæ has been infested by a small caterpillar which bores in the tips of the young twigs, and turns them yellow and rusty and soon gives the whole tree a sickly appearance. It is said to be a

CORYLUS COLURNA.
Growing at Highland Park, Rochester, N. Y.

serious pest in some parts of Canada. Dr. James Fletcher, entomologist of the experimental farms in Canada, gives a brief account of it in his annual report for 1906. Dr. Fletcher states that large numbers of parasites are found active in connection with the insect and there is every reason to believe the outbreak will soon come to an end. I have seen its ravages in natural arbor-vitæ plantations in western New York. I do not know to what extent it prevails in this country, as the account in the Canadian report is the first published description I have seen of it. From the nature of its operations it can be seen that it is difficult to deal with by any spraying methods.

"The mite known to gardeners as red spider is a very serious pest on some spruces and junipers in many parts of this country. It is always worst in a dry season. It can be readily controlled where there is a strong pressure of water under command applied with a hose, but that is rarely available. Water applied with a hose from a powerful spray pump will dislodge it. John F. Johnston, superintendent of Paul Dana's estate in Long Island, who is an expert cultivator of conifers, has lately been using sulphur to destroy it on spruces and junipers. He blows it on with a bellows in the morning when the dew is on the branches, followed at intervals throughout the summer with occasional strong hose sprayings of water. Mr. Johnston tells me that the experiments which he has conducted for a short time, appear to be effective and satisfactory.

"The white pine weevil causes serious injury in many parts of the country. It sometimes attacks spruces and other pines, but not to any serious extent. The beetle lays its eggs in May, on the shoots of the previous year. During June and the first part of July the larvæ feed on the inner bark, and the shoots turn yellowish and brownish and soon die down to the base of infestation. If the infested terminals are cut off as soon as detected in June and July and burned, the broods of the weevils will be destroyed. Professor A. D. Hopkins, entomologist of the Department of Agriculture, Washington, D. C., states that this, though, may destroy large numbers of valuable parasites. He recommends placing these infested shoots in a tight barrel securely covered with wire fly-screen netting, so that the parasites may escape, while the beetles perish. By October 1 the weevils will be dead, and the netting may then be removed, but the barrel and its contents should be left until the following June, to allow the escape of the later developing parasites."

The speaker gave brief general descriptions of what he considers the best and hardiest conifers for the north and northeastern states. He took up the pines first. The section which includes the white pines, or those with five leaves in a sheath, is perhaps the most ornamental, he said. He paid special attention to the handsome and desirable white pine, the Swiss stone, and Cirean white, the mountain, Macedonian, Japanese white, Lambert's, Bhotan, the pitch, the lace bark, the yellow, Jeffrey's red, Swiss mountain, and many other varieties.

Larches came next in order, and Mr. Dunbar described the European larch, the Japanese native larch or tamarack, which, he said, is not as much planted as it should be, as it is distinct and very picturesque. Spruces are of great ornamental value, but the Norway spruce he declared he had little respect for. The hemlock spruce was said to be among the most beautiful of conifers. The late Josiah Hoopes, who wrote an admirable treatise on conifers, said if he were restricted to the choice of only one evergreen, he would take a fine specimen of the hemlock spruce.

The firs hold an important place in ornamental planting, and there are few trees that convey such conceptions of nobility and majesty. The Japanese umbrella pine with its prim conical habit is an interesting conifer and perfectly hardy. "I remember," said Mr. Dunbar, "that we grew these in pots in England, and I was much surprised when I saw them for the first time in this country looking well and happy in zero weather."

The address concluded with descriptions of native, western, Chinese and Japanese arbor-vitæ; cedars, junipers and yews. The Japanese ginkgo, a deciduous conifer, has shown, he said in closing, a great hardihood in the northeastern states and grows to a large size and attains mature beauty. Its usefulness as a street tree has been shown in Washington.

Holly From Seed.

ED. AMERICAN FLORIST:—

Please give me some information in growing holly from seed. GARDENER.

We reprint John Dunbar's answer to a similar query which was given in our issue of January 18: "The seeds should be separated from the pulp, and sown at once in a flat of sandy soil, and the surface of the soil should be covered with a layer of sphagnum moss, or any similar material, to keep the surface of the soil cool and moist. The flat may be kept in a cold frame, or a cool greenhouse, and they will germinate the second year. The third year they should be removed from the flat and planted in a nursery bed, a few inches apart, and transplanted again according to their requirements. The growing of hollies from seed is a slow process, and requires much patience, and unless you wish to go into this experience for enjoyment, we would advise you to purchase the plants from a nursery."

British Horticulture.

FROM THE BRITISH TRADE PAPERS.

USEFUL SPRING SALAD PLANT.—The first three or four months in the year are the worst for maintaining the salad supply, and especially so after a succession of severe frosts which have destroyed all autumn-sown stock in the open ground. Endive up to this date has been available, but now this is over unless given glass protection. A good substitute for endive and lettuce is Carter's Endive-Leaved lettuce, a very good salad plant and most valuable on account of its rapid growth. The leaves resemble endive, being deeply serrated, and even in a young state very good for the salad bowl. With a frame or glass I have had useful cutting material in a very short time. Sown in boxes and cut over when quite young it may be had fit for use under a month. It is also equally valuable for sowing on a warm border for first supplies. Several sowings should be made from February to May, the April and later sowings being made on good ground in the open.

AUBRETIA BRIDESMAID.—The soft pink aubrietias supply a want in the garden at this season, and Bridesmaid is one of the most pleasing of those possessing this tint, one which is not at all plentiful. It is paler and more delicate in color than Moerheimi, and one can hardly say that the two are rivals, for each has its own value. For those, however, who wish an aubretia of delicate pink, almost blush hue, this neat little variety can be confidently recommended. It is one of several raised and sent out by Barr and Sons, and it certainly reflects credit on the firm with whom it originated. Its habit is closer and more compact than that of Moerheimi, so that it quite lacks the looseness of growth and rather ungainly habit of a few of the named aubrietias. One does not refer to Moerheimi as one of these, for that good aubrietia is neat and excellent in its growth.

RHODODENDRON INTRICATUM.—When shown April 2, a first-class certificate was given to this pretty little species from western China, with which everyone was delighted. It is quite a pigmy, flowering when but a few inches high, though we are told by E. H. Wilson, who introduced it when traveling, for Veitch, that it reaches a height of one foot to three feet. It was exhibited under the name of R. nigro punctatum, but was afterwards proved to be a distinct species. For associating with the smaller-growing members of the genus it bids fair to be a decided acquisition, for it is said to have proved quite hardy at Coombe Wood. The flowers are each about three-quarters of an inch in diameter, deep lilac in color, and borne in great profusion.

VITIS LEEOIDES.—From China we have had within late years many distinct and ornamental members of the vine family. In this, one of the most recent, the leaves are made up of three or five oblong leaflets, green above and purplish underneath. As climbing plants for pergolas, etc., are now so much sought after, this will, doubtless, become popular.

E. SCHRADER, New Springville,
RICHMOND BOROUGH, N. Y.

CARNATION CUTTINGS.

We are in unusally good postion to supply exceptionally well-rooted, healthy stock. We have such a large quantity of flowering plants that we propagate only from heel cuttings from flowering shoots. Our cuttings are rooted in light, sunny, airy, houses, and we are sure will satisfy the most critical buyer.

A prominent carnation grower writes: "You seem to be **the only firm in the business that knows how to pack stock and have it reach the buyer in good condition,** and I have always found your cuttings cheaper than the same varieties at much lower figures.

While our prices may not always be the cheapest, we certainly can give, quality considered, as good value if not better, than is obtainable anywhere.

WINSOR, which we introduced last year has proved to be the finest novelty introduced in years. We think it is the most profitable variety grown to-day, considering its fine color, splendid keeping qualities and productiveness. When properly grown it leaves little to be desired, and almost every one succeeds with it.

White Enchantress, the best all-round White Carnation, on account of its large size, long stem, earliness and productiveness. Our White Enchantress exhibited at the Carnation Convention at Washington, was the only White Enchantress exhibited that received an award.

Strong rooted cuttings, now ready for delivery, from sand, $6.00 per 100, $50.00 per 1000; from soil, $7.50 per 100, $60.00 per 1000.

We offer, also, **Beacon** and **Red Chief**, from sand, $6.00 per 100, $50.00 per 1000; from soil, $7.50 per 100, $60.00 per 1000, also **Victory, Melody** and **White Perfection,** from sand, $4.00 per 100, $35.00 per 1000; from soil, $6.00 per 100, $45.00 per 1000; **Variegated Lawson, White Lawson** and **Red Lawson,** from sand, $3.00 per 100, $25.00 per 1000; from soil, $4.00 per 100, $35.00 per 1000. We can supply, also, **Winona** and **Afterglow,** at $12.00 per 100, $100.00 per 1000.

Buyers will find transplanted stock offered from soil well worth the difference in price.

LEGAL NOTES.

Dickson's Irish Roses.

In the chancery division, before Justice Kenny, the case of Alex. Dickson and Sons, Limited, v. Alexander Dickson and Sons was mentioned on cross applications by plaintiffs and defendants for leave to administer interrogatories to each other. The action is brought by the well known company of nurserymen, seedsmen and rose growers, carrying on business in Newtownards, Belfast, Dublin, Blackrock, and also in Herefordshire, Eng., for an injunction restraining the defendants, who are also nurserymen, carrying on business at Woodlawn Nurseries, Dundrum, and Parliament street, Dublin, from selling roses and seeds not grown or propagated by the plaintiffs as "Dickson's Roses" or "Dickson's Seeds" or as "Dickson's Irish Roses," and from carrying on the business of nurserymen and seedsmen under the style of Alexander Dickson & Sons, or Alex. Dickson & Sons, or any style in which the name Dickson appears, without taking reasonable precautions to clearly distinguish the business carried on by the defendants from that carried on by the plaintiffs; and also for an account and inquiry as to damages.

The plaintiffs allege that roses and seeds grown and propagated by them have been largely advertised as "Dickson's Roses" and "Dickson's Seeds," and thereby acquire a reputation for excellence in the home, colonial and foreign markets, and that roses and seeds stated to be Dickson's would be understood in the trade and by purchasers as the plaintiff company's roses and seeds; and they allege that the defendant, Alexander Dickson, who until February last year carried on business as the Ashbourne Agricultural Co., had, for the purpose of taking advantage of the reputation of the plaintiff company's roses and seeds and appropriating their trade connection, commenced to trade under the name and style of Alexander Dickson and Sons. The defendant firm repudiates all these allegations, and denies that there is any foundation for them. Justice Kenny made the orders asked for.—The Horticultural Advertiser, Eng.

DEFIANCE

The only scarlet with the real velvet color. It is there for quantity and quality. Let us have your order for early delivery.

$12.00 per 100; $100.00 per 1000.

ELI CROSS,

Cor. Ashland Ave. and Page Street. **Grand Rapids, Mich.**

Morristown, N. J.

The Morris County Gardeners' and Florists' Society held a very interesting meeting February 12. The monthly exhibit was a very creditable feature though no special effort was made in this direction. Robt. Scott, of Sharon Hill, Pa., had 50 flowers of the new rose Mrs. Jardine. Its most striking characteristics were fine foliage, long, stiff stems and fullness and substance of flower. A certificate of merit was awarded.

W. A. Manda of South Orange sent up a fine vase of new carnation, No. 20. The judges decided it was a promising commercial variety and would like to see more of it. Chas. H. Totty had White Perfection in fine shape and A. R. Kennedy had a vase of White Enchantress that secured a cultural certificate. Arthur Herrington's vase of Beacon won a cultural certificate. It was long stemmed, large flowered and the color was intense. The same exhibitor had a fine collection of indoor-grown vegetables, and 50 plants of stocks, Beauty of Nice and Queen Alexandra in 4-inch pots, with wonderful spikes of flowers. A cultural certificate was awarded the stock. Wm. F. Lyons, Springbrook farm, had a new white hybrid calanthe which was much admired.

The next meeting, in March, will be carnation night, and as there are so many novelties of decided merit in the market, we expect to have a better show than ever before. It is one thing to read an introducer's description and quite another thing to have the flower before you, and, judged by competent men, no better advertisement can be than for a gardener to take home a flower or two and present them to the ladies. Carnation night has always been a great night with us, and we expect this one to be no exception. Geo. Harvey, of Madison, and O. A. Miller were elected members.

J. D. THOMPSON CARNATION CO., Joliet, Ill.

Florists as Confidantes.

"A man holding my job frequently must use all his self control to keep his face straight, and just as frequently to keep from weeping," said the florist as he completed the sweet and original note which he was writing for a young man who could not trust his own pen to communicate thoughts to a certain young lady who was to receive on St. Valentine's Day a beautiful bunch of carnations.

Just at this juncture a perturbed young man entered hurriedly, and asked in a low but impressive tone:

"Are you sure you sent those flowers?"

"Yes."

"And was the card at the bottom of the box, almost hidden?" This in almost a whisper.

"Yes."

"And did you tie them with a pink ribbon?"

"Yes."

The young man rushed out again.

"That's the sixth time he's been in here this morning, and asked those questions," confided the florist. Then he related the following romance.

A year ago a rush order from out of town came for a large box of pansies to be sent to an Atlanta girl, but with the instructions that the name of the sender must be a secret. The next morning the young lady, rather timid and uncertain, entered the florist's store in Peachtree street. She asked the manager the name of the sender of the pansies. He politely refused, so she departed to return with her mother, who was most emphatic in her demands for the identity of the man of the pansies. She, too, was denied the information, and likewise the father on the next day. Late one evening the girl returned.

"Please just tell me if he lives in Atlanta or out of the city," she asked. The manager refused, more politely than before.

"Is he tall, with dark hair, or rather medium height with blue eyes?"

"I tell you," said the manager, "if you want to thank him for those flowers, write a note and we will be sure the right man gets it."

What was in that note only two people know. The address was "To Him." Nothing more was heard of the romance until there was an order for wedding flowers about a week ago. She was married "to him."

The literary department of the florists' business is the most difficult. Raising flowers, preparing them for the market, selling and delivering them is easy, compared to composing expressions of sorrow or congratulations.

"Sometimes," said the florist, "a husband comes in and orders flowers for his wife. He says, 'Just write a nice card for me.' Now, we don't know whether he is giving the flowers because he is sorry for a little tiff they've had, or whether he's merely in love with his wife. So we have to write something that will fit either case."

In the matter of funerals, the florists carefully censor all cards their patrons send out. Many persons, if permitted, would say, "with the compliments of," or even worse, "with the best wishes of," instead of "with the sincere sympathy," and the like.

Then there is the impecunious person who does not believe flowers are a very good investment. One of this kind entered the florist's shop the other day. He announced his intention of buying some flowers for a funeral.

"Ten dollars?" asked the florist.

"No, not that much. You see it was not a member of my immediate family."

"Eight dollars?"

"Well—er—you—see—the person was not a relative of mine."

"Five dollars?"

"I don't care to pay much, for I was never very intimate with the deceased."

"Three dollars?"

"Oh, no, it's merely a slight acquaintance."

"Two dollars?"

"Well, make it a dollar. The person was just a brother of a friend of my wife's, you see."

Love affairs in which the flowers play an important part are frequent, and the florist must be as silent as a grave. Perhaps he could, if he would, pair off half the town into devoted couples. But he doesn't; for secrecy is a part of business.—Atlanta Georgian.

CORONA, CAL.—Hiram Strauss is improving his property on Washburn street by the addition of a greenhouse.

"THE TEST is what TELLS THE STORY."

When growers who buy by the 100 the first season order thousands the next—IT MEANS MERIT.

New "MY MARYLAND" Rose

BEST UP-TO-DATE COMMERCIAL ROSE.

The Gardeners' and Florists' Club of Boston: A report of merit is hereby awarded to **John Cook,** for Vase New **H. T. Rose, No. 294,** since named **"My Maryland."** Description and points of particular merit: This new rose has a pleasing shade of salmon pink. With other essential characteristics of a good commercial rose fully proven, much may be expected of it.

The Committee believes this variety will be especially valuable in the light pink class of winter blooming roses.

Given by the Gardeners' and Florists' Club of Boston, this 17th day of December, 1907.

[Signed.]

The Dingee & Conard Co., West Grove Pa.

Toronto.

PRICES UNSTEADY.

Trade the past week has been quiet; stock is accumulating, and prices are unsteady. Excepting in American Beauty, roses are plentiful enough for all purposes. Carnations are overplentiful, while with bulbous stock there is a glut on.

NOTES.

A visit to his establishment found the genial J. H. Dunlop, with a vivid recollection of the many good things seen at the Washington exhibition; always enthusiastic, he has made arrangements to try some of the new varieties. A walk through the greenhouses found everything in the usual model appearance. Carnations are looking better than ever, and a heavy crop is on. Roses in the different varieties show great promise. Lilies, some of which are in bloom, stand out prominently.

The Gardeners' and Florists' Association held an enthusiastic meeting February 18. The Dale Estate exhibited some very fine Bridesmaid and Bride roses, large flowers and long stems. M. Adams, of Davisville, had some fine dwarf cinerarias; these were in 4½-inch pots and many of the flowers over two inches in diameter. Edward Dale gave a synopsis of the carnation meeting, reviewing the different varieties which appealed to him.

Early in the morning of February 18 fire broke out in the premises occupied by D. J. Sinclair, of Bay street, and before it was extinguished did considerable damage to the contents, very little of which escaped. Mr. Sinclair places his loss at $4,000, the insurance carried being $3,000. Business was demoralized for a few days, which will add to his loss.

Arthur Frost has a new myosotis, which came into bloom in October, and has lasted until the present. This is a seedling of his, and from its early flowering tendency should prove a money-maker.

Thos. Manton has gone east on a visit to Ottawa and Montreal. H. G. D.

C. HUMFELD, Clay Center, Kas.

Worcester, Mass.

Trade on St. Valentine's Day was very good and roses, carnations, violets and lily of the valley were much in demand. Violets had the call and everybody cleaned out early in the day. All the stores had special window displays, some of these very elaborate. Trade in general keeps up to last year's at this time and, in view of the general depression in business, is very encouraging. Tulips, narcissi and hyacinths are very plentiful and selling at a rather low figure. Carnations are very fine and of the new ones Beacon, Aristocrat and Winsor are making good. Roses are getting more plentiful and are making good money.

SOCIETY MEETING.

The meeting of the Worcester County Horticultural Society February 13, was ladies day. The speakers were Mrs. George S. Ladd of Sturbridge; Mrs. David S. Fiske of Grafton, and Mrs. Sarah E. Brown. After the speakers had finished, there was special music. Before introducing the speakers, President George Calvin Rice announced that at the meeting next week Kenyon L. Butterfield, president of the Massachusetts Agricultural College, will talk on "A Campaign for Rural Progress." Mrs. Ladd was the first speaker and was warmly received, her subject being "The Influence of Horticulture," Mrs. Fiske's was "Practical Horticulture." The last speaker was Mrs. Sarah E. Brown, chaplain of the grange. Her subject was "Esthetic Horticulture."

E. E. STEWART, RIVES JUNCTION, MICH.

A Loam Query.

ED. AMERICAN FLORIST:—

Please tell us what is meant by the terms "turfy loam" and "fibrous loam," so often used in directions for potting. P. F.

We would think the terms were so plain that they could not well be misunderstood. Turfy loam means simply loam from rotted turf or sod, while fibrous loam denotes loam with plenty of fiber from the decaying grass roots in its composition. G.

Hot Water Heat for Roses.

ED. AMERICAN FLORIST:—

Can roses be successfully grown in houses heated by hot water? T.

Certainly; as long as the temperature is kept right it does not matter whether the heat is from hot water or steam, though, of course, the latter is more used for large greenhouses.

G.

Protection of Banana Fruits.

A regulation has been passed by the Queensland (Australia), department of agriculture, providing that all bananas intended for export to Victoria shall be covered with fine cloth netting for three weeks prior to plucking the bunch. This has been found, by experiment, to be an effective protection against the Queensland fly, which when introduced works serious ravages in all orchards. This regulation harmonizes with the Victorian state regulation, which forbids importation of bananas from the tropics, unless they have been so protected.

R. Vincent, Jr. & Sons Co., WHITE MARSH, Balto Co., MD.

Roses on Solid Beds.

ED. AMERICAN FLORIST:—

Can roses be successfully grown on solid beds heated from the walk? T.

Yes; many thousands are grown this way, but beds with drain-pipes run across them to allow the heat to circulate underneath the soil are preferred. G.

The Spineless Cactus.

Santa Rosa, Cal., Jan. 28.—Luther Burbank declares it is foolishness to say his spineless cactus is not a success, and says the government bulletin was issued because the experts are piqued that he beat them five years in the development of cactus. He further declares the cactus is far too valuable to have been given a thorough trial and says it is perfect nonsense to talk about it not thriving.

The Spineless Cactus Co., organized under the laws of Arizona and capitalized at $500,000, purchased the California rights and is testing plants on the desert at Indio. It has five varieties and reports to Burbank that the plants are doing wonderfully well and that during the present winter they have made a marvelous growth.

These plants are guarded by men with shotguns and dogs and surrounded by heavy barbed wire fences. These plants will be put on the market next summer. The German consul in San Francisco is negotiating at present with Burbank to introduce the cactus into Germany's African possessions. Burbank says the cactus will produce 20 tons of fruit to the acre after three or four years' growth. Next year Burbank will sell his fruit. This year none was sold, but each seed of the fruit eaten was saved. Burbank declares his spineless cactus a "dead sure success."

Berkshire Petunia

A fine, free flowering, fringed pink double Petunia. Flowers measuring 3 inches across; a most valuable acquisition, with no "fancy" price attached.

ROOTED CUTTINGS,
$2.50 per 100; $20.00 per 1000; 500 at 1000 rates,

Asparagus Sprengeri.

ED. AMERICAN FLORIST:—

When should I sow Asparagus Sprengeri and how many fronds per plant should I cut?

SUBSCRIBER.

Sow seed at once. The amount that can be cut from each plant depends on the treatment the plants receive. About 20 fronds would be a fair average. Look up our issues of August 17 and May 4, 1907, for the culture of this plant. B.

Shamrock for St. Patrick's Day.

ED. AMERICAN FLORIST:—

Please let me know how shamrock is grown and sold on St. Patrick's Day. What size should the plants be and what prices do they bring? Mine are in 2-inch pots and are growing well. Will they be in time? J. L.

Shamrocks, in most cases, are saleable when well grown in 2-inch pots. Where larger plants are in demand they are grown in 3-inch pots, or in pans and boxes. Many shamrocks are cut for wearing, either the longest sprays or even the entire plant is cut just above the soil in the pots. A plant about four inches across is the best for general sales, though many large specimen plants are wanted. They grow very rapidly once well established in the 2-inch pots. Prices vary, the most prevailing price is 10 cents for a good and shapely plant. J. F. R.

PREPARE FOR EASTER

Araucarias, Azaleas and the Cultivation of Choice Easter Plants Our Specialties.

Never mind hard times. Look for a big Easter trade. Secure your supply early. All our houses are full to their utmost capacity with the choicest plants in **bud.** Just right for Easter—in fine condition; finer than ever before. With a little forcing they can be brought into bloom at any time, according to your requirements.

Araucarias Robusta Compacta and **Glauca,** a perfect marvel and wonder of nature. We are one of the heaviest importers and cultivators of this beautiful decorative plant. Our plants are about the same in height as in width.

Robusta Compacta, 7-in. pots, specimen plants, 6-year-old, 5 tiers, 27 to 30 in. high, $2.00 to $2.50 each.

Excelsa Glauca, specimen 7-in. pots, 6-year-old (the fine bluish-green color makes or gives this variety a fine, striking appearance—sells at sight), 30 to 40 in. high, 4, 5 and 6 tiers, $1.50, $1.75, $2.00, $2.50 to $3.00 each.

Araucaria Excelsa, 6-in. pots, 4 to 5 years old, 20 to 25 in. high, 4, 5 and 6 tiers. 75c to $1.00 each; 5¼-in. pots, 3 years old, 3 to 4 tiers, 7, 8, 10 to 14 in. high, 40c to 50c each.

Azalea Indica. We make a specialty of importing every year an immense stock of the choicest varieties popular in America, grown under contract for us by an Azalea specialist in Ghent, Belgium. If you need Azaleas, don't look around in vain all over the country for bargains, but come or write direct to us. We will be able to supply you with the best obtainable in the American market; full of buds; in good, healthy condition, right for Easter; all planted in October or November in 6 to 7-in. pots.

☞ **Take Notice.** We do not sell Azaleas in the fall, having the best picked out (and having the rubbish left for Easter), but we keep them all full of buds for our customers for Easter. Mme. Van der Cruyssen (2,500 of them), this is the best double pink variety known to the market, round as an apple, covered with buds; Simon Mardner (dbl. pink), Vervæneana (variegated dbl. rose), Bernard Andreas Alba (dbl. white), Niobe (dbl. white), Deutsche Perle (dbl. white), Empress of India (dbl. variegated), Professor Wolters, and about six more varieties. Price: 6-7-in. pots, 60c, 75c, $1.00, $1.25, $1.50, $1.75 to $2.00 each.

Kentia Belmoreana and **Forsteriana,** Belgium and home-grown stock, 4-in. pots, 18 to 20 in. high, 35c; 5¼, 5½ and 6 in. pots, bushy plants, 50c, 60c and 75c each.

Latania Borbonica, 5-in., 30c.

Asparagus Plumosus Nanus Compacta, 4-in. pots, $10.00 per 100.

Dracena Bruanti, from Belgium, full of green foliage from bottom to top, 6-in. pots, 22 to 25 in. high, 40c each

Cineraria Hyb., 4-in., 10c; 5-in., 20c; 6-in., $3.00, $4 00 to $5.00 per doz.

Choice Nephrolepis, all pot-grown.

Boston Ferns, 8-in., as big as a washtub, $1.25 to $1.50 each; 7-in., $1.00; 6-in., 50c; 5 to 5½-in., 35c to 40c.

Whitmani Ferns, 8-in., $1.50; 6-in., 50c.

Scottii Ferns, 7-in., $1.00 to $1.25; 6-in., 50c; 5½-in., 40c.

In Philadelphia there's a florist noted,
Aschmann his name, his plants beyond compare;
To a sweet girl his heart is all devoted,
Next rank his Araucarias, passing fair;
When seen together they're a pair so charming—
Brimful of beauty—both he cannot keep;
So to his heart he'll hold his winsome darling,
While you may have the Araucarias cheap.

Ficus Elastica or **Rubber Plant,** home grown and Belgium stock, 5, 5½, 6 and 7 in. pots, 30c, 35c, 50c, 60c and 75c each.

Begonia Improved Erfordii, 4-in pots, very large, $2.00 per doz.; 5¼-in., in bloom and bud, 25c each, or $3.00 per doz. **Begonia Flambeau,** 5½-in. pots, sells on sight, 25c.

Cyclamen Grandiflora, 4-in., in bud and bloom, 20c.

Hydrangea Otaksa, 6 to 7-in. pots, in bud, 35c, 50c, 75c and $1.00 each; right for Easter.

EASTER LILIES. Japan Multiflorum, of our own importation, raised from special 10-in. bulbs, 6-in. pots, right for Easter. This year I can say we have the finest lot we ever had. Have about 5,000 to offer. Please send your order in time this year, as we have such a big demand every year for Lilies that some cannot be supplied. Prices as usual. Plants above 5 buds, 10c; plants under 5 buds, 12c per bud. (Medium height).

Spirea Gladstone, 6 to 7-in. pots, large stock, right for Easter, in bud now, 50c to 75c.

Watch adv. for Hyacinths, Tulips and Daffodils later on.

VAUGHAN'S SEED STORE, 84-86 Randolph Street, CHICAGO. 14 Barclay Street, NEW YORK.

Greenhouses and Nurseries: Western Springs, Ill.

NEW VIOLET BOSTON.

In introducing this new variety to the trade I wish to state that I have been growing it in quantity for the past two years and do not hesitate to state that it is entirely distinct a strong grower a free bloomer and the finest single violet in cultivation. Ready for distribution in April and May. Orders booked now. **$2.00** per doz.: **$12.00** per 100; **$100.00** per 1000. 500 at 1000 rates.

WILLIAM SIM, **Cliftondale, Mass.**

A Rime of Up-to-Date Advertising.

Do you load it at the muzzle
When you want a shot or two?
Do you wind it with a watch key
Like your father used to do?

How'd you like to hop a horse-car
Like you did long years ago?
Don't the auto beat the ox cart?
Well, I rather reckon so.

Do you argue that an hour-glass
Beats a Waltham all to smash?
Do you use the same old system
Keepin' books and countin' cash?

Do you trim a goose-quill neatly
When you want the ink to flow?
Don't you think there's been improvement
In the last decade or so?

Tell us, are you advertising
In the same old foolish way
That your grand-dad did before you,
And persist, "It doesn't pay?"

Think the whole world knows your address?
"'Cause it hasn't changed in years?"
Wouldn't the pathos of such logic
Drive a billy goat to tears?

"Just a card" is all you care for,
Hidden, lonesome, and unread,
Like the sign upon a tombstone
Telling folks that you are dead.

Wake up, man, and take a tonic,
Bunch your hits and make a drive,
Run a page and change your copy,
Advertise and keep alive!

—Southern Engineer.

J. L. DILLON, Bloomsburg, Pa.

LOS ANGELES, CAL.—In connection with the proclamation of Mayor A. C. Harper designating March 7 as Arbor Day, City Forester E. J. Harper is making preparations to have 200,000 trees planted in this city on that date. The city forester proposes to organize all the improvement associations of the city in one civic organization, to assist in making Arbor Day a success.

Mexican Indian Pottery.

Cuernavaca pottery is manufactured in the little village of San Antone, just outside the city of that name. The dwellers in practically every one of the adobe houses in the village are clay workers, and each house is a workshop. Pottery is here made entirely by hand. The clay, after being taken from the earth, is first thoroughly dried in the sun, then pulverized with a wooden mallet, and passed through the finest meshed brass-wire cloth, after which process the clay is finer than wheat flour. For mixing, a fine slime is prepared by soaking a portion of the pulverized clay in water, passing it through a sieve, and afterwards mixing the dry clay and kneading to the right consistency.

A mold of the required size for the body of the article to be made is placed on the upper portion of the old style potter's wheel, covered with the proper thickness of clay, then patted and shaped with a wooden paddle and with the hands. The Indian potter turns the model about before him by scraping his bare toes on the lower portion of the wheel, and during the revolutions he continues to smooth the clay with a narrow strip of wet cloth until the desired surface is obtained. Handles, spouts, etc., are all formed by the hands, without molds, and joined by means of the clay slime and prepared clay. The wages are about 50 cents per day.

Each family of workers are specialists in their line of work. Many forms and designs are produced, but only one design in one family. The potter who molds flower pots cannot mold water bottles, nor can the one who molds water bottles mold figures. The worker teaches his son to perform the same task as his own, and should he have no son the knowledge of the special form or design of his work is lost at his death. By way of illustration, I was told of an aged Indian who had for many years furnished the firm with a special form of jar, known as the "Montezuma." The Indian died, leaving no heirs, and the loss of this particular article, which was naturally a rarity commanding a good price, resulted.

Floriculture at the University.

A paper by E. Davenport, read before the Illinois State Florists' Association at the third annual convention at Springfield February 18-19, 1908.

Illness, from which I have not yet fully recovered, compels me to send this brief greeting instead of the more formal address I had hoped to prepare for this meeting. I am not familiar with the technical affairs of floriculture, and in that shall need to be guided in my recommendations by those whose knowledge in these matters may be assumed to be expert. I need no help, however, to fully appreciate the importance of the subject, not only to those engaged in it as a business, but also to the university and to the state at large.

The appropriation which you secured is for research into those phases of floriculture that will make the business less hazardous, more profitable, and better able to serve a public whose demand for flowers is growing both in the number and the quality of the orders. The first business of the experiment station is, then, to carry on such investigations as shall accomplish these ends as directly and as completely as possible. A beginning has been made, and when the houses are erected that are now being planned it will be possible to still further enlarge the work.

If I do not greatly mistake the ideas of the florists, we are not to stop at the present stage of things. I believe that your action and your achievements up to date are but a part of a larger thing that was born when you were successful in landing the present appropriation. Such an interest as this cannot come to the university without exerting the greatest influence upon all the other interests on the campus; indeed, I believe it is the business of the university and your advisory committee to plan and conduct these intrests from the first in such a manner and upon such a scale as shall uplift the whole institution and go far toward increasing the sentiment for the beautiful as well as for the useful in life.

There is no doubt that the people of the Mississippi valley will be a great and a rich people. They will be industrially and commercially the peers of any people of the earth. It is inevitable that this should be so. The unanswered question yet is, "Will they also be artistic?" Those who have studied our race the closest insist that we have all the elements of the artistic instinct in the best sense of the term. Manifestly it must be cultivated along with our other instincts if we are to develop as a well rounded people who know what to do with our money when we have earned it.

In this large field of higher development you and your interests are to exercise a large and lasting influence. It has begun none too soon. The first work of the experiment station was to meet the first demands, and these were naturally for things that would "pay;" for investigations that would make farming more profitable. Your action on behalf of floriculture was the first of its kind, and your university is the first to assume an obligation to do what it can for an interest that is not only commercial but is also eminently artistic, and, in my way of thinking, great things will come of it.

Floriculture is a new subject from the university standpoint, and as a consequence few men are trained to do the work that needs to be done at this time. This interest is yet, so far as trained specialists are concerned, in much the condition which agriculture as a whole occupied when the stations started late in the 80's. There were many successful farmers, a few successful teachers of agriculture in a small way, but no investigators. There are many successful growers of flowers, only a few who have attempted to teach the subject even in an elementary way, and almost nobody who has distinguished himself as a competent investigator in the broader field of floriculture. So we are placed in the position of together working out a plan not only to achieve a definite purpose, but to make the organization and the machine to produce it. I am not without experience in this sort of thing. I know it is a slow job, but I know, too, that with a healthy sentiment, such as I believe we all have, with high ideals, and large purposes such as we certainly have, with patience to persevere, and with faith in ourselves and in each other, which I am sure we possess, and with the money which I feel certain the state will provide—with all this we shall accomplish things worth while.

Our aim should be nothing less than the cultivation of the sense of the beautiful, the stimulation of the buying instinct and the knowledge and taste for good flowers and artistic decoration as well as the means of preventing losses. All this will make the florists' business more profitable and at the same time will go far toward cultivating the artistic spirit in the state, and to bring about a millennium of outdoor art in this country. I am especially anxious that in the working out of these plans, in whatever form they are attempted, there shall be established and maintained at the university such a plant and such an atmosphere in things floral as shall be of lasting influence upon the young people of the state, and in every way a credit to the interest represented by this body.

Grubs in Carnations and Geraniums.

ED. AMERICAN FLORIST:—

We are bothered with some kind of a grub, similar to a cabbage cut worm, in our geraniums; also with some kind of a grub in one of our carnation beds. It cuts off the carnation stem and works in the buds. Please advise us what to do to get rid of them.

B. & Z.

You should have sent us samples of the insects and we could probably have helped you. Do this, and in the meantime keep a close watch, especially at night, and destroy all the grubs found.

SADDLE RIVER, N. J.

St. Paul.

BUSINESS GOOD.

Trade continues first class with plenty of good stock. Roses have improved some in quality as well as quantity but there is no surplus. American Beauty sells very slowly, one store having given up keeping a stock on hand altogether. Bulbous stock is plentiful, good quality selling readily and the poorer grade finding very few buyers.

Holm & Olson have filed articles of incorporation with a capital stock of $75,000, S. D. Dysinger being the new member of the firm. They report business as having doubled in their new store.

The next meeting of the Twin City Florists' and Gardeners' Club will be held in this city the third Tuesday in March.

Otto Hiersekorn has taken out a building permit for a fine house on one of our best residence streets.

Frank Gustafson of the St. Paul Floral Co. contemplates rebuilding part of his old houses early this spring.

Several market gardeners are building or intend to build greenhouses for raising spring plants in.

All the regular bulb salesmen have now been here and everyone seems glad that the siege is over.

J. Cornandros, who runs the Golden Rule flower department, reports business good.

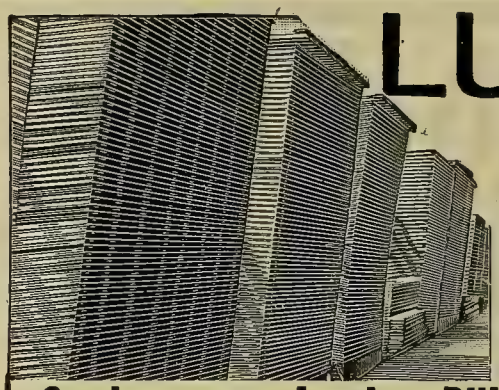
Carl Haugen is sending in some very fine violets both single and double.

Charlie Vogt says business is better than ever.

Visitors: A. N. Kinsman, Austin; Harry Bayersdorfer, Philadelphia, Pa., and wife on their return from the coast and W. Greisinger of Ghent, Belgium.

O.

NEW ALBANY, IND.—Business here is away ahead of last year and the outlook is very encouraging, according to Anders Rasmussen. He has bought glass for a new carnation house 12x300 feet and for a propagating house 10x150 feet.



LUMBER
BARGAIN PRICES.
A wonderful opportunity is offered you to buy lumber and building supplies of every kind at *Prices that will save you big money.* Such a chance seldom occurs. Lumber for your house, church, barn, meeting house, crib, store, factory, and in fact, buildings of every kind. We can furnish absolutely everything needed in construction material. Have your carpenter or builder make a complete list of everything you require, including Lumber, Sash Doors, Nails, Roofing, Siding, Ceiling, in fact, anything you may need in building material or merchandise of any kind.

Send us your Lumber Bill for Our Estimate.
We bought at Manufacturers' Sale over 50,000,000 Feet of all kinds of Lumber and Finishing Material. We are making special concessions, to those who buy at once. Even if you have no use for this lumber at once, it will pay you to buy now. Our prices will save you 30 to 50 per cent.
We cheerfully invite inspection of our Lumber stock and will be glad to have you come to our warehouse and yards at Chicago, see the lumber we are offering, and you will recognize that it is all what we say of it; make your own selection and see it loaded. It is not necessary to come to Chicago; we can easily sell you by mail. We can quickly convince you of the wisdom of placing an order with us. Just send us your lumber bill, and we will easily *"Show You."* On application we will send copies of letters from customers who have bought. They saved money why can't you? Write us to-day. *WE PURCHASED EVERY EXPOSITION, INCLUDING THE $90,000,000 ST. LOUIS WORLDS' FAIR* ASK FOR OUR FREE 500 PAGE CATALOG, No. C. H. 47. AMERICAN PEONY SOCIETY.

Fourth annual meeting at Ithaca, N. Y. June 1908. C. W. WARD, Queens, N. Y., Pres.; A. H. FEWKES, Newton Highlands, Mass., Sec'y.

It is the roaring month of March,
The wild northeaster bends the larch;
The gray rain, beating on the wold,
Has closed the crocus-cups of gold.
But there will be an April day—
The thrush will pipe another lay,
And we will find on greener hills
White violets and daffodils.

SUGGESTIONS FOR PLANT GROWERS.

Plants for Window Boxes.

The filling of window boxes is a lucrative branch of the trade in many towns and it is well to take a look around now and see what plants are coming along in this direction. Marguerites we recently referred to and one of the best subjects to go with these plants is a good scarlet geranium. Prepare some of the best of the bedding plants for the purpose by giving them good room and pinching so that the flowers will be on time. No further pinching of the shoots after this will be necessary but, if it is apparent later that some of the flowers are going to be too early, pinch these out. The pots in which these plants are grown should be as small as possible, consistent with keeping a healthy plant until June, 3½ or 4-inch being the limit or much difficulty may be found in filling the boxes. Good, brightly colored coleuses are a great help and seedlings may be raised on time if the seed is sown right away. Where there are plenty of stock plants put cuttings in now. A light soil and position in the full sun is best to bring out the color of these plants. Thunbergia alata if sown as described recently will soon be ready for pricking off. Never let the young plants suffer for want of attention, and pinch the shoots once or twice to induce a bushy habit. Cuttings of tradescantia and panicum may be struck now; place six cuttings of the former and a dozen of the latter in 2-inch pots over a gentle heat and useful little stock will result. The bright vermillion, double nasturtiums are excellent for the purpose, bright, free flowering and constant. Get the stock plants out and cut back a little to produce growth shoots for cuttings. In three weeks from now there will be plenty of nice little stubby side shoots, that, if struck then, will be in good time for the purpose indicated.

Hybrid and Rambler Roses.

The plants of these roses, in some cases, may not be any too well rooted and considerable care will be necessary with the watering. The stored up energy in the stems keeps the shoots going for a short time but, unless the roots are working well, any attempt at forcing is bound to fail, the shoots growing a few inches and then collapsing suddenly. A gentle heat to the roots and a cool temperature overhead will help any plants that are only doubtful as to roots, but it is better to hold them out of the forcing house entirely until there is no doubt in this matter and the young roots can be distinctly seen around the ball when a plant is turned out of its pot for examination. The later plants now being brought in must be well pruned back and there must be no mistake about this. The hybrid perpetuals must be got back to real solid growth. The tall growers like Paul Neyron and Mrs. J. Laing need a little more growth left on than General Jacquimenot and the more moderate growers, but in any case cut back to hard growth without pith that stands up well to the knife. In cutting back the ramblers this is not so important as, even though the top shoots may fail, the entire plant is not ruined as it is with the hybrids. But cut back to firm wood if good flowering shoots are to be had. Keep a sharp look out for the leaf roller, green fly or other insects on the plants advancing for Easter but do not fumigate more than is really necessary. By no means allow insects to get ahead. One light fumigation early will check incipient attacks which, if allowed to go on, would necessitate heavy and possibly harmful fumigation.

Spirea Japonica.

After the clumps of Spirea Japonica are well rooted and growing freely it is almost impossible to overwater them. A pot saucer filled with water under each plant helps later when the sun is bright but is hardly necessary yet. In no case must the plants be crowded. As the heads develop they must be constantly shifted around and will need a new stand every week or two. Once the plants get drawn or onesided they are ruined in appearance for good but if they have plenty of room so the light reaches them at all angles and from all points they make fine shapely specimens. Better grow fewer plants and do them well than a number of unshapely ones. Grown in a light house from the first, this spirea is seldom damaged by

sunlight in large houses unless night moisture settles on the leaves and early ventilation is neglected. Watch this carefully as the season advances or the plants will be injured; owing to the small size of the pots these are usually grown in, some feeding will be required when they are finishing.

Genistas for Easter.

If the directions previously given have been carried out, no further pinching will be needed and the late plants can go straight away for flowering. The roots will have taken a good hold of the new soil and a little feeding may be given, increasing this by degrees until the flowers show color. Standard plants like that shown in the accompanying illustration are best for not being trimmed or clipped in too closely; the plants are more graceful when allowed to make a more or less natural growth which would be out of place in the ordinary bush shaped plant as grown for market. Anyone desiring to grow such plants should select young specimens with as straight shoots as possible and run them straight up to the desired height when they may be stopped and a head gradually formed by stopping the side shoots as they appear. It will take at least two seasons' growth to get well furnished specimens from the time the young plants are selected for the purpose and each year, of course, they will improve. Summer is the time for growth and as soon as the flowers are past the shears may be used to clip them into shape. Then let them grow naturally, only stopping any shoots that seem to be taking an undue lead at the risk of spoiling the symmetry of the plant. The genista is a stronger feeder than the majority of hardwooded plants and to get the best results must never be allowed to suffer for want of manurial sustenance. Guano, changed occasionally to soot water, is good feed for the plants, but practically any good fertilizer, properly used, will be suitable. It is a good, clean growing plant, not especially subject to insect pests, and its culture will well repay anyone who takes it up intelligently.

THE AUDITORIUM, OKLAHOMA CITY, OKLA.
Where Flower Show Will be Held Next May.

Horticulture in Alaska.

Through the courtesy of Oscar Gard, a business man of Skagway, Alaska, we are enabled to present a number of illustrations of fruit, flowers and vegetables grown in Alaska. Mr. Gard, who is a native of Ohio, but has been for some time a resident of Alaska, revisited his old home this winter and continued his trip to New York. While in Gotham Mr. Gard met some people who seemed surprised that he did not wear a bearskin cap, and go generally clothed in the skins of animals, and being of a humorous temperament he enjoyed the joke. Quite by accident, he was met by our representative, and on his return to Skagway he sent the photographs here shown. It would appear that the horticultural possibilities of that part of Alaska are very promising. The photographs are by Case & Draper of Skagway.

In reference to progress in the northwest the Seattle Post Intelligencer had in a recent issue an interesting article and a cut showing the large greenhouse establishment of the H. Harrington Co. at Vashon from which we cull the following:

"Not more than a look distant, and a short one, from the little frontier store building, out of the doorway of which the storekeeper shot a bear only a few years since, I came upon the trail of an automobile. And, following this a few rods, I arrived at the substantial gate of a 200-acre farm. Not a common or an ordinary farm, but a greenhouse farm, a nursery farm, a flower-bulb-growing farm, and aside from these, in some sense, a general farm, since there are meadows and barns and fields. This on Vashon island, King county.

"This place of rather unusual proportions for the Puget sound country, and of unusual accomplishments for any country, is the Harrington farm. If you make any inquiry of neighbors or nearby settlers concerning it you will be told that it is a 'great place, with whole acres in greenhouses,' nor does this strain the truth particularly. But its size and its greenhouses are not all. 'Acres under glass' has a large sound and it means much, but it is literally true of this Vashon island place, for in greenhouses of modern type and improved construction there are enough to cover about three acres. And these are all equipped with modern heating and regulating devices. Thousands of chrysanthemums, violets, carnations and lilies are grown. An orchid house has been established, and this is well filled with these plants.

"Outside the greenhouses are the rose gardens and beds, the flower bulb gardens with 100,000 bulbs, most compactly but thriftily growing, for this is a bulb country; the nursery rows, the hotbeds and the odds and ends of curious or beautiful or rare plants and shrubs which are necessarily a part of the stock of the nurseryman. Last of all, almost pathetic when we think of it, the humble meadow and the wide fields more or less unused as yet, but which would be brought out to be the pride of the average farm. Gradually these are being encroached upon. The flower grower's need of space increases but gradually, however certainly, if success is with him.

"A steam plant, two large boilers and all the extended appurtenances provide

HORTICULTURE IN ALASKA.

the necessary heating. And there are water works and lighting plant and stables. All this is where there was nothing but the rugged, unmastered wild but a few years ago, and where even now one must follow a trail road, unmarked by human habitation, through deep, rough, picturesque and practically virgin forest gulch for a mile or more from the water front to reach the site of this remarkable enterprise."

An Oklahoma Exhibiton.

The illustration herewith shows the plan of the new Auditorium at Oklahoma City, Okla., with the arrangement of floor and balcony seating space for the flower show, which is to be held there March 16-23. The show is to be opened by an automobile parade, prizes being given for the most tastefully decorated cars. There is every probability of a fine and successful show being held, as the manager of the building will give liberal prizes. The board of park commissioners has also taken hold and W. H. Clark, secretary, informs us that the board will exhibit, and has determined to do everything possible to make the show a success. It is to be hoped that northern and eastern florists will participate and help to give the new show a good send-off.

The Private Gardener.

A paper read by Robt. Craig, Philadelphia, Pa., before the Massachusetts Horticultural Society at Boston, February 29, 1908.

I use the term "Private Gardener" because it is one in common use and well understood to distinguish one who has charge of a garden or grounds and cultivates vegetables, plants and flowers, not to sell, but for the use of those who employ him to do this work. The gardener assists and directs nature in producing everything which grows out of the ground for man's use; for the gratification of his palate, and which is capable of ministering to his sense of beauty. His work is to provide not only food for the body but also "food for the soul." We sometimes see an advertisement in the daily papers like this: "Wanted a gardener who understands care of horses" or "who can milk." This is a sad abuse of the word; what is wanted is a handy laborer, or man of all work; much that I shall say today cannot specially be applied to him.

I know that my audience includes many who are not gardeners, but I feel that they, in their interest in the subject, will pardon me if the greater part of my remarks are directed specially to gardeners. I choose the subject because I conceive that it is one of more importance than is generally assigned to it and that the private gardener is likely to play a part of continually growing importance in American life. His influence on the future of horticulture is powerful for good or for evil. If he be a capable, energetic and honest man, he will do such work as will make his employer a patron of gardening, and if he be ignorant, careless and dishonest he will not only ruin himself, but will damage the cause he misrepresents. Allow me to recite a couple of instances occurring in my own neighborhood which illustrate this point:

I was well acquainted with a wealthy gentleman who built new greenhouses and started to improve the grounds surrounding his fine mansion. He was fortunate in securing a fine English gardener, newly arrived in this country; his place rapidly improved under the new gardener's care and after two years work, when the owner saw he was getting good results, he became greatly interested, and invested freely large sums to carry on the improvements and enrich the grounds with plantings of rare and beautiful trees and shrubs; he built additional greenhouses, bought many plants, and also a fine collection of orchids. Everything prospered and was a source of great pleasure to the owner and his friends, when suddenly the good gardener was stricken with an incurable disease and had to give up work. The place was then put in charge of his first assistant, a young man about 26 years old, who was given a fine opportunity to make a name for himself, but he could not stand even a little prosperity; took to drinking and playing the races, and during a spree in which he did not put in an appearance for two days, an accident to the boilers resulted in the entire stock of plants being frozen to death. The owner, who had plenty of money to spend in gratifying his tastes, lost all interest in gardening and became a liberal patron of other fine arts. His collection of paintings and examples of fine sculpture are known far and wide, but the greenhouses are empty, the garden neglected, and it is not likely the owner's interest in these will ever be revived.

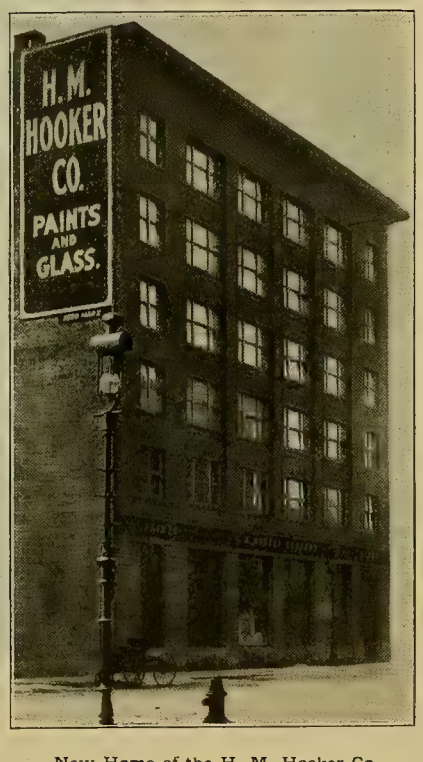
Another instance coming under my immediate observation interested me still more: One of the wealthiest men in the neighborhood of Philadelphia, retiring from active business, built one of the finest mansions in the state, employed the highest talent in landscape gardening and, with a large force of men, in a couple of years had the new place greatly improved. He employed a young German gardener who had previously at a salary of only $60 per month made a good name for himself; gave him entire charge and he worked with such intelligence, industry and honesty, that the employer built for him additional ranges of glass about two years ago at a cost of $50,000, and allows him to spend annually a large sum in improving the place. Only last summer he took a trip to Europe at his employer's expense with

GENISTA FRAGRANS IN 9-INCH POT FOR EASTER.
Grown by Robt. Craig Company, Philadelphia.

power to purchase such rare plants as he might select. His salary is now quite satisfactory to him. "Oh!" you say, "this was a rare case"; perhaps it was, but I am sure at the rate wealth is increasing in this country the number of such places will steadily increase. I like to quote Lord Bacon on this point: "When ages grow to civility and elegancy men come to build stately, sooner than to garden finely as if gardening were the greater perfection."

Before proceeding further it may be well for us to consider that we are in Boston; Boston, a city rich in horticultural history, has always been foremost in encouragement of advanced gardening. Here in 1829 the Massachusetts Horticultural Society was incorporated "for the purpose of encouraging and improving the science and practice of horticulture." Ever since, and before that time, Boston has been the foremost American city in horticulture. In 1822 the first gardening periodical, The New England Farmer and Horticultural Journal, was founded; followed by Hovey's American Garden and Barretts' Horticultural Register in 1835. The first greenhouse in the country, history says, was built in Boston by Andrew Faneuil about the beginning of the eighteenth century. And today, in the excellence of its parks and private gardens, in proportion to its population, it is easily in the front. Those who love gardening in any branch, find in Boston a congenial atmosphere; Boston has been the home and scene of the life work of many famous gardeners. I look upon Jackson Dawson as the best all around propagator and plantsman that America has known, and the late Fred Harris for nearly half a century at Hunnewell's famous place at Wellesley was a model for private gardeners to imitate.

The problem of how a gardener should set about preparing himself for his life work is, in this country, a serious one. In the older countries of Europe, opportunities to acquire a thorough knowledge of all departments are plentiful. There are so many estates on which the grounds are admirably planned and planted and where there are numerous houses adapted for propagating and growing everything for the garden; cold pits and cold houses; experiment stations; intermediate houses and stove houses with graperies, fruit houses and hotbeds so that a man may get a thorough knowledge of gardening in all branches; and there are many commercial places which carry on all lines and where boys may go and learn the business as they grow to manhood. There are only a very few such commercial places in America. In this country almost all the trade establishments cultivate specialties as roses, carnations or palms. Nearly all of our good all around gardeners got their training abroad, and it is well for any young man who can get a chance to learn gardening under such a man, either on a large private place or in a park, some of which in the larger cities I am glad to say, have now large ranges of glass and grow everything but vegetables which is a very important branch and of which I may have a few words to say later. Some of our colleges have now facilities for teaching gardening. I wish that all of the colleges would follow the example of Cornell, where they have six greenhouses in which students may gain a practical knowledge of plant growth, learn how to prepare soil and manure, and have opportunity to gain a general knowledge of advanced gardening. Many of the colleges have now a course in forestry, and I understand that young men getting diplomas, if otherwise fitted, can readily procure employment at fair salaries. It seems to me that the time is now ripe for all the leading colleges to build ranges of glass and have courses in practical horticulture. Graduates from these classes, otherwise desirable, would have an advantage over uneducated men in securing the best positions. The recent establishment of classes in landscape gardening by the Florists' Club of Boston, is of great advantage to those near enough to take advantage, and is an example for all similar institutions everywhere to imitate.



New Home of the H. M. Hooker Co.

See page 276.

Important as is the subject of forestry, gardening is equally so. We can see, on the part of American business men, a growing disposition as soon as they are financially able, to establish gardens for their use and enjoyment and as the most pleasant refuge from our all too-strenuous business life. To the gardener who wants to improve himself, books are a paramount necessity. The recorded wisdom of the ages is at your service here. Nicholson's "Dictionary of Gardening" and Bailey's "Cyclopedia of American Horticulture" should be in the possession of every gardener; they describe nearly every plant in cultivation and their cultural notes are of very great value. I will not attempt naming all the good books but cannot refrain from mentioning Jenkin's "Art of Propagation and Improvement of Cultivated Plants"; Professor Taft's "Greenhouse Construction"; Hunt's "How to Grow Cut Flowers"; Henderson's "Practical Floriculture"; Falconer's "Mushrooms and How to Grow Them"; Elwanger and Reynolds Hole's books on roses; Downing's "Fruits and Fruit Trees"; Peter Henderson's "Gardening for Profit"; Mrs. Van Rensellaers' "Art our of Doors"; "The Principles of the Harmony and Contrast of Colors," by M. E. Chevreul; Herrington and Smith's works on chrysanthemums.

Cultivate a love for books; it is a habit that grows by indulgence; as the fondness for books grows you can add to your library; all the larger seed houses now carry the best of the horticultural books which you are privileged to look over and select according to your needs or taste. Subscribe for one or more of the trade papers and get your names on the lists of the agricultural stations so as to get up-to-date information, the results of the latest experiments along all lines. The seedsmen's catalogues are great educational factors; I know of no greater improvement horticulturally than in the character and contents of these valuable publications. A gardener should study natural landscapes so as to readily apprehend their points of beauty and their beauty as a whole, and then with "The art that doth mend nature" put the finishing touches thereto.

Every garden may be made more interesting by excelling in some specialty; every gardener should have a hobby. If the place be a small one and your opportunity meagre, take in the flower line. Pansies, verbenas, Phlox Drummondii or the herbaceous phlox, and, in the greenhouse plants, cyclamen, cineraria, primula, etc. By saving your own seed, carefully selecting, year after year, the finest, it is astonishing how you can improve the varieties in any species. Like results follow a similar course in vegetables. Buy, for instance, the finest varieties of corn and select from these for seed the ears that contain the greatest average of good points, as flavor, size and good appearance, and you are likely to get corn better than you can buy. Or if your place and opportunity are greater start for instance making a collection of conifers (in groups or in single specimens) or a collection of rhododendrons or lilacs, of which there are now so many fine kinds, or roses, paeonias or similar plants in the hardy garden. You will find in a few years your constant and careful pursuit of your hobby will result in making you and the place you represent, more or less famous, and your application to work along a special line will enable you to give valuable points to your fellows. As Emerson says "If you make shoes better than anyone else you will find a path beaten to your cottage door."

It is profoundly interesting to study how new varieties come. Nature works, often we know not how, in bringing forth new varieties, the influence of heredity undoubtedly prevails to some extent and instances are not wanting to show that it does. Let me give you just one in my own experience: Three years ago we made a number of crosses in carnations using the variety Harlowarden as one of the parents; you will recollect that this sort had a very long, very desirable stem and we noticed that about one-fifth of these seedlings had this Harlowarden stem, but there were characteristics developed in a number of seedlings which had no visible connection with either of the parents. Sometimes, however, the influence of both parents can be distinctly traced. Time will allow me to mention only one or

two instances: Many of you will recollect the introduction of Daybreak carnation, a charming variety which had not many stems, but these were long and stiff and every shoot produced a flower. About the same time was introduced Tidal Wave which produced many stems but lacking in length; the crossing of these two varieties produced the famous Lawson which inherited the good points of both varieties. Among the seedlings with Lawson blood has been found Enchantress, which I think has more good qualities than any other variety, and following along this line has resulted in producing a free blooming vigorous type which has made Peter Fisher famous. The results of M. H. Walsh's work in roses of the Wichuraiana type are little short of marvelous; the man who does such things is a public benefactor. But if, while man can do something in breeding from types, nature is always at work and often produces, we know not how, valuable "breaks" in seedlings or sports, which are frequently lost because the gardener fails to recognize their merits and propagate and perpetuate them. Private gardeners have done much in the past to preserve and propagate good new things and should be ever on the alert to take advantage of any opportunities along this line which kind nature may afford. The famous Seckel pear was a chance seedling found growing along the roadside and man had no hand in its origin, but some one should receive the blessings of generations for preserving and propagating it.

One of the main branches of work for the private gardener is the growing of vegetables. Our enterprising seedsmen are continually introducing new varieties and a large percentage of these novelties have merit and occasionally there is a great advance over previous varieties. Be ever on the alert for the good new things. There should be an abundance of vegetables for spring, summer and fall and, where the facilities exist, in the winter also. George Elliot says: "No man can be wise on an empty stomach," and Ben Johnson that: "A good dinner lubricates business." No dinner is complete without fresh vegetables and many of the very finest, most luscious and delicately flavored cannot be purchased in the markets, because they do not pay to grow commercially. If you can furnish your employer a regular supply of these dainties, you will find yourself in close touch with him and he is likely to help you in any of your plans. Vegetables grown under glass are superior to those grown outdoors in tenderness, crispness and fine flavor and every large garden should have special houses or ranges of houses for this purpose; these need not be expensive structures and may be in any out-of-the-way place so as not to interfere with the architectural effect of the plant structures. Connected with these vegetable houses there could be other inexpensive houses where seedlings could be started, dormant plants kept and much of the repotting and unsightly work done, thus giving opportunity to keep the show houses more attractive.
